Quality Tells

When Henry Disston was asked the
question:

"What do you put in your saws?"

He replied:

"Good steel and honest work."

**UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY**

"If you want a saw it is best to get one with
a name on it that has a reputation. A man who
has made a reputation for his goods knows its
value as well as its cost and will maintain it."

THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

AT LAST!

A DOCK CUTTER that DOES THE WORK

The "Abbott" Dock Cutter

*The Center
Prong spears and
splits the root while
the wings of the "W"
hold the root to the four
cutting edges; it cannot get
away. Stones don't dull it. Easily
sharpened.*

Farmers have long wanted a good tool that would cut thistles and docks out at the root.

You have no doubt had numerous calls for them.

Here is one that just fills the bill to a "T."

It is the only tool made that does cut easily and cleanly and is just right.

Show it to farmers. They will see its good points quickly and—

They will buy it.

It sells for one dollar.

Nice profit in it for you, Mr. Dealer.

"Order from your Jobber." If he cannot supply you, kindly write to us at once.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

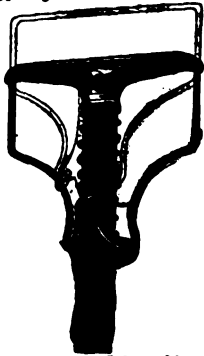

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

The Gem Mop Head.

THE CRYSTAL COFFEE MILL
with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE FAMOUS GEM
is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL
with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE RIGHT SPACE SPICE CABINET
is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

The Jewel Coffee Mill

HARDWARE

Application for a charter has been made to the Pennsylvania State authorities by the Westinghouse Consolidated Foundries Company of Pittsburg, Pa. The object is for the various Westinghouse Companies, which now have foundries at Pittsburg, Allegheny City, Cleveland and Attica, N. Y., to have all their castings made in one factory, which is located at Trafford City near Pittsburg. This plan is to assure greater economy and uniformity in the making of foundry products.

The Avery Stamping Company, Cleveland, Ohio, is sending out another set of advertising blotters as a companion for the five which have been sent to the Honorable Mr. Hardware Merchant of the United States at intervals during the past years. As with the popular "Never-Break" steel seamless cooking utensils and patented hand shovels, spades and scoops which these blotters are meant to popularize even more than has been done by their elder brothers, this absorber of superabundant writing fluid is above the average and the results naturally most gratifying.

Consul F. S. Hannah, of Magdeburg, reports that the municipal authorities of Nordhausen have forbidden the wearing of dress trains inside the city limits. Last year, "to prevent danger to health and annoyance by raising of dust," the police board forbade the ladies to allow their dress trains to drag on certain promenades and principal streets. By a recent action of the health commission, this order has been extended to cover the entire city, and disobedience shall be punished more severely than formerly. The present penalty for violations of this ordinance is by fine not exceeding \$7.14, or imprisonment for a corresponding number of days. This, so far as the consul can ascertain, is the first city in Germany to put itself on record as opposed to this menace to health.

The Janney-Semple-Hill Hardware Company, Minneapolis, Minn., will erect an immense new warehouse at a cost of \$260,000, at the corner of First Street and Third Avenue South. The plans, which were drawn by Long & Long, architects, have just been completed and provide for a seven-story structure, making one of the largest warehouses in the entire Northwest. The structure will be 142 by 198 feet. Brick will be used in the exterior construction and reinforced concrete on the interior.

A regular meeting of the Cycle Association of the United States was held in Niagara Falls, N. Y., on the 6th inst., the session being one of twelve held each year to discuss the trade situation. It was stated at this manufacturers' meeting that the bicycle outlook is rapidly improving. During the past year 24,000 automobiles were sold and nearly ten times that number of bicycles were disposed of. A large increase in the sale of bicycles is predicted for the coming year.

The present total production of rubber throughout the world is estimated by French experts at 57,000 tons. Of this total 55 per cent. comes from America and Africa. The consumption of rubber by the principal countries of the world in 1904 was, in tons, as follows: The United States, 26,470; Germany, 12,800; Great Britain, 10,000; France, 4,130; Austria-Hungary, 1,320; Holland, 1,218; Belgium, 748; and Italy, only 588 tons.

NEW CHICAGO BRANCH OF THE ARMSTRONG MFG. CO. OF BRIDGEPORT, CONN.

In order to better serve the needs of a greatly increased Western business in their steam, water and gasfitters' tools and machines, The Armstrong Manufacturing Company, of Bridgeport, Conn., has lately opened a branch office and warerooms at 23 South Canal Street, Chicago, Ill. The new branch is in charge of Hugh S. Laing, formerly Assistant Manager of the New York City branch. The premises include an office and show room, 18 feet wide by 150 feet deep, and a large basement for storage. In addition to a complete line of the genuine Armstrong Stocks and Dies, there will be carried a full stock of Armstrong's Pipe-Cutters, Pipe Vises, Bard Adjustable Bushings, Ratchet Attachments for Die Stocks and Pipe Wrenches. In the salesroom a full line of pipe cutting and threading machines taking up to 6-inch pipe are on exhibition. In the wareroom a full stock will be maintained to enable customers in the district to receive their orders promptly. Buyers of Pipe-fitters' tools in the West or central part of the country are cordially invited to communi-

cate with the Chicago office for any particulars concerning the Armstrong tools.

RECEIVES AMOTHER DEGREE.

Webster R. Walkley, managing director of the New York branch of the Peck, Stow & Wilcox Co., 27 Murray Street, New York, was given the honorary degree of Doctor of Civil Law (D. C. L.) on the occasion of the one hundred and twenty-third commencement, June 6, of Dickinson College, Carlisle, Pa. This college is the second oldest in Pennsylvania, having been organized in 1783, and of which George E. Reed, S. T. D. and LL. D., is president. Mr. Walkley is a graduate of Wesleyan University, Middletown, Conn., class of 1860, and for 15 years has been one of its trustees, being elected by the alumni.

THE AMERICAN EXPORTER.

That our commercial relations with South America are still far from satisfactory is shown in a number of timely and able articles which appear in the current issue of the *American Exporter*.

From one of the articles, under the title of "Commercial Relations Between the United States and Its Twenty Latin-American Sister Republics," we see that, while the twenty Latin-American republics imported in 1905 goods to the value of nearly \$610,000,000, only \$181,000,000 came from the United States. However, of this share of American trade more than one-half is credited to Mexico and Cuba, consequently leaving very little for Central and South America. In other words, while our trade is tremendous in Mexico and Cuba, throughout South America we are doing but a trifle of business. There is not a single country in South America where our trade can compare with that of Europe, and this in spite of the fact that the United States is one of the largest buyers of South American products. The ten republics of South America imported in 1905 goods to the value of \$403,000,000, to which this country contributed less than 15 per cent!

The above referred to article gives a clear idea of our commercial relations with each of the twenty Latin-American republics and should be read by anyone interested in our commercial intercourse with Latin-America.

When it is considered that the twenty Latin-American republics cover an area equal to that of the German Empire, while the total population of those vast territories scarcely approaches that of the Fatherland, it will be readily understood that there is room for immigration and colonization, the prime elements in the development of any unsettled country.

The entire issue is profusely illustrated by portraits of South and Central American Presidents and typical views of tropical scenery. The publisher, Mr. William J. Johnston, who last year accompanied Secretary Taft to the Far East, will personally attend the Congress in Rio de Janeiro, and subsequently make an extensive tour of South America.

THE PAN-AMERICAN CONFERENCE.

The much talked about Third International Conference of American Republics will open in Rio de Janeiro, Brazil, on Saturday, July 21st, and remain in session until September 1st. Hon. Elihu Root, our distinguished Secretary of State, will shortly sail for Rio de Janeiro on board the cruiser "Charleston," one of the latest and finest vessels in the navy. The delegates, six in number, headed by Hon. William I. Buchanan, ex-Minister to Argentina and Panama, member of the last Pan-American Conference in Mexico City, will sail from New York on July 2d, on the S. S. "Byron." A number of distinguished South American diplomats at Washington have already left for Europe, whence they will proceed to Rio.

BRITISH CONSULAR REPORTS.

The London Times, referring to an official statement made by Sir Alfred Bateman concerning British consular reports, says:

"The deductions from the study of 171 British consular reports, as summarized, appear to be somewhat familiar in certain respects. Contrary to those of Germany and the United States, the reports of the consular officers of this country consist more of critical than of informative matter; and it is the general opinion that a little more information of a definite and positive character as to trade opportunities abroad would amply compensate for a retrenchment or even total abandonment of those diatribes on British commercial methods with which British manufacturers are already too painfully familiar."

JUNE 25, 1906

Editorial Trade Review

Vacation trips are now the order of the day. The travelers, having reached the end of their hard work for the season, are in a position to start out first on the camping-out idea, and enjoy life without a strain, when the fact that they are resting on their oars, figuratively speaking, leaves the store force but little else to do than fill the "hand to mouth" orders that daily arrive, and figure on their own contemplated absence, and the knowledge of their absence gives the boys that linger enough more to do to make them glad when their turn arrives.

Vacations were organized when buying was the feature of two respective seasons—Spring and Fall—and more latitude was given to those who vacationized because, when it occurred, trade was rather dull, but they had to get back before the first of August, as Fall goods commenced to arrive from England and other countries, and the evening hours had to be utilized only too often to get the goods sampled and placed in stock.

We have all settled down in the belief that the prosperous condition of our beloved country is going to last indefinitely, and can prepare for it without misapprehension. Prices are as low now as they are apt to be this Fall, and when we take note of the condition of things generally, instead of preparing to take on light stock when the Fall stocks are not usually of that quantity, we shall order early with some degree of perfect confidence in the near future and then look out for floods of goods—provided we can get them. Many lines now are bought ahead of their wants, so many people in these confident times think that a wise thing to do. The trend of prices, if any is noticeable, is of an upward character and, unless time is taken by the forelock, the goods will certainly not be forthcoming. Almost any retail dealer knows only too well the time to sell is when you've got the stock in the house. That's "the why and the wherefor." Nowa-

days orders for axes, coal-hods, elbows, stoveboards, lanterns, scoops, etc., are all ordered in the early Spring for the possible wants of Fall. There will be no stocks of goods to any great amount carried over. Everything was sold up close; even screen doors, about the combination prices of which the dealers rebelled early in the season, were sold, no matter about price—the thing was to get them. Like wirecloth, there was lots of it sold and none to carry over. The same is true of cream freezers, lawn mowers, steel goods, etc.

Winter goods are in the same condition as far as any stock on hand is concerned. The principal fear that exists among the trade is that they won't get all that's coming to them, which past experience tells them is among the possibilities.

ANALYSIS OF COMMERCE OF THE UNITED STATES.

Analysis of the foreign commerce of the United States, recently presented by the Department of Commerce and Labor through its Bureau of Statistics, have included discussions of trade relations with each of the principal countries, and an analysis of these analyses presents some interesting general facts about our trade relations with each of the great divisions of the world, whether geographic or climatic.

Thus it appears that imports from Europe increased a little more than one-half in the period from 1895 to 1906; from North America nearly doubled; from South America showed but a slight increase; from Asia practically doubled; from Oceania, including Hawaii, trebled, and from Africa increased about one-half. On the other hand, exports to Europe nearly doubled in the period from 1895 to 1906; to North America nearly trebled; to South America more than doubled; to Oceania more than trebled, if we include the trade with Hawaii; to Africa more than doubled, and to Asia in 1905 were 7 times as great as in 1895.

Manufactures supply the largest part of the imports from Europe, and agricultural products, copper, mineral oil, leather, and iron and steel supply the largest part of the exports thereto. The bulk of the North American imports are sugar from Cuba; coffee, sisal, fruits, copper, and lead from Mexico, Central America, and the West Indian Islands; timber, lumber, fish, and nickel ore from Canada; the exports to North American countries are chiefly manufactures, also meats, flour, and other food stuffs to those at the south. From South America the imports consist chiefly of coffee, india rubber, wool, hides, and skins, while the exports thereto consist chiefly of manufactures and certain lines of food stuffs. From Asia the imports consist chiefly of tea, coffee, raw silk, fibers, wool, pig tin, and wrapper tobacco, and the exports to Asia consist largely of cotton cloths, mineral oil, copper, and miscellaneous manufactures. From Oceania the imports are chiefly tropical products and the exports thereto chiefly manufactures and food stuffs. From Africa the imports are chiefly tropical and subtropical products and the exports thereto chiefly manufactures.

Of manufactures, the exports for the fiscal year 1906 will be about 600 million dollars, of which about 250 millions go to Europe, the large proportion of the manufactures sent being copper, mineral oils, manufactures of iron and steel, boots and shoes, and scientific instruments. The exports of manufactures from the United States have grown from 183½ millions in 1895 to about 600 millions 1906, and the share which manufactures form of the exports, from 18 per cent. in 1890 and 23 per cent. in 1895 to about 34 per cent. in 1906.

DEATH OF JAMES A. NEALEY.

James A. Nealey, agent of the American Screw Co., Providence, R. I., died at his home in Providence on the evening of Monday, June 18, from heart failure consequent upon pneumonia. Mr. Nealey was a native of Rhode Island, having been born in Pawtucket in 1842, and from early youth had been employed with the American Screw Co., with which he began his connection soon after its incorporation, which was in 1860. After occupying various positions as salesman and clerk, he was elected secretary of the corporation in 1884, and had served continuously from that time in the several positions of secretary, treasurer and agent, having occupied the last named position for the past fifteen years. In 1892 he married Miss Grace G. Allen of Pawtucket, who survives him. He had no children.

THOSE "CLEARING UP" SALES.

It's all right to be just clearing out old stock at bargain prices sometimes; once in a while though people like to see you blossom out new, even if they have to dispense with your cut-rate offers in your advertising temporarily. To be constantly "overstocked," selling out old goods," "cleaning up," "making room," etc., gives one the impression that so many and such long continued sales are fakes or else that you must be loaded down with all of the commercial flotsam in the universe and therefore a poor place to buy. Keep the old stuff closed out as much as possible, sure, even if you have to sell some of it below cost, but don't keep all your advertising in that angle. Make yourself a reputation for being bright, new, clean and base the bulk of your advertising on that. Even offer some article at a closing-out price while it is new, if necessary. 'Twill be a novelty among sales and will strengthen your reputation. Work the old stuff off in private sales when you find the man who wants that kind at bargain prices, but don't make too much of a public holler that you have old stuff on hand. Your customer won't say much about it for he isn't proud of his cheap purchase; why should you be more so? Chances are the fellow who wants the old, rusty, shelf-worn, out-of-date stuff wants to keep it quiet and is a great deal more likely to come and whisper his wants to you when his neighbors are not looking than he is to come and buy just after you have been shouting to the whole town that you have a lot of bum stuff to dispose of. Be new, be bright, be shiny and make a commercial parlor of your main stock while you quietly shove the beggar stuff out at the back door of your sales department when the rest of the town is not on the watch.

HOW A CHERRY STONER APPEALS TO A WOMAN.

The woman who finds a machine that will stone cherries without reducing them to pulp; that will not stain her hands with juice and wrinkle them until it "sets her teeth on edge," or hopelessly discolor her clothing, is not again going to waste hours of tiresome pottering over hand stoning if she has to sell part of her cherries to pay for the stoner.

Few simple household duties savor more of the disagreeable. The juice will spatter in all directions, soon the fingers get smeared, and so sticky that they only increase the muss when they try to stop the progress of the juice which about this time commences to trickle down the sleeve.

A woman may doubt the efficiency of the cherry stoner, but she is open to conviction. The main thing is to get her attention; to make known and prove your claims. She will first investigate whether the pits are cut out without unnecessarily mutilating the fruit; and will want a machine readily adjustable to the various sized cherries. She will object if many of the pits are dropped into the stoned cherries. A few revolutions of the crank and the steady flow of pits from the spout is sufficient proof of its time-saving value. And the fact that she need not even touch the fruit unless to remove a defective cherry eliminates the last disagreeable feature—the stained hands, which she feels for a week like hiding.

The speed of the stoner per minute should be ascertained, and just that and no more claimed for it. An announcement in the local papers when the first cherries are placed on the market of "I STONE ONE QUART A MINUTE WITHOUT STAINING YOUR HANDS OR DRESS."

will bring interested parties.

A striking display for the show window is a stoner with a quart of stoned fruit in a dish as it fell from the machine, and another plate containing the pits from the same. Place under glass cover, and put above it the words suggested for the ad. This will open the way for bringing out the other points to those interested.

A TOUCH OF AMERICAN PRIDE.

Rather a pleasing effect for a National holiday window can be obtained by seating two lay figures, one of Uncle Sam in his customary uniform and the other of the Hardware dealer, facing each other, each evidently in a meditative humor and each studying the firmament above the head of his vis-a-vis. Placard this,

COUNTING THEIR STARS.

Over the Hardware dealer, directly in Uncle Sam's vision should hang an American flag, the stars—in other words, his possessions—of which the Great American Citizen is contemplating. Over his own head, in the range of the Hardware man's vision should hang a sky of "star" goods, paints, agricultural machinery, building material, household goods, anything on which the dealer cares to make a special drive. This drive is specially adapted for drapery effects and cannot fail, if properly arranged, to leave an impression at once pleasing and permanent.

FROM WHICH THERE IS NO APPEAL.

By F. A. PARKER.

Hardware dealers may not be aware of the fact, but they are liable, at any time, be they manufacturers, jobbers or retailers, to have a fraud order issued against them and their mail held up by the postoffice department. There may be no real reason for such action. There may be no such thing as fraud or falsehood in the history of their business, but apparently that will make no difference when the order is once issued, and it also seems that you are never consulted about such orders until they are issued. You have nothing to do with it. It is none of your business, from the point of view of the postoffice department.

The trade will naturally think that such a condition of affairs is utterly impossible in this country, where there is so much talk about freedom of speech, freedom of the press and freedom of the public in general, but let us take a look at what is going on in other lines of business, and see how much freedom we really have when it comes to dealing with the postoffice department, and see what we had better demand from Congress in the way of remedies.

About a year ago the firm of Becker Bros. & Co., of Kansas City, Mo., which was conducting a mail-order liquor house, had a fraud order issued against it by the postoffice department, and its mail was held up for a considerable period, while the manager was trying in every way to get the matter straightened out and save his business from utter ruin. A fraud order against a liquor house sounds all right to dealers in other lines, and they let it go at that, they never worry about how some other man's rights are being trampled upon. That is what the liquor man would do if he read the heading of the same kind of an item in reference to a Hardware dealer. Now, let us look into the case, and see if we are not also in danger, if the postoffice department continues to have its way about it and there is no appeal allowed to the courts.

The manager of Becker Bros. & Co. finally asked the United States court for an injunction against the postmaster of Kansas City, Mo., to compel him to deliver his mail, and it was granted, but that was not the last of it. The postoffice department appealed the case on the ground that there was no appeal allowed from a decision of the postmaster general to the United States courts, and a few days ago the United States Circuit Court, in session in St. Paul, Minn., handed down a decision in favor of the department.

At the trial in Kansas City it developed that the manager of the concern was never given any notice that he was doing wrong, and what he should do to make it right. The fraud order was merely issued and the mail ordered held, and at that late date it was considered time enough for him to find out what was the matter, and try and save himself from ruin the best way he could.

He went to Washington and appealed to the postoffice department, both in person and by attorney, but without results. He tried in every way to get what he considered justice, and about all he could get was the advice to get along the best he could, for there was no appeal from the order of the postmaster general. At the department he was informed that in his advertisements he had claimed to be a distiller when in fact he owned no distillery, and that such advertising was misleading to the public, and for that reason the department would not allow him to continue.

He asked them to take his advertisement and cut out whatever they wished, and let him go ahead and do business while he still had a chance to hold his customers, and stated that when he went into the business he found his competitors were claiming to be distillers, when in fact they were not, and thought that as his whisky was as good and as cheap as theirs, if they were getting business by making the customer believe that the liquor was going direct to them from the distillery, and thus cutting out the middleman's profit, that he had a right to do the same, and that he was not the originator of the plan.

The department absolutely refused this request, and stood on what it called its rights, and he was forced to go to the courts for justice. Right here is where the danger to all lines of business makes its appearance, the courts appear to feel that they do not have jurisdiction. It developed in the trial that the postoffice department had sent out many letters to the customers of this country, in all parts of the country, with the hope of finding some one who was not satisfied with the whisky received, and willing to make a complaint against the company, but they were entirely unable to find a single dissatisfied customer, and so the department had to file its own complaint before itself and then sets up the plea that there is no appeal allowed to the courts of the country.

It no longer makes any difference to this particular company what becomes of the case, so far as the business is concerned for the business was completely ruined by the fraud order, and

the manager has since purchased a distillery and is conducting a business under his own name, but as a citizen of the United States who feels that he has some rights, and also has the grit to stand up for them, this man is going to appeal the case to the United States Supreme Court, and all merchants should watch for the decision with much interest, for they are vitally interested. In fact they should do more than this. They should begin a movement at once to have Congress pass a law giving an appeal to the United States court from decisions of the heads of all governmental departments, for no matter how good a man may be who happens to be at the head of a department, he should not be allowed to be prosecutor, judge and jury, all in one, with no appeal. It is too much power to put in the hands of any one man.

This was simply a case where the department objected to the wording of an advertisement, and ordered the mail of the company held, because of its own objection. No customer could be found who was not pleased with the goods delivered. No complaint was ever heard. The department objected, and being supreme, just stopped the business.

Apply this to your own line of business. Suppose you are a manufacturer, and in advertising your product you state that it is made of a certain kind of steel, and that the postoffice department decided that the statement is misleading, and stops your mail. You have no appeal, so what are you going to do?

Suppose you are a retailer, and in your advertisement in the local paper take particular pains to bring out the superior points of some article you are offering, taking the word of the manufacturer that such is the case, and then suppose the postoffice department differs with you, and thinks your statements are misleading, stops your mail and orders the paper to refuse your advertisements. What are you going to do about it, with no appeal, and no opportunity to show that you are right?

There are hundreds of cases which can be picked up every day in this line of business, where there is apparently more reason for such an order than in this liquor case, where no complainant could be found, and while it is right that the postoffice department should have the authority to refuse the use of the mail to anyone for an unlawful purpose, there should be an appeal within the reach of the people, to some outside authority, which can decide as to what is lawful or unlawful without any chance of prejudice.

It is time the business world was giving some attention to this matter, or we may have a young despot in our midst before we know it, and right now, while the department is being run by a conservative man, is the right time to make the first move. Suppose we happen, in the future, to get a postmaster general who is not a conservative man, or suppose he will happen to be a man who will place too much confidence in evidence brought before him by subordinates who are not worthy of the confidence, or suppose he is a man who is easily ruled by his friends and that such friends have him thus ruin the business of their competitors? With no appeal to the courts, where will the end be? By all means use your influence to get this matter straightened out now, before great damage and injustice comes to many. It can hurt no well regulated governmental department to have its acts reviewed by the United States court when a citizen claims that his rights have been trampled upon by a ruling.

J. STEVENS ARMS & TOOL CO.

In consequence of being unable to make deliveries of their new No. 80 Repeating Rifle that was promised on July 1, the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., thought that a notice regarding the delay should be sent to all the jobbers, which has been done. Believing it to be of equally the same interest to the retail distributors of firearms, we publish it below.

DELAYED SHIPMENTS.

To the Jobbing Trade:

When orders were placed with us late in 1905 for the new goods we were to supply this season, we promised the No. 325 Hammerless Double Barrel Shotgun June 1st and have "made good" on deliveries.

The No. 14 Little Scout Rifle was promised for May 1st and salesmen's samples were shipped at that time. By July 1st we will be able to make liberal stock shipments to all.

The No. 80 Repeating Gallery Rifle was promised for July 1st but will not be ready until September, and as promises for delivery are often not kept by other manufacturers, we have taken great pride in the past in making deliveries of new goods promptly at the time agreed; hence an explanation is in order.

We feel that we are in no way at fault because of delays, as on March 17th, all of our polishers "struck" because we did not consider it best to unionize our factory. It was not a disagreement of wages, as we were paying the full union scale, although some of the union men claimed it was because of a cut in wages.

We at once secured new help to fill the strikers' places and are now running full force and in better shape than before the strike; but it delayed us about sixty days in bringing out new goods as well as making the changes on the Nos. 250 and 350 series of Double Barrel Guns.

We believe, however, that we did remarkably well, as we have back-ordered but few goods during the past three months and the union made threats to close all our factories entirely and were backed by the National Polishers' Union, the National President and other National Officers, who often visited Chicopee Falls during the early days of the strike and took the matter in charge.

We are quite satisfied with results, as other manufacturers in the past under similar circumstances have been practically "shut down" for months. We did not close our factory a single day and back-ordered very few goods considering conditions, and as stated are now in better shape than ever before. It will take about ninety days, however, to "clean up" the few back orders and fill specifications placed early (which always take preference over current business) as this is our busiest season.

Believing an explanation is due you, especially regarding deliveries on the No. 80 Repeater and that you will not criticise us in the least, thanking you for past courtesies and awaiting your further commands, believe us to be

Very truly yours,

J. STEVENS ARMS & TOOL CO.

I. H. PAGE, *Pres. & Treas.*

IOWA HARDWARE ASSOCIATION OUTING AND PICNIC.

At a meeting of the promoters of the Iowa Hardware Picnic Association, held on June 16, at the offices of the Iowa Hardware Association, the dates of the Fourth Annual Picnic were arranged for Thursday and Friday, July 19 and 20, 1906.

The leading feature of the 19th will be the great annual contest between the merchants and traveling salesmen, as shown on the baseball diamond, which event is scheduled for 4 P. M. of the 19th.

The following committees are to have charge of the various departments of work:

EXECUTIVE COMMITTEE—S. R. Miles, F. R. Currie, William McGowan, L. R. Bailey, D. H. Palmeter, M. Heegaard.

INVITATION AND PROGRAMME—A. R. Sale, F. D. Weatherwax, G. B. Streeter, A. Van Ness, J. E. Tatum.

FINANCE COMMITTEE—F. R. Currie, W. R. Davis, J. Kuppinger, G. B. Downing, P. Knutson.

SPORTS AND ENTERTAINMENT—G. B. Streeter, E. F. Tabor, M. M. Heegaard, A. R. Sale, S. White.

RAILROAD, TRANSPORTATION, BOATS AND CARRIAGES—L. R. Bailey, William McGowan, Jr., J. W. Konvalinka, H. E. Redfield, M. B. Carpenter.

SUPPLIES AND REFRESHMENTS—Charles Knutson, R. E. Adams, Mr. Shurtleff, R. R. McCall, R. D. McManus.

It is especially requested that all members of these various committees get together without delay, and report their action to the secretary of the Picnic Association, in order that any matters of interest may appear in the printed programme, which is now in the hands of the printers for the general information of the people who are to participate in our Fourth Annual Outing and Picnic.

It is also especially requested that all members of committees forward at once to the secretary, the names of all new members of the association and others to whom they desire to have special invitations extended to attend our annual convention.

The Committee on Sports and Entertainment are especially requested to have their part of the programme outlined at once, with a list of prizes for the events, in order that this may have proper notice in the printed programme of the exercises.

The Committee on Transportation will also accept this notice to furnish the secretary, at the earliest possible date, all matters that they desire inserted for the information of the members of the association.

Notice is also given to the Hardware Merchants ball nine that daily practice will be held at Plummer's field at 5.30 A. M. each day, Saturday and Sunday excepted, until the day of the picnic. Members of the nine will be assigned their positions for the annual contest after one week's practice.

Members of the traveling men's nine are requested to avail themselves of every opportunity both on the diamond and in gymnasiums that they may have access to, in order that they may place themselves in fit condition for the annual contest. Assignments for positions will be made by G. B. Streeter, upon application, when same have been approved by the Committee on Sports.

All communications regarding the various features of the programme should be referred to the secretary of the Picnic Association.

A. R. SALE, Secretary.

CONVENTION ECHOES

An extremely interesting address on the subject of Labor Conditions was delivered by James A. Emery of New York. His ideas were cogently and eloquently expressed, and deserved the close attention which they received. He spoke substantially as follows:

LABOR CONDITIONS.

By JAMES A. EMERY.

James A. Emery, secretary of the Citizens Industrial Association of New York, spoke very ably on the economic problems which confront our commercial enterprises. He said that the question of getting enough material for our manufactures does not bother us so much because the earth has not ceased to yield raw material, but it is the supply of labor which has not increased proportionately with the demand our growing industries make upon it, which gives us the greatest trouble.

He referred to the enormous losses to both labor and capital during the great strike of 1880 to 1900 and showed how these strikes had an indirect effect upon nearly all inter-related industries, which effects were not nearly as far-reaching as the moral, social and political damage done by them. Serious as these problems may appear, however, they are by no means hopeless of solution.

He said that we Americans had the habit of growing suddenly pessimistic or optimistic, and that whenever we pass through periods of moral, social or political fright, we see no remedy for moral business corruption.

Our labor problems cannot be settled from year to year as labor organizations or their leaders seem to think. Our economic quarrels will never be abolished, and social wrongs will never be righted by denying the laborer the right to organize. This is an age of organization. Organization is native in man's being. In fact, the whole force of his nature cries out for social organization.

Moreover, ours is a nation different from all other nations in its political and industrial theories, and we differ from other nations by three fixed principles: Individual liberty, inviolability of private contracts and the protection of the principles of private property. Individual liberty defended and protected in our own country has reduced a race of men with wonderfully developed powers. The history of our nation is the history of individuals, who put these principles into practice and made the most of their opportunities, and the state protected and fostered individual initiative. Ours is a government of inalienable right. The right to live is the right to work.

How far we have diverted from this principle is shown by the fact that apprenticeship among the trade is getting to be a lost art. There is not a single apprentice among the Granite Cutters; not a single apprentice plumber in New York City, and every where industries are beginning to feel the pressure that is being brought to bear upon them by the monopoly of labor. The arrogance of trade unions has grown to such an extent that a father's son cannot learn the father's trade without the consent of the union, and this state of affairs is not confined to one trade alone; it prevails in nearly every industrial trade center.

Individualism has built our government; has developed its resources; has built up its national character, and it will be impossible to perpetuate it so long as we allow principles to exist which are a contradiction of the three cardinal principles of our government. Unflinching devotion to these principles is the only remedy.

The devotion to principles which characterized our fathers should characterize every American business man in the settlement of industrial difficulties which cannot be settled until they are settled right. They can only be settled on the basis of reciprocal obligations. The principle of individual liberty must be held inviolate. To no man must be denied the privilege to live and to work on terms which suit him best. This is the day for courageous men, who will stand ready to check the growth of bad principles.

✱

The discussion on Thursday afternoon for the American Hardware Manufacturers' Association on the Integrity of Contracts was opened by Alfred Sang, vice-president of the Garland Nut & Rivet Co., whose address on the subject was well expressed and to the point. As we were unable to do it justice in the crowded condition of our columns in the last issue, we present it here in full. He said:

INTEGRITY OF CONTRACTS.

By ALFRED SANG.

The subject of contracts is very difficult to approach and by no means easy of discussion. As it develops it is found to influence every relation between buyer and seller, for contracts regulate and systematize the essential factors of Trade, Buying and Selling.

But to discuss the integrity of contract, in other words, their moral soundness is harder yet. It is a trying matter for any man to stand up and tell how things ought to be done, and why, when he may not always himself act in accordance with his words. Still if men only preached what they practised a state of equilibrium would exist and no progress would be possible.

You must accept my opinions as entirely personal and not corporate, and while I may voice the opinion of the majority of manufacturers here present, it is in a personal way; the concerns which they represent are compelled to adhere to present day practice whatever the personal opinions of their officers may be. We are here to improve and influence corporations by personal discussion, personal opinion and personal influence.

We all know what a contract is, I shall not describe it. We must first discover by what standard we are to gauge the value or rather the validity of a contract. To have any validity whatever, a contract must be valid in the eyes of the law; to be valid legally, it is essential that it be bi-literal; in other words, it must create mutual obligations.

We always start our contracts with the names of the contracting parties. This is the place, the important place, in which to remember that both parties are entering upon this contract on an even footing, with the avowed intention of exchanging considerations of presumably equal value and of dealing fairly with each other. This is where the integrity of a contract begins.

It has been said that one man's rights end only where another man's begins. This is the only possible interpretation of equality of rights of mutuality. This is the spirit in which we should enter upon our contracts. Is this the spirit of the age? The spirit of the age is to obtain some personal advantage, all because of the old idea which is universally rejected and yet persistently applied in action that one man cannot obtain an advantage without injury to some other man. This may be true in war and love, the one the remnant of barbaric days, the other a law unto itself; but it is not true in commerce, and we all know it and disregard this knowledge. Where commerce is carried on as a warfare and all rules of honesty and morality ignored, it may cause the over-prosperity of one man through the enslavement of others, but I refer to that class of honest, progressive commerce in which alone all of us here are interested.

A country cannot be prosperous unless every class is prosperous. The merchant's prosperity depends in a measure on the prosperity of the manufacturer, and vice-versa, hence the principle of mutuality which must preside at the execution of a contract is more beneficial to both parties than a one-sided is to the man who secures a temporary advantage over the other.

Every man attaches a great deal of importance to his signature when he endorses it to a check payable to his order, especially if the amount be large. This feeling of importance is intensified when he attaches it to a promissory note or to a sworn statement. The factor which intensifies this feeling of importance we usually call "the sense of honor" and we can take it for granted that in this assembly, at any rate, the validity and necessity of the sense of honor in such cases is beyond discussion.

A contract to sell or to buy goods, is an express executory document, and the principles involved are of the highest order; an easy way for you to realize this is to read carefully the wording of any one of your own contracts when it is being broken at your expense.

A man's honor is as fully at stake when he attaches his signature to a contract as when he attaches it to a promissory note. If he repudiates, or openly or secretly breaks the contract, he dishonors his signature. The financial measure of his action, if he be the buyer, is the manufacturer's profit, if he be the seller, it is the difference between the contract and the market prices. A definite sum of money is at stake, and the breach of contract is, therefore, no more or less than an appropriation of another man's money.

Some men smile at the legal form which some manufacturers adopt for their contracts. This is not a wholesome attitude. Let your contracts be as simple and as short as possible, but give them a legal appearance, and do not omit the legal phraseology, for that is just what will help you and the person with whom you make the contract to remember that the signature is not a mere dash of the pen but a serious undertaking in which the integrity of a name and of a reputation are at stake.

Allow me to insist on the importance of giving our contracts a serious and a legal form, if only as a help to remove present day laxity; to impress the mind with its importance and dignity. Furthermore, that it be clearly understood that the honor of the firm is as fully at stake as when the signature is attached to a statement duly sworn to—that the absence of the notary's seal does not make honorable that which is legally dishonorable.

And, therefore, do not leave the signing of a contract to any one. Even a buyer should not sign a contract unless it be countersigned by a director of his company. Do not entrust the safe guarding of the honor of your firm to those who are not appointed for this purpose. Buyers, whether for a manufacturing or a jobbing concern, are hard workers and hard workers are very inclined to be overzealous—when zeal acquires such a momentum that it over-shoots the narrow boundaries of right and lapses into wrong.

Let me say as a corollary that the man who signs the contracts is the man who should cancel them, if cancellation becomes necessary.

A breach of contract is bound to be a most potent demoralizer and a shield for all kinds of mal-practices; mal-practices which in many quarters are accepted as regular routine business; fixed habits which drug our sense of right during six days of the week and create a distinct commercial personality; a lazy personality which is outwardly active, which selects the easy but devious methods in reference to that which requires concentration, patience and Sunday morals on week days. As Franklin once said, "Tricks and treachery are the practice of fools that have not wit enough to be honest."

Happily, abuses, sooner or later, create re-action which awakens social self consciousness.

A contract which is binding on the seller alone, and allows the buyer to withdraw if the market weakens, or gives him the equivalent privilege of getting the benefit of the market, is not a contract in any sense whatever; it is a jug-handled arrangement which encourages disloyalty and destroys confidence, confidence which is the very soul of profit.

Let me dwell on the word confidence, which I have just described as the soul of profit and, therefore, the soul of material prosperity. When a man has confidence in you, he trusts your word, he has faith in your written statement, he relies on the integrity of your character. No more than this, he believes that you have confidence in him. Here we have mutuality again. A man has confidence in you because he believes that you have confidence in him.

We are, therefore, mightily interested in finding out how this mutual confidence is to be brought about. It is right in the contracts which we make. If, from his experience, a man knows that you steadfastly adhere to your agreements he will give you his confidence. We talk of our confidential clerks. We have confidence in their integrity, but we do not attach much importance to their integrity in their relations with others; hence it is that we so often find that the most confidential employes are the ones who abscond with the funds or cook their books. We expect our men to be straight but crooked, truthful to us and lying to others, and in every respect different from what we would have our children be—until, of course, we take them into the concern. We must now say a few words about prices, which after all, are responsible for the existence of our contracts.

It is said that competition is the cause of the close prices ruling now-a-days on standard articles of Hardware. This is only one cause. There is another not less active cause, which is, moreover, far less legitimate, in fact not legitimate at all, and must be eradicated, if the task is, as I believe, within the limits of our power. I refer to the persistent pounding of prices by buyers for jobbing houses. Usually by means which I might qualify in one word, but won't.

The pounding of prices means the pounding of quality; the one is the concomitant of the other, and while the first injures the manufacturer most, the second does no less of an injury to the dealer and to the consumer.

The action of telling a plain, barefaced falsehood in order to obtain a more favorable price is nowadays regarded with almost complete indifference. That a gentleman should sell his honor, that any man should sell a particle of that stuff of which his character is made is one of the very worst features of modern commercialism.

Many contracts are made solely with the view of taking an illegitimate advantage in regard to price.

It is, of course, perfectly legitimate to say, "We can get these goods elsewhere at your price, and we, therefore, prefer to buy on an open market," but it serves to show the spirit which animates the majority of buyers. Even on a low market the buyer is so confident of being able to use his "Big Stick" with efficacy when prices go up that he does not consider it on the slightest advantage to make a contract. "We want you to protect us" says the merchant to the manufacturer after his buyers have beared the market to a point where the manufacturer has no margin left wherewith to protect him.

The jobber's view of a contract is in glaring contrast with the view taken by manufacturers in relations among themselves—I must really beg you to excuse me for making so venerable and time worn a statement. We manufacturers of Hardware buy steel and other raw material on contracts, and while I must hesitate to say that all of us are beyond reproach in our methods of obtaining prices, I shall not hesitate to say that once our contracts are signed we stand loyally by our signatures, and seek no favors outside of those which may be necessitated by circumstances beyond our control such as strikes and fires. If the market declines, to use a common expression, we take our medicine.

Another contrast is to be found in the general respect of contracts shown by consumers of our finished goods whenever they buy direct. If they are covered for the season and you come at them with a proposition which is lower on account of a decline in the market they will almost invariably write back that they are not interested because they have contracted until a certain date. I can hardly describe to you the feeling of respect which such a reply has always given me, a respect which in time must necessarily redound to the advantage of the consumer.

When he thinks he can thereby get additional protection, how ready the jobber is to make a new contract and in most cases, without so much as advertising the manufacturer with whom he breaks faith. I do not speak here of individual jobbers. This seems to be a failing of the fraternity, and is, no doubt, due to conditions which the jobber alone can explain. Let him explain, and we can perhaps help him to meet our wishes and reap the benefit of our increased confidence.

I am speaking frankly, because it is our desire to better these conditions, to give you greater margins, to protect your profits if you will protect ours. This can be done, and loyalty alone will do it, but we must not only be loyal here but also when we get back to our desks far from the fraternal julep.

We ask for more loyalty and, in return, we will give you better margins and we will back you in any warrantable stand against new forms of competition, for your interests will be our interests, your profits part of our profits. But now, your profit is our loss, and while we would like to help you, common-sense, not to speak of our stockholders, warns us that we must apply the full force of the golden rule and disregard your interests as you disregard ours.

Let me say most emphatically that it is the earnest wish of the manufacturers of Hardware and, especially of those represented at this convention, to market their goods through the jobbers. That is why they are here to-day. But it is for the jobbers to guide the evolution of our trade relations. Without their guidance we are helpless in our endeavor to bring about the very conditions for which these joint meetings have been instituted.

Contracts foster the maintenance of prices, than which there is no more interesting question to the manufacturers.

The manufacturers expect to make the prices; it seems to me that they are entitled to this; one reason alone is sufficient. They are the only ones who know the cost of their goods. Goods are periodically sold below cost and when the manufacturers attempt to improve prices, buyers are often led to believe that they are taking an undue advantage—trying to make too much money; then the pounding of prices and of good feeling begins without any possible advantage to either side.

One of the forms of protection has been to limit the contracting period—60 days is becoming quite common. The reason for limiting the period really belongs to another subject at present under discussion between manufacturers and jobbers. I will merely say that were it not for jobbers' stocks, manufacturers would be able to get the increased prices to which they are entitled by reason of increases of raw materials. Jobbers' stocks would not interfere if prices were maintained.

The question of differentials is entirely bound up in the question of contracts. Differentials will not increase as long as the status of contracts is not improved.

On the other hand, if contracts are respected and their integrity guarded, differentials will be allowed which will bring joy

to your hearts and profit to your pocket. As distributors of manufactured goods you should be a part of the manufacturing system and we shall put our heads together to cultivate our joint profit.

We manufacture the goods, and therefore, we manufacture the profits; if you take all the profit, it does not pay us to keep on manufacturing it. It compels us to look for a different channel for the marketing of our product. As I have stated before, we want to do business with you. We are here for it, and we ask you to meet us half way.

Let us remember mutuality, let us protect each other and realize the necessity for the integrity of our contracts and the rest will take care of itself.

I can add but little to what I have already said. The integrity of contracts commences with the spirit presiding at the execution of the document itself, hence the utility of its being both an expressive and impressive document. There is no sentiment in mutuality. It is a commercial law, paramount to a law of nature that the greater the manufacturer's profit the greater the jobber's. Do not allow buying to degenerate into bargain hunting. I will reiterate the necessity of contracts being signed by responsible officers of the company to guarantee their integrity. I will also say that the matter of contracts is bound up with a question of restricting prices and conditional selling, questions which would not exist; which would never have were there more loyalty. We are here, gentlemen, to cultivate this loyalty but our loyalty must not cease when we leave Hot Springs. We must take it with us to our offices and constitute ourselves fearless leaders of commercial integrity. One thing at a time is a safe rule. Let me, therefore, express the opinion, in conclusion, that the signing of all contracts by responsible officers and directors will do more to promote the integrity of contracts than the concentrated moral efforts of all the preachers of Christendom.

A thoughtful paper was received from President F. S. Kretsinger, who is now in Europe, on Cheap Letter Postage vs. Rate of Second Class Matter, in which the subject was exhaustively treated, as will be noted by the following:

CHEAP LETTER POSTAGE VS. RATE OF SECOND CLASS MATTER.

By F. S. KRETSINGER.

Every business man, whether manufacturer or merchant—in fact, every individual correspondent—is interested in obtaining a lower rate of postage for letters. We may each day give no heed to the use of the little redstamps, costing only two cents each, but, when at the end of the year, we scrutinize the postage account on the bookkeeper's annual statement, we notice its size, and it gives us some concern.

When we are informed by the Government that at two cents per ounce for first class postage, there is an enormous profit, we may well ask ourselves why are we charged so high a price for carrying our letters? The answer is found in the annual report of the Post Office Department; and it is clearly evident that letter postage is bearing the brunt of the expenses of the Post Office Department of the Government, and that Second Class matter (the most of which is really merchandise) is being carried at a loss to the Government.

As a matter of fact, the Government is practically paying a subsidy to a certain class of business; or in other words, is, and for some years has been doing in a measure, a Parcels Post business by carrying certain merchandise at one cent per pound, and at a loss of three cents per pound, and is in part, making up for this loss by a two cent letter postage rate.

It is far from my purpose in introducing this subject of letter postage rate, to make any attack on any business industry that may be favored by the Government in carrying that industry's product to the markets, but in making comparisons, I am compelled to make use of the convincing evidence offered mainly by the Post Office Department; and if such comparisons are odious, it is only because of the existence of certain practices, and for which the beneficiaries, and not we, are responsible.

As my main object and purpose is to consider the subject of Letter Postage, without reference to Third or Fourth Class or Free postage matter, I will only allude in connection with it, to that of Second Class matter, because of the peculiar conditions there existing.

The fiscal year of the Post Office Department ends with June 30th, and on that date in 1902

The Total Expenditures for the Department were \$124,786,000.00
The Total Receipts of the Department were 121,848,000.00

The Total Loss being in round numbers \$2,938,000.00

WEIGHT.

The weight of First Class Matter—letters and postal cards, was 101,104,000 lbs.

or 12¼% of the total weight of all classes carried.

The weight of Second Class Matter at one cent per pound, was 490,963,000 lbs.

and was nearly 66% of the total weight of all classes carried.

REVENUE.

The revenue from these two classes was:

First class.—\$90,951,000, or 78% of the total revenue.

Second class.—\$4,821,000, or only 4 13-100% of the total revenue.

During the fiscal year ending June 30, 1903,

The total gross receipts of the Post Office in all its Departments were \$134,000,000
And the total expenditures were about 138,500,000

Showing a deficit of \$4,500,000

Of this amount, letter postage (First Class Matter—paid for largely by the business world) furnished only 14% of the weight, but paid about 78% of the revenue—of this, nearly 9-10 was profit to the Government.

But of Second Class matter—periodicals—there were 545,000,000 pounds carried, covering 65% of the total postage tonnage, but contributing less than 4% of the total revenue, or about \$5,095,000. Had Second Class matter shared in the expense account, instead of contributing a little over \$5,000,000, it would have contributed over \$95,000,000.

During the year ending June 30, 1904, the loss to the Government was \$8,500,000

and the weight of Second Class matter carried at 1 cent per pound, was about 611,000,000 lbs.

or nearly 70% of the total weight carried, while in the matter of Revenue, that of First class matter amounted to \$106,860,000

or 78% of the total; while the total receipts from Second Class matter was only \$5,697,000

or only 4% of the total.

Taking these three years together, it shows an increased loss to

F. S. KRETSINGER, PRESIDENT.

the Government each year, and that whereas the tonnage of First Class Matter was only 13 1-4% of the whole, that of Second Class Matter was from 65 to 70% of the whole; and these conditions are reversed in the matter of revenue—for the revenue of First Class Matter was practically 70% of the whole, while that of Second Class Matter was practically 5%.

And it may interest you and all other tax-payers to know that the enormous growth of the Merchandise-Periodical Industry is quite largely responsible for the alarming deficit in the Post Office Department, which during the year ending June 30, 1905, exceeded the great sum of Fourteen Million Dollars (\$14,000,000.00).

On June 23, 1874, Congress established a pound rate of postage on Second Class Matter—that is, printed mallable matter, regularly issued at stated intervals—the postage rate being 2 cents per pound for newspapers, and 3 cents per pound for magazines. Later both magazines and newspapers were given a uniform rate of 2 cents per pound; and again on March 3, 1885 (to be effective July 1, 1885) the rates on both were reduced to 1 cent per pound. To obtain the benefit of this low rate, it is only required that they be regularly issued at definite intervals, of printed paper sheets, numbered and dated and issued from a regularly constituted office of publication. Excluded from these liberal provisions were publications issued strictly for advertising purposes, and those circulated at merely nominal rates, and a requirement is, that they must have a legitimate list of subscribers—all very small obstacles, which are easily overcome by any wide-awake publisher.

According to the Post Office Official Estimate, the actual bare expense of hauling, receiving and distributing such matter, is over 4 cents per pound, and yet for this was charged only 1 cent per pound.

About 1876 the total sales in the entire country of monthly publications, in the aggregate, did not much exceed 5,000,000 copies per annum; while the monthly publications of all kinds now exceed 350,000,000 copies per annum. The popular ones average about one pound each in weight, and are therefore carried for 1 cent each from one end of the country to the other.

In Germany (small, geographically, as compared with this country)

periodicals pay 5 cents per pound for a single pound; a little higher rate for fractions of a pound, and 7 1-2 cents each for two pound packages.

In England (another country comparatively small in area) the rate is 4 pence—about 8 cents per pound.

Alluding in each instance to the year 1903.

The reasons advanced for obtaining a low postal rate on publications, was that the masses might be furnished with cheap reading. To what extent is this true? Take for instance the May, 1905, numbers of the following prominent periodicals, and note their total number of pages, in which the pages of literature and reading matter are about as follows:

| Publications. | Literature. | Advertising. | Total Pages. |
|-------------------------|-------------|--------------|--------------|
| Scribners | 126 | 149 | 275 |
| Harpers | 160 | 172 | 332 |
| Munseys | 125 | 130 | 256 |
| McClures | 113 | 146 | 259 |
| Country Life in America | 44 | 86 | 130 |
| Review of Reviews | 126 | 165 | 291 |

| | | | |
|-------------------------------|-----|-----|------|
| Totals (Including title page) | 614 | 848 | 1543 |
| Per cent of whole | 45% | 55% | |

Or 22% more pages of advertising than of reading matter. And upon the examination of kindred periodicals published since this date given, similar conditions will be found to prevail.

Such periodicals are, to the extent of 55% at least, as much merchandise as any of the goods made by any one of the members of our Associations, or that are sold by any merchant.

I have not singled out these valuable and popular journals for the purpose of criticising or of passing judgment on them, but rather because they are all well known, and they happen to be at hand when this article was having my attention.

While there are others whose advertising pages are almost of equal value, interest and merit with their literary parts, there are doubtless a very large number of periodicals distributed under cover of the present law, and which are not educating; and which are of little or no value in our homes or offices. For instance, there is a certain journal published once a month (the subscription price of which is ten cents per annum) for which they claim a guaranteed circulation of 1,250,000 copies per month, or 15,000,000 copies annually. It is poorly printed on common paper, and the so-called "literary" part of it of a very ordinary character, while the advertisements, which cover more than 40 % of its pages, may be called of extraordinary character, such as "Hypnotism," "Marriage Directories," "Lost Treasure Rods," "Fortune Telling," "Remedy for Pits," etc.

But taking a general average of periodical literature of all kinds, and assuming that only one-half of it is advertising matter, and as the total quantity of second class mail matter carried by the Government last year, was approximately 611,000,000 pounds, it is evident that 305,500,000 pounds of advertising matter was carried by the Government at 1 cent per pound, or for \$3,055,000, and at a dead loss to the government of 3 cents per pound, or \$9,165,000, a sum exceeding the total loss of the Post Office Department in carrying all mail matter for that year.

If you wish to advertise in one of the popular magazines, even the high priced ones, they will give you a page for \$500.00 each issue, and guarantee a monthly issue of 500,000 copies—they will carry your advertisement to the 500,000 purchasers for \$500.00; but if you wish to send a circular by mail to these 500,000 people, the Government will charge you \$5,000.00 postage; and besides this, you must pay for the printing, the envelopes and the addressing—and all because the Government will carry these same circulars in magazine form for the magazine publishers for 1-10 what the Government charges you.

One thousand business letters are estimated to weigh (on the average) 18 pounds, the postage on same being 320.00; while the postage on 18 magazines, weighing approximately 18 pounds, is only 18 cents—a marked difference between \$20.00 and 18 cents.

Taking all of these facts into consideration, is not a readjustment of postage rates in order? Why should every man, woman and child, every mercantile institution and the public generally, be required to pay 2 cents for every letter of one ounce or less, or on an average, more than \$1.00 per pound postage for letters, while merchandise in the form of advertisements is carried under certain forms, for 1 cent per pound?

It is time for business men by and through various Associations and Organizations, to give this subject some thought, and some forceful attention. As matters now stand, there is unjust discrimination, which should not continue.

As the subject is a new one for this Association to take up and consider, I purposely submit this very brief report without argument, any further than to say, that from the evidence presented, and which is a simple statement of facts, no other conclusion can be drawn than that a re-arrangement should be made in the Classification of Mailable matter and the rates of postage on same. Were there an equitable adjustment made, even treating generously, such classes as may be entitled to special favors, it is evident that a material reduction could be made in the letter postage rate, and without loss to the Government.

F. S. KRETSINGER,

President, American Fork & Hoe Co.

THE MILBRADT MFG. CO.

At a recent meeting of the Ebbing Mfg. Co., St. Louis, Mo., the name of the corporation was changed to the Milbradt Mfg. Co. and G. A. Milbradt, originator and patentee of the Milbradt rolling step ladders, was elected president. The Milbradt Mfg. Co. will continue the manufacture of these step ladders, and other store specialties, and will assume all obligations of the former company.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

PENALTY FOR MARKING UNPATENTED ARTICLES "PATENTED."

QUESTION: Is it a violation of the United States Patent Law to mark an article "patented" when no patent has been obtained. If so, what is the penalty?

REPLY: Section 4801 of the Revised statutes provides that every person "who in any manner, marks upon or affixes to any unpatented article the word "Patented," or any word importing that the same is patented, for the purpose of deceiving the public, shall be required, for every offense, to a penalty of not less than one hundred dollars, with costs; one-half of said penalty to the person who shall sue for the same, and the other to the use of the United States, to be recovered by suit in any district court of the United States within whose jurisdiction such offense may have been committed."

SALE OF GOODS INDUCED BY FRAUD—SELLER'S RIGHT TO RESCIND THE CONTRACT.

QUESTION: "A" was induced to sell goods to "B" on credit for \$500, because "B" stated that he was worth \$5,000. This statement was false and at the time he made it "B" was insolvent. After "B" got the goods he sold them to "C," who paid \$550 for them and had no knowledge of "B's" misstatements. "A" has learned of the fraud and wants to take the goods back. Can he recover them from "C"?

REPLY: He cannot. Where a purchaser by fraud induces the seller to sell goods to him on credit, and replevy the goods so long as they are in the possession of the fraudulent vendee. But when the goods are sold to an innocent third person who buys them for value without the knowledge of the fraud, the seller's right to recover the goods as soon as they have passed into the hands of an innocent purchaser for value.

GUARANTY OF COLLECTION—WHEN LIABILITY ARISES.

QUESTION: "B" gave a note to "C" for some goods for \$250. At the time the note was given "A" endorsed on the note "I hereby guarantee the collection of the within note in consideration of the payee taking the same." The maker has since become insolvent. Can "B" proceed at once against "A" to recover the amount of the note?

REPLY: This was a guaranty of collection and not a guaranty of payment. One who becomes a guarantor of collection agrees simply that the claim is collectible by due course of law, and only promises to pay in case the note cannot be collected by suit. In other words before the guarantor can be held, judgment must have been recovered against the principal debtor and the execution issued thereon must have been returned unsatisfied in whole or in part, and this judgment must have been recovered without unnecessary delay. The fact of insolvency is no excuse for the failure to prosecute. It follows that "A" cannot be held liable until a judgment has been obtained against "B" and an execution returned unsatisfied. It would be otherwise if the guaranty were one "of payment" instead "of collection." The guarantor of payment becomes liable as soon as the principal debtor makes default.

EXECUTOR'S RIGHTS OVER PROPERTY IN ANOTHER STATE.

QUESTION: A person dies in Pennsylvania leaving personal property in New York and other States. What must be done to collect this property?

REPLY: The ordinary course is to take out letters testamentary or letters of administration in the State wherein the decedent resided at the time of his or her death. The executor or administrator appointed by this jurisdiction may collect the assets in other states, provided the persons having possession or control of them will voluntarily turn over the property to the executor or administrator. But the executor or administrator appointed by one state has no power as such to bring suits or enforce the payment of claims in other jurisdictions. Unless the persons having control of the assets in New York and other states will voluntarily turn them over to the Pennsylvania administrator, he must procure ancillary letters in each State in which there are assets, before he can compel their delivery to him.

RECENT TRADE PUBLICATIONS.

GEORGE H. BISHOP & Co., Cincinnati, Ohio, with factories at Lawrenceburg, Ind., and branch offices at 100-102 Reade Street, New York, and 103 Lake Street, Chicago, have recently issued their Revised Catalogue No. 3, showing their patent ground Pond Ice Saws, One Man Saws, Narrow Crosscut Saws, Felloe Webs, Fay's Patent Scroll Saws, Hand Ice Saws, Cincinnati Plastering Trowels, Hand-Made Hand Saws, Saws for the little ones, Mitre Box Saws, Patent Back Saws, Stair Builders' Saws, Adjustable and Interchangeable Saws, Compass Saws, Keyhole Pads and Saws, Pruning Saws, Beef Splitters, Butcher Saws, Hotel and Kitchen Saws, Mincing Knives, Choppers, De-Horning Saws, Hedge Knives, Beet Knives, Tobacco Spuds, Cabinet Scrapers, Cane and Corn Knives, Wood Saws, etc.

ROME MFG. Co., Rome, N. Y., present their Catalogue "D" of the "Rome" line of Nickel Plated Copper Ware. They are manufacturers of Copper Tea Kettles, under the name of the Rome, Stanwix and Mohawk; Tea Kettle Inset Pails, Copper Range Kettles, Nickel Plated Copper Tea and Coffee Pots, Individual Pots, Pitchers, Serving Dishes, Cream Pitchers, Tea Sets, Brass Trays, Cuspidors, Dippers, Drinking Cups, Wash Basins, Stove Tanks, Wash Boilers, Insect Guns or Sprayers, Trimmings for Brass and Iron Bedsteads, Brass Spools for drawers of fine wire; Bicycle Pumps, Physicians' Inhalers, Disinfectors and Vulcanizer Shells. This is a very attractive line of goods, and the catalogue will be found of interest.

E. C. STEARNS & Co., Syracuse, N. Y., are sending out their illustrative and descriptive catalogue of Hardware. This includes their Ball-Bearing Lawn Mowers, Reversible Lawn Sprinklers, Screen Door and Window Corners, Window and Door Screen Frames, Hold-Back Spring Hinges, Sliding Barn Door Locks, Vanderbilt Sash Balances, Sliding Door Hangers, Star Thimbles, Ceiling and Register Plates, Vulcanized Fibre Mallets, Swivel Jaw Blacksmiths' Tongs, Folding Mitre Boxes, Saw Filing Guides and Vises, Saw Filing Tools, Baxter "S" Wrenches, Bench Hooks and Stops, Square Beam Vises, Saw Sets, Eccentric Clamps, Carpenters' Clamps, Door Frame Clamps, Carriage and Wagon Jacks, Spoke Shaves, Plug Cutters, Pointers, Hollow Augers, Spoke Tenoning Machines, Plumb Bobs, Oil and Molasses Gates, Green Bone Vegetable and Meat Cutters, Hand Rail Brackets and Breast Strap Slides.

UTICA PIPE FOUNDRY Co., for whom Charles Millar & Son Co., Utica, N. Y., are selling agents, have issued a price list of their goods, which include Cast Iron Soil Pipe and Fittings, Cast Screwed Steam Fittings; also Plumbers' Castings and Specialties. In an introductory note to plumbers, they state: "All of this material is made almost exclusively from the best quality of Lake Superior iron, and is noted for its softness and strength. Our patterns and our entire equipment are new, and we have spared neither labor nor expense in securing the best methods and machinery for the purpose. We are now also making a very heavy and superior quality of Cast Iron Screwed Fittings for Wrought Iron Pipe."

THE DUCHARMES & Co., Shelburne Falls, Mass. Catalogue No. 2 of their Improved Electricians', Hand D, Peerless, O. K. No. 9 and Dandy Jewelers' Screw Drivers, Screw Driver Bits, Our Perfect Nail Sets, Ice Picks, Scratch Awls, Rimmers, Center Punches, Tinners' Punches, Ship Carpenters' and Belt Awls. A price list of their tools is included, and the company state: "We make a specialty of high grade tools, which are specially hammer forged, hardened and tempered, using nothing but the highest grade stock in both steel and handles. We guarantee our tools to the trade, and will replace free of charge any that break, bend or are not perfect in all respects. Each driver is tested to break a screw head in its size."

BRODERICK & BASCOM ROPE Co., 805-809 North Main Street, St. Louis, Mo., with branches at 19 Murray Street, New York, and Seattle, Wash., have issued their Price List "G" relating to Wire Rope for various purposes, and includes Hoisting Rope, Yacht Rigging, Wire Sash and Bell Cords, Hawsers, Running Rope, Mast-Arm Rope for arc lights; Strands or Guy Rods, Rope Hooks and Couplings, Switch Ropes, Ballast Unloaders, Wrecking Ropes, Cables, Flat Ropes, Sockets, Hooks and Thim-

bles, Turnbuckles, Ferry Travelers, Rope Blocks, Rope Sheaves, Snatch Blocks, Rope Transmissions, Tackle, Manila and Sisal Rope, Stevedore Rope, Oakum, Twines, Marlines, etc. It is almost impossible to specify the precise uses to which Wire Rope is adapted, but the company enumerate some of the purposes for which it is much preferred: For underground haulage, tail ropes, hoisting from deep shafts, inclined planes, transmission of power, ferry ropes, guy ropes for derricks, suspension cables, signal cord, ships' standing rigging, tiller ropes, guy ropes for smoke stacks, wire tramways, cable railways, endless wire ropeway for the transportation of material over mountainous and difficult roads, switch ropes, etc.

GEORGE M. EDDY & Co., 345-353 Classon Avenue, Brooklyn, N. Y., are offering their new catalogue of Measuring Tapes of linen, cotton and steel for all purposes. In an introductory note, they state: "This business was started in the year 1844 by George M. Eddy who devoted a lifetime to the manufacture of Measuring Tapes and the name of 'Eddy' in this connection has always been recognized as a standard for quality and excellence. For exact measurements we always recommend Steel Tapes as being the best, most durable and giving the most satisfactory results." Their Steel Tapes are manufactured under the names of Paine's, Friend, Star, Empire and Self-Winding. They also illustrate Metallic Tapes, Bent Leather Cases, Pressed Leather Cases, Patent Leather Cases, Russet Leather Cases, Enameled Steel Cases, Pocket Tapes, Architects' Tapes, Tailors' Measures and Advertising Tapes.

CENTRAL NEW YORK VARNISH Co., 55-59 North Genesee Street, Utica, N. Y. Catalogue pertaining to Coach and Carriage, Polishing, Rubbing and Miscellaneous Varnishes, Paste and Liquid Fillers, Shellacs, Utica Varnish Stains, Stove Pipe Enamel, Ready Mixed Paints, Floor and Deck Paints, Piazza Floor Paints, Roof Paints, White Enamel Paints, Bath Tub Enamel, Colors in Oil, Graining Colors, etc.

ROBINSON CLAY PRODUCT Co. OF NEW YORK, Flat Iron Building, Broadway and Twenty-third Street, New York, successors to the Syracuse Stoneware Co., of Syracuse, N. Y., and the New York Pottery Co., of New York, have issued a catalogue of their products, which include such articles of Stoneware as Butter Jars, Water Jars and Covers, Low and High Meat Tubs, Churns, Baltimore or Tie Jars, Preserve Jars, Dutch Pots, Stove Tubes, Black and White Glazed Pans, French Pots, Shoulder Jugs, Syrup and Fruit Jugs, Druggists' Jugs, Vase Shaped Jugs, Railed Jugs, Harvest Jugs, Beef Extract Jugs, Oyster Jugs, Ink Jugs, Ink Bottles, Beer Bottles, Blacking Bottles, Beer Mugs, Root and Ginger Beer Bottles, Rubber Cement Bottles, Coffee Urns, Glazed Flower Pots, Hanging Baskets, Rose Jars, Umbrella Stands, Soap Jars, Stew Pans, Meat Roasters, Cooking Sets, Pie Plates, Butter Bowls, Mixing Bowls, Bean Pots, Batter Pails, Pipkins, Growlers, Beer Steins, Stone Pitchers, Coffee Pots, Mustard Pitchers, Vegetable Dishes, Spitons, Jelly Cups, Snuff Jars, Percolators, Water Kegs and Filters, Poultry Fountains, Dog Feeders, Tea Pots, Ale Jugs, etc. Everything that can be thought of in the way of household necessities will be found within its pages.

J. M. KING & Co., Inc., Waterford, N. Y., have published a Revised Price List of the tools of their manufacture, including Blacksmiths' Stocks and Dies, Plug and Taper Taps; Machinists' Stocks and Dies, Hand Taps, Machine or Nut Taps, Machine Screw Taps, Pipe Taps and Reamers, Pump Stocks and Dies, Combined Drill Reamers and Taps, Combined Wire Shears and Pliers, Combined Pliers and Stretchers and Wire Cutters.

"UNIONS FOR STEAM PIPES."

We have been favored with a little pamphlet entitled "Unions for Steam Pipes," being an illustrated description of the several varieties of unions with valuable suggestions concerning same by the well-known writer on such matters, W. H. Wakeman, an expert steam engineer and author of well-known books on steam engineering. This pamphlet is a reprint from Dixon's house organ Graphite, and they would be very glad to send a copy free of any charge to any engineer or any steam fitter, or any one interested in steam pipes.

NEW GOODS AND SPECIALTIES

NATURAL DOUBLE-WING TROUT FLIES.

The Clark-Horrocks Co., Utica, N. Y., are putting on the market a seasonable article in trout flies. These flies, instead of a single wing, have double wings spread out, making an excellent imitation of a natural fly. They are made in all the popular

DISPLAY CASE TO SHOW TROUT FLIES.

wing patterns, and are put up in an attractive partition box for case or counter display, shown in the illustration herewith. These boxes contain a gross or half gross of flies, as ordered. The convenience of this method of packing, and the attractiveness of the display are expected to appeal to expert fishermen as well as to merchants handling fishing tackle.

ORNAMENTAL WALL RACK.

Ideal Register and Metallic Furniture Co., Detroit, Mich., are the manufacturers of the Ornamental Wall Rack illustrated herewith. It is furnished in two styles: Oxydized copper or dead black finish, and in three designs as follows: No. 1, extreme

ORNAMENTAL WALL RACK.

height 20 inches, projecting four inches from the wall; No. 2, extreme height 10 inches, having two hooks, and a match box; No. 4, extreme height 12 inches, having three hooks. These

racks are described as extremely ornamental in appearance, and well adapted to many places where plainer strap racks or ornamental standing racks, etc., would be considered unsightly or inconvenient.

GEM RURAL MAIL BOX NO. 3.

C. A. Peck Hardware Co., Berlin, Wis., are the manufacturers of the Rural Mail Box illustrated herewith. It is styled the Gem No. 3, and is marketed along with Gem No. 1 and No. 2 and the Jewel. The Gem No. 3 Mail Box is described as of high-

GEM RURAL MAIL BOX NO. 3:

grade material in every respect, the body being made of No. 20 galvanized steel, having the ends cast and well galvanized. It is painted green with the letters U. S. Mail in red, a combination which is said to give a pleasing and striking appearance. There is a drop door with catch at the top, so that all the carrier has to do is to jerk it open and slam it shut. The door contains an extra large drop-letter slot which will accommodate newspapers and small packages.

A RATCHET ATTACHMENT FOR DIE STOCKS.

The frequent necessity for doing pipe work and for making alterations and repairs to piping in close and cramped quarters has brought several ratchet stocks on the market. These all require that the buyer purchase a complete stock in order to avail himself of the ratchet.

The Armstrong Manufacturing Company, Bridgeport, Conn., however, makes ratchet attachments fitting their various sizes of stocks, which are easily attached to or removed from the stock by simply removing a thumb screw. This allows the pipe-fitter to use the regular Armstrong Stock on ordinary work, and have only the added weight of the ratchet, in cases where it is necessary to thread the pipe in confined space such as in ditches or where pipe runs near a wall or ceiling.

ARMSTRONG RATCHET ATTACHMENT

The Armstrong Ratchet consists in a light but strong malleable iron ring, which carries the ratchet and pawl, and which is slipped over the barrel of the stock and securely attached to it by a thumb screw. No extra handle is provided as the extension is tapped to receive one of the stock handles. It may be instantly adjusted for turning the stock in either direction.

This is a strong and thoroughly reliable tool that has proved of great service and value to pipe fitters and engineers, enabling them to use their regular Armstrong Stocks for threading pipe in positions where otherwise they would have to take down the pipe.

A complete 48 page catalogue of pipe-fitter's tools and machines will be mailed on application to the Armstrong Manufacturing Company, Bridgeport, Conn.

WAGNER ROOF BRACKET.

Wagner Mfg. Co., Cedar Falls, Iowa, are introducing to the trade the Wagner Roof Bracket No. 40, shown in the accompanying illustration. In its construction it is made of steel, black japan finish, and will take a 2x6 inch timber. In Fig. 2 is shown a section of roof shingled, and also one not shingled, the brackets being used both for sheathing and shingling. To use for the former purpose, nails should be driven into the sheathing, and the bracket hooked on to the same through the slotted

WAGNER ROOF BRACKET.

holes at top. To use for shingling, the upper end of the bracket should be pushed under a layer of shingles. The teeth on the lower brace, which may be observed in Fig. 1, will then catch and securely hold in the two lower layers of shingles. The timber

METHOD OF USE ON ROOF.

is prevented from slipping or turning up edgewise by a safety hook at the top of the upper brace. The brackets come packed one dozen in a box, the gross weight of which is 23 pounds.

THE ABBOTT DOCK CUTTER.

The American Fork & Hoe Co., Cleveland, Ohio, have recently placed upon the market the Abbott Dock Cutter, a new tool with more apparent merit than any invention that has recently come out in the line of farming tools, and which promises to become more popular than the old-style Thistle and Dock Cutter.

Docks, Canada Thistles and other noxious weeds grow a very large root, sometimes one and one-half inches to two inches in diameter, hard and fibrous, impossible to be pulled. There has been no tool made and in use that was really suitable for the work. The narrow plain end article that has been made in the past loses its sharpness and efficiency, and when the corners become rounded off, they easily slip away from the root, and a stone or other obstruction will deflect them. The consequences are that a man purchasing one of the old style uses it for a short time and then throws it away. In the new design, effort has been made to seek an improvement which will present a form of cutting edge that will be efficient in engaging, holding and cutting the root; one that will be convenient and ready for manipulation, strong and not easily dulled by contact with stone or other articles nor caused to glance away by them. The blade is provided with a cross bar of one piece with itself, making it possible to use the foot to assist the operation. No more strength is required to cut the roots of weeds with the tool than is necessary to drive it through the ground. The cutting edge is made in the form of an inverted "W" and has many advantages, the principal one being that the center prong splits the root of the dock or the weed which is frequently large and very tough, and cuts in conjunction with the outer edges. The outer edge in conjunction with the inner tooth forms four cutting blades, and they have a shearing out which makes the operation very easy to perform. This shape of the edge also gathers the root into itself, prevents it slipping away, even though the blade is not ac-

curately aimed. The blade is sufficiently long to reach the root of any weed and properly curved, so that when working in a natural spading position, it will reach under the weed and surely cut the root. The angles of this cutting surface shaped like a

THE ABBOTT DOCK CUTTER.

"W" are so made that it is possible to grind them with a square face emery wheel, and they are tempered just sufficiently hard so that it is possible to restore the edge with a file. Furthermore, the beveling is done on the under side of the tool and the natural grinding of the earth as the tool passes through it tends to keep the edge sharp.

IMPROVED TYPE OF HOTEL LOCK.

Sargent & Co., New Haven, Conn., and 149-153 Leonard Street, New York, have just put on the market an improved type of hotel lock, as here illustrated. There are two patterns of this lock made, 6250 P, with key holes below the knob, and 6260 P, with key holes above it, this feature being the only difference be-

FIG. 1.—IMPROVED HOTEL LOCK.

tween them. The dimensions are 6 by 3½ inches with 2¾ inches backset. The fronts are of bronze metal and there are three heavy bronze bolts and three wrought steel tumblers. The special feature of the locks is the arrangement of the interior mechanism, so that it is possible to operate them with four different keys. First there is the guest key, which can be used in

only one lock, and that when not locked on the inside, two of which are supplied with each lock. Next in order is the master or floor key, which operates the locks on all rooms on a floor, when not locked on the inside, designed for the maid's use. Then comes the grand master key, which throws the lock bolts on all room doors in the hotel, when not locked from the inside. The fourth style of key is the emergency key, by the possession of which the locks on all room doors in the hotel can be unlocked from the outside, even when locked from the inside with the guest key in the lock. This key is designed exclusively for the

FIG. 2.—SHOWING THE FOUR TYPES OF KEYS.

use of the proprietor or manager, and kept, for instance, in the office safe, accessible only to the owner or his designated representative, for use only in case of great necessity, such as suicide of the occupant of the room. When ordered with these keys, the locks are arranged so that when locked from the inner side by the key they cannot be operated from the corridor by the guest key, the master or floor key or the grand master key, but can be operated by the emergency key; and while the door is locked on the inside with the guest key the key cannot be taken out, thus always insuring the key being in the lock in case of fire or other peremptory necessity for its use. The guest key is operative from the inside at all times, whether or not the lock is locked from the outside. The outside knob regularly operates the latch bolt at all times except when the door is locked from the inside, at which time the outside knob is stationary. The advantage of the stationary knob is to indicate that the room is occupied, is to show the maid that the room is occupied so that she will not awaken or disturb an occupant by inserting the master key in the lock.

NEW DOUBLE BARREL HAMMERLESS SHOTGUN.

J. Stevens Arms & Tool Co. have recently gotten out their new No. 325 Double Barrel Hammerless Shotgun, of which we give an illustration, which is their latest production in the shotgun line, and is now ready for delivery. The action is of the Anson & Decey type, with the Stevens checkhook, relieving the forearm of all strain and which proved so popular last year. The

NEW DOURLE BARREL HAMMERLESS SHOTGUN.

barrels are of especially prepared high pressure steel, choked-bored for nitro powder. Has extension matted-rib with their reinforced breech; oiled, walnut stock with pistol-grip checked, and patent snap forearm checked. The regular length of stock is 14 inches, with 2 inch drop. Can be supplied in 12-gauge, with 28, 30 and 32-inch barrels, and in 16-gauge, with 28 and 30-inch barrels only. Weight, $7\frac{1}{4}$ to $8\frac{1}{2}$ pounds. The list price of this gun is \$20.00. Further particulars can be obtained from the catalogue which will be furnished on request.

"BARTH-WEILER" LIFTING JACK.

The Barth Manufacturing Co., Milwaukee, Wis., are introducing to the trade the "Barth-Weiler" Lifting Jack, which we illustrate herewith. This Jack is reversible. A simple reversing mechanism enables the operator to raise or lower the load half a notch, or lower the load half a notch per stroke of the lever, and by means of a tripping device the load can be dropped at once.

Only the best malleable iron and steel castings are used in the manufacture of these Jacks. Every Jack is tested to its listed capacity in a hydraulic press, the pressure in all cases being applied to the foot on the rack. Four styles are furnished in the

"BARTH WEILER" LIFTING JACK.

single lever, and four in the compound lever constructions. In the single levers the capacities range from three to four tons, and in the compound lever constructions the capacities run from five to nine tons.

LABOR CONDITIONS IN FRENCH WINE DISTRICTS.

Consul Miller, of Rheims, furnishes the following report on the relations that exist between the manufacturers of champagne and their workmen:

There are thousands of men employed here in the great champagne industry. In recent years strikes have been unknown. The employers have discovered a preventative and have demonstrated its practicability. This is the bonus system. Every employee who merits it is paid annually a bonus in addition to his wages. The bonus is not made part of the contract between employer and employee, but it is well understood that employees who make good records will receive it. No employee knows what his standing with the firm is until the day for paying bonuses arrives. As pupils in the public schools have their standing in politeness, respect for and obedience to their teachers, punctuality, and ability written in their weekly "notes," so the employees of the champagne houses have their records carefully registered.

The head of one of the great manufacturing houses here, who is frequently in America and is an indirect employer of labor there to a certain extent, speaking about the frequent strikes in the United States said: "While I have great respect for the skilled workman in the United States and what he accomplishes, I regret that, generally speaking, the laboring people of your country have not been trained to respect their employer and demonstrate that loyal spirit toward the employing firm as they should have been, and often the employer does not respect them as he should."

The workingmen in the champagne trade have an organization to which their employers contribute liberally and otherwise encourage. The object of the society is for mutual help in case of sickness or misfortune. Every member's wife who has a child born has the doctor's bill paid, and in addition receives twenty francs (\$4) with which to purchase the infant's first outfit of clothing.

OUR BRITISH LETTER.

London, June 12, 1906.

INTERNATIONAL TRADING ON THE INCREASE.

As the result of the Postal Congress at Rome, the Postmaster General has intimated that next year the unit of weight for letters to and from all countries in the Union will be doubled, so that letters will then be forwarded from Great Britain to America and other places at a postage of 2½d. up to one ounce in weight, instead of only half an ounce as at present. This will be regarded as a boon by British makers, who frequently wish to enclose lists and other documents in their correspondence. Everything which reduces the cost of correspondence is a step in the right direction, and tends to bring into closer union the traders in different countries. International trading appears to be on the increase, and in the course of conversation with British makers, I find that many English manufacturers are sending parcels of British-made goods to the States, through shippers and merchants, more frequently than was formerly the case. At the same time, it is well known that American goods are reaching this country in larger quantities than formerly, and especially is this the case in small sundries which are handled so extensively by British Hardwaremen.

THE HARVESTING MACHINERY SEASON.

The Agricultural Show season has commenced in good earnest, and British ironmongers who sell implements and machines are busily engaged in supplying their clients with harvesting machinery. The Bath and West Agricultural Society's Show, which is considered to be the most important event in the agricultural world in the Southern and Western counties of England, has just been held at Swindon, an important railway town, but situated conveniently, as it is easily approached from the agricultural districts by which it is surrounded. The show was most successful, and was attended by many of the leading manufacturers, including a number of American firms, who once more demonstrated the excellent qualities of the harvesting machinery manufactured in such large quantities in the United States of America. The leading makers, many of whom are connected with the International Harvester Trust, are carried on as separate companies in Great Britain; in more than one instance two or three of the branches being represented by one firm, who make leading lines of implements and machines firmly established in this country, taking up in an off season such side-lines as cultivators, manure spreaders, and other appliances, chiefly of American manufacture. The Bath and West possesses several curious features, almost unknown in any of the other great agricultural shows in this country, chiefly relics of old institutions which have been incorporated at various times. One of the most interesting of these is an Art and Furniture Exhibition, held in a building in the show grounds. It adds an artistic side to the implement trade, and forms a pleasing relief to the somewhat monotonous round of exhibits of cattle and implements, and also tends to elevate the tastes of agriculturists and others who frequent the show. Another attraction at this popular Exhibition is the Horticultural display and Exhibition of Forestry, in which there are technical exhibits, showing the growth and development of plants, and models, demonstrating insects and other pests which farmers have to contend with in the cultivation of the soil. The Royal Agricultural Society of England have now completed their preparations for the "Royal," which is to be held at Derby during the last week of the present month, and I hope in my next letter to give you an outline of some of the chief features of interest in connection with that exhibition, and also to bring under the notice of your readers the names of some of the principal American firms who will have stands, and briefly review the American implements which are popular in this country.

IRONMONGERS' ASSOCIATIONS.

In my last letter I gave you an account of the Annual Conference of the Ironmongers' Federated Association, which was held in London early in May. It was a most successful event, and the matters brought under discussion have found local associations much matter for consideration, and also have afforded the members opportunities of bringing under notice of their fellow ironmongers, the advantages of association. The work of the last few months has been continuous and progressive, and the associations, now placed upon a firm basis in this country, have made considerable headway, not only in the increase of their number, now upwards of 50, but also in membership. The network of associations which stretches to many remote districts

in England, is gradually closing around those localities where ironmongers have heretofore held aloof from association, and doubtless the time will not be long when the meshes in the net will be closed in, and associations will be dotted over all parts of Great Britain; bringing ironmongers into close fellowship with one another, and enabling them to carry on the Hardware business on more profitable lines, and especially to compete with the larger stores, which institutions have been instrumental in taking away the more profitable branches of the Hardware trade. Just now there is a lull in the work, and some tendency to postpone serious business matters until the summer months are over, and picnics, river excursions, and Summer outings are taking the place of business gatherings. The river excursion of the London Ironmongers' Association will take place at the end of the present month, and according to the latest reports, there will be a record attendance. Many London ironmongers and their friends supported by contingents from different parts of the country, have signified their intention of taking part in this now annual trip on Old Father Thames, which is so highly appreciated, and made a source not only of pleasure but of business discourse between ironmongers residing in different parts of the Metropolis. London has now grown to such an extent, that many of the suburban ironmongers are separated from one another, even to a greater degree than provincial Hardwaremen in towns some twenty or thirty miles apart, and it is felt on all sides that some system of branch associations in London is not only desirable, but almost necessary. At the last general meeting of the association held on June 12, the proposed incorporation of the I. F. A., was the principal topic of discussion, nearly all the members present being in favor of immediately carrying out the resolution passed at the last Conference, when it was decided, as soon as possible, to seek a Charter of Incorporation. By obtaining such a charter, the I. F. A. will become a corporate body, having power to act on behalf of its members, and placing the officers in a more assured position, the benefit of incorporation being considerable, not only directly, but indirectly, giving the association a status in the trade and among the manufacturers and merchants of this country.

MUNICIPAL TRADING.

Municipal trading still occupies a prominent place in the politics of Hardwaremen, most of whom are opposing the municipalities trading, even at a profit to the general body of ratepayers, when such trading is admittedly detrimental to the interests of a section of the ratepayers—often a section paying a large portion of the rates. Municipal authorities have gradually encroached upon retail traders, and despite the number of checks such trading has received from the opposition of retailers, the undertakings of municipalities are steadily increasing. Especially is this the case in reference to the gas committees—so many gas works and electric supplies being under the control of the municipalities, it being conceded by all that such undertakings are guided better, in the interests of the public, by the representatives of the people themselves than by private firms; but the limit which such undertakings should be subjected to is often overstepped, and little by little, carrying out contracts, employing workmen, and even supplying fittings, is added; in each case the work obtained and carried out, presumably for the benefit of the whole, is an absolute loss to that section of the community who earn the money which they are called upon to pay in rates and taxes. Ironmongers' associations and gasfitters' associations are strongly opposed to municipalities carrying out electric wiring, gas fitting, and the sale and even hire of cooking stoves, when the business can be so well conducted, and pay equally reasonable prices by local Hardwaremen, plumbers, and gasfitters. It is pleasing, however, to note, that in more than one instance, several influential companies and bodies of traders have entered into satisfactory arrangements with local ironmongers to carry out a certain portion of the work connected with the sale and installation of gas cookers and heating stoves, and they have also made them agents for procuring hirers of stoves. Such instances have been almost exclusively confined to independent bodies of traders, and not to those who are carrying out the work of municipalities.

PRESENT-DAY WORKSHOPS.

To sum up the whole matter, the ironmongery trade is gradually assuming a more important position than it has held during recent years, and the simple retailer of Hardware is regarding his workshop as an important factor in consolidating his business

SCREWLESS SPRINGSET SHEARS AND SCISSORS

Have taken the trade by storm. By sheer force of merit they have cut their way into popular favor. Are absolutely screwless, adjustable by a spring plate; are self-sharpening; they have

a perfectly even tension throughout their cutting length, which preserves their keen edge.

The
"Screwless"

is perfectly simple in construction—simply perfect in action.

NO MORE

twisting of shear handles to hold the cutting edges together; no more painful cramping of hand to guide the shears aright. You simply close the handles and guide the blades—the shears do the cutting automatically. MR. DEALER:—Our descriptive circular and price list tell the rest. Write for them to-day.

DAVIES AUTOMATIC SHEAR CO.

41-43 MAIDEN LANE, NEW YORK.

and spreading his conditions. The old-world workshop, with a tinman, a gasfitter, or perhaps only an odd jobbing man, is gradually becoming obsolete, and the British ironmonger is realizing that in order to carry out work satisfactory, economically, and profitably, he must sweep away the old-world relics of tools and appliances which were formerly thought sufficient, and must install new machines, improved tools, and introduce wherever necessary, power, in order to effect economy and saving of labor. Many of the machine tools which have for so long past been commonly used in the United States, are finding their way into this country, and the ingenious labor saving contrivances with which American workmen are familiar, are fast becoming regarded as essential in the British Hardwareman's workshop. The Fiscal questions and the prohibitive tariffs insisted upon by the United States, doubtless do much to keep British manufacturers from a policy of reciprocity, and from dumping down British-made goods on American soil, in the same manner as United States makers are said to send over large shipments of American goods into this country. During the past few months there have been several striking examples of the way in which tariff charges may be overcome, and at the same time profits made by British manufacturers upon goods which they have heretofore found to be cut too fine to place upon American markets. More than one instance has been brought under my notice of British makers opening up works on American soil, and laying down extensive plant and machinery in order to manufacture the goods which they have hitherto with difficulty been able to dispose of, profitably, in the United States. Thus British capital is now working in several instances and competing side by side with U. S. A. manufacturers. This system of reciprocity appears to be an equitable one inasmuch as British merchants and British consumers are familiar with the numerous goods of American production which are admitted freely into this country. In fact, any kind of interchange which brings about the consolidation of commercial union between the manufacturers and merchants of the United States and Great Britain, is welcomed by all broadminded Britishers, who recognize that the time is long past when the policy of insular trading could be maintained. The markets of the world are large, and the demands of civilized people create an opening for manufactured goods of all classes.

No one country can supply either its own needs or the needs of the world at large, and the greater amount of international trading which is devised and carried on, the better will be the status of those countries engaged in such intercourse of national commerce.

THE INLAND EMPIRE IMPLEMENT AND HARDWARE DEALERS' ASSOCIATION.

The Inland Empire Implement & Hardware Dealers' Association held its second semi-annual meeting in Spokane, Wash., recently and raised \$10,000 by subscription, with which to fight the "buggy trailers" and "range peddlers." The association is determined to wage unrelenting war upon these men, whom they call enemies of the local dealers, and they have outlined an extensive campaign. Secretary E. V. Evenson of the association says the fund subscribed will be used to hire men to follow up the agents representing Eastern houses to explain to the would-be customers the advantage of buying from the home dealers, the trickeries which the outside agent is supposed to resort to, and the superior quality of the buggies and ranges purchased from local merchants. It is expected there will be a merry war and a good deal of bitterness in the fight which the association is launching.

The association has a mutual insurance company newly organized. The insurance report shows premium receipts, \$4,299.85; total at risk, \$260,650; reinsurance, \$154,000; amount at risk above insurance, \$105,850.

The organization has appointed a legislative committee which will attempt to secure State legislation to assist the association in its fight against the country peddlers. The association also appointed a committee which will attempt to secure the organization of all the implement and Hardware dealers in Washington, Idaho, Oregon and Montana. The Inland Empire, so-called, embraces Eastern Washington, Northern Idaho and Northeastern Oregon.

THE LATEST STRIKE.

"So Jenny struck you, did she, Tommy? I hope you did not hit her back."

"No ma'am. I hit her face."

REVIEW OF THE MARKETS.

WIRE NAILS: There is a good, well sustained demand for Wire Nails, which are required for immediate shipment, as well as specifications of previous contracts, which are good, showing a depletion of the average stock is regular. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|--------------------------------|--------|
| Carloads to jobbers..... | \$1.85 |
| Carload lots to retailers..... | 1.90 |

New York. The orders for small lots from store are reported unusually steady and active, and although not large in volume are wanted for immediate use. Quotations for small lots from store are on the basis of \$2.15 per keg.

CUT NAILS: A fair demand is reported of contract orders for future delivery, but an ordinary one for immediate delivery. Quotations are as follows: \$1.75 to \$1.80 base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads, on dock, New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York. Local business is light, although as good as anticipated. Small lots from store are on the basis of \$2.05 per keg.

BARB WIRE: The orders from the railroads are still reported as being in good volume, while from the regular trade the demand is normal. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | Painted. | Galv. |
|--|----------|--------|
| Jobbers, carload lots..... | \$2.00 | \$2.30 |
| Retailers, carload lots..... | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: Orders having been given for a good way in advance of actual wants, specifications are especially active and quite heavy in consequence. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers 6 to 10. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

| | |
|---|------------|
| White Sisal (500 feet to the pound) | 9¼ to 9½ |
| Standard (500 feet to the pound) | 9¼ to 9½ |
| Standard Manila (550 feet to the pound) | 10½ to 10¾ |
| Manila (650 feet to the pound) | 11½ to 12 |
| Pure Manila (650 feet to the pound) | 12½ to 13 |
| Less than car lots ¼ cent advance. | |

ROPE: The following prices may be said to represent the market:

| | Cents Per Pound. |
|------------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12½ |
| B Quality Manila | 11½ |
| Pure Sisal, 7-16 and larger | 9½ |
| No. 2 Sisal, 7-16 and larger | 8 |

LINSEED OIL: Under date of June 12 the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

| | |
|-------------------------------------|----------------------|
| In lots of less than 5 barrels..... | 40 cents per gallon. |
| In lots of 5 barrels or more..... | 39 cents per gallon. |

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

| | |
|--|-----------------------|
| Double Boiled Linseed Oil, 2 cents per gallon higher than raw. | |
| Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw. | |
| Calcutta Oil | .68 cents per gallon. |

THE PITTSBURGH TRADE.

Activity continues in the Pittsburgh jobbing trade, and there does not seem to be any prospect of an early change in this condition. Although the coal strike still continues in parts of the field, the parts that are working are quite busy, and the average demand is large. Locally, some of the builders' trades are out on strike, carpenters and painters among them. The bridge builders are also out, yet work goes along somehow. We note a large sale of screen doors and windows. It was thought the heavy advance in price of these goods would restrict the demand this year, but such does not seem to be the case.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

Notwithstanding the frequent expression that a change in business conditions is due, everything seems to favor continued prosperity. The crop conditions are good. Consumption equals production. There is very little over-trading and credit is not extended. There is very little over-production, as the mills are well supplied with orders, and unless vacations are short, goods will be, for Fall orders. Judging by the past, we might anticipate that dull times will follow such prosperity, but judging by probabilities, no reason appears for expecting slack business, and every indication points to active business through 1906. Anticipating a panic and preparing for it prevents its coming. Speculation in business nowhere exists, and business was never on a more legitimate basis. Jobbers and retailers are buying because their customers want the goods, and both are troubled to supply the demand. There is nothing to breed or feed a panic, unless bank deposits furnish it. They are constantly increasing, and mortgages decreasing. The agricultural class are prosperous, contented and hopeful, and have no fear of being swallowed up by millionaires or trusts, bad as the disclosures are. To know the worst about the insurance companies, Standard Oil Co., Beef Trust, the Railroads, Post-Office and land thieves, is a large dose and seems like a shameful revelation of family secrets, but criticism is often better than praise. It may demand the united action of State and Nation to diagnose and prescribe for such evils, but the general health of the nation is too vigorous to collapse under the change of diet necessary. The increasing complaints seemed to require investigation, and the shame the facts produce, may act as a restorative. That great reform will follow is already manifest. The argument one hears that such revelations interfere with business can be successfully replied to, that such business should be interfered with. Abundant opportunity to do a successful business, that investigation will not hurt, remains.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE CHICAGO TRADE.

If we were to find any fault with the present situation it would be mainly because manufacturers have not been shipping seasonable goods to us as promptly as we could use them, and it means a great deal when a wholesale Hardware merchant can say that his greatest difficulty is in not being supplied with goods by the manufacturers.

On all such seasonable goods as Rakes, Hoes, Forks, Lawn Mowers, Window Screen Cloth, Refrigerators, Ice Cream Freezers, Special brands of Old Style Roofing Plate, Wrenches, Hand Saws, Hatchets, Hammers, Axes, Files, Planes and other mechanics' tools, there has been a decided scarcity during the last few weeks, and we could have sold more of these lines of goods than we were able to secure from the manufacturers.

It has been a number of years since our company has had so lively a trade during the first six months of the year, as we have had this season, and in addition to direct shipments, our traveling salesmen have had the very best of success in taking future orders so that the promise for a splendid Fall trade has not been any better with the Wells & Nellegar Co. since the boom year of 1899. Crop prospects throughout the West, as a rule, are fairly good. There seems to be a large number of building projects under way, especially those of a moderate character. Consumers seem to be well supplied with money, so that collections are as good as we can reasonably expect.

It is now nearing the time for vacations, although we can hardly see where we can spare any large number of our employees at any one time, for the reason that there does not seem to be much of a let-up on trade. Mail order business seem to be increasing. Taking it all in all we have no fault to find with our future prospects

"These Brands are Sold by all Live Hardware Merchants"

THE COLUMBUS TRADE.

As for trade, we have no complaint to make as we have been crowded to our full capacity all the time thus far in the year. We have many complaints against manufacturers, on account of slow shipments. Wirecloth, poultry netting, lawn mowers and rubber hose have been hard to get and we have had to disappoint a great many customers on account of manufacturers not filling early orders complete, but making small shipments, consequently our stock has been broken a number of times.

The weather has not been the most favorable for crops. After planting, we had a long spell of dry weather and all crops suffered. When rain did come, it was too late to make a full crop of hay and oats. If we have a late fall, the corn crop can be made yet. Wheat is looking well and nearly ready for harvesting.

The building trade is active but would be still more so if material and labor were not so high. Bricklayers are getting 65 cents an hour. Lumber is very high and it looks as though there was at least a gentlemen's agreement on prices. Some customers have sent out of town for lumber, sash and doors. This is bad for any community and we think matters will be adjusted as soon as consumers are convinced of a combine, and just as soon as people find out they are being held up, something happens, especially in these times of investigation. The four-legged hogs (it is necessary to state the number of legs, as there are two kinds, now) have been squealing for some time, but packers would not take warning until something hit them. The President has the Bull by the horns and the hogs (two-legged ones) by the ears, and they are squealing good and hard, but we don't believe he will let go until conditions are bettered. Good luck to him and bad "Cess" to the Congressman or Senator who fails to stand by him.

, THE SMITH BROS. HARDWARE CO

THE SAN FRANCISCO TRADE.

Thus far the first calendar summer month of the year is making a bright exhibit in trade. The usual commercial statistics and reports from various lines of business are all indicative of continued mercantile, financial and industrial activity. The weather the past week was not unfavorable, either to growing crops or the distribution of merchandise. Money is plentiful here; more than needed for commercial requirements in fact, and crop conditions, owing to the unusually late Spring rains, are most excellent. Business conditions in this city are steadily being restored, and the change from day to day is perceptible to even the most untrained and casual observer. It will not be long now ere we shall be fully back to the old volume of trade, and our weekly exhibit, as progressively indicated by the bank clearings antedating April 18, once more in the column of gains over preceding years.

An hour before posting this letter, Secretary Everett of the San Francisco Retail Hardware Association, informed the writer that nine Hardware dealers had joined the association since the earthquake, and three new retail dealers had been voted into the Oakland Hardware Association. "This encouraging news," he remarked, "indicates that in case there is not enough righteous people left in San Francisco to save us all from being blotted out, there is at least in the trade fraternity of feeling sufficient to want to be bunched with the crowd on the other side of the great divide."

In a walk this week through a portion of the burned section of the city, I noticed among the many hundreds of one-story frame business structures being erected for temporary use the following Hardware signs and locations: Brownlee & Co., 466 Golden Gate Avenue; Palace Hardware Co., 468-470 Golden Gate Avenue; Chas. Brown & Sons, Olive and Van Ness Avenues; Bennett Bros., 541 Haight Street and C. H. Philpott, 135 Fifth Street.

I know of two diffident and deserving Hardware merchants who have been helped on their feet again since the great April calamity destroyed all they had, helped through the generosity of Eastern men of the trade. You know in times of stress there are two classes of needy people to be reckoned with—those who will talk of their troubles and those who won't. Of the first class there's seldom a need to worry, their frankness or their assertiveness or their common-sense, whichever you please, bringing their necessities to the front. It's the retiring, sensitive, reticent brother that needs to be looked up and a friendly hand extended to him. And thus will he unbosom himself under the glow of communal sympathy—a thing far removed from pity, the despised thing of the proud. It was this thought that prompted E. W. A. Waterhouse, of Waterhouse & Lester, Hardware dealers, to make an appeal to his Eastern correspondents in behalf of the proud poor of San Francisco, whose business was ruined by the fire—the reticent poor who have refused to lay bare to the world's glare their losses and misfortunes, and who have not been reached by the quasi-public methods of the Red Cross. "Just to set them going again," said Mr. Waterhouse, "that these self-respecting men may sooner become self-supporting. They don't want charity, but they welcome help to get on their feet again." And so the appeal went East four weeks ago, and fell not upon unheeding ears, for he received from his firms \$3,635, with a P. S. to call again, if needed. The following firms were the contributors: American Horseshoe Co., Philippsburg, N. J., \$1,000; Rhode Island Perkins Horseshoe Co., \$500; Edward Smith & Co., New York; also contributions from the Cleveland Axle Mfg. Co., Canton, O.; Toledo Carriage W. W. Co., Toledo, O.; Excelsior Seat Co. and employees, Columbus, O., and Mutual Wheel Co., Moline, Ill.—*Industrial Press Association.*

THE PHILADELPHIA TRADE.

The Spring season is now drawing to a close and the fact that we are passing into Summer is emphasized by the vacation list, which has now made its appearance in our stores to the great joy of those who are away and the corresponding sorrow of those who do the added work of the absentees. It is human nature to be willing to take a vacation, but it does not seem quite so natural to take a turn in doing the work of those who are away and yet as each takes his or her vacation it should be remembered that those left behind must keep up the work. The vacation season is one of the perplexities of business and year by year the problem seems to be more serious so that the question of a continuance of the custom becomes perplexing. In a large establishment the vacations are necessarily spread over a number of weeks; during all of that time there is more or less confusion in the store and the manager of the store force has his hands full in making the wheels move smoothly. Every year this becomes a harder task as trade grows more uniform and is no longer crowded into certain months as was the custom of a few years ago. Correspondence with many manufacturers throughout the country reveals a very satisfactory state of affairs as all report a large volume of business and look forward, almost without exception to a large and satisfactory business during the coming Fall. With many an increase in prices seems to receive careful consideration and the next few weeks will determine whether business conditions will justify such a change.

With this letter the business relations of the writer with **HARDWARE** are to come to an end. For a number of years it has been his privilege from time to time to write a Hardware article to the readers of this magazine and from time to time he has been cheered by a personal letter or message from some Hardwareman stating that these articles have not been allowed to go unnoticed. This has led the writer to feel that in this way he has made a number of friends whom he has not perhaps had the pleasure of meeting personally, and now on the eve of his retirement from the Hardware business, with which he has been connected for over thirty years, he cannot refrain from saying a kind farewell, to all his friends both known and unknown. His best wishes will go forward not only to this magazine but also to its host of readers.

In thus saying "Goodbye" to the Hardware business it is a

pleasure to express the respect and liking which he has always had for it as a clean, honorable and straightforward business. Of course, honesty is personal and a man so inclined can lower the standard of any business, but the Hardwareman is not called upon to put sand into sugar, adulterate drugs, poison foods, give short measures or scant weight or foster dangerous habits by selling alcoholic liquors, and while the great prizes of wealth may not fall to the lot of the Hardwareman, he may in the language of the "One Book," "Do the thing that is right for that shall bring a man peace at the last." With the hope that coming years may bring to both **HARDWARE** and its readers happiness and prosperity we now say "Adieu."

Respectfully yours,

BIDDLE HARDWARE CO.,
James H. Ritter.

A NOTICE TO DEALERS.

All Genuine Enterprise Goods are Marked With the Trade Mark of that Company.

Efforts having been made to sell to the Hardware trade specialties of various brands with the statement that they were made in the works of The Enterprise Manufacturing Company of Pa. with the skilled labor and high standard that have given the Enterprise goods their reputation, the above company desires emphatic announcement made that it is its invariable rule not to manufacture specialties under any other name than its own. Goods otherwise marked, and offered with the claim that they were made in the Enterprise works, should be viewed with suspicion, to say the least, as sailing under false colors. The fact that such claims are made is a tribute to the high standards of Enterprise workmanship, but they are unjust and injurious, both to the concern itself, and to the dealers who may be misled thereby. All dealers know the trade-mark "Enterprise."

New York City

RUSSELL & ERWIN MFG. CO. OF NEW YORK.

The business of the New York branch of the Russell & Erwin Mfg. Company was on June 8 incorporated under the laws of New York as the Russell & Erwin Mfg. Company of New York. This has been supplemented by numerous changes which practically reorganizes the different departments and greatly strengthens their efficiency. The officers are as follows: Howard S. Hart, president; R. A. Hawley, first vice-president; I. D. Russell, second vice-president; J. H. Van Newkirk, treasurer and manager; W. H. Donaldson, assistant treasurer; W. A. Cherry, secretary, and C. C. Haselton, assistant secretary. The Board of Directors consists of the officers here named, together with William Browne, George E. Moore, William E. Diehl and O. P. Malone. The selling portion of the business is entirely in charge of W. A. Cherry, who is responsible for all sales from the New York warehouse, and the contract department, assisted by W. E. Diehl, sales manager, S. C. Van Antwerp, assistant sales manager, and George E. Moore, who is in full charge of pricing and costs, with a corps of competent assistants. C. C. Haselton has charge of all buying, both of the Factory Line and General Merchandise, which has always been a part of the business. He is assisted by Mr. Saylor and Mr. Johns, with a corps of assistants. The office force is under the immediate supervision of W. H. Donaldson, who has entire charge of all invoicing, collections, etc.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED JUNE 11, 1906.

- 404,829. DRILL BIT. J. Eagen, Wyoming, Pa.

 823,949. LIFTING JACK. William F. Kidd and L. Kidd, Bloomfield, Ind.

INTERNATIONAL POSTAGE.**WORK OF THE CONGRESS WHICH MET IN ROME.**

According to a dispatch from Rome the Postal Union Congress, which practically ended May 22, cheapened the postage on heavy letters. Not only has the unit of weight been raised from 15 to 20 grams, but the postage was reduced from 25 centimes to 15 to 20 grams after the 1st of June. These changes will be even more favorable to Anglo-Saxon non-metric countries than those using the decimal system, the British delegates having secured the adoption of 1 ounce. Unfortunately the congress could not be induced to lower the initial rate of letter postage. The British and Japanese proposals for a reduction to 20 centimes both failed. New Zealand's advocacy of universal penny

postage was rather a demonstration than a business proposal. A little success was scored by picture postal cards in internationalization. Permission was granted hitherto by only a few countries to write on the left-hand half of the address side. Still a more welcome boon to the public is the new reply coupon, which takes the form of a postal order to the bearer exchangeable in any country for a postage stamp of the value of 25 centimes.

SOUTH CAROLINA RETAIL HARDWARE ASSOCIATION.

The second annual meeting of the South Carolina Retail Hardware Association was held on the 12th, 13th and 14th insts., at Columbia, the sessions being held at Craven Hall. The attendance at the meeting was very good and larger than was hoped for by the officers. The address of President H. P. Duvall, of Cheraw, was a specially interesting one, and was listened to with close attention. We give the following extracts from it:

One, if not the most important of all questions before us is the best means of encouraging harmony and co-operation between the manufacturer, jobber and retailer, to the mutual advantage of each. A retailer separate and alone is entirely at the mercy of either the manufacturers or jobber, but if a member of an association representing a State and millions of money and trade it puts the retailer in a new light, and makes his wishes command respect, if they are reasonable, of course. The retailer comes in daily contact with the consumers, spends his time and money and takes many risks in putting on the market the manufacturer's goods, and is the outlet through which the volume of goods must go, and he should guard well his highway to the consumer, and not let others use it without toll. Alone he cannot do it, but in combination there is strength, and only by making our organization a working body, and having well defined plans, and knowing what we are working for, and all working together for a common end, we can, in my opinion, make this organization a success.

We can see very plainly that the tendency now is direct trade between the consumer and manufacturer. The profits of the retailer are being cut closer and closer, while the expense of doing business is growing larger and larger. We must have better stores, carry larger stocks, buy in larger quantities, have more expensive clerks and more money invested, and the time, in my opinion, is now on us when the retailers should have a settled policy as to the conduct of their business, especially their relations with the manufacturer and jobber, and be in a position when a demand is made to enforce it.

An interesting and able address on "Mutual Fire Insurance" was delivered by Elliott Dunn of Charleston, which was followed by a general discussion of the subject.

LEGISLATION.

A committee was appointed to secure the passage of a suitable lien law for the protection of Hardware dealers in supplying materials for building, with authority to employ a lawyer to frame such law, a copy of which will be mailed to every Hardwareman in the States of North and South Carolina.

The place of meeting for next year was not finally determined, but either Columbia or Charlotte, N. C., will be chosen.

OFFICERS ELECTED.

The following officers were elected for the ensuing year:

PRESIDENT—T. O. Flowers, Rock Hill.
 VICE-PRESIDENTS—E. W. Duvall, Cheraw; Elliott Dunn, Charleston, and W. N. Everett, Rockingham, N. C.
 SECRETARY-TREASURER—Paul W. McLure, Greenwood.

A very enjoyable banquet was given on Thursday evening. M. Bonnoitt of Darlington acted as toastmaster, and there were addresses by Mayor Gibbes, Paul W. McLure, Elliott Dunn and W. W. Everett.

TAX ON COMMERCIAL TRAVELERS.

The tax imposed by the Province of Quebec on commercial travelers and companies is giving rise to a good deal of trouble. The tax on travelers is semi-annual and varies in amount, according to the character, wholesale or retail, of the houses visited. A traveler may have to pay \$200, according to the conditions of his sales. For instance, if a traveler selling motor cars sells direct to the consumer, he must take out a \$200 license; if he sells to a dealer for retail to the consumer, the charge of \$100, and if to large concerns which resell to dealers and not to consumers direct, the license is \$50. If the business is done through a commercial traveler, the commercial travelers' tax is payable. If the agent has a fixed place of business, then the firm he represents becomes liable to the percentage tax. This is a tax levied upon companies doing business in Quebec. This tax amounts to one-eighth of 1 per cent, upon the amount of paid-up capital to \$1,000,000, and \$50 for each \$100,000 or fraction thereof above \$1,000,000. An additional tax is leviable of \$50 for each place of business, factory, or workshop in the cities of Montreal and Quebec, and of \$20 for each place of business, factory, or workshop in every other place.

THE COMPULSORY WORKING OF PATENTS.

An agitation has been started in England for the compulsory working of patents and much interest appears to have been aroused in the subject. The criticism aimed at the British patent laws also applies to those of the United States, and in a sense with even more force, because while in Great Britain it is possible for any one to obtain a license to manufacture under a British patent, on a royalty fixed by the Board of Trade, in this country a patent remains in force the full period of its life, with no obligation to the patentee to manufacture his invention, nor with any right vested in any other person to take the neglected invention and make something of it. At a recent hearing on the subject the advocate of the compulsory working of patents presented the following argument, in brief:

"The object of a patent is to give a monopoly to inventors and thereby encourage industries which would be checked if all devices or systems at once became general property. A patent is a monopoly which is granted by the State in return for something it expects, that the burden of labor shall be lightened and that production shall be increased. The State is entitled to say if it is not getting its share of the bargain, that it must revoke the whole of the monopoly which it conferred. It was certainly never contemplated by the law that injury might be done a trade through its means. Yet such is the case. A German—to take a concrete example—holding a British patent can prevent the manufacture of the patented article in this country (Great Britain), while he is at liberty to produce it himself in his own country and sell it in this. Clearly the progress of industry which the patent laws would assist is thereby hampered.

"We will suppose that the work of 10,000 men is required to supply the wants of this country for this particular invention. Were the goods not imported from abroad the wages of these 10,000 men, the cost of the raw material, the rates and taxes and all the cost of manufacture would be spent in this country. As matters stand, practically all the outlay takes place in Germany, but the money to meet it is drawn from England. Is it not then clearly desirable that a person, be he English or foreigner, who is protected by our patent law should be compelled to exercise the benefits he receives from that law in this country? But the case does not end here, for while we are giving the foreigner a marked advantage he is giving us nothing in return."

The last sentence refers to the provision of the patent laws of most countries, which compels a patent to be worked within a certain period of time, varying in different countries, the penalty being the forfeiture of protection.

In the argument of the English advocates of compulsory working of patents the provision of the English law permitting others than the patentees to work under the patent is put aside with the statement that the machinery of this part of the statute is clumsy and complicated, and, moreover, that it is not by any means the same thing as compulsory working of the patent. In considering this phase of patent laws in relation to the United States the tariff enters prominently into the question in cases where a foreign patentee fails to work his invention in this country and instead manufactures at home and exports to the United States. Yet there is an argument aside from this, and one that probably applies equally well in England, and this is that manufacturers frequently buy patents from inventors and then let the ideas lie idle, oftentimes forever, the purpose being to prevent others from making use of what is not required by the purchasing owner of the patent. For example, a manufacturer may have a perfectly satisfactory method of accomplishing a certain mechanical action in a machine. An inventor finds another method of accomplishing the same result and the manufacturer prefers to pay a round sum rather than have a competitor enter a field which the manufactured device has made quite exclusive. So the new patent is tucked away for good. If there were the right under the law to manufacture under a license, or if the patent had as an obligation the necessity of manufacturing within a certain time, say, one, two or three years, as the periods run in other countries, including Canada, then the public would have the benefit of useful inventions which to-day are valueless.—*The Metal Worker*.

NO SHADE FOR PAT.

Pat—I'm afther bidding you good-bye, Moike. It's to Panima for me. Sure, four dollars a day, workin' on the canal looks like a gold mine beside the one dollar and twenty cents in Ameriky.

Mike—But, Pat, do you mind that Panima is one of the hottest places in the world? It's one hundred and twenty in the shade most every day.

Pat—You don't suppose that I'm such a dommed fool as to stay in the shade all th' time, do you?—*Magazine of Fun*.

POPULAR TALKS ON LAW

Copyrighted, 1906, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. 2.—THE CONSIDERATION TO SUPPORT A CONTRACT.

The rule that every promise must have a consideration to support it in order to be good in law; in other words, that every contract must have two sides; and the further rule that the consideration, or that which is agreed to be given for the promise, must not be something which the promisor is already bound in law to give, has frequent application in cases of settlements of existing debts. A owes me, we will say, \$500, and the debt is overdue. I say to him, "Pay me \$450 now and I will release you from the remainder of the debt." He pays me \$450, relying on my promise. Am I bound in law to release him from the remainder of the debt? No, because the consideration for my promise to release him was his paying me \$450, something which he was already bound in law to do. If, however, he had agreed to do something more than he was already bound to do, as for instance, to pay \$450 at some place other than that provided in the original contract, or to pay me \$450 and do some specified service, then that which was agreed to be done over and above the mere payment of the \$450 would be considered in the law a sufficient consideration to support the agreement to release the debtor from the remainder of the debt.

It is held, however, that if a man owes me \$100 overdue, and I agree to accept something other than money, as, say, a horse, in full payment, I cannot thereafter claim that the horse was not worth \$100, and that therefore the debtor still owes me the difference between the value of the horse and the hundred dollars on the ground of no consideration. If one pays something other than money, whatever its value, in full satisfaction of his debt, and the creditor accepts it, the debt is discharged as completely as if it had been fully paid in money.

Then, too, if the debt is not yet due, the creditor's agreement to accept a part of it at once in full discharge of the whole debt is good, as in that case the consideration is payment before the debt is due, and that is a new consideration—something the debtor was not bound to do.

Where the debt is uncertain in amount, or is in dispute, it is held that a promise to give a release on the payment of a certain amount of money is good, even although it may be afterwards found that the real amount due was more.

If a creditor receives in full payment from his debtor some obligation due the debtor from a third person, the debt is discharged, even although the transferred debt is smaller than the one for which it is given in payment.

If a person to whom a debt is due agrees to accept a negotiable promissory note for a less amount than the debt and gives a discharge, he is bound to do so, the theory being that the advantage the creditor gets from the note, it being negotiable, is sufficient consideration.

It was held that a promise of extra pay to sailors in consideration of their agreeing to finish a voyage for which they had signed articles was without consideration. So was a promise to pay a witness for attendance at court more than the fees prescribed by law. So was a promise to reward an officer for arresting a criminal whom the duties of his office required him to arrest.

The whole question as to whether or not a promise to pay less than the whole debt will discharge the debt on the payment of the lesser amount depends entirely upon whether or not what is agreed to be done by the debtor is something which in law he is already bound to do. If there is anything to be given or to be done by him other than he is bound by law already to do, there is sufficient consideration for the promise to release, and the promisor will be bound.

A promise made to one in consideration of his forbearing to sue is made on valid consideration. A promise made to one in consideration of his forbearing to collect a debt or to enforce payment is made on good consideration, provided the forbearance be for a definite or reasonable time. A forbearance not to prosecute a demand which is found not to exist in law or in fact is no consideration.

(To be Continued.)

AN EXPOSITION INCIDENT.

There was a fair maid named O'Neil,
Who went up in the great Ferris wheel;

On the thirty-fourth round

She looked down at the ground—
And it cost her an eighty-cent meal.

NOTHING NEW UNDER THE SUN?

The "Sunshine" Washing Machine

Sunshine Washer
Ready for shipment.

Sunshine Washer with Top removed,
Showing Mechanism.

is the newest in washing machines.

It is the most convenient washer on the market. Has few parts; the tub of galvanized iron, can be placed on stove to heat the water and after washing stored away in stand.

Rectangular in shape, made of corrugated Galvanized Iron, Agitator is Star Shaped and clothes are washed by contact with sides and bottom. Operated by means of handle. A quarter turn does the trick—does the washing in short order. Send for circular and prices.

PATENTED APRIL 2ND, 1901.

A. G. McAU SLAND & CO., - - - DENVER, COLO.

State and County Rights to Manufacture and Sell on Liberal Terms—and Protected.

Hight's Union Combination Square

Five Tools in one: 8-inch Try Square, Bevel, Butt Gauge, Marking Gauge and Mitre

The notches in the edge of the slot in the blade, $\frac{1}{4}$ inch apart, make it a gauge. To use the bevel protractor, loosen the clamping bolt, draw the protractor out to the angle required, and clamp in place. Set the protractor by the scale marked on the circular segment. This scale is marked to indicate the angle expressed in inches rise for twelve inches base, when set on the figure 6, in the first series. The angle is one which will give rise of six inches in twelve, or the angle for the bottom of rafter for $\frac{1}{4}$ pitch. Set on the 6 in the second series and you have the angle for the top of the rafter for the same pitch. So with all the figures in the two first series. The first series is from 1 to 12, the second from 12 to 1. The third series is for convenience, when it is inconvenient to turn the tool over to get reverse angle. The circular segment is laid off in degrees on the lower side, which will readily show you the figures on a square with 12 required to cut any desired number of degrees. The notch in end of protractor will enable it to be used for a gauge to get in corners, gauging for setting hinges and beveling edges, etc. All nickel plated. The scale alone, to any workman, is worth the price of the square.

The best tool of its kind on the market. A quick seller.

A. W. HIGHT, Box 17, Station C, Toledo, C.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ambridge, Pa.—Dickson-Patton Hardware Co. has been incorporated. Directors—W. Miller Dickson, Charles Patton, Don Rose, R. B. Walker, Sewickley; A. M. Ross, Economy.

Anderson, Ind.—Walter Margason, of Newcastle, an experienced Hardwareman, has opened a new store at No. 10 West Eighth street.

Beaver City, Neb.—T. A. Rodman will open a new Hardware store.

Beaver City, Neb.—The North American Cutlery Co. is about to be organized.

Berryville, Ark.—Articles of incorporation have been filed with the secretary of state by the Walker Hardware Co., showing a paid-up capital stock of \$20,000. The incorporators are William Walker, C. E. Walker, J. H. Sheppard, G. W. Walker.

Bridgeport, Conn.—The Hawley Hardware Co., newly incorporated with \$15,000 capital has purchased the business of Charles W. Hawley, at 1108 Main street. The incorporators of the new company are all clerks of Mr. Hawley. They are Joseph H. Stagg, Herbert Bottomley, Charles Lindquist and Charles Jensen. The latter, with Mr. Lindquist, recently opened a Hardware store in East Bridgeport and this will be a branch of the Main street store. Mr. Stagg is the president and treasurer of the new company, Mr. Bottomley the secretary and Mr. Lindquist the vice-president. The new company have taken possession.

Charlottesville, Va.—Charlottesville Hardware Co. has been incorporated. C. H. Walker, president; J. Payne Carroll, vice-president; A. N. Adams, secretary and treasurer, R. E. Yowell, all of Charlottesville. Capital stock: Maximum, \$100,000, minimum, \$50,000.

Cody, Wyo.—R. J. McGinnis and W. H. Brundage have formed a partnership and will engage in the Hardware business.

Delta, Colo.—Porter-Obert Hardware Co. has been incorporated with a capital stock of \$10,000 by J. E. Porter, H. H. Obert and W. E. Obert.

Detroit, Mich.—The Gregg Hardware Co. has opened a new store at 48 Cadillac Square and 43 East Congress street. They will carry a large line of Hardware and tools.

Evansville, Ind.—Meyer Hardware Co. has been incorporated; capital stock, \$30,000; directors, Albert N. Meyer and James T. Walker, of Evansville, and James H. Kroh, of Indianapolis.

Hempstead, N. Y.—James & Hawkins, of Jamaica and Rockville Centre, have bought the Terry property on Front street, where, after alterations are completed, they will open their third store.

Johnstown, Pa.—W. E. Shissler and Charles Leventy have leased the property at 558 Central avenue and about July 1 will engage in business as the Moxham Hardware Co.

Kippen, Idaho.—The Lookout Hardware Co. of Lookout, Ida., is about to open a branch store in Kippen, Ida.

Lexington, Miss.—Beall Hardware Co. has been incorporated, capitalized at \$25,000, by D. W. Beall, L. G. Beall and others.

Los Angeles, Cal.—F. A. Marcotte has engaged in the Hardware business.

Neosho Falls, Kans.—Charles Brooks has opened a new Hardware store.

Nashua, N. H.—The store in the Merchants Exchange, formerly occupied by George H. Wiley & Co. is being fitted up for a Hardware store, which will be carried on under the name of Whittemore & Ambrose.

Oklahoma City, Okla.—Storm & Erickson Hardware Co. has been incorporated with a capital stock of \$6,000. The directors are: W. W. Storm, I. W. Erickson, Mary D. Erickson, and Minnie D. Storm, all of Oklahoma City.

Paducah, Ky.—Articles of incorporation have been filed by the Louis W. Henneberger Co., which is a newly organized Hardware concern that will engage in business here by purchasing the retail department of the Scott Hardware Co., one of the largest establishments in this portion of the State.

Peck, Ida.—William DePew is putting in a new stock of Hardware.

Petersburg, Va.—A charter of incorporation has been granted to Peterson & Jefferson, Inc., for the purpose of dealing in Hardware and agricultural implements. G. P. Peterson, president and treasurer; Hatcher S. Seward, vice-president and secretary; T. J. Jefferson, manager. Board of directors: G. P. Peterson, Hatcher S. Seward and W. R. Duell.

Pittsburgh, Pa.—The Pittsburgh Hardware & Home Supply Co. held a formal opening in its new quarters, Seventh avenue and New Grant street recently. The firm, which conducts what is really a Hardware department store, occupies a six-story building, and handles Hardware of all kinds, sporting goods, electrical goods, mechanics' supplies, cutlery and hotel and restaurant equipment.

South Tacoma, Wash.—W. T. O'Connor and D. L. Merrill are engaging in the Hardware business.

Walla Walla, Wash.—Articles of incorporation for a new Hardware and implement company have been filed. The company will be known as the Tierney-Toner Co., the incorporators being Frank W. Tierney, Oscar Drumheller, M. Toner, C. H. Bowers and T. J. Ennis. The new company is capitalized at \$16,000.

Wichita, Kans.—H. W. Collier & Son have engaged in the Hardware business.

Wrightsville, Ga.—Petition for charter has been filed for the People's Hardware Co. The incorporators are J. H. Rowland, T. C. Holt, J. V. Snall, T. L. Martin, and R. R. Martin, all of whom are engaged in other business here. The petition recites that the capital stock of \$10,000 has been actually paid in.

Changes and Improvements.

Bowling Green, Ky.—Charles W. Rogers, of McMinnville, Tenn., has bought the one-half interest of R. E. Harris in the Hardware business which for several years has been conducted at the corner of Main and College streets, by the firm of Miller & Harris.

Brush, Colo.—J. B. Killion has sold his Hardware business to S. W. Goddard & Son.

Campbellsburg, Ky.—C. R. Orem has sold his Hardware store to Dillard Rocketts, of Hillsboro.

Carmen, Man.—Buettner Bros., Hardware merchants, have disposed of their business to A. J. McConnell, and will leave shortly for Saskatchewan, where they will open a new store.

Central Square, N. Y.—Elliott & Lane have sold their Hardware store to Henry S. Hunt of Cato.

Cherryvale, Kans.—Owing to the dissolution of the Hardware firm of Baldwin & Hendricks, Mr. Baldwin will continue alone.

David City, Neb.—F. C. Scott has sold his interest in the Barnes-Havlik Hardware Co.

Evansville, Ind.—The stock of the Greiner Hardware Co. has been sold. The business will be continued under the firm name of the Meyer Hardware Co.

Fannettsburg, Pa.—William and Roy Kegerreis have succeeded their father, the late M. Z. Kegerreis, in the Hardware business.

Girard, Ohio.—The Zeller Hardware Co. have increased their capital stock from \$5,000 to \$25,000. H. Niedemier, Jr., is the president.

Guelph, Ont.—James W. McMillan and John R. McMillan have purchased the Morris Hardware establishment and will take over the business in a few weeks.

LaBelle, Mo.—E. L. Loudermilk has sold his Hardware store to Brownfield & Pugh.

Medical Lake, Wash.—Rielly Bros., Hardware dealers here, are closing out.

Middlebury, Ind.—The firm of Kauffman & Kauffman, Hardware dealers, has been dissolved. Ira E. Kauffman has sold his interest to his partner, Charles E. who will conduct the business alone in the future.

Miles City, Mont.—The Montana Hardware Co. has increased its capital stock from \$20,000 to \$50,000.

New Providence, Ia.—Bales & Armstrong have succeeded to the Hardware business of the Bales-Howard Co.

New Rochelle, N. Y.—Robert E. Douglass of New York City, has purchased the Hardware business at 23 Rose street, of W. A. Klein.

Painted Post, N. Y.—W. A. Smith has closed a business deal with E. E. Mason, of Woodhull, whereby he will take possession of the Mason Hardware store at Woodhull about August 1st.

Paterson, N. J.—James Tanis, doing business at River and Putnam streets, in Hardware and general supplies, has sold out to Joseph B. Allen.

Salem, Mo.—Martin Dent Hardware Co. have filed a statement to show they have made an increase in their capital stock from \$7,500 to \$15,000, all the increase paid.

St. Edward, Nebr.—Henry Pitcher has purchased the Hardware store of William Eidam.

Verona, Mo.—J. T. Miller has succeeded to the Hardware and implement business of T. J. Miller & Bro.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Binghamton, N. Y.—A certificate of incorporation for the National Dishwasher Co. has been filed. The directors and stockholders are D. A. Smith, T. B. Crary and Hiram Goldsmith. The capital stock is named as \$1,000.

Bridgeport, Conn.—The Gaynor & Mitchell Manufacturing Co. has been incorporated with a capital stock of \$60,000. The incorporators are Arthur C. Gaynor and Joseph F. Gaynor, Bridgeport, and Angelo Gaynor, New York. The business was formerly carried on as a co-partnership.

Detroit, Mich.—The Proctor-Raymond Mfg. Co. has been incorporated to manufacture electric bells, trunk trimmings, electrical and Hardware specialties. A site having a frontage of 460 feet has been purchased for a plant.

Indianapolis, Ind.—The Combination Farm Tool Co. has been incorporated with \$10,000 capital stock. The directors are William Foor, H. A. Adams and F. E. Foor.

New York, N. Y.—Manhattan Screw & Stamping Company has been incorporated. Capital, \$200,000 and directors: S. Wilner, E. R. Wilner, Anna S. Wilner, New York.

New York, N. Y.—Neal & Scott Company has been incorporated to manufacture Hardware tools, etc., tinware, etc.; capital, \$25,000. Incorporators: Bernard B. Neal, Joseph W. Scott, Henry E. Stoffregen, No. 81 Warren Street.

New York, N. Y.—Richards Keyless Lock Co. has been incorporated to manufacture keyless locks, Hardware, etc.; capital, \$100,000. Incorporators: E. A. Monfort, Elbert L. Barney, Dr. C. A. Hegeman, all of New York.

Pekin, Ill.—The National Steel Tank Company is a new concern which has been organized in Pekin. Ruhaak & Lackman Company are the organizers, and they propose to manufacture steel tanks for town or country homes, and water supply for villages and public buildings, for kitchen, bath and basement use in homes. They will handle two sizes of tanks, with capacities of 220 and 365 gallons.

Portland, Me.—Central Equipment Co. has been organized for the purpose of dealing in tools, machinery and mill and factory equipments, with \$500,000 capital stock. Officers: President, John W. Anderson, of Gray; treasurer, James R. Parsons, of Yarmouth.

Portland, Ore.—Edwin L. Furman, Eli Hogan and O. P. McGee have filed articles of incorporation of the Universal Tool Company. Capital stock is \$50,000. The objects are to manufacture and sell metal, wood and glass tools, etc.

Rochester, N. Y.—Schreiber & Klier Co. has been incorporated to manufacture razor guards, cutlery, etc., capital, \$2,000. Incorporators: Edward A. Schreiber, No. 405 Child Street; Joseph G. Klier, Yates, N. Y.; John B. Kiley, No. 39 State Street.

St. Joseph, Mo.—The American Gas Stove Co. has been incorporated with a capital stock of \$50,000.

Taunton, Mass.—Taunton Stove Lining Co. has been incorporated to manufacture and sell stove linings, fire bricks, etc.; capital, \$25,000. President, Clarence S. Parker, Taunton, Mass.; treasurer and clerk, J. Walter Parker, Taunton.

Worcester, Mass.—The International Mfg. Co. has been organized to manufacture a new ratchet drill, the invention of Napoleon R. Thibet of that city. The company has not yet begun to manufacture for itself, but is putting the drill on the market from an outside shop.

Changes and Improvements.

Adrian, Mich.—The Adrian Wire Fence Company has doubled its capacity for 1906. A new warehouse, 80x140 feet, with a covered platform fourteen feet wide alongside, has also been completed.

Allentown, Pa.—L. H. Yeager, Charles H. Yeager, E. A. Donecker and Calvin Jackson have made application for a charter for a corporation to be called the Jackson Mfg. Co., the object of which is the manufacture and sale of washing machines, wooden ware and household specialties. The Jackson Mfg. Co. is located at present at Reading, and will be brought to this city. A building will be erected and the manufacture of these goods commenced on a small scale and increased as the business warrants.

Anderson, Ind.—The Anderson Tool Co. have closed a contract for a new building 100 feet long and 50 feet wide, of brick and steel construction, which structure they are forced to build owing to the growth of their trade.

Bowling Green, Ohio.—The Leonard Stove Co. has begun the work of clearing off the debris preparatory to rebuilding the plant that was destroyed by fire a few nights ago. The plant will be built larger and better than before, and the buildings will be of cement and brick, making them fire-proof. The loss, according to the incomplete invoice, was \$67,000, with \$11,000 insurance.

Chattanooga, Tenn.—The Chattanooga Iron & Wire Works has moved into a new and larger building, this change being necessitated by the material increase in the company's business.

Chicago, Ill.—The International Harvester Co. is planning to construct a \$1,000,000 office building at Jackson Boulevard and Franklin street.

Cleveland, Ohio.—The Cleveland Hardware Co. are erecting several large buildings, the contract having just been awarded for a new engine house to cost in the neighborhood of \$20,000.

Cleveland, Ohio.—The Worden Tool Co. will erect a new factory building on Scranton avenue, S. W. The building will be one and two stories high, and will be 317 feet by 80 feet in size. The new building will cost about \$50,000.

Columbia, Pa.—At a meeting of the directors of the Keeley Stove Co. it was unanimously decided to enlarge the plant. Two additional buildings will be erected to connect with the present building, and when completed the foundry will occupy all the space in the foundry building, part of which is now occupied for other purposes.

Cuyahoga Falls, Ohio.—The Falls Rivet

& Machinery Co. has bought the property of the Kearney & Foot File Co. in Kent, Ohio, and is equipping a plant for the making of rivets and bolts. It expects to be turning out these goods about August 1.

Elwood, Ind.—The Ames Shovel and Tool Company will rebuild that portion of its factory on the south side that was destroyed by fire last summer, erecting a two-story addition, covered with corrugated and with iron roof. The work will be commenced at once.

Grand Rapids, Mich.—The Grand Rapids Hardware Co. has purchased a two-acre site on Eleventh street and the railroad tracks. The company will eventually build on the site but the plans have not yet been prepared. The company employs 100 persons at its present location on Pearl street, and manufactures a sash pulley.

Kansas City, Mo.—The Pague Mfg. Co. which was organized about a year ago for the manufacture of lard pails and cans, pieced tinware, fruit cans, oil cans, specialties, etc., has been obliged by the growth of its business to materially enlarge its manufacturing facilities. A site has accordingly been purchased on which the company will erect a four-story building 50x90 feet, which, with another building already on the ground, will add greatly to the company's capacity.

Marion, Ind.—Hoosier Range Co. have closed a contract for the construction of the factory buildings that the company will erect at Twenty-sixth and Adams streets where the company's new plant will be located.

Martins Ferry, Ohio.—The Spence-Bages Stove Co. has decided to erect another big building in the square where their factory, office and warehouse is located. The new building will be 40x100 feet in dimensions.

Memphis, Tenn.—The Livermore Foundry & Machine Co., one of the oldest concerns in the South, is making extensive changes and improvements in the mechanical equipment. L. E. Traylor has recently been chosen general manager.

Milwaukee, Wis.—Forward Machine & Tool Co. have filed an amendment changing the name to the Forward Iron works.

New Brighton, Pa.—The Standard Horse Nail Company has just given out a contract for an addition to its plant in the shape of a brick building, 45x100 feet, with truss and slate roof.

New Haven, Conn.—The Union Horse Nail Co. has increased its capital stock from \$150,000 to \$300,000, the purpose of the new capital being to expand the business. The plant, both buildings and equipment, was practically doubled recently.

North Milwaukee, Wis.—Work on the monster plant to be erected at North Milwaukee by the Avery Scale Co. of London, is rapidly going forward and a force of men and teams is being employed in the excavation work. The building, which is to be of brick and steel construction, will be 150x250 feet in dimensions.

Oswego, N. Y.—The Oswego Tool Co. has purchased the three-story building, No. 126 West First street. This building is next Nos. 122 and 124 already occupied by the Tool Co. The new building will be used to accommodate the increasing demand for the Tool Co.'s products.

We are **EXCLUSIVE MANUFACTURERS** of the

Auxiliary Ironing Board

THIS is a new and substantial Ironing Board for quickly and perfectly ironing sleeves, shirt waists, baby clothes and other small articles. The full length of sleeve may be ironed without wrinkling. The Board is made of hardwood, with nicely rounded edges, and tapering in shape. The iron parts are nicked white, and made strong, but light in weight. It may be quickly fastened to the table and swung up out of the way, if desired, for quick use of table for other purposes.

The Turn-Back Feature Is Its Greatest Convenience

Store Display Cards, in two Colors, Furnished with Every Shipment

WHEN WRITING

to our advertisers please

**MENTION
HARDWARE**

GERMAN gentleman, having resided for many years in England, France, also other European countries, and now a resident of Dresden is prepared to act as

EUROPEAN BUYER

or in any other capacity to first-class American firms. Has a thorough knowledge of soft goods, Hardware goods, also of raw produce and banking business. First-class references will be given. Please write full particulars to "European Buyer," care Rudolf Morse, Dresden, Saxony.

HARDWARE DEALERS RECORD (Continued.)

St. John, N. B.—Formal announcement of the dissolution of the Hardware firm of Kerr & Robertson, and of the continuance of the business by the new firm, Robertson, Foster & Smith, Ltd., has been made. John M. Robertson, of the late firm, is the president of the new company; W. H. Smith, vice-president, and F. A. Foster, secretary-treasurer.

Embarrassments.

Bowling Green, Ky.—Kellogg Hardware Co., of this city, has filed a petition in bankruptcy. It is stated the liabilities are about \$5,000, with assets, consisting of stock, \$3,500.

Louisville, Ky.—Lisette Noelling, conducting a Hardware business at 230 West Market street under the firm name of C. Noelling & Co., has filed a petition in bankruptcy. She lists liabilities of \$9,997.90, of which \$9,256 are unsecured. Her assets are \$6,596.11, of which \$6,000 are stock in trade.

Massillon, Ohio.—J. R. Smith, a Hardware dealer on West Main street, has made an assignment for the benefit of his creditors and named Attorney Thomas C. Davis as assignee, who has taken charge of the business.

Oconto, Wis.—Henry M. Barlament, a Hardware dealer, has filed a petition in bankruptcy. The total liabilities are \$9,098.56. The assets are claimed to be \$10,084. Several Milwaukee and Oshkosh firms are creditors.

Brockton, Mass.—Andrew F. McCabe, dealer in Hardware on Alton street, has filed a voluntary petition in bankruptcy. He owes about \$13,000 and his assets are nominally \$9,000, this including real estate, personal property and bills payable. Mr. McCabe hopes to effect a settlement with his creditors and continue.

Joplin, Mo.—Deputy Sheriff Clarence Kier has levied on the stock of the Miners' Hardware Co., located near the corner of Seventh and Main streets.

Moorhead, N. D.—Arthur R. Charest, Hardware merchant and tinner at 704 Front street, owing to the pressure of creditors, has made an assignment to the Moorhead National Bank.

Fires.

Checotah, I. T.—Checotah Hardware Co. has suffered a severe fire loss.

Farrington, Ia.—The Hardware store of F. D. Carr & Co., has been damaged by fire.

Snyder, Okla.—The Hardware store of Boals & Williams has been burned out. Loss, \$25,000; insurance, \$4,000. The Wey Hardware store was also destroyed.

MANUFACTURERS' RECORD—Conc.

Rochester, N. Y.—Application has been made by the Pritchard-Strong Co. for permission to erect an additional building for the company's plant, at a cost of \$40,000. The building, excavations for which have been started, will be 146½ feet wide, 219 feet long and 30 feet high and will cover the entire vacant plot at the corner of Main street and East and Circle street, just west of the Main street bridge. The Pritchard-Strong Co. manufactures stamped metal wares and its growth has been rapid since the company was organized a few years ago.

Rutland, Vt.—The property of the Stafford-Holden Mfg. Co. on South Main street, Barre, better known as the "fork shop," has been sold at public auction to William Holden and Edgar M. Trow. Granite and pneumatic tools are the articles manufactured by the Trow & Holden works. Mr. Holden will begin work on the "fork shop" at once, having it remodelled and put in shape so that his plant may be moved there as soon as possible. The

new quarters will have a floor space 40 by 200 feet.

Torrington, Conn.—The Union Hardware Co., manufacturers of skates and Hardware, have drawn plans for an additional factory building. The structure will be of brick, 100 feet square, one-story high with basement. It will cost about \$8,000.

Wallingford, Vt.—The Wallingford Mfg. Co. is to build a storeroom, 100x75 feet, and three stories high, and a forge room, 70x75 feet. Rapidly increasing business has made this necessary. The company is employing at the present time nearly 100 hands, and will increase this force when the additions are completed. Forks, hoes, garden rakes, grass and corn hooks and corn knives are manufactured.

Watertown, Wis.—The Washington Cutlery Co. will erect a two-story factory building at Watertown. The structure will be 60x144 feet in dimensions, of frame construction, and it will cost \$3,500.

West Nutley, N. J.—The X-Ray Stove Polish Co., with factory at Wallington, and offices at 78 Hudson street, New York, has purchased the large brick factory of the Nichols Hat Works, at West Nutley, and will remove to that place in July.

Embarrassments.

Glen Rock, Pa.—The Standard Screen Co., Limited, has passed into the hands of receivers. Assets, \$10,500; liabilities, \$17,727.

Miscellaneous.

Chattanooga, Tenn.—The Chattanooga Plow Company have held their annual meeting and elected the old officers, consisting of Mr. C. D. Mitchell, president; Howard Mitchell, secretary, and Judson Buchanan superintendent, and the old board of directors.

Richmond, Ind.—Henry Deuker, George Deuker, William Jessup, Charles Border and George Kemper, were elected directors of the Border Bolt and Lock-Nut Company at the annual meeting.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured
and Sold 41,430
MAJESTICS in 1905
beside many other
makes.

Does that tell the story?

We will verify these
figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub

of the Majestic is made of selected **Virginia White Cedar**, and will stand the action of water a life time. It is bound with our celebrated **Electric-Welded Wire Hoops**, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the **Snow Ball Freezer**. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of **Virginia White Cedar**, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are **JOBBER** or **DEALER** write us to-day for particulars and prices which will surprise you.

C. C. C. Saw Clamp

Pat. U. S. Feb. 20, 1906; Canada, April 3, 1906.
Other Foreign Patents Pending.

Is the latest, lightest and best Saw Clamp on the market.

Best For Wood Workers

because it only weighs about a pound, is simple in construction, durable and efficient. Can be carried in the pocket.

Frame is made from the best grey iron, japanned. The clamping part is of rolled steel completely covered with rubber, which holds the saw perfectly rigid, taking up all vibration, and thus saves greatly in the cost of files. It's noiseless in operation.

PRICE 75 CENTS.

Send for further particulars and discounts.

THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

Steel Picket Fence—34 different designs. Prices that will
make you money. Catalog Free.
Address Box 31, WARD FENCE CO., Portland, Ind.

The New Universal Square

"New Style"—Made in 3 Sizes

No. 6—6 Inch. No. 10—10 Inch. No. 13—13 Inch

Always ready: No adjusting; Made of best steel and is light. Coppered, then oxidized or nickel finish. Can't rust. Guaranteed. If found untrue will be replaced.

For sale by all leading tool dealers. Write for circulars.

Combination: Tri: pitch cut; Hip and Valley cut and mitre square. Draws circles; gauges lumber; octagonal cuts; laying out mortise and tenons; plumb and level; straight edge, rule scale, and innumerable other purposes.

To operate, you simply reverse it from side to side. It marks $\frac{1}{8}$ inch on one side and $\frac{1}{4}$ inch on the other.

The Duby & Shinn Mfg. Co., Inc.
Office and Works, 34 E. 29th St., N. Y. City

Polygon
Conductor
Pipes
Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

WAYNE WASHERS sold up to the present time
And increasing at the rate of 300 per day.

We make 23
different styles
of washing
machines, and
dealers can
supply their
entire wants
from our fac-
tory.

A complete
stock carried on
hand at all
times. Ask for
prices and cat-
alogue.

This machine combines the reciprocal pin wheel motion, with the oscillating movement of the whole suds box, by means of which we are enabled to double the capacity of the machine and wash clothes cleaner, quicker and with less labor than any other machine now on the market.

This machine is finished in the natural finish, or with mahogany stain finish, if so desired, with the outside iron parts finished in gold or silver bronze; the two finishes combined making it the most beautiful machine on the market. This machine is fitted with our new galvanized iron pin wheel, or with wood pin wheel, if so desired. The bearing of the machine works on sixteen steel rollers, which lightens the efforts of the person washing, one-half.

DAVENPORT, IOWA.

Wrings the Mop dry

Both feet rest firmly on the floor—no danger of upsetting bucket and wetting feet. Pressure that wrings mop is from a *spring*, not from the foot. Two springs, one on either side are independent of each other, pressure adjusts itself to any unevenness of mop—wrings all of mop thoroughly.

Tub is strong and extra braced. Rollers are solid maple and *never* stick. Attractively labeled—make good display in your store—sure to please customers

Ask your jobber.

Hight's Union Combination Square

All the Combinations available all the time.

**Five Tools in one: 8-inch Try Square, Bevel,
Butt Gauge, Marking Gauge and Mitre**

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.

If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices

and full description sent on application.

The best tool of its kind on the market.

A. W. HIGHT, Box 39, Station B, Toledo, O.

C. C. C. Saw Clamp

Pat. U. S. Feb. 20, 1906; Canada, April 3, 1906.
Other Foreign Patents Pending.

Is the latest, lightest and best Saw
Clamp on the market.

Best For Wood Workers

because it only weighs about a pound, is simple
in construction, durable and efficient. Can be
carried in the pocket.

Frame is made from the best grey iron, japan-
ned. The clamping part is of rolled steel com-
pletely covered with rubber, which holds the
saw perfectly rigid, taking up all vibration,
and thus saves greatly in the cost of files. It's
noiseless in operation.

PRICE 75 CENTS.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured
and Sold 41,430
MAJESTICS in 1905
beside many other
makes.

Does that tell the story?

We will verify these
figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub of the Majestic is made of selected Virginia White Cedar, and will stand the action of water a life time. It is bound with our celebrated Electric-Welded Wire Hoops, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the Snow Ball Freezer. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of Virginia White Cedar, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are JOBBER or DEALER write
us to-day for particulars and prices which will
surprise you.

When Henry Disston was asked the question:

"What do you put in your saws?"

He replied:

"Good steel and honest work."

UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY

"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."

HARDWARE

The Salt Lake City district office of the Westinghouse Electric & Mfg. Company was removed on July 2nd, 1906, to 212 to 214 South West Temple Street, Salt Lake City, Utah.

THE MERCHANTS' ASSOCIATION OF NEW YORK.

The Merchants' Association of New York, ever alert to foster the trade or welfare of this city, has now arranged merchants' rates from Mexico to the metropolis, these rates to be in effect for the first time during the coming buying season. The rate will be operative from points on the national lines of Mexico and the Mexican Central Railway on July 21st and 25th, inclusive, and August 4th to 8th, inclusive, with a thirty day return limit. The special rate will be one fare and one-third for the round trip.

The Merchants' Association has had prepared a comprehensive list of jobbing and prominent retail merchants in Mexico. To all these the reduced rate announcement, printed in both English and Spanish, will be sent. Copies of the circular will also be furnished to New York City merchants, commission houses and manufacturers doing business with Mexico for mailing to their trade. The railroads mentioned will distribute the circulars in the territory from which the rate will apply, so that no effort will be spared to induce Mexican merchants to visit New York to make their Fall purchases.

CONNECTICUT HARDWARE DEALERS' ASSOCIATION.

The Connecticut Hardware Dealers' association will hold its semi-annual meeting at the Pequot house, New London harbor, on July 11. The session is to be chiefly devoted to social exercises and an excellent dinner will be held at the hotel, together with other attractions for the members. There will be a brief business session and President George J. Bassett of New Haven will preside. He will also be the toastmaster at the banquet. The officers are:

President, George J. Bassett, New Haven; first vice-president, Irving C. Treat, Hartford; second vice-president, E. C. Birdsey, Meriden; recording secretary, James L. Phelps, Windsor Locks; financial secretary, F. A. Farrar, South Manchester; treasurer, Lewis B. Crosby, New London; directors, one year, A. H. Abbe, New Britain; J. J. Noxen, Middletown; H. T. Clark, Willimantic; F. W. Jaynes, Greenwich; two years, W. A. Church, Derby; Eli C. Birdsey, Meriden; D. B. Wilson, Waterbury; A. W. Davenport, Stamford; three years, F. W. Palmer, Stamford; F. M. West, Bridgeport; J. L. Carroll, Winsted; C. H. Preston, Norwich.

SOUTH AFRICAN IMPORTS.

From British South African returns it appears that for the six months ended December 31, 1905, the imports of Hardware and cutlery, implements and machines into British South Africa amounted to \$10,750,777. This was divided as follows: Hardware and cutlery, \$3,889,302; agricultural implements and machinery, \$740,270; machinery, except locomotives and parts thereof, \$6,121,345. The bulk of the imports was from Great Britain. The United States and Belgium furnished the larger part of the remainder.

A WINDOW ATTRACTION RUSE.

The last issue to hand of *Australasian Hardware and Machinery* describes a dodge which was resorted to by a firm of "universal providers" in Brisbane to attract the attention of passers-by. It was the representation of a broken-glass front with a placard offering a substantial reward, not for the perpetrator of the "outrage," but to anyone who could prove that any other firm were giving better value for cash than they. The next time one of your subscribers gets his front window really broken, he might turn the mishap to good account in like manner pending the replacement of the damaged plate by the insurance company.

POCKET KNIVES FOR SOUTH AMERICA.

Cheap knives with nickel-plated handles find a good outlet in Mexico, says *Messer and Feile*, but they should be packed carefully. The knives are generally nicely packed in dozens in cardboard boxes, instead of being simply rolled up in paper. The imports of knives into Argentina have considerably increased. In 1903 they amounted to 1,460 cases, but rose in 1904 to 5,896 cases. Argentina is importing largely of other articles, especially machinery—a sure sign of her growing industries. The knives and kindred goods imported emanate chiefly from Solingen, Sheffield, and France. In Buenos Ayres knives with neatly ornamented handles find favour.

SARGENT'S PLANES.

Even the "envelope dodger" of the present day has got to present an artistic appearance, judging from Sargent & Co.'s latest, by which the trade is notified that "First Class Mechanics use Sargent's Planes, which are guaranteed to do good work, and warranted in every particular." They look it.

SHIDLER BROS. RETIRE.

The well known firm of Shidler Brothers, 131 to 133 South Michigan St., South Bend, Indiana, wholesale and retail dealers in Hardware, stoves, furnaces, paints, sporting goods, silverware, etc., has been sold out, owing to the ill health of A. N. Shidler, one of the partners and president of the Indiana Retail Hardware Association. The Shidler brothers have bought a large interest in the Wells-Krieghbaum Table Company in the same city and A. N. Shidler will hereafter devote more of his time to outside work which will undoubtedly prove of the utmost value physically.

Besides being a most successful business man, A. N. Shidler will retain the everlasting gratitude of the Indiana retail Hardware trade for his effective services as president of the Indiana association. During his term of office the organization has increased many fold in numbers, and is perhaps the most loyal and enthusiastic in the country. The last meeting, held in February at Indianapolis, proved a revelation to those who had not followed association progress closely. At one session it was estimated that over nine hundred were present. This convention was presided over by President Shidler, who at the close was re-elected for a second term.

Every association member in the country will regret the retirement of Mr. Shidler from Hardware circles. He has proved a valuable counsellor, a firm friend and aggressive leader. The Indiana association is especially unfortunate in losing so forceful a president. We wish Mr. Shidler all success in his new venture, and extend heartfelt gratitude for his services of the past.—*National Hardware Bulletin*.

CORBIN CABINET LOCK CO. SOUVENIR.

Corbin Cabinet Lock Co., 21 Warren Street, New York, are distributing to their customers a beautiful mezzo-tint of a male lion, the only advertising noticeable on which is the name Corbin shown very unobtrusively on the padlock which securely fastens the king of beasts in his close quarters. It makes a very handsome picture in one's office and one which looks extremely artistic when framed properly.

ROGERS WINS THE GRAND AMERICAN HANDICAP.

Two hundred and sixty-eight of the best shots in the country took part in the Grand American Handicap Tournament held in Indianapolis, Ind., June 19 to 22. This event was attended by shooters from all over the country. The great event of the week was the Grand American Handicap, which was won by Mr. F. E. Rogers, of St. Louis, who broke 94 out of 100 targets from the 17-yard mark in a gale of wind, shooting Winchester Factory Loaded Shells. In each of the other three events on the program, Winchester Factory Loaded Shells or Winchester Repeating Shotguns landed in first place, making a clean sweep for these justly popular and reliable goods.

AS GOOD AS GOLD.

"As good as gold" is a proverb, and for an honest man there is nothing so good as gold. Anciently the Romans worshipped virtue and honor as gods. They built two temples which were so situated that none could enter the temple of honor without passing first through the temple of virtue. So while the temple of financial independence is the desirable place for a man to-day he must not forget to come into it through the temple of Honesty. Among the Greeks and Romans honor was more sought after than wealth, but to-day times have changed and the world bows down to and looks up to the man with the plethoric bank account.—*Optical Journal*.

SARGENT'S ORNAMENTAL HANGER.

We have received an extremely handsome display hanger, illustrated in bronze with a Sargent's Lock and Rose and Escutcheon, which emanates from Sargent & Co., New Haven and New York. It is intended to serve in an ornamental manner as a reminder to the man about to build that the best thing he can do is to "use Sargent's Artistic Hardware and easy Spring Locks" in the operation of doing so. It will make a ten strike wherever displayed.

JULY 10, 1906

Editorial Trade Review

When comparison is made with the unprecedented business of the preceding six months with that of any previous period of time, 1906 need not fear the comparison; for on all sides we hear of the unbounded prosperity in every channel of human endeavor from which an illustration may be had. There seems to be no slacking in the volume of trade, which is so customary at this vacation period of the year. The sales are certainly looking well on the books of daily entry and meet the dealers' manifest approval.

This is likely to be followed by an opulent July; notwithstanding the manufacturers find it difficult to fill their orders for Hardware staples and specialties, which they have received up to July first, and there are but few signs of relief in this respect noticeable in the growing factories. With every increase in facilities for manufacturing there is an abundance of trade that increases the output, and yet few, if any, surplus stocks can be found visible at our factories; all of which make deplorable conditions for the opening of the Fall season, which will surely be augmented by heavy orders now in preparation, from dealers who are coaxed and encouraged to order early.

June came near breaking all previous records for the month, and the sustained demand for goods, both large and small orders, will surely prevent any concessions in price, for which the dealers are hopeful at this time of the year. The anxiety will be to get the stocks that naturally are wanted from the manufacturers in due time. The only weakness that materially interfered was in the Nail market; but the recent meeting with the reaffirming of all prices, and the curtailing of output to stop loose quotations, had a due effect, and no changes are expected of any kind before August which encourages the buyer, and the temptation to make regular prices is removed.

The whole purview of the market for wire products and general Hardware is an eminently satisfactory one, and the prospects are so flattering that vacations, which are now the order of the day, may be enjoyed without any anxiety for the instability of the market.

Crop conditions could scarcely look better; every evidence is existing that they will compare favorably with the prosperity-crowned years of the past. Farmers have such an abundance of money they feel an irresistible desire to spend it.

The field of labor is without its periodical upheaval, and seems to be free from all tendency to break loose in an honest endeavor to improve conditions. Work was never so well paid for, nor were working hours ever so short.

The remarkable absence of spasmodic advances in prices, which were so freely prophesied early in the year, failed to reach an expression in more than an ordinary manner. The inability to deliver the goods, stifling the feeling to speculate on the future; the disposition to order the goods for stock earlier than usual for Fall trade, affecting retailers as well as wholesalers, and seems to increase throughout the trade, is a good move if it is made general, to foster which the dealer, we hope, will be steadfast and thus make the business less hazardous, the certainty of having the goods on hand, when wanted, offsetting any possible change in prices, or terms of payment.

EXPORTS OF MANUFACTURES FOR MAY.

Exports of manufactures from the United States in May, 1906, were larger than in any preceding month in the history of our export trade, aggregating over 56 million dollars, an average of more than 2 million dollars for each business day in the month. This is the showing made by the returns received in the Bureau of Statistics of the Department of Commerce and Labor. For the eleven months ending with May exports of manufactures aggregated 551 million dollars, an average of nearly 2 million dollars for each business day of the eleven months. For the month of May alone they are 8 million dollars in excess of those for May of the preceding year, and for the eleven months aggregate 58 millions more than in the corresponding months of the preceding year. These figures seem to justify the prediction that the total exports of manufactures for the fiscal year just ended will aggregate about 600 million dollars, against 543 millions in 1905, 323 millions in 1900, and 229 millions in 1896, having thus increased about 160 per cent. during the decade, while other domestic exports were increasing but about 76 per cent.

A comparison of the exports of manufacturers in the fiscal year 1906 with those of earlier years shows that the growth in the last decade has been much greater than that of any earlier decennial period. The total value of manufactures exported in 1856 was 31 million dollars, and in 1866, 49 millions, an increase of 18 millions. In 1876 the total was 102 millions, an increase during the decade of 53 millions; in 1886 the total was 136 millions, an increase of 34 millions during the decade; in 1896 the total was 228 millions, an increase of 92 millions during the decade, and should the estimate of 600 million dollars for 1906 prove reasonably accurate the increase during the decade ending with the present year should approximate 370 millions, the gain in the last decade having been four times as great as that in any earlier decennial term. The relative share which manufactures form of the exports also shows a marked gain, having been in 1856, 11.8 per cent; in 1866, 10.6 per cent; in 1876, 17.1 per cent; in 1886, 20.5 per cent; in 1896, 26.5 per cent, and in 1906, approximately 34 per cent.

The increase in the exportation of manufactures during the year, which has amounted to something more than 50 million dollars, occurs in a large proportion of the articles forming this large total of 600 million dollars, but chiefly in manufactures of iron and steel, manufactures of cotton, leather and manufactures thereof, cars and carriages, agricultural implements, mineral oils, furniture, paper, paraffin, scientific instruments, manufactures of indian rubber, manufactures of fiber, and other less important items. Under the general head of iron and steel, in which the increase during the ten months ending with April amounted to about 20 million dollars, locomotives show an increase of 2½ millions; metal-working machinery, nearly 2 millions; builders' Hardware, 1¼ millions; sewing machines, about 1 million; electrical machinery, about three-quarters of a million; typewriters, nearly a half million; pipes and fittings, over a half million; wire, about a half million; structural iron and steel, a little over a million. Agricultural implements show an increase during the same period of about 1½ million dollars.

Imports of manufacturers' materials also show a marked growth during the year. They aggregated 53 million dollars for the month of May, 1906, against 45 millions for May of last year, and during the eleven months ending with May, 1906, were 541 millions, against 483 millions in the corresponding period of the preceding year. This growth in the importation of manufacturers' materials is quite as strongly marked as that in exports of manufactures. For the twelve months ending with June the total value of manufacturers' materials imported seems likely to aggregate approximately 590 millions, or nearly as much as the value of manufactures exported. A comparison of this figure of manufacturers' material imported in 1906 with the statistics of manufacturers' material imported for consumption during earlier years shows for 1896, 281 million dollars; for 1886, 223 millions; 1876, 117 millions; 1866, 129 millions; and for 1856, 80 millions. Manufacturers' materials formed in 1856 26 per cent. of the total imports for consumption; in 1866, 30 per cent; in 1876, 25 per cent; in 1886, 36 per cent; in 1896, 37 per cent, and in 1906 will approximate 47 per cent. of the total imports.

Manufactures exported in 1906 exceed by about 60 million dollars the value of all manufactures imported, even including in the latter those partially manufactured articles brought into the country for use in manufacturing. Prior to 1898 the imports of manufactures were always greater in value than the exports of manufactures; since 1898 the exports of manufactures have exceeded imports in value, except in a single year, 1903. In 1860 the value of manufactures imported was five times as great as the value of manufactures exported; in 1870, about three times as great; in 1880, about two and one-half times as great; in 1890, about twice as great; and in 1898, as above indicated, the exports of manufactures for the first time exceeded the imports of manufactures and have, with a single exception, so continued to the present time.

DEATH OF GEORGE J. LAIGHTON.

George J. Loughton, former president of the Russell & Erwin Mfg. Co., died on July 1 at the home of his brother-in-law, Henry S. Lambert, in Asheville, N. C. Mr. Loughton retired from active business duties in January 1903, after having been identified with the Russell & Erwin Mfg. Co. for 40 years, from stock clerk to president.

George J. Loughton was born in Portsmouth, N. H., March 27, 1846, and after two years in a retail Hardware store there went to New York in quest of fortune. Having in mind possible employment with the Russell & Erwin Mfg. Co., he duly presented himself at its New York office with a letter of commendation from his late employers. As a result of the call, young Loughton was attached to the office staff and his first duty was to assist in making up an account sales of a certain class of goods sold in the Canadian market. About this time the California department of the business was organized, and its manager asked for his assignment to its force, and in July of the same year his wages were advanced to \$10 per week. From clerk he became buyer and then manager of the California department, the business of which grew to \$700,000 a year before the department was discontinued. Mr. Loughton's first wife was Miss Effie Hogg, who died in 1885. Some seven years later Mr. Loughton married Miss Bertha D. Mace, daughter of the late Judge Mace of Newburg. Since her death in May, 1905, Mr. Loughton has been feeble in health. Mr. Loughton was made a director of the company January 28, 1891; assistant treasurer February 15, 1893; treasurer February 27, 1895; vice-president February 19, 1896 and president January 28, 1898. It will be recalled that on severing his connection with the company, he was presented with a beautiful sterling silver loving cup of ample proportions, the gift of the selling staff, as an expression of its appreciation of their late chief's nobility of character, sterling integrity and attractive personal qualities.

Mr. Loughton was a member of the Hamilton Club of Brooklyn, of the Hardware Club of New York and of Plymouth Church.

AIM HIGH.

There are some people to whom any one can sell goods if they want to buy and have the money; others are fastidious in their tastes. The ideal salesman prepares himself to meet the highest demands and then depends upon the superlative degree of his abilities to cover all the minor classes.

It is always more enjoyable to sell goods to the best people; not the pseudo-aristocracy but the true gentlemen of broad mind and liberal understanding, and it is for this particular kind of customers that the young clerk should aim to fit himself. A refined, cultured customer likes to deal with a salesman of his own class; anything less is apt to rasp his sensibilities, even though he may be too much of a gentleman to admit it. Such a salesman too at once commands the respect and confidence of the most ignorant workman providing he has good sense mixed with his culture. A fop wins the respect of no one, but to be polished enough to give even the frills and ruffles of society polite atten-

tion does not mean to be a fop. A true gentleman is agreeable to all classes and his range of usefulness extends over a far greater variety of customers than that of any of his fellows. A striking instance of this in commercial circles is the average bank cashier who is sufficiently polite, polished and courteous to please those who are accustomed to polite attention; does the day laborer show displeasure at the same courteous treatment? It is the salesman who prepares himself to please the best people who will be the most successful for himself and his employer.

PERSONALITY NEEDED IN BUSINESS.

By B. A. CHAMBEAU.

Personality, someone's personality—and it should be that of the owner or manager—must dominate any business that is to be successful. It is as essential that a business throb with the personality of the manager, and so loudly and clearly that the public can hear it, as that a novel or picture show in its structure and treatment the unmistakable imprint of its creator.

Now then, some men have mighty unpleasant personalities. As every trade draws all manner of men to its following, there are certain to be some among my readers who have personalities that are not liable to please their public.

There are others among us who cannot be said to have much of any personality.

A man belonging to either of these classes should not be discouraged. You who have the sort that does not take, change it, or hide the imperfections. You who have none to speak of, cultivate one. Both things can be done and have been done thousands of times by men in all professions and callings. To put the proposition more plainly, trade-winning personality consists of being two things—a great hustler and very obliging, and continually impressing on your public the fact that you are those two things. In vulgar parlance, put up a front.

It isn't enough, you see, that you hustle; you've got to make people realize that fact. Let them know that you do things, are always doing things—do more things than your competitors. Make a big sound. Do it right, and we won't call it noise but the music of trade. Neither is it enough that you be obliging without letting people know it. There are a hundred and one ways, yes more than that, of being obliging to people and making them quite sure that there is nothing under the sun that is reasonable that you wouldn't do for them, when all the time you are being refreshed by the delicious assurance that you are obliging yourself by increasing the number of your friends and the size of your trade.

Obligingness is a boomerang, one of the kind that kicks back pleasantly.

I have the Bible to back me up in the foregoing statements, for are we not cautioned not to hide our light under a bushel? There would be more successful retailers if we all sang that exhortation unceasingly to ourselves.

But I do not, and doubt if you do, care for platitudes and general advice unless they lead up to something specific, so we'll hypothesize a case, a man and his business, on which to hang our specific illustration of the proper use of personality.

Jones was a very ordinary chap, externally; no one had ever accused him of laziness, nor did anyone anticipate that he would ever set the world afire. But Jones had a highly organized idea tank. Good healthy ideas were conceived and flourished in his ordinary looking cranium like mosquitoes in a Jersey swamp.

Jones might have got along just as well, perhaps, if he hadn't possessed a head that originated ideas, for there are always lots of other fellows turning them out for our adoption and adaption. But it just happened that Jones had an idea tank of his own.

No matter how he started in business—he started in a small way, in a locality some men would have called poor, but that he felt satisfied with. "There's something in being well located, but there's more in having brains," said Jones.

Jones realized the need of personality, and his lack of it, and straightway set his idea machine at work.

He figured out that it wasn't enough to tickle one or two of the customer's senses. He sat down at his desk and wrote this:

"I am going to hustle and be obliging, to appeal to people's vanity." So Jones began to advertise, and he didn't tune a lay of cut prices either. "The people I want to sell to are the people who want the best. I have the best and I will get the people. Not only must I have a clientele that I shall be proud of, but I shall make my place the only one at which that clientele will deal."

Thus mused Jones, and, musing, began to advertise. He advertised only in the papers that circulated among the best people. And right here is something worth remembering; bring the best people to you and the others will follow. Broadcast advertising of a kind that does not appeal to the best people is, except that touching your own neighborhood, lost, for the lower classes will not hunt up the advertiser—except for cut prices—

but will buy wherever they happen to be. Jones' advertising was dignified, but sprightly. It was instructive. It told why he should be patronized, because he had the newest and best, and because it was the place the best people patronized—the modish place to buy. Jones asserted that, and, of course, no one publicly disputed him. Things oft reiterated and never questioned are eventually accepted as facts. Jones "drummed" daily and tactfully, his way into the best people's attention, and soon his claims to popularity became actual facts.

You see, Jones did what certain successful manufacturers have done. He became the standard of excellence. It hurt a person's pride to admit that he bought at any other place than at Jones'.

And Jones got them going as well as coming, for he kept up his incessant, subtle flattery when they reached the store. There's where his personality came most into play. In his advertisements it was Jones' place, but in the store it was Jones himself.

For Jones was always there. He adhered to the principle that the manager should himself meet as many of his people as he could. He fixed new faces into his memory. He instructed his clerks always to address him, when they did at all, by his name, prefixing it, of course, by a "mister," speaking it so clearly the customers around should hear. The result was that every one who came to the store soon knew Jones by sight.

What good did that do? A lot. People like to be recognized by the one "higher up," wherever they may go. Jones tried to get around to wait on the most prominent customers, and being known to them personally, he was spoken to and could himself speak more clearly than if he were a clerk. He always sought to make a good impression, and his bearing and remarks never offended the most exacting vanity, and very often gave its fur a gentle stroke the right way. To customers, big or little, whom he could not serve himself, he usually contrived to get a nod and smile before they were out of the door. So Jones got the reputation with the upper class of being a "gentleman," and with other classes as "such a nice man."

And now Jones is getting rich, and all because he insisted that the best people bought of him and never bought elsewhere and just made them subconscious by defending that claim or wish to be classed among the "best people" by actually buying from him.

Jones was naturally a slow-moving man, but he practised rapidity of motion with both hands and feet, for he estimated at its right value the psychological effect of sprightliness upon both his clerks and his customers. And, besides, more was accomplished in a given time. So his personality dominated every one of his employees, to whom, by the way, he never forgot to be courteous and considerate, and he had the most efficient staff you ever saw.

SOME FACTS TO REMEMBER.

By FRED A. GANNON.

In buying or selling goods, always remember:

That the standards of living are advancing.

That men and women have more money to spend for Hardware to-day than ever before. The average wage of to-day will buy from two to a dozen times as much, or many, articles, as did the average wage of the early period of this country.

That standards of society now demand neatly kept and well painted houses.

That the man to-day wants a spring lock on his front door and keys for his family. Grandfather barred his front door with a wooden joist, and he and the children came in the back door.

That the man of to-day wants burglar-proof fasteners on his windows. A stick, or a nail, sufficed grandfather.

That the man of to-day shaves daily with the safety razor. Once a week, with a big sword-like blade, satisfied grandfather.

That the farmer of to-day wants a motor pump or other supply of running water. His grandfather went to the spring with a bucket, or gathered the rainwater in a barrel.

That the woman of to-day wants a washing machine. Her grandmother cultivated curvature of the spine every Monday morning.

That the mechanic of to-day demands many keen tools. His kit would amaze his grandfather.

That ready made, iron or wire, fences are artistic and economical. A stone wall or a rail fence surrounded the old homestead.

The boys of to-day want stylish, shiny metallic skates. Grandfather's wooden skates, with their curling toes and well defined quiet, still hang in the attic.

That Hardware for the home to-day must be artistic as well as serviceable. The crude hand wrought Hardware on the old farm looks as homely to-day as a bonnet of the 18th century.

That people are always wanting something better, something that looks a little better and that wears a little better, and they

are willing to pay a little more for goods that will save them time and add to their pleasures.

That time can be saved and pleasure gained by the introduction of new ideas. That trade papers present new ideas to the retailers and that retailers who offer new ideas to the public prosper.

That the way to prosper is to build up, not down, and that to build up one's business, one must build up himself, his store and his customers.

A SIMPLE ADV.

"We expect a full line of blankets in next week and will probably have something specially attractive in our windows. Come in and look us over."

The salesman gave the invitation to his customer along with the package he was wrapping in a voice that savored more of personal than commercial interest. Not a word about selling him anything.

"How did you know that man was interested in blankets," asked a younger clerk who was willing to learn, after the man went out.

"I don't. I only know he owns some horses. If I had asked him he would have told me that he was not; then I should have had to batter down his opposition before I could hope to get him interested; in other words, would have had him in a negative frame of mind. Now, if he can make it at all convenient he will be pretty sure to look our window over when it is ready and if it pleases him, will be in to see the goods. Then, chances are, we will make a sale; at least we have a good many times just on the strength of these little personal attentions. People like to be remembered personally, you know, and these little man-to-man invitations, though they cost so little, form the strongest pulling ads. a store can have."

THE FEELING OF INDEPENDENCE.

It is the tendency to decry this disposition of the Americans to worship money, but to me there is nothing more natural, for although money of itself is of no consequence, yet the feeling of independence it gives is the most satisfying thing in life. Young man, if you are not putting away a stated sum of money each week out of your salary you are slowly forging a chain around your leg to which will one day be fastened the heavy ball of Habit that will make you finish your life working for some other man who in the end will some day die and leave his business to his son who in turn will tell you that you are too old and will dump you out on the cold world like a broken down street car horse. If you want to be able to say to your boss that your salary is not enough, and you are thinking of leaving, you have got to have a few bones hidden away in the ash heap to make good your bluff. Don't you dream for a single instant that the old man don't know how you are fixed and how much you need your job, for he *does*. Begin it next week.

D. C. W. in the *Optical Journal*.

A SUCCESSFUL MAN.

According to the convictions of many young people, and perhaps, I might say, in the eyes of those classed among the older and wiser heads as well, the successful man of the day is the one who has discovered the manner and method by which the acquisition of material wealth is considered to be the only object in life worth striving for. But such is not the case. Many men who are not money makers have in them the elements of great success, as in my opinion a man who goes through life and retains the good opinion and respect of his fellow citizens, holds elevated positions of public trust, and always faithfully carries them through, is upright, true and honest in every way well deserves to be called a successful man.

Money making is frequently a gift, which is born in some men, but the possession of money is too often the ruin of otherwise good men. True it is that the love of money is said to be "the root of all evil," yet I do not belittle the art of money making nor the necessity of it, but the one who can deliberately make money his god, or allows himself to be valued as a money maker only, is not worthy to be called a successful man.

The true man will live each day in such a manner that he can when he seeks his couch at night, subject the work of the day to retrospection, and honestly say to himself that he has without doubt done his best, and be willing to take the consequences. If he has made a mistake he will resolve never to make the same one again, so that when he nears the end of life he can look back with pride on a record so established, and feel that the fortune he leaves is such a one as will serve as an example of uprightness and be worth more to his heirs than any money which he has accumulated.

T. G. W.

AUTOMOBILE IMPORTS, EXPORTS, AND MANUFACTURES.

More than 4 million dollars' worth of automobiles will have been brought into the country during the fiscal year, and more than three million dollars' worth exported during the same time. Figures of our foreign commerce in automobiles, as announced by the Department of Commerce and Labor through its Bureau of Statistics, show the value of automobiles imported in the eleven months ending with May to have been \$3,502,244, and of parts thereof, \$378,389, while exports thereof during the same months amounted to \$2,957,748. It is apparent, therefore, that the figures for the full fiscal year will show more than 4 million dollars' worth of automobiles and parts thereof imported and more than 3 million dollars' worth exported.

Meantime the manufacture of automobiles in the United States has amounted to presumably more than 26 millions of dollars, since the Bureau of the Census has recently issued a preliminary statement which shows the value of automobiles manufactured in the United States in 1905 at \$26,645,064. This figure includes amounts received for custom work and repairing and value of products other than automobiles; but as it does not include automobiles, valued at \$879,205, manufactured in establishments engaged primarily in the manufacture of other products, it may probably be safely set down that the value of automobiles produced in the United States approximates 26 millions of dollars and the imports 4 millions, and that out of this total of 30 million dollars there was exported about 3 million dollars' worth.

The rapid increase in the use of automobiles is shown in a marked degree both by the figures of the Bureau of Statistics and those of the Bureau of the Census. The value of automobiles manufactured in 1900 is given by the census figures at only \$4,748,011 and in 1905, as above indicated, at \$26,645,064. The Bureau of Statistics figures will show approximately 4 million dollars' worth of automobiles imported in the fiscal year 1906, against less than 2½ millions in 1905, about 2½ millions in 1904, and about 1 million in 1903.

Of the 3 million dollars' worth of automobiles exported in the fiscal year just ending, about one-half goes to Europe and most of the remainder to Canada, Mexico, the West Indies, and Australia. The details of distribution have only been worked out for ten months of the present year, but they show the value exported to the United Kingdom at \$616,177; to Canada, \$435,850; to Mexico, \$293,002; to Italy, \$227,588; to West Indies and Bermuda, \$224,676; to France, \$170,601; to Australia and New Zealand, \$148,124; to South America, \$61,780; to Germany, \$57,259; to British East Indies, \$31,046, and to Africa, \$26,925. Of the imports, fully two-thirds came from France and practically all of the remainder from the United Kingdom, Germany and Italy, in about equal proportions.

The industrial effect in the United States of the increased use of automobiles (while it can not be fully measured because of the large number of people employed in their care, repair, etc.,) is indicated in some degree by the figures of the census, which show that the number of wage-earners in the automobile manufacturing establishments of the country increased from 2,242 in 1900 to 10,239 in 1905; that the wages paid increased from \$1,320,658 to \$6,178,950; the salaries of officials, clerks, etc., from \$294,770 to \$1,060,425; and that the materials used, which of course largely represent labor, increased from \$1,804,287 to \$11,658,138.

The importance of the automatically propelled vehicle in its relation to the commercial and industrial development of the undeveloped sections of the world is suggested by a study of the figures of exports of automobiles to the various countries and continents. Lack of transporting power whether in the form of horses, canals, or railways has been one of the greatest obstacles in attempts to develop the mountain, desert, and tropical regions of the world; and the fact that the automobile, whether built primarily for passenger transportation or transportation of freight, is being rapidly adopted in those regions in which animal power is scarce suggests great possibilities in production and commerce through the use of vehicles of this character.

Reports from United States consuls and others have shown the practical application of automatically propelled vehicles in many of the comparatively undeveloped countries, especially in the Tropics, including Mexico, the West India Islands, South America, Africa, India, the Malay peninsula, Java, China, Japan, and the Philippine Islands, all of them sections in which animal power for transportation is extremely scarce and development delayed by reasons of that scarcity. The proportionately large exportation of automobiles to sections of this character is a suggestion of the practical uses apparently being made in those countries of this class of vehicles. About 20 per cent. of the automobiles exported from the United States in the year just closing went to Mexico and the West Indies, while only about 7 per cent. of the other exports went to those countries.

The export trade in automobiles has advanced rapidly in recent years and suggests a probably rapid growth in the near future. The total value of automobiles exported from the United States in the ten months ending with April, 1906, was \$2,473,-

207, against \$1,876,063 in the corresponding months of 1905 and \$1,542,535 in the corresponding months of 1904, and thus indicates that the automobile may take the place in our export trade of bicycles, of which the exportation has fallen from \$7,005,323 in 1897 to \$1,378,428 in 1905. The exports of automobiles from France were, in round terms, 10 million dollars' value in 1903 and 20 millions in 1905.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

LANDLORD AND TENANT—EFFECT OF TENANT'S SICKNESS

QUESTION: I leased a house for a year for \$200. I intended to leave at the end of the year, but owing to the serious illness of a member of my family, I was obliged to remain over for about fifteen days after my lease had run out. I could not have moved earlier without danger to the life of this member of my family. The landlord now claims that he has the right to treat me as a tenant for another year and to collect rent from me. Has he that right?

REPLY: He has not. The general rule of law is that where premises are leased for a definite term of one year at a fixed rent and the tenant holds over after that term expires; the landlord may treat him as a tenant for another year and collect rent accordingly. But this rule only applies where the tenant's holding over is voluntary. Where the tenant is obliged to stay for a few days in order to avoid the peril of exposing a member of his family to danger and death, it cannot properly be said that he is acting voluntarily, any more than if he had been detained in the house by the police.

TENDER NOT VALID IF RECEIPT IN FULL DEMANDED.

QUESTION: I did a piece of work for a person on a wagon which came to \$20. He claimed what I did was worth only \$15 and offered me \$15 in full payment and demanded the wagon and a receipt in full. I refused to give it up until the \$20 was paid, and he now says he will sue me. Can he do so?

REPLY: There can be no question that you had a lien on the wagon for your work and had a right to keep it until the lien was discharged, either by payment or tender. The tender of \$15 was not good because it was accompanied by the condition that you should accept it "in full" for your work. A tender to be valid must be absolute and free from all conditions. It follows that you are entitled to retain the wagon.

NATIONAL BANKS—EFFECT OF CHARGING USURIOUS INTEREST.

QUESTION: What is the effect of a national bank lending money at a greater rate of interest than the law permits in the state where it is situated?

REPLY: The U. S. Revised Statutes provide that any national bank may collect interest at the rate allowed by the laws of the State or Territory where the bank is located and no more, except where by the laws of any State a different rate is limited for State banks, the same rate shall apply to national banks located therein. The statutes also provide that the taking, or charging of a higher rate of interest, when knowingly done, shall be deemed a forfeiture of the entire interest on the debt. It is also provided that in case the greater rate of interest has actually been paid, the person by whom it has been paid may recover back twice the amount of the interest thus paid, at any time after two years for the usurious transaction.

FATHER WHEN LIABLE TO PAY FOR HIS DAUGHTER'S SERVICES.

QUESTION: A daughter stays with her father during his declining years and does the work of his household. In case he dies without leaving any will, can she recover anything for her services in addition to her share of his estate?

REPLY: Not unless there was an agreement between the father and daughter that she should be paid for her services. Ordinarily such an agreement will be implied where one person performs work with another's knowledge and for his benefit, but this presumption does not apply when the parties stand in the relationship of parent and child. In such a case in order to make the father or his estate liable for services performed by the child while a member of his household, there must be some evidence of an express agreement to pay for them.

AN "OLD TIMER'S" LETTER TO HIS NEPHEW.

MY DEAR NEPHEW:

I am glad you took that position in the Hardware store. It is one thing to want to get to work and quite another thing to want it so badly that you take the first job you can get. Some fellows there are who say they want a job, but for some reason or other they are constantly looking for a position. The reason is, that in reality these chaps do not want to work, always waiting for something to turn up, instead of getting right down on their hands and knees and turning up the stone, under which lies the bait with which a fellow can catch his fish.

And I am glad my boy that you are going into a Hardware store; it has always seemed to me that selling Hardware was just about as manly a job as any fellow could find and where Hardware is sold you will find men. In this age of female commercialism you have found one job in which the girls will not be competitors, even those department stores handling Hardware finding it necessary to have men behind the Hardware counter. You will find it a hard business in more ways than one, but you will also find it is a man's position and men are made for hard work and you will find hard work will help to make you a man.

Now, I do not wish to give you too much advice; you will probably have plenty of that given you, but there are two things which are absolutely essential to your success. The first essential has been taught you at home and that is honesty. The second you will find to be in the knowledge of your business and in the use of this knowledge. You have probably heard it said, "knowledge is power," but knowledge only becomes power when it is used. Therefore, you will remember that it is the use of knowledge that is power. Learn all you possibly can about the Hardware business, first by learning where everything in the store is kept; make it a point to be the first fellow on the job and the last one to get through at night, and be busy every minute of the day.

You may be interested in the experience of another fellow I have heard about, over in a New England town a few years ago. When I was in a Hardware store in which his boy was employed I asked the proprietor for the last copy of a certain Hardware journal. After looking for a moment for the copy of this trade journal the proprietor said: "I remember now, one of our boys asked me if he could take that paper home every week, as he wished to read it thoroughly. It will be back here to-morrow if you want it. He keeps it a couple of days." In commenting further on this subject the Hardwareman said, "There is the boy over there. He is learning the Hardware business, learning it in every way possible, not only by studying trade journals and catalogues, but asking many questions. That young fellow will be manager of this store some day," continued the Hardware man. "Look at him over there now, rearranging and dusting those cans of mixed paint. He has been in my employ less than a year but if anything is wanted from upstairs or down in the cellar or out in the warehouse he is the one to go, for he knows where everything is and he can tell the price of almost everything in the store. He is the best clerk we have ever had."

Now, last winter, upon soliciting business in this same store, I found that boy of three or four years before to have become practically the manager and one of the most intelligent buyers in the country. I spoke of the fact to the proprietor who also remembered of speaking of this boy on a previous occasion. "Yes," continued the Hardware man, "that boy is going to succeed; in the first place he worked hard to learn all he could of the business, and has made himself of so much value that I practically leave most of the buying and much of the managing of the business to him."

I only speak of this, nephew, to remind you that the future is just as good in positions for young fellows as has been the past, and I want you to remember that most of the successful merchants to-day were once clerks, and by adapting yourself and keeping ever in mind the one idea of being a successful Hardware man, you are bound to succeed.

I am interested in your success and I want to hear from you and I want you to remember that your old uncle has an eye on you and expects great things from his nephew. Write me.

Your Uncle Ed.

The Doctor's Daughter—Papa, can you fix dolly? I operated on her and all her utensils are coming out.

Student—I don't think I deserve an absolute zero.
Professor—No, sir, neither do I; but it is the lowest mark I am allowed to give. Good day.

SEARS, ROEBUCK & CO.

Sears, Roebuck & Co., Chicago, have recently been incorporated as a New York corporation, succeeding the Illinois corporation of the same name, with an authorized issue of \$10,000,000 preferred stock and \$30,000,000 common stock. In this connection a detailed statement fuller and more complete than has heretofore been made public, is given of the business of the company. It appears that the company's sales in 1905 amounted to \$38,708,526, while for the first five months in 1906 the total sales aggregated \$20,322,160, as against \$14,247,794 for the similar period in 1905.

The officers of the company state that it sells this enormous output without the extension of any credit, the terms being "cash before delivery;" that the business is distributed among upward of 6,000,000 customers in all parts of the United States, whose orders for merchandise are received by mail; that the incoming letters averaged for the past year about 75,000 per day; that the newly completed buildings for handling the merchandise and for administrative purposes cover a large part of 37 acres of land in the city of Chicago, and that the foregoing does not include any of the various manufacturing concerns in which the corporation owns a controlling interest.

NET PROFITS AND SALES.

The following statement is made of the net profits of Sears, Roebuck & Co. for the four years ending December 31, 1905, over all charges, as follows:

| | |
|------|----------------|
| 1902 | \$1,215,824.75 |
| 1903 | 1,768,599.07 |
| 1904 | 2,276,871.24 |
| 1905 | 2,868,661.31 |

The sales of the company during the years above mentioned were as follows:

| | |
|------|--------------|
| 1902 | \$16,416,792 |
| 1903 | 24,000,264 |
| 1904 | 28,711,693 |
| 1905 | 38,708,526 |

COMPARATIVE STATEMENT OF SALES.

The principal departments into which the business of the company is divided and the sales of each of these departments during the past three years is here given as follows:

| Departments. | 1903. | 1904. | 1905. |
|---|-------------|-------------|-------------|
| Furniture | \$1,598,642 | \$2,013,858 | \$2,945,008 |
| Jewelry and Silverware | 1,075,598 | 1,209,150 | 1,454,432 |
| Groceries | 687,553 | 983,512 | 1,687,993 |
| Drugs and Surgical Inst's. | 504,520 | 661,445 | 709,520 |
| Harness | 638,946 | 724,812 | 1,066,181 |
| Vehicles | 1,008,747 | 1,121,066 | 1,406,021 |
| Musical Goods | 983,895 | 1,125,357 | 1,337,066 |
| Clothing | 2,504,786 | 2,779,657 | 3,430,093 |
| Dry Goods and Carpets | 1,484,346 | 2,006,716 | 3,070,472 |
| Men's and Women's Furn. | 1,220,042 | 1,777,486 | 2,388,011 |
| Shoes | 944,582 | 1,449,578 | 2,432,210 |
| Ladies' Cloaks, Waists, Furs | 1,056,472 | 1,554,884 | 2,111,298 |
| Bicycles | 738,837 | 497,262 | 634,041 |
| Stoves | 1,818,291 | 1,844,864 | 2,803,710 |
| Sewing Machines | 1,387,245 | 1,323,489 | 1,317,709 |
| Books and Stationery | 301,400 | 318,148 | 374,217 |
| Paint and Wall Paper | 454,516 | 700,469 | 910,381 |
| Agricultural Implements | 472,816 | 480,990 | 650,099 |
| Hardware and House Furn. | 2,373,430 | 2,862,366 | 4,506,415 |
| Millinery and Notions | 793,443 | 1,013,186 | 1,180,771 |
| Photograph, Phonograph and Optical Supplies | 583,888 | 675,408 | 897,716 |
| Sporting Goods | 1,338,777 | 1,421,594 | 1,548,317 |
| Binder Twine | 40,993 | 65,929 | 81,599 |
| Electrical Goods | 54,747 | 90,755 | 153,091 |
| Seeds and Bulbs | | | 20,103 |

The facts thus presented call for careful study on the part of those engaged in the Hardware and allied trades, whose goods form so large a proportion of those marketed by the mail order house. Conclusive evidence is thus afforded of the formidable competition which the retail dealers of the country are called upon to meet.

A Kansas woman, Mrs. A. J. Stanley of Lincoln, has been awarded a prize of \$250 by a Boston firm for the best answer to the question, "What constitutes success?" She wrote: "He has achieved success who has lived well, laughed often and loved much; who has gained the respect of intelligent men and the love of little children; who has filled his niche and accomplished his task; who has left the world better than he found it, whether by an improved poppy, a perfect poem or a rescued soul; who has never lacked appreciation of earth's beauty or failed to express it; who has always looked for the best in others and given the best he had; whose life was an inspiration; whose memory a benediction."—*Kansas City Star*.

MANUFACTURER AND MACHINERY DEALER AND HIS ADVERTISING

To one in business there is a wide difference in the status of advertising as it is regarded by the general advertiser and the seller of machinery, mechanical appliances and the like.

With few exceptions the latter, using almost exclusively what are termed the technical and trade journals, doesn't take the matter of advertising very seriously. And this may explain much. There is a vague, indefinite feeling that there is good in it and that it is the proper thing to spend something during the year to keep one's name up. And so the thing is done, but without any great expectations, or the expenditure of more than the minimum enthusiasm.

If, when the twelve months have passed, there are any convictions arising from the experience, it is the belief, more or less openly expressed, that advertising on the whole is a nuisance and altogether the most unsatisfactory thing the advertiser spends his money for.

And mostly he's right.

There is no going back of the fact that what one gets out of advertising is largely determined by what is put into it, and this in turn depends upon the degree of interest and enthusiasm which the work engenders.

It would seem that there is mighty little but money put into the advertising end of the business by the average machinery dealer to-day, and that is mostly *just put in*.

There are reasons, of course, why this is so.

Triple expansion engines, coal handling machinery and the like are not universal necessities, to be sold by the gross or carload; neither do they suggest great possibilities as the basis for a mail order business.

The trade from advertising products of this character must come most frequently in devious indirect ways (as it usually does) and its propagation calls for a full allowance of faith, patience and time.

Clearly the situation does not make for the highest degree of enthusiasm.

Seldom, too, in manufacturing concerns is there anyone of the right caliber who really wants to attend to the matter; can't take the time from other duties; thankless job, and all that. And so the work is tossed from one desk to another, until it has gone the rounds of the office and become the most bedraggled and neglected part of the business.

Someone will some day take the time to give this important aid to the selling organization the attention it deserves, and so realize what a big and vital matter advertising really is and how much it can accomplish under the right conditions.

For the present, few, even among those who have some real faith in its value, are willing to admit off-hand that advertising can do much for one's own business as it has done for that of his neighbor in trade.

And this because of the belief that *his* is a "peculiar" business and therefore one to which the usual usages and methods of procedure may not properly apply.

And what if it is granted *instantly* that this is so?

It simply proves what men of experience well know, namely, that every business must be considered of and by itself and the advertising adapted to meet the conditions which obtain in each individual case.

If users of advertising space in the technical and trade papers knew the good that would result from a systematic and dutiful attention to their advertising, instead of the happy-go-lucky way in which this end of their business is usually conducted, they would no longer miss the fine possibilities it affords.

Advertising is no longer all theory; much has been proved.

It has developed from a business man's rattle into a mighty serious business, and indeed comes very near to being a science.

Many extremely bright and ambitious men have been drawn to it, and have given it of the best that is in them. The result has been the uncovering of possibilities that cannot be overlooked by the serious, earnest merchant or manufacturer who would not only progress but survive.

In order, however, to go at the matter properly, one must recognize at the start that the advertising will not safely run itself; neither can its management profitably be intrusted to the tender mercies of a junior clerk or office boy. Also that it does not pay to make contracts for the fun of seeing one's name in bold type, or because the "solicitor" is persistent and a "good fellow." That really isn't good business.

More than all must come the conviction that it is necessary to give this department of a business.

More than all must come the conviction that it is necessary to give this department of a business the same thought, labor and financial support as is extended to others if the results are to be correspondingly satisfactory.

The matter of advertising naturally comes within the scope of the sales department and should be considered in conjunction with it.

Working in accord with the sales manager, the men on the road and the branch offices, it can accomplish much to the advantage of all.

Just as soon as the matter of advertising is talked about there is a noticeable quickening in the business life of a concern as a whole; when it is actually entered upon, the benefit is decidedly apparent. Every one appreciates the fact that something is being done by "those higher up" to push things, and each instinctively gets to work with a surer grip in the effort to make good.

The branch offices and men on the road gradually feel the movement of the vital forces in motion at the other end of the line, and strive in turn for a better showing partly from a natural pride in pulling their share, and partly that they, too, may reap the greater benefit from the help thus given, while it is to be had.

The result is a vim and "go" that breed dollars.

There is nothing else quite as sure for good in a case of "dry rot," threatened or arrived, as advertising.

Neither is there anything more reliable as a general business tonic.

The purpose of advertising, briefly, is to create new business and hold that which has already been created.

And if it is of the right sort, it will do this.

Advertising fathers opportunity for both buyer and seller.

It brings one's product to the direct notice of the trade or the consumer.

Through advertising it is possible to reach many out-of-the-way markets of the world, where the man with the trunks and the grip-sack could not seek orders profitably.

It will, moreover, pave the way in splendid shape for these hard-working pioneers of business as they wind their way through the great commercial centers, and make the catalogue, or other business literature which naturally follows, both welcome and of more than passing interest.

Beyond all this, an original, forceful line of advertising is proof convincing to the world at large that the concern back of it is a stirring and progressive one, that it is doing things in a big, broad-gauge, twentieth century way; and you and I and everyone else like to do business with just such people.

Seeing is still believing, mostly, and one feels that such folks are dependable.

Business conditions are changing, and where, as is so largely the case to-day, the buyer and seller rarely have a chance to meet face to face, there is no better or surer way for the seller to get known than by being fittingly and persistently represented in those publications which cover the various industries it is desired to get before and cultivate.

The acquaintance and reputation which can be acquired in this manner will often decide the direction in which orders are placed, and, of a certainty, cannot be gained as economically or expeditiously by any other means.

The value of advertising, also, for securing representatives in various and remote sections of the country should not be overlooked.

It very often occurs that business connections are made with individuals and concerns of reputation and standing who are led to seek an agency because of the vigorous advertising that is done by the enterprising manufacturer; which also makes his goods easier to sell than those less well known, and thus profitable to handle.

The trade press as a whole is steadily making for a better average, and there is scarcely a profession, industry or field of commercial activity that has not its publications of worth devoted to its special interests.

One may therefore pick and choose his battle-ground fairly, and plan the campaign for more trade to suit his inclination and his purse. It is thus made practicable to "try out" new or promising fields, and so size up the possibilities afforded before going into an expenditure of time and money which might other-

wise attain large proportions and prove unprofitable after all.

Of necessity, to reap the maximum results from advertising, especially machinery advertising, the matter must be taken in hand in a serious, systematic and business-like way.

It is all one man can do and do well, and to try to crowd the work in along with other duties is to invite failure at the start.

The thing simply cannot be handled in such a way and be made to pay.

Advertising to-day is a big and growing proposition. It costs a good deal in time and money and needs a brainy man with tact, and a wide experience back of all to make it pan out satisfactorily.

There should also be judgment at command that is sound, a capacity for investigation and comparison of values, which comes only to a mind trained to the work, with the ability to take favoring opportunity as it may develop, and make the most of it in an advertising way.

All of which may be secured if the desire is both keen and sincere.—*W. Hull Western, of the Manufacturers' Advertising Bureau.*

WHY FISHING TACKLE IS A PROFITABLE LINE.

All merchants, no matter what line of business they are engaged in, know that it is not so much the amount of trade that they handle as the profit on their goods that will make them rich. As a corollary to this it may be stated that the more profitable a line of merchandise, the more difficult it is to handle successfully. Goods in which the competition is most keen must be sold on a close margin and consequently, they bring the smallest margin of profit. Some goods must be sold close. Much of the stock in any store must be sold with little profit. For example, it would be hardly possible to conduct a Hardware store without carrying a stock of nails, and it also would be impossible to sell these goods to large buyers—to contractors or to builders—anywhere in the East, at a profit large enough to pay the running expenses of the store. Now, this being the case, the wise merchant, says the *Sporting Goods Dealer*, is the one who is constantly on the lookout for any line which pays a good profit, and at the same time will find a ready sale. The sporting goods and Hardware dealers must also realize that each year their fields are being encroached upon by dealers in other lines—the modern house, the general store, the department store, and in some cases the competition is making itself felt from the jobbers in nearby towns. The dealer, therefore, must make an effort not only to hold his present trade, but to take advantage of changing conditions.

"How to enlarge my profits without noticeably increasing my expenses." This is a question that nearly every thoughtful merchant is asking himself, and this best can be accomplished by gradually adding profit-making lines to his business. One such line is fishing tackle. In the Hardware business no branch pays a better profit than sporting goods, and nothing in sporting goods can be made as profitable as fishing tackle. This branch of the business has great possibilities. The trade is only in its infancy. Each year the ranks of the old enthusiasts are being added to by a large number of boys and young men, who are for the first time taking up the sport of fishing. Unlike many other outdoor sports or games, fishing is not a fad. A man who has once been a fisherman always remains so. Another reason for an increase of these goods is because good fishing each year is made more possible. The millions of fish that are being planted every year by the States and Federal Government is having its effect now in making it more easy for a sportsman to find a place to use his tackle. A few years ago, if a man was run down from overwork or worry, his physician would recommend a sea voyage. To-day he would be told to take a trip in the woods—to spend a few weeks camping, and this is giving men an opportunity to find the rare sport in fishing and in consequently making an increased and large demand for the goods.

Men are buyers of fishing tackle and men are customers of the sporting goods and Hardware stores—consequently it is these dealers who can best handle this line of goods, and it is the most natural place for the sportsman to look for his tackle. It is also true that the larger assortment of fishing tackle and better display of fishing tackle that is made, the greater amount that will be sold. It is possible for a boy with a 5-cent line and a pin fish hook to catch fish. Every man realizes this; also he realizes that the best sport can be had not in the number of fish that he gets as much as going after them and preparing for the trip. So it is that the better display that is made the more goods will be sold, as fishing tackle more than almost any other line of merchandise is largely purchased because the fisherman thinks that with it he will have better sport. If it appeals to the eye it will find a sale, and it can not appeal to the eye unless it is well displayed. In putting in the line of fishing tackle it is of great importance to start right—to have the goods that are best

adapted to local trade. A dealer being located in a country where most of the fish are trout would be very foolish to put in a stock of heavy bass or salt water tackle. It would not sell and he would soon become discouraged with the trade. It is, therefore, of great importance not only to have a well assorted line, but to have one that is made up of goods that are used in the locality in which the dealer is. Also, in putting in a new line of fishing tackle, like any other class of merchandise, it is of great importance to have the goods at the right prices. Therefore, the line should be purchased of a manufacturer who would be able to put the dealer in a position to meet any competition and yet the dealer should not over-buy. Fishing tackle being seasonable goods, the stock should be kept fresh. Each year new articles are brought out and, therefore, the stock should be purchased with care.

GREAT ORIGINALITY SHOWN IN LURES.

In the matter of new and original lures for the taking of game fish, there has been astonishing advancement. Every sort of device, from those which closely resemble some small insect or minnow, to those which resemble nothing ever seen on the earth or in the waters under the earth, have come out; strange to say, some of the most revolutionary are the most successful. For instance, take the subject of tail from a buck deer. Who would ever suspect any affinity between that strong coarse fibre and the gamy black bass? Yet few better artificial lures for black bass ever came to the attention of the American angler than the Worden bucktail minnow, fashioned of the hair of the deer. The Dowagiac artificial minnow, made of wood, has now arrived at the place where it is really a bit of jewelry fashioned out of wood, so exquisite is the attention lavished upon the details of its making. They may now be had either floating or sinking, with the greatest variety of finishes, detachable hooks, glass eyes, and so finely finished that not even the most severe usage will chip or scratch off the surface enamel. Then there are the Kent, Mohawk, Expert, Hildebrandt and Stewart baits, each of which has some new distinctive feature and all of which have proven effective and popular. Then another most ingenious and interesting lure is fashioned of a wood or cork body, with a couple of big brilliant red feathers sticking out as a sort of tail, and between these feathers, point up, is located the single hook. This affair, known as the Coaxer, not only resembles a bug while flying through the air, but also while struggling over the water. It was remarkably successful throughout the West during the last summer, and bids fair to be one of the most popular lures of the present season. The Rhodes mechanical frog, in wonderful imitation of the real frog, with legs that draw up to the body when the frog is at rest, and which spring out at full length as the frog is drawn through the water, is another of the latest novelties. Nothing better in the way of imitation of natural motion of any lure used in fishing has so far come on the market, and it is safe to say that this lure will do great execution during the coming season.—*Sporting Goods Dealer.*

A GERMAN SOCIETY'S JUBILEE.

The society of German Engineers, which with its 20,000 members is now the largest engineering society in the world, celebrated on June 11 to 14 the completion of the fiftieth year of its existence. The opening ceremony was held in the German Imperial Parliament building at Berlin under the presidency of Dr. A. Slaby. Congratulatory addresses were delivered by the Prussian Home Secretary, the Prussian Minister of Education, the Ober-burgemeister of Berlin, and the Rector of the Berlin Technical School, as well as by numerous representatives of kindred societies in Germany and elsewhere. Mr. Bennett Brough, of the Iron and Steel Institute, spoke for the British societies, and Professor K. E. Hilgard, of the American Society of Civil Engineers, for the American. The proceedings terminated with a lecture by Dr. W. von Oechelhaeuser on technical work past and present. On June 12 a lecture was given by Dr. A. Riedler on the steam turbine, and on June 13 papers were read by Professor Muthmann on the methods of dealing with atmospheric nitrogen, and by Dr. Hoffmann on the utilisation of power in mines and metallurgical works. Throughout the week an elaborate programme of visits and excursions and social functions was arranged for the 1,231 members and 464 ladies who took part in the meeting.

A BRUSH WITH THE BARBER.

"What's the matter with the shaving brush; it seems to be losing its grip?"

"Yes, the handle and hair had a falling out, and the hair got the worst of it."

"Better try the saving powers of your 'auxiliator.' May-be you'll cure it."

ELECTRIC TRAINS NEAR AT HAND.

It is now within the range of probability that the first single phase electric train will run on the New York, New Haven & Hartford Railroad between New York City and Stamford, Conn., before the summer is over. The latest reports from Coscob, where the electric power station is now being erected by Westinghouse, Church, Kerr & Co., who have charge of the construction of that building, are to the effect that everything is now about ready for the reception of the first installment of electrical machinery. The latter is being pushed at the Westinghouse works in East Pittsburgh with the utmost expedition and the first generator is already in the testing department.

It was learned that the initial installation of apparatus will have a capacity of 13,000 horse power, consisting of Westinghouse-Parsons steam turbines and Westinghouse Alternating Current Single Phase generators. The progress of this work is watched with considerable interest by electrical as well as railroad men, not only because the electric railway system to be installed will signalize new departure from the methods of electric propulsion heretofore in vogue, but it will also make another step in advance of the transformation of trunk line steam roads into electric railways.

Of the 35 locomotives, which will be operated on the road to begin with, the first are now undergoing practical test on the Westinghouse Inter-Works Railway at East Pittsburgh.

TALKS BY THE OLD STOREKEEPER.

"Talks by the Old Storekeeper" has the ring of actual experience. It is based upon no mere theory but is the fruit of Mr. Farrington's years of actual storekeeping.

The Old Storekeeper is one Tobias Jenkins who has made his pile and has sold out his store to a younger man, John Barlow, whose mistakes in management are such as any merchant is likely to make, though such a book as this is calculated to render them unnecessary.

In his long and strenuous business life, Tobias has picked up a lot of shrewd, hardheaded philosophy. This is imparted in energetic and pithy language which goes straight to the mark in these "Talks," through which runs the thread of a story making a book not only valuable, but thoroughly interesting from cover to cover. The Old Storekeeper's views on store management, or advertising, on window displays, on special sales, etc., together with his ideas regarding the treatment of the men behind the counter, the clerks who handle the money, and his keen insight into human nature make this book one which will appeal to every practical merchant.

Here are a few extracts from the book which will give you a better idea of what it contains than anything we could say.

The Old Storekeeper divides clerks into three classes. He says:

"I divide clerks into three kinds; the kind that start right, the kind that end right and the kind that are never right. Most clerks start in right, but deliver me from the chap who is absolutely perfect the first week.

"What a model he is! he can't work hard enough. He has no bad habits. He never smokes, drinks or swears and never has. He says he always goes to Sunday school and that his mother made him promise he would not go out nights. In about three weeks you'll need a detective to watch him. He'll be raising his own wages every day without saying anything to you about it.

Here are some of the pithy remarks of which the volume is full:

"Often the boss has right in his fist the making or breaking of a good clerk."

"There's the same sort of human nature in a clerk that there is in anybody else and it takes the same sort of treatment to get it out."

"Many a promising business man has been spoiled by getting to the private office stage too quick."

"Lots of young fellows go into a store with the notion that from that time the store is half their own."

"Better have fifty things down in your 'want book' and decide not to order them, than leave out one you really need."

"Most young fellows need someone to watch them and call them down when they get to feeling their oats too much."

"Freak shows are all right to advertise the store in a general way, but as window displays, they aren't worth powder to blow them up."

"I can spot a cigarette clerk as far as I can see him. He isn't capable of struggling with anything or anybody. He is in the hands of fate."

"Every dog has his day, and the man who finds himself loaded up with a big stock of Irish setters when bull terriers are all the rage, won't do much business."

Though most of the extracts given have inclined toward that all-important subject, clerks and their management, the following partial synopsis of subjects treated in the book will show how well it covers all the themes of practical concern to every merchant:

Store management. The what to do and when to do it of the retail store.

Story of the Old Storekeeper's detection and dismissal of a dishonest clerk.

The Old Storekeeper's ideas on the money-back-if-you-want-it plan.

The why and how of getting people to buy at home instead of sending to the city.

Some things about the value of the traveling man and the way to treat him.

The value of prices, plain prices everywhere on all kinds of goods.

The first rule in the book is to have the goods. So the Old Storekeeper says.

The temptations of the money drawer to the merchant himself. Advertising of all sorts.

What makes a clerk a good clerk. What a good clerk is.

Making the windows pay.

A woman's views on how a store ought to be run.

"Talks by the Old Storekeeper" by Frank Farrington. Cloth, 50c. Postpaid, Merchants' Helps Publishing Co., Delhi, N. Y.

THE EARLY USE OF IRON.

Mr. Bennett H. Brough, the Secretary of the Iron and Steel Institute, lectured before the West of Scotland Iron and Steel Institute last Spring on the "Early Use of Iron." The date of the discovery of iron, said Mr. Brough, had long been a matter of controversy, but it was generally believed that the first iron used by man was of meteoric origin. The theory was nevertheless open to doubt, in view of the difficulty of working meteoric iron.

That iron was known to the Egyptians, even in the earliest times, was evident, says the London *Ironmonger*, from their conspicuous metallurgical knowledge, and from the facts that the working of granite and porphyry was scarcely conceivable without steel tools, that the oldest tombs had inscriptions referring to iron, and that sources of supply of manganiferous iron ore were found by Professor Bauerman in Upper Egypt. All possible doubt had been removed by remarkable archaeological discoveries. An iron sickle, found by Belzoni under the feet of one of the sphinxes at Karnack, was deposited in the British Museum, and proved that the smith's art was practiced at about 600 B. C. In 1837 a fragment of a wrought-iron tool was found in blasting-operations in the Great Pyramid. This piece of iron, nearly 5,000 years old, was also preserved in the British Museum. Analysis showed it to contain a small proportion of nickel; but as it also contained combined carbon, it was not of meteoric origin.

In Syria the fame of the swords dated back to the earliest times. In the time of Abraham, Damascus was an important commercial centre. At a later time the Roman Emperor Diocletian had a sword factory here for his army, and even in the time of the Crusades the swords made of a combination of steel and wrought iron polished and lightly etched were prized throughout Europe.

To our forefathers the Aryans in India iron was known at a very early date, and used for weapons and tools. Iron ore was abundant; and the lack of copper made it probable that the iron age in India was not preceded by a bronze age. Indian iron and steel, even in very ancient times, were celebrated throughout the world; and the knowledge of metallurgy possessed must have been considerable. Evidence of this was afforded by the iron pillar at Delhi, which was fifty feet high and sixteen inches in diameter, and appeared to have been made of fifty-pound blooms welded together. It dated back at least 912 years B. C.

Numerous iron objects of prehistoric date had been found in northern Europe, where iron was undoubtedly the first metal to be used. Iron weapons, too, had been found in the remains of pile dwellings in Switzerland. In that country the Bernese Jura abounded in remains of prehistoric iron smelting, which had been carefully investigated by Quiquerez, a scientifically trained mining official. The furnaces were in dense forests, in order to obtain an easy supply of wood. The workmen dwelt in caves, and charcoal was burned in piles. The furnaces were all similar, differing merely in size.

In Britain development was slow. External influences did not change so rapidly as on the Continent; and consequently the Britons adhered longer to their flint weapons and implements, in the manufacture of which they attained remarkable skill. Indeed, the old flint mines at Brandon, in Somerset, were still worked for supplying gun-flints to savage tribes. In Ireland the use of stone implements was continued well into historic times. Nevertheless, Britain possessed in tin a metal that was sought after by all the world.

In the early Middle Ages, although little progress was made in iron smelting, great advances were made in the manipulation of iron and steel. The sword was the triumph of the smith's art; but the manufacture of defensive armor called for skill of no mean order. The value of iron was, however, fully recognized.

Iron cannon-balls were cast by Ulrich Beham in Memmingen in 1383; but cast-iron cannon are not mentioned before the fifteenth century. In 1412 two cannons, each five pounds in weight, were cast for the town of Lille, and in 1422 cast-iron cannon were in use in the Hussite wars. The explanation of the late use of iron for castings was undoubtedly found in the unsuitability of the white pig iron originally made. It was not until the height of the furnaces was increased that silicon could be reduced and grey pig iron obtained.

With the discovery of cast iron and the introduction of the blast-furnace, the first stage in the history of iron closed with the end of the fifteenth century. Epoch-making inventions and discoveries soon followed. The introduction of coal as fuel for smelting by Dud Dudley in 1618, the replacement of coal by coke, the building by James Watt of the first blowing-engine at the Carron iron-works in 1750, the invention of puddling by Henry Cort in 1784, of the hot blast by Neilson in 1828, of the Bessemer process in 1856, of open-hearth steel making in 1861, and of basic-steel making in 1879, were a few of the great improvements that led to the marvellous development of the iron trade in this and other countries, and had rendered it possible for the world to produce, as it was now doing, 45 million tons of pig iron annually.

MAKING JAPANESE SWORDS.

The swordmakers of Toledo and Damascus have been reputed to be the world's most famous artisans in this industry, but in Japan the swordsmiths turn out weapons whose blades are fully as keen and hard and composed of as fine quality as those of the old swordsmiths.

Furthermore, the Japanese sword is supposed to be sanctified by the god who is the patron of this industry, says *Chamber's Journal*. In fact the making of the sword is, to a great extent, a religious ceremony, and all of the operations are performed by hand.

The first step, of course, is to forge the steel. This is done in a hut specially built for the purpose, containing the bellows, the anvil and the hammers used by the chief swordsmith and his assistants. On the walls are placed what the Japanese call *kakemonas*, representing the god of the swordmakers and the chief goddess of the Shintos.

The walls are also decorated with wisps of straw and zigzag shaped pieces of paper charms, which are intended to keep off evil spirits. Great care is also taken to prevent any woman or girl from setting foot in the building, as women are supposed to be attended by demons who would injure the quality of the swords.

The chief instruments used in making the swords are two large sledge hammers, weighing twelve pounds each, and a smaller one weighing two pounds, which is used by the chief swordsmith. Before work at the forge is begun prayer is offered up to the patron god. Prayer having been finished, work begins.

The metal used in sword making is Japanese steel, made by melting iron ore in a charcoal furnace and dropping it into cold water. The carbon derived from the charcoal causes the formation of steel. It comes in lumps which average about one and a half pounds apiece, and about fifteen of them are required to make a sword blade weighing when finished, without sheath or mountings, from one and a half to two pounds.

The reason why such a quantity of the metal is required is that every ounce of it is carefully examined for defects, and should there be any which is considered inferior it is rejected.

It is inspected by heating each lump of the steel to a high temperature, then plunging it into cold water and breaking it into fragments, every one of which is examined. If the maker notes that the edge of a piece glistens or is of uneven color it is immediately condemned.

After a sufficient number of small pieces of good quality have been accumulated, another of the original lumps of steel is heated and beaten out into a flat slab. This slab, while red hot, is creased in two parallel straight lines by heating the edge of a hatchet into the flat surface of the slab with a hammer.

The slab of steel is then rendered brittle and broken along these creases, forming a rectangular slab of steel some two and a half or three inches wide. Upon it are piled a number of small fractured bits of steel.

When enough has been piled up to make a heap about two or three inches high, the whole is first sprinkled with straw ashes, and then a mixture of earth and water is poured over it, serving to cake the bits of steel and keep them in position.

In this form the metal is again placed in the furnace and then withdrawn, sprinkled with ashes of the straw and pounded with sledge hammers until the whole forms an ingot about six inches in length, an inch and a half in width and an inch in thickness. At last a part of the material for the sword has been forged; but

it must again be heated until it will bend upon itself, when the big and little hammers pound the halves together into another solid mass.

This is repeated over twenty times before the metal is sufficiently kneaded to suit the smith. Three ingots of this kind are required to make the sword, and are welded and beaten into a rough semblance of the sword blade by the heavy hammers.

It is then taken in hand by the chief swordsmith, who, with his small hammer, and aided by his assistants, gradually beats this mass of steel into the shape of the sword blade. It is a process requiring great manual dexterity, acquired only by long practice, and the result is wonderfully accurate when one considers that nothing is used but hammer and anvil.

When the finishing touches are being given to the blade the work is done entirely by the chief swordsmith, who dips his hammer into cold water while the fashioning of the sword is going on. The use of water serves to cleanse the surface of dirt and causes a thin layer of oxidized or burned steel to scale off, thus insuring a thoroughly clean surface to the sword when beaten into shape.

The sword is then completely fashioned by the use of files and an instrument resembling a carpenter's drawing knife.

The next process, that of hardening, is peculiar to the Japanese sword, and is looked upon as the most important part of its manufacture, while the person who does the hardening is regarded as the maker of the sword, it being his name which is inscribed upon the hilt. His spirit, his character, his individuality, are supposed to enter into the blade he hardens, and the blade is good accordingly.

The blade is covered over to a thickness of about one-eighth of an inch with a rather thick paste made by mixing a certain kind of fire clay with water. The edge and point of the sword are then scraped clean and re-covered with a much thinner layer of clay containing proportionally more water than the clay which has already been put on.

All openings into the forge are then closed so as to exclude the light, for darkness is necessary in order to determine the proper temperature of the blade to be hardened. Prayer having been offered up, the chief smith takes the clay covered blade, pushes it gently into the furnace, and moves it slowly to and fro in the blazing charcoal until the whole blade is uniformly heated from end to end.

The test which determines the proper degree of temperature is when the entire blade attains that degree of redness which is seen when one looks at the bright sky with his eyelids closed. With a shout of exultation the smith plunges the blade into water of a temperature of 100 degrees, and moves it to and fro until all sizzling ceases. The sword now goes into the hands of the professional polisher and sharpener of swords, which is a separate branch of work.

The last step taken before it is ready for use is to have it blessed or sanctified by the sword god. When the polishing is completed the weapon is placed in front of the *kakemona* suspended on the wall, with an offering of sake, rice and sweetmeats, while the swordsmith and his assistants take their prayer scrolls and make the final offerings to the deity to bless it.

During the ceremonies their friends of the male sex are invited to examine the weapon, and also to partake in their hospitality. Then everyone departs, as the sword must be left alone with the *kakemona* all night in order that his influence may enter into the blade.

While the Japanese weapon is undoubtedly equal in quality to the blades of Toledo and Damascus, it has but little elasticity, and cannot be bent double like the famous products of the old Spanish swordsmiths.

It will retain its edge, however, a remarkably long time, even when put to rough usage, and will cut through substances which the ordinary steel blade would scarcely dent.

NOT TAKING CHANCES.

Two salesmen who knew each other well happened to call on the same man at the same time, only to discover that his office door was locked. One of them suggested that they leave their cards sticking in the crack of the door.

"Not on your life," said the other, "and I'll tell you why. I once had a good customer who had an office in one of the downtown buildings. One day when I called he was out and the office was locked, so I stuck my card in the crack, as you suggested. Not long after a rival salesman blew in and saw my card. He wrote on the face of it, just over my name, 'I have been trying to find you for two days; now you can go to hell.' All I could say never squared it with the customer, and the other fellow got the trade."—*Crockery and Glass Journal*.

RECENT TRADE PUBLICATIONS.

KRAMER BBOS. FOUNDRY Co., Dayton, Ohio, have favored us with their Specialty Catalogue No. 6, devoted to Gem Furnaces, Dayton Gem Stoves for office and store rooms, Cast Iron Spout Shoes, Sash Weights, Vases, Chairs, Settees, Sewer Basins, Manholes, Cess Pools, Coal Hole Covers, Sugar Kettles, Mangers, Feed Racks, Cast Iron Mauls, Stair Plates, Chimney Tops, Stove Pipe Thimbles and Dampers, Stove Carriers and Casters, Cement Tools, Curb Tools, Gasoline Torches, Fire Brick, Stove Rods, Knobs, Hinge Pins, Flue Stops, Lid Lifters, Pokers, Drawer Pulls, Bed Casters, Stove Polishing and Daubing Brushes, Coal Tongs, Fire Shovels, Stove Linings, Baskets, Grates, etc., etc. The catalogue may be had upon application.

WESTERN IMPLEMENT Co., Port Washington, Wis., are sending out their catalogue to the trade, which illustrates and describes their line of Lawn and Porch Furniture, Harrow Carts, Handy Trucks, Feed Grinders, Sickle and Tool Grinders, Emery Wheel Dressers and Wrenches, Wheelbarrows, Hoisters, Water Conductors, Basin Covers, Sink Brackets, Milk Can Handles, Chest Handles, Third Seats, Post Mauls, Hitching Weights, Corner Feed Boxes and Hitching Posts. This will be found a very useful catalogue of goods used extensively on the farm, and should be sent for by the dealer.

BRAUER BROS. MFG. Co., manufacturers, importers and jobbers of leather goods and wholesale dealers in leather in St. Louis, Mo., are presenting their first complete catalogue. A large assortment of this class of goods will be found within its pages, including English Mutton Leg and Mexican Hand Carved Gun Cases, Razor Strops, Men's Square Cut Oak Half Soles, Leather Aprons, Leather Coil Washers, Shawl Straps, Trunks, Suit Cases, Bags, Buggy Harness, Horse Collars, Breeching, Halters and Strap Work, Bridles, Whips, Lashes, Leather Leggings, Pistol Holsters, Money Belts, Baseball Uniform Belts, Cartridge Belts, Dice Cups, Billies, Gloves, Skate and Book Straps, Telescope Rod Cases, Leather Wrist Supports, Ankle Supports for Skaters, Sword Scabbards, Tobacco Bags, Pen Knife Cases, Leather Key Chains, Watch Fobs and Chains, Pug Harness, Goat and Dog Harness, Dog Collar Locks, Dog and Cat Collars, etc., etc.

BLESS & DRAKE, manufacturers of all kinds of smoothing irons, 173 to 177 N. J. R. R. Avenue, Newark, N. J., have published an illustrated catalogue of their Improved Potts' Iron, New Potts' Iron, Mrs. Potts' Irons, Old Style, Self-Heating Charcoal Irons, Salamander Irons, Self-Heating Tailors' Irons, Common Sad Irons, Tailors' Geese, Flounce and Sleeve Irons, Laundry and Pressing Irons, Chinese Laundry Irons, Troy and Keystone Polishing Irons and Sad Iron Stands. This company was established in 1852, and their output is considered standard in excellence.

IDEAL PUMP & MFG. Co., manufacturers and jobbers, Green City, Mo., have distributed their general catalogue No. 3 to the trade. The contents include Cistern Pumps, Force Pumps, Lift Pumps, Hand and Windmill Standard Pumps, Plungers, Spray Pumps, Faultless Sprayers, Drive Well Points, Tubular Well Cylinders and Drives, Valve Balls, Seating Tools, Valve and Plunger Leathers, Leather Washers, Iron Tank Floats, Brass Strainers, Monitor Pipe Holders, Drive Shoes, Hydrant Clamps, Rod Couplings, Reducer Couplings, Rubber Buckets, Earth Augers, Lap Welded Casing, Wrought Iron Nipples, Elbows, Crosses, Circulating Boiler Fittings, Drive Caps, Wrenches, Chandelier Hooks and Loops, Window Sash Weights, Ceiling Plates, Pipe Hangers, Brass Railing Fittings, Gate Valves, Stop Cocks, Water Gauges, Taps, Reamers, Drills, etc., etc. This is a very complete catalogue of an extensive line of goods.

WOOD BROS. STEEL SELF-FEEDER Co., Des Moines, Iowa. Catalogue devoted to a description of the merits of the Wood Steel Self-Feeders and Band Cutters, Oscillating Bundle Spreaders, Automatic Variable Speed Governors, New Headed Grain Feeders with Extension Carriers, Automatic Couplings for Engines and Threshers, Perfection Tenders and Tender Truck Frames. A large number of testimonials are given, and the catalogue will be found an interesting one to dealers in agricultural implements.

FRED. D. DIVINE Co., 76 State Street, Utica, N. Y. Booklet describing and illustrating Divine Hand-Made Rods, manufactured under the names of Split Bamboo, Bethabara, Maltese, Greenhart, Dagama and Lancewood. In a note to their patrons, they say: "Rods in the following list are hand-made and warranted perfect, in both material and workmanship, and will be made good to purchaser, free of charge, in case of breakage from either poor material or workmanship. These rods are equal in every way to the very best made, and are sold at reasonable prices. We make a specialty of rods to order. If you have an idea of how you wish a rod made to suit your taste, write us the dimensions and a full description, and let us make you such a rod. Our guarantee holds good on such work, but a rod so made is considered special and must be accepted by the party ordering." Several views are given of camps in the Adirondacks and lakes in Canada, as well as some fine catches of fish. Prices accompany each line of goods.

C. HAGER & SONS HINGE MFG Co., 2427 to 2457 De Kalb St., St. Louis. Catalogue and price list of Steel Hinges, Butts, Washers, etc. including Chest Hinges, Parliament Butts, Table Hinges, Back Flaps, Pew Door Hinges, Shutter Butts, Wash Tray Hinges, Flask Hinges, Strap Hinges, T Hinges, Hinge Hasps with Staples, Crate Hinges, Basket and Crate Hasps, Trunk Hinges, Gate Hinges, Plate Hinges, Screw Hooks, Pulley Hooks, Well Wheel Hooks, Wrought Steel Washers, Stay Nails, Tub Handles, Riveting Burrs, Barn Door Latches, Bow Staples, Felloe Plates, Corner Irons and Braces, Hame Hooks, Anchors, Tie Buckles, etc.

CHICAGO STOVE WORKS, Blue Island Avenue and 22nd Street, Chicago. Supplemental Catalogue No. 43 of Gold Coin Stoves and Ranges. A large assortment of Polished Steel Ranges is shown; Steel Coal and Wood Cooks; Coal Ranges under the names of Novel, Peerless, Crown, Gold Coin and Home; Coal Cooks under the names of Modern and Mystic; Model and Rival Wood Cooks; Real Gold Coin Ventiduct Base Burners; Gold Coin, Security, Star and Prize Oaks; Wood and Laundry Stoves and Gas Ranges. This company also supplies the dealer with cuts for advertising. The catalogue may be had upon application.

HORTON MFG. Co., Fort Wayne, Ind. Illustrated catalogue of their High Grade Washing Machines, which includes their Galvanized Rotary, Globe, Western and American Washers, with repairs for same.

ENTERPRISE ENAMEL Co., Belaire, Ohio, have presented us with catalogues of their Azurelite, Limonite, Chrysolite and Nublu Enamel Wares, covering an extensive line of goods, such as Tea Steepers, Tea and Coffee Pots, Biggins and Boilers, Tea Kettles, Milk or Rice Boilers, Berlin Sauce Pans and Kettles, Preserving Kettles, Pudding Pans, Flat Skimmers, Milk Pans, Mixing Bowls, Fry Pans, Dish Pans, Molasses Pitchers, Baking Dishes, Wash Basins, Dippers, Basting Spoons, Drinking Cups, Plates, Water Pails, Dinner Pails, Water Pitchers, Soap Dishes, etc. These are very handsome and complete lines of goods, and these catalogues should be sent for by the dealer.

BILLINGS & SPENCER Co., Hartford, Conn.—Catalogue of Patent Improved Drop Hammers and other Forging Machinery. The company states: "In presenting this catalogue to manufacturers, we wish to call attention to the favorable circumstances and advantages we have had in the development and manufacture of our Drop Hammers. Having made a specialty of the drop forging business for a period of over thirty-five years in the manufacture of Machinists' Tools and Forgings of all descriptions, and having used all of the various styles of Drop Hammers that have been on the market in that time, we have had the opportunity to note their defects, and where desirable improvements could be made; to thoroughly test such improvements in our own shops and to perfect them for adoption on the machines manufactured by us. In this way we have brought our machines to their present state of efficiency. It is to the fact that we are actual users of Drop Hammers that we attribute our success in developing the improved machines we are now building and which are described in this catalogue."

NEW GOODS AND SPECIALTIES

ROYAL STEEL SAW SET.

Among the many tools sold by the Supplee Hardware Co., Philadelphia, Pa., under the copyright name of "Royal Steel" is the Royal Steel Saw Set, which as a saw set differs from the hand saw sets in several particulars. The saw may be laid flat on a bench, window-sill, stair-tread or any other available flat surface, greatly to the convenience of the carpenter or other user of the saw set. The Royal Steel Saw Set is made of drop-

ROYAL STEEL SAW SET.

forged steel, polished and nickel-plated, and packed in boxes containing one sixth of a dozen each. It is absolutely guaranteed against defective workmanship or material, and is retailed universally at \$1 each, and at that price a handsome profit to the dealer handling it.

EXACTO PACKING GAUGE AND CUTTER.

Every practical engineer to whom time is an object will appreciate the convenience and utility of a simple but ingenious device, the Exacto Packing Gauge and Cutter, recently placed on the market by Greene, Tweed & Co., New York. Themselves large manufacturers of packings, they were in the best position to

FIG. 1. EXACTO PACKING GAUGE AND CUTTER IN OPERATION.

fully recognize that the success of a packing largely depended on the skill displayed by the engineer in cutting and fitting it and that the sale of so-called "ring" packing was chiefly owing to the fact that they relieved the engineer of this trouble and responsibility, even if they were not as satisfactory from the standpoint of durability, etc. With the Exacto Packing Gauge and Cutter and knowing the diameter of the rod he proposes to pack, "continuous length packings" are as convenient to handle and far more economical than any ring packing, a perfect fit being at the same time assured, with choice of material which the engineer cannot always command in ring form. Our first illustration shows the device all ready for use. The dial is set at the figure representing the diameter of the rod to be packed, plus the diameter of the packing to be cut. A set screw secures the stop in place. The free end of the packing, having been cut to the proper bevel in the gauge, is then passed into the apparatus until the beveled end fits strongly into the stop. With the thumb of the left hand, the knife guide is then pressed down, firmly holding the packing

in place. The knife, of the serrated edge variety, is then inserted in the guide and the cut made, as shown in our second illustration. The result is a ring with the ends cut to a true bevel, as shown in Fig. 3, which will—if care has been exercised in the

FIG. 2. ENLARGED VIEW OF PRINCIPAL WORKING PARTS.

operation—exactly fit the rod. All the rings cut to this measure will be exactly of the same size; there is no possibility of waste from errors in cutting, no loss of time in fitting the packing to the rod, and if the packing is right, a tight joint and a workman-

FIG. 3. MODEL OF CUTTING WITH BEVELED ENDS.

like job is assured. All things considered, we are so favorably impressed with this little machine that we predict, because of its utility, that few engine rooms of the future will be found without one. We suggest to engineers to look into it.

Birmingham, Eng., does the biggest idol trade of any city in the world, says the *Pittsburgh Dispatch*. American steel makers may score victories in the matter of steel rails, but Birmingham stands absolutely alone in its commercial relations with the heathen. "Ju-Ju" goods of wood, tin and cheap metal are sent to various African ports almost by the shipload. Elaborate Joss gods are manufactured for China, some of them on special lines of wealthy Celestials who prefer to have their deities made to order. Images of Buddha, and of the various gods worshipped by the thousands of sects in India are turned out by the latest machinery in the Birmingham mills. It frequently happens that missionaries and idols, both British made, leave England for the same Eastern port, and the idol manufacturer usually has the best of the bargain. The biggest trade is with African agents, who supply interior tribes.

THE DANA FOOD CHOPPER.

The Dana Mfg. Co., Cincinnati, are introducing to the trade the Dana Food and Meat Chopper, which is destined to achieve an exclusive success in its field equal to the Dana "Peerless" Freezer and the Dana Mop Wringer. The Dana Food Chopper is the simplest food chopper made and the easiest to operate. Only two parts to clean: rotor and shell. It has the largest cutting capacity, the rotors are self-sharpening and cut at an oblique angle instead of square. Three rotors, one for each kind of cutting, do the work. It will cut, chop or pulverize any food used in the kitchen. Each rotor has a conducting spiral of its own, all one piece, so that the food is fed properly for the article chopped, which makes the pieces uniform and makes mashing impossible. The juices are retained. It does the work

easily and rapidly. Three rotors are enough to chop to any size desired, meat of all kinds, raw or cooked; fruits and vegetables of all kinds, and coffee. Rotor No. 63 grinds coffee as well as any grinder, pulverizing it if desired, which the coffee grinder does not do. When rotor is removed shell is open, free for cleaning. No uncut food is left in the machine, and there is no drip or waste. The Dana Mfg. Co. believe they now have a line of Dana specialties for household use, each one of which was put on the market only after much consideration and thorough test. All but the Dana Food Chopper have been placed before the jobber, dealer and consumer by their well organized sales department, which works in harmony with their advertising department. After years of investigation and months of testing, the first lot of Dana Choppers has come from the factory. The same high quality and business energy which has been associated with the other Dana products will be applied here.

SEMICIRCULAR LEVEL, PLUMB AND INCLINOMETER.

Bradford Union Mfg. Co., Bradford, Pa., are placing on the market the circular Level, Plumb and Inclinator illustrated herewith. It is made of cherry or mahogany, highly polished, the top and bottom bound with solid aluminum, milled perfectly straight and true. It is stated that there is absolutely no warp or twist. In addition to being a level, the device gives any degree or angle; also the rise or fall to the foot graduated to $\frac{1}{4}$

SEMI-CIRCULAR LEVEL, PLUMB AND INCLINOMETER.

inch. It can be readily mounted on a tripod for determining grades, foundations and excavations. The level determines exactly the position of an object with regard to a perpendicular, horizontal plane or incline, and defines the degrees in inclination from a perpendicular or a horizontal plane. A further use is ascertaining the height of a building or other object at varying distances. The device has a semicircular glass tube, with a gradual scale above, which represents the number of inches or fractional parts thereof on rise or fall to the foot. For example: When the centre of the air space is on $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ or 1 inch, it means that there is that much of an incline to the foot. Thus in a distance of two feet, multiply by 2; in a distance of 10 feet, multiply by 10; in a distance of 50 feet, multiply by 50 etc., to any distance desired, as it makes no difference as to the length of the level. Below the glass tube is the 90 degree scale, figured both ways. Thus when the centre of air space registers 30 degrees on the upper set of figures, the lower set reads 60 degrees. All parts of the device can be readily adjusted. It is explained that with the device all figuring is dispensed with, the air space finding its own level and registering the same at any angle or patch, wherever it may be placed.

IMPERIAL CENTRIFUGAL PUMP

Among the numerous Automobile specialties manufactured by the Imperial Brass Mfg. Co., Chicago, Ill., we illustrate and describe the Imperial Centrifugal Pump. This pump gives positive circulation and is absolutely noiseless. It is perfectly balanced; hence the friction and power required to drive it are reduced to a minimum. These pumps are manufactured with bases, as indicated in the illustration herewith, or with other styles or

IMPERIAL CENTRIFUGAL PUMP.

shapes to meet the requirements as demanded. They are made entirely of bronze, with 9/16 Tobin bronze shaft, 3-inch bearings, and 1/2 inch pipe connections. They are 5 inches in diameter, the approximate weight being six pounds. The manufacturers recommend chain or belt drive rather than gear wherever possible. They are calculated to give 165 gallons per hour at 300 revolutions per minute, or 200 gallons at 400 revolutions; 250 with 600 and 350 with 900. They also manufacture in brass

Imperial pipe fittings, which are small things, these connectors, but are big helps when a pipe on the car breaks and needs immediate repair. They enable one to put two broken ends of a quarter inch pipe together in a short time, and establish a connection so that the oil supply or other pipe lines can go on as if nothing happened. To make a repair it is only necessary to place the end of pipe through the No. 1 connectors and join the two ends by the No. 2 connector. A supply of these connections in a tool box will come handy at some time or another, while the expense is merely nominal.

REYNOLDS FOLDING DECOY DUCKS.

J. W. Reynolds, No. 68 S. Morgan Street, Chicago, is the manufacturer of the Illinois River Folding Decoy Ducks, of which we present an illustration herewith. They are made of wood and brass, no frail material being used in their construction. Even the paints are especially prepared, and will not crack nor peel under the action of the sun or water. They are also painted with care, so as to have an attractive appearance to lure and look natural when in the water. One particular advantage that

REYNOLDS FOLDING DECOY DUCKS.

will appeal to the practiced duck hunter is the celerity with which these ducks can be set out and taken up. Another is the ease with which they can be packed and transported from place to place, as they set in a very small space and their weight is insignificant. The birds are painted in natural colors on both sides to represent male and female Mallards, Pin Tails, Canvas Backs, Blue Bills, Black Mallards and Whistlers. They are attached to a wooden float in groups of three. The float is in three pieces and jointed on one end with a three-plate hinge, so when extended a bird floats at each extremity. The float sinks beneath the surface of the water, presenting just the decoys. It takes but a few seconds to put them in use, as a spring holds the combination open, and no adjustment is needed. Four floats take one dozen decoys, which come in a light strong carry box with handle, including cords and anchors complete.

IMPERIAL AUXILIARY OIL PUMP.

Imperial Brass Mfg. Co., Chicago, Ill. are the manufacturers of the Imperial Auxiliary Oil Pump, of which we give an illustration herewith. This oil pump is small and compact, fits snug

IMPERIAL AUXILIARY OIL PUMP.

to the dash-board, and is ready for use in an emergency, when the oil supply is cut off through accident or mishap. It is made of brass, with a cylinder 4x1 1/2 inches, and fittings for 1/8 inch pipe, usually connected with a small tank from which it draws

the oil on the up stroke, discharging it on the down stroke. Has two valves: An intake valve, which opens on the up stroke, and a discharge valve which opens on the down stroke. It also has a pet cock, with lever, which can be opened or closed, as desired.

SELF-ADJUSTING PORCH SWINGS.

The Indiana Bent Rung Ladder Co., Indiana, Pa., have added to their line of Porch Swings the two styles which are illustrated herewith. In No. 1 we have their Self-Adjusting Solid Comfort Veranda Swing. This is self-adjusting to any position of

SELF-ADJUSTING SOLID COMFORT VERANDA SWING NO. 1.

ease and comfort. The great feature of the swing is the foot rest which keeps ladies' clothing from contact with the porch floor. This can be changed into a child's crib or hammock in ten seconds. It is constructed of hard wood, angle and flat steel, all parts being bolted together. The standard size of this swing is 36 inches. No. 2 is the Mission Style Reversible Swing, having a reversible back, entirely new this season. The re-

MISSION STYLE REVERSIBLE SWING NO. 2.

versible position is the new feature not possessed by any other swing on the market. Can be taken apart in five minutes and knocked down for storage or shipment. Length 3 to 6 feet, and finished in weathered oak. The manufacturers say they are paying particular attention to the construction and finish of these swings. The lumber used is thoroughly seasoned, kiln-dried oak, and the angles and flat parts are the best low-grade carbon steel. These swings are not painted, but finished in golden, weathered or green oak, hand rubbed, showing the various growths of the wood. All of their makes of swings are so constructed as to be shipped knocked-down, so as to save freight and storage. All parts being interchangeable, any novice can put these swings together or take them apart in a very few minutes. All the swings are furnished with 30 feet of silverized chain and other attachments complete for hanging.

QUALITY COUNTS.

Low price often tempts people to purchase something that is not perfectly satisfactory, and they console themselves for the imperfections by the thought that they have at least got their money's worth. But the man who buys a low priced revolver is indeed tempting Providence, because it stands to reason that the money which the manufacturer saves must come out of the quality of the weapon. You cannot have absolute accuracy and the very best materials and workmanship at a bargain counter price, and unless the weapon is as nearly perfect as human skill can make it, it may prove more destructive to the owner than to anyone else. What does a dollar or so saved on the price count against the loss of a hand or an eye? If you want a revolver that can be depended on in any emergency, because it is made of the best material, is constructed by skilled mechanics, is accurate to the thousandth of an inch, with no rattle or shake about it, and as flawless as the most rigid inspection will insure, that is quick acting yet cannot be fired when on safety half-cock except by pulling the trigger, you will find it in the "H & R" Double Action, Model 1905, Revolver. It is up to you, Mr. Dealer, to handle only first-class goods as your reputation is at stake.

GREAT DEMAND FOR ALUMINUM.

LARGE INCREASE IN PRICE—NEW USES FOR THE METAL.

Reports from Great Britain show that the consumption of aluminum has increased so rapidly that the world's supply at present falls far short of the trade demand. Many users of the metal, particularly those engaged in the motor-car industry, are suffering great inconvenience without any immediate prospect of substantial relief.

The world is dependent for its supply of aluminum on four sources of production. The chief of these is represented by the Pittsburgh Reduction Company at Niagara Falls. In Great Britain there is the British Aluminum Company, whose plant is at the Falls of Foyers, and on the Continent of Europe there are the Neuhausen works in Switzerland, and works in Germany. In the United States shortage was aggravated by a strike of workmen. Americans sought to cover their requirements in this emergency by importing from Great Britain, but there was no aluminum there to be had. The British production amounts to about 2,250 tons per annum, which does not meet the needs of that country, and additional plants are being laid down in Scotland and Wales. There was a great demand on the Continent of Europe for this metal, and the result has been that aluminum ingots were quoted the 1st of April at \$850 a ton, or \$200 above the market price ruling last July, but the quotation is purely nominal, inasmuch as there is no material to be had in England.

ALUMINUM INSTEAD OF BRASS.

The *London Times* says that aluminum has come very prominently into use for castings, such as are necessary in electrical work, and an immense impetus has been given to the industry by the adoption of the metal for crank cases and gear boxes in automobiles. Aluminum is also very largely displacing copper for the manufacture of pans, such as are used in wax refining, jam boiling, etc. It is claimed that where brass can be used aluminum is, with rare exceptions, equally applicable, is equally economical, and has the great advantage of being about one-third of the weight. It will naturally be asked why the great expansion of demand for the metal has not been accompanied by a corresponding increase of production. The answer is that the producers have miscalculated the rate of progress, the present consumptive demand being very greatly in excess of that at the same period of last year. The rapid development of the motor-car industry is, no doubt, chiefly responsible. The supply of aluminum can not be increased at will, as is the case with many commodities.

In America aluminum is being adopted for electric wires. For example, the current from Niagara is being carried from the rapids to New York by aluminum cables. The metal has not, however, been applied to this use in England.

VICTORY?

"Who says the illiterate get no pleasure out of classic art?" remarked an alumnus of the University of Rochester recently. "A copy of the Winged Victory was placed in the center of our library last Summer. One of the workmen, a recent importation from Dublin, surveyed the headless and armless statue with some curiosity.

"'An phat may ye call that fellow,' he asked.

"'That's the statue of Victory,' said the librarian.

"'Victory, is it?' said the man; 'begorra, I'd like to see the other fellow then.'—*N. Y. Tribune*.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. 2. THE CONSIDERATION TO SUPPORT A CONTRACT, CONCLUDED:

If a creditor agrees to give up part of his debt in consideration of the debtor's giving him new or additional security, his promise will have a good consideration and be valid.

Then, too, in order for the consideration to be legal, it must not be something in the past. Thus, if one does work for me gratuitously and I afterwards voluntarily promise to pay him for it, I am not bound in law to keep the promise, the consideration having been something in the past. So if I have bought a horse and not at the time required a warranty, and I afterwards go to the person from whom he bought it and ask for a warranty, a warranty then given, unless something is paid or promised to be paid on it, is not valid in the law.

If I promise to repay to strangers what they may pay out in the future in taking care of my sick son, who is of full age, the promise is supported by a valid consideration and is legally binding. If, however, strangers take care of my sick son who is of full age and I afterwards promise to reimburse them, my promise is without consideration, as it is based upon past acts. I may be morally bound to do so, but I am not legally so bound.

It has been held that where the act is done at the request of another person under such circumstances that the law will imply a promise to pay what the service is worth, a subsequent promise to pay will be binding, the theory being that the parties have reduced to a certainty what they have purposely left undetermined.

As an exception to the rule that promises cannot be based on a consideration that is past we name promises to pay debts barred by the statute of limitations or by discharge in bankruptcy. Courts so holding have declared that the moral obligation to pay a debt barred by statute or by discharge in bankruptcy is sufficient to uphold the promise.

Another rule is that the consideration must be something possible. A promise to do something that cannot in the nature of things be done is not a valid consideration to support a contract. Not only a thing which is physically impossible, but also a thing which is legally impossible cannot be made a consideration. A mere stockholder in a corporation cannot execute a legal deed for the corporation. A promise by a stockholder to do so would not be a legal consideration for a contract.

The question arises as to whether the fact that one is morally obliged to do a thing will make his promise to do it valid as a consideration for a contract. We have seen that where one is legally bound to do a thing his promise to do it will not make a legal consideration. The rule is that a moral obligation will not uphold a promise.

There is one other point we should consider before passing from the subject of consideration. Sometimes a consideration is said to fail. If I promise to pay a man a hundred dollars in consideration of his agreeing to sell me his chestnut colt, the consideration supporting my promise to pay is his promise to convey the title to the animal to me. If before he does so the horse dies, there is a total failure of consideration. There is absolutely no way possible by which he may fulfill his agreement.

Where a patent right was a consideration of a contract, and it was found that the patent right was void, the consideration was said to have failed. The mere fact that a patent right that constituted the consideration of a contract could not be applied to any useful purpose and was of no value did not constitute a failure of consideration.

A promise to pay money for notes which afterwards are found to be forged is another instance of a promise given for a consideration that has failed. There is such a thing, too, as a partial failure of consideration, in which case the party injured may recover for so much as has failed.

Before passing from the question of consideration, let us emphasize the fact that a court will never examine into the mere adequacy of price or consideration, that is, it will not consider whether the price or consideration was large or valuable enough. Courts do not attempt to make contracts for people. They will not answer the question as to whether one person received enough of what he gave, or whether one promise was worth the other. The only time when the question of adequacy can come up is when fraud is charged and the gross inadequacy of the consideration, however, is not enough to warrant a court in setting aside a contract.

(To be continued.)

Legal Matters

OF INTEREST TO HARDWAREMEN

DRAFT—INDORSEMENT—RUBBER STAMP.

The Supreme Court of North Carolina held, in the case of *Mayers vs. McRimmon*, that the placing of the name of the payee of a draft on the back thereof with a rubber stamp by a person having authority to do so, and with intent to indorse the instrument, constitutes a valid indorsement, and that the indorsement of a draft does not prove itself, but must be established by proper testimony.

TRAVELING SALESMAN—MISREPRESENTATIONS.

The Supreme Court of Minnesota held, in the case of *Roebuck et al. vs. Wick*, that where a traveling salesman falsely represented to the vendee of certain goods that he had made sales of similar articles to a competitor engaged in the same business in the same place as the vendee, in evidence of which he produced a fictitious contract of sale to such competitor, he made use of an artifice intended to cheat or deceive another within the rule avoiding a contract of sale for fraudulent misrepresentations.

EXEMPTION—TOOLS—ABANDONMENT—LEASE.

The Supreme Court of Minnesota held, in the case of *Cable vs. Hoolihan, Sheriff, et al.*, that the exemption of tools and instrumentalities granted by section 5459 of the General Statutes of 1894 is lost by an abandonment of the trade or occupation in connection with which they are exempted. In the case before it, the court held that the exemption claimed by the plaintiff respecting certain tools levied upon by the defendant as sheriff had been lost by his conduct in abandoning his trade and leaving the tools to a third person for the period of two years, coupled with the right on the part of the lessee to purchase the same at any time within one year from the date of the lease.

EMPLOYER'S LIABILITY—DEFECTIVE APPLIANCES.

The Supreme Court of Minnesota held, in the case of *Costello vs. Frankman et al.*, that appliances and implements may be suitable and safe when used in the performance of certain work under other conditions, and if the employer furnishes appliances under conditions where from the nature of the work they are liable to become unfastened and thus subject employees to injury, the employer is open to the charge of having furnished unsafe and unsuitable appliances. In the case before it, which involved the question of the safety of a pulley block and appendages, the court said that the rule was not changed by the fact that the same might have been rendered safe by proper tying or mousing, and that as respected and unskilled workman having no knowledge of facts, such mousing was not a duty to be performed by the employees.

GREATEST INSURANCE ON EARTH.

I want to write an ode to the savings bank for the man who works on a salary and I want to tune my harp and sing psalms of praise to the sinking fund for the man who owns the place! I want to slap the man on the back who has something laid aside for the moist day of the future. I want to drink to the man who has a nice little nest egg laid aside and who can look grim Adversity in the eye and with a grin say: "Go to the devil!" I want to doff my hat to the business man who has the sinking fund habit, for he can cross his legs and smoke comfortably when the mill hands go on a strike and business in his town goes to the demnition bow wows! I kow-tow to the boy on 15 a week who is slipping 5 of it away each week and who has a few wholesale catalogues laid away in the bureau drawer at home and is getting interested in the subject of rents and is beginning to wonder who made Smith's pretty fixtures. I glory in the man who is ready for anything and the greatest insurance on earth is sinking fund and the savings bank. ! D. C. W.

TRIMMING THE TRIMMER.

"Here, you boy, what are you doing with the whisk?" said the customer to the boy in the barber shop who was plying the broom while looking another way.

"Don't speak so cross to the boy; he's only learning the business," said the Boss.

"When a boy needs it, I'll trim him down," said the man who was being broomed.

"We cannot permit a customer to trim his 'whiskers' in this shop. I'll attend to that." Remarked the Boss.

THE WOMEN ARE CRAZY

to get those perfect-cutting **Screwless Springset Shears**. "Perfectly lovely!" "Just splendid!" they exclaim when they take the shear in hand and feel the easy, smooth, velvet-like action.

To a hard-headed hardware man, such enthusiastic expressions may appear unnecessary; but men do not realize how much discomfort women have had to put up with in cutting with the old hand-cramping, screw-connected shear. And no hardware dealer can afford to disappoint his fair customers in a matter so important to them.

Give them **SCREWLESS SPRINGSET SHEARS**, or they will get them elsewhere; for they **WILL** have them.

The cause is plain to see: Perfect spring tension; cuts entire length of blade; roller bearing.

MR. DEALER: Just a hint: Get a pair for your wife or daughter; your next move will be to order a gross for the other men's wives and daughters.

Send for price list and descriptive folder.

DAVIES AUTOMATIC SHEAR CO.,

41-43 Maiden Lane,

NEW YORK

THE COPPER AGE.

"Twenty-five years ago the United States produced 27,000 tons of copper. The production during 1905 was practically 400,000 tons, or more than half of the world's total supply. The value of last year's output may be given as \$160,000,000," says the New York Sun. "The uses of this metal are steadily growing. It is estimated that by 1920 the requirements of the world will reach 1,500,000 tons. The United States will probably hold its present place in the market. New deposits are opened from time to time. There are known districts yet undeveloped in the western mountains, and Alaska is rich in copper. Mexico and Canada are copper countries and send the United States ore and matte for smelting, and pigs, bars and ingots for manufacture. The increasing supply of the metal promises to keep prices within reasonable bounds, while the increasing demand fairly assures ample profits to the owners of copper properties. No available substitute has yet been found for its use for electrical purposes. and the employment of electricity increasing from year to year. The day of copper has come, and there is every reason to believe it will be a long day."

INCREASED OUTPUT OF COPPER.

The value of the copper production in the United States in 1905 was \$137,498,727, as compared with \$105,629,845 in 1904. The product of 1905 was much the largest ever recorded in the United States. Exports of copper to Germany, Holland, and other countries continue to increase. During the months of May 11,072,320 pounds were shipped to Germany, as compared with 6,381,340 pounds in April. Exports to Holland were 14,197,120 pounds in May, an increase of over 1,000,000 pounds as compared with the preceding month. France took 6,948,480 pounds and the United Kingdom 5,125,120 pounds, being a considerable increase over the previous month's shipments. The Michigan mines produced 20,000,000 pounds of refined copper in May, which sold for approximately \$3,760,000. That was the largest output secured in any month since copper was first mined in the Lake Superior region. It indicates an annual production of 240,000,000 pounds, but an even larger product is expected as a result of preparations made by the mine owners to handle a greater output.

CANADIAN TRADE.

BRITISH COMMISSION WILL SEEK REASONS FOR SMALL SALES.

Consul R. S. Chilton, Jr., quotes a Toronto newspaper statement that the British Board of Trade will send a commission to Canada to discover the nature of the competition that is encountered by British manufacturers in Canada, upon which the paper comments:

When it is remembered that the products of British factories enter this country at two-thirds of the ordinary duty, it is remarkable that they have not made greater headway. Between 1897, when the British preference was begun, and 1905 the dutiable imports from Great Britain increased by about \$16,000,000, while the dutiable imports from the United States increased by \$38,000,000. The increase in the British imports was mainly in cottons and woollens. And right at this point, where something has been accomplished, the Canadian manufacturer complains that he is injured by the competition of the English and Scotch factories.

This is a notable instance of nature, geographical proximity and social and commercial habits being stronger than law. Canada has the necessary equipment of a manufacturing country, including mines, forests, and water power. All the necessities of life and most of the conveniences and luxuries are produced within its own boundaries. As its great water powers are developed it will tend to become more and more an industrial country, and to require less and less from abroad. In the meantime the proximity of the more advanced United States has the natural result, first, of promoting the sale of American manufactures in Canada; next, of arousing in Canadians the ambition to manufacture similar goods for themselves, imitating, adopting, and varying American inventions and processes of industry.

In these facts may be sought the cause of the partial failure of the British preference. What Canadians do not or can not produce for themselves they are apt to seek in the United States. Near the border line similarity of conditions and habits conduces to this result. Such things as stoves, refrigerators, wagons and farm implements illustrate this similarity. If a Canadian manufacturer finds that some new device is giving his American competitor an advantage over him he adopts it or improves upon it. In this keen rivalry it is very difficult for the old country manufacturer to take a part. It is in staples like cottons, woollens and certain prepared foods that the British manufacturer holds his own.

OUR CANADIAN LETTER

(By Our Special Correspondent.)

TORONTO, July 5, 1906.

A BIG HALF YEAR.

The first half of 1906 has been a remarkably good one for Canadian Hardwaremen, as while a few winter lines such as sleigh bells, axes, etc., were carried over in large quantities, owing to the mild winter, other winter goods sold well and with the early Spring a building boom set in, dealers in every part of Canada finding an increased demand for mechanics' tools, builders' Hardware and contractors' supplies. The Summer slackening off has not materialized as early as usual, shipments continuing heavy up to the end of June. Travelers will take well-earned holidays this month, and manufacturers and jobbers will endeavor to get large enough stocks to supply the heavy demand certain to be felt in the Fall. With the exception of lanterns, wire nails and a few other lines, prices have held very firm all Spring and Summer. As an indication of the remarkable development going on in Canada, the building statistics of Toronto might be quoted. Last year was the record year, but for the first six months of 1906 the permits issued totaled \$6,200,000 as compared with \$4,500,000 during the same period in 1905.

In spite of this prosperity, the retail trade has not been getting its share of the harvest, because of lack of organization. Price cutting has been general, and most dealers have been doing hundreds or thousands of dollars' worth of business in wire nails, fencing, white lead, churns, lanterns, cement and other staples, without making enough profit to cover the cost of handling these goods. The sale of builders' supplies, etc., to consumers by large retail houses on the jobbers' list has also resulted in much loss to the trade within a hundred miles of Toronto. Tinware manufacturing houses, metal roofing concerns and other producers and jobbers are also accused of selling to men outside the trade in direct competition with regular dealers to whom they have sold stocks of goods. The Retail Hardware Associations of Western Canada and Ontario are grappling with these problems, however, and conditions are bound to improve if the trade backs up the executive officers. The Western Hardwaremen meet in convention at Winnipeg on July 25 and the Ontario Association holds another convention at Toronto on September 4 and 5.

QUEBEC TRAVELERS' TAX.

The latest provisions of the tax imposed on "foreign" travelers by the Province of Quebec are not generally understood, a sliding scale being now in force.

The six months' privilege, in effect since May 1, provides for a license from 1st May to 1st November, or from 1st of November until the 1st of May following, by paying one-half the amount of full yearly tax. Thus a traveler for a firm outside of Canada calling on the wholesale trade in the Province of Quebec, instead of paying \$100 pays only \$50 for a six months' license, and a traveller calling upon the wholesale and retail pays \$100, while one selling consumers pays \$200, instead of \$200 and \$400 respectively. This latter provision is decidedly more equitable as it practically cuts in half the obnoxious tax. To avoid taking out more than a six months' license foreign travelers must arrange their trips so as not to overlap the dates mentioned.

Foreign commercial travelers still make strenuous objections to the tax, but the Provincial Revenue Department is closely watching its collection, and evasions, which were at first effected, are now impossible. Interviewed in Montreal, the collector of Quebec provincial revenue outlined clearly the exact interpretation of many dubious points. For instance, a firm outside of Canada desiring to send a traveler to work the Province of Quebec, to avoid paying the tax must have a bona fide place of business in the province at some centre where stock is carried and books kept. A favorite form of evasion, which is useless in this respect, is for a foreign firm to establish an agent in either Montreal or Quebec. While the resident agent has not to take out a license, a traveler from the headquarters of the firm, or any of its foreign branch offices, coming to the province to call on the trade with the agent, must pay the tax.

TRADE DEVELOPMENT AND PERSONAL ITEMS.

The Schultz Mfg. Co., Hamilton, Ont., a new concern launched a year ago, has gotten well established in the lantern business. There are three other large manufacturers of lanterns in Canada, the Kemp Mfg. Co., Toronto; Ontario Lamp & Lantern Co., Hamilton, and the W. W. Chown Co., Ltd., Belleville. For about a year there has been an open market in lanterns, the result being that not only the trade but grocers and others are stocked up with lanterns and they are being sold for half their

former price by both manufacturers and retailers.

Port Hope and Bowmanville are two Ontario towns of 3,000 to 4,000 population, each having five Hardware stores in addition to others in near-by towns and villages which compete for the farmers' trade. In Port Hope there are also two stove and tinware stores, none of the Hardwaremen handling this side line. Needless to say, competition is keen, and staple lines such as nails, white lead, etc., are being slaughtered at bottom prices. One dealer in Port Hope is overcoming the manufacturers' agreement by buying through the Chicago House Wrecking Co., hoping in this way to beat his competitors on the lines he secures from this concern. In Belleville and Barrie, in direct contrast to the towns first mentioned, the trade have drawn up a list of prices and price cutting is practically unheard of. In the last two named towns the dealers are organized in the Retail Hardware Association.

The Morse Hardware & Lumber Co., Swan River, Man., has been incorporated with a capital stock of \$100,000.

A. A. McMichael, vice-president and Toronto manager of the James Robertson Co., Montreal, Toronto and St. John, died suddenly early in June. Mr. McMichael was chairman of the Hardware section of the Toronto Board of Trade, and a popular and energetic man. The Robertson Co. some months ago sold their saw business to the Canada Simonds Co., but still manufacture paints and plumbing supplies. H. S. Harwood has taken over the management of the Toronto branch.

Several changes have been made in manufacturers' agency circles in Winnipeg during the past month. James Tees, of Tees and Persse, died suddenly and E. B. Loucks left the Marshall-Wells Co. to open an agency in partnership with E. H. Bissett. Mr. Tees commenced business with the Canada Lead Works of Montreal.

The Canada Simonds Saw Works are installing improved machinery at their Montreal works.

The Williams Gauge Co., Pittsburgh, are opening a branch at Montreal, in charge of W. N. Courtney.

R. J. Bruce has sold his Hardware store at Port Perry, Ont., to A. J. Carnegie, and has purchased Hope & Noden's business at Toronto Junction.

John McCollough, traveler for Wood, Vallance & Co., Hardware jobbers, Hamilton, Ont., recently returned from a three months' tour of Southern Europe and Asia Minor.

The George Taylor Hardware Co., London, Ont., have opened a branch at New Liskeard in addition to their branch at Cobalt in the famed mining district in Northern Ontario.

Geo. Caverhill, of Caverhill, Learmont & Co., Hardware jobbers, Montreal, has recovered from a short illness.

Arthur Leger, of Lacroix & Leger, and A. Derouin, of L. H. Hebert & Co., Montreal, are on a three months trip to Europe.

A. D. Lablanc, formerly of the Canada Hardware Co., Montreal, has joined the travelling staff of Lewis Bros., Montreal.

Percy C. Owen, of the Rogers Hardware Co., Charlottetown. P. E. I., has removed to Lacombe, Sask.

F. J. Cragg, of F. J. Cragg & Co., Halifax, N. S., was a delegate to the recent convention of the Knights of Columbus at New Haven, Conn.

The Maple Leaf Harvest Tool Co., Tillsonburg, the Nicholson File Co., Port Hope, and Shurley & Dietrich's saw works, Galt, are all enlarging their plants and machinery.

The Ontario Silver Co., Niagara Falls, Ont., have been prosecuted and fined \$600 for marking their cutlery "Sheffield." The Cutlery Corporation of England was behind the prosecution.

The J. H. Ashdown Hardware Co., Winnipeg, are to open a branch jobbing warehouse at Calgary, Alberta, and it is also reported that a Toronto wholesale house will also establish a branch at Calgary.

The Hamilton Plate and Mirror Glass Co. are to open a factory at Hamilton, Ont.

The Blanchite Process Paint Co. has been formed at Toronto, the capital stock being \$250,000.

The Canadian Wire Screen Co., Toronto, capitalized at \$250,000 will make wire roller window screens at Toronto.

J. E. Lundy and J. B. McLeod have opened a Hardware store at Edmonton, Alberta.

The Kelly Hardware Co., Brandon, Man., has been incorporated with a capitalization of \$15,000.

S. S. Wetmore, of A. M. Bell & Co., Halifax, N. S., one of the best window display artists in Canada, will attend the Window Dressers' Convention in New York in August.

Brandram Bros., the English firm of lead corrodors who are to establish a Canadian plant, have decided not to locate at Halifax, and will probably select Montreal as their factory site.

REVIEW OF THE MARKETS.

WIRE NAILS: At a meeting of the independent Wire Nail Manufacturers held in the latter part of June, quotations were re-affirmed and production was sufficiently curtailed during the Summer months to strengthen the market conditions. The demand keeps up very well, while the steel shortage has a negative effect on the output. Slight concessions from official quotations are reported as having been made on desirable orders. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|--|--------|
| Carloads to jobbers | \$1.85 |
| Carload lots to retail merchants | 1.90 |

New York. Small lots from store are still in fair demand for immediate wants. Quotations for small lots from store are on the basis of \$2.10 per keg.

CUT NAILS: At the recent meeting of the Cut Nail Association prevailing prices were re-affirmed, new business in cut nails being reported light. Mills are running on contract orders already booked. While some quotations are reported as having been shaded slightly by mills outside the Association, the market fairly maintains its strength. Advantage is taken by some of the mills to close for needed repairs. Quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock New York; \$2 for less than carloads on dock New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York. The local demand is moderate in its proportions. Quotations for small lots from store are on the basis of \$2 per keg.

BARB WIRE: The present demand from the trade proper is comparatively light and but little doing, the railroads furnishing the principal outlet through specifications on contract orders. Quotations recently re-affirmed are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | | |
|---|--------|--------|
| Jobbers, carload lots | \$2.00 | \$2.30 |
| Retailers, carload lots | 2.05 | 2.35 |
| Retailers, less than carload lots | 2.15 | 2.45 |

SMOOTH FENCE WIRE: New business is referred to as being quite moderate, although manufacturers of Fencing are beginning to place contracts for their annual requirements. It is expected the business in this line will be very heavy during the Fall, as shipments from the mills are larger than usual at this season of the year. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

WOOD PLANES: The manufacturers of Wood Planes, Hand and Bench Screws, etc., have withdrawn all quotations on these goods made previous to July 2. New prices are announced advancing quotations, due, it is said, to the increased cost of lumber and other materials. On the new schedule the price of Planes to the general retail trade is subject to the following discounts:

| | |
|---------------------------------------|-----|
| Wood Bench Planes, First Grade | 35% |
| Wood Bench Planes, Second Grade | 45% |
| Molding Planes | 30% |

The usual additional concessions are made to the large buyers.

HAND AND BENCH SCREWS: The advanced prices on Hand and Bench Screws are represented by the following base discounts.

| | |
|---|-----|
| Wood Bench Screws, without collar | 25% |
| Wood Bench Screws, with collar | 20% |
| Hand Screws | 25% |
| Cabinetmakers' Clamps | 25% |

HENRY DISSTON & SONS, Philadelphia, have issued a new edition of their catalogue under date of July, 1906. A variety of new goods have been added to their line, and also a number of changes in list prices, some of which apply to important goods.

In connection with the catalogue a revised discount sheet is issued bearing date of July 2, 1906, in which a number of changes are made in the discounts.

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

| | |
|---|------------|
| White Sisal (500 feet to the pound) | 9¼ to 9½ |
| Standard (500 feet to the pound) | 9¼ to 9½ |
| Standard Manila (550 feet to the pound) | 10½ to 10¾ |
| Manila (650 feet to the pound) | 11½ to 12 |
| Pure Manila (650 feet to the pound) | 12½ to 13 |

ROPE: The following prices may be said to represent the market:

| | Cents Per Pound. |
|------------------------------------|------------------|
| Pure Manila, 7-16 and larger | 12½ |
| B Quality Manila | 11½ |
| Pure Sisal, 7-16 and larger | 9 to 9¼ |
| No. 2 Sisal, 7-16 and larger | 7¾ to 8 |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....40 cents per gallon.

In lots of 5 barrels or more.....39 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Doubled Boiled Linseed Oil, 2 cents per gallon higher than raw.

Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.

Calcutta Oil68 cents per gallon.

THE GRAPHITE TRADE.

Business in the line of graphite products shows for the six months of 1906 marked increase over the six months of 1905, although we did not think it possible. Prospects are reported by our salesmen throughout the United States seem to be that there will be no let up to business. At present writing some of our Western salesmen report the thermometer to be from 92 to 105, which has "knocked business," coming as it has close to the Fourth of July.

JOSEPH DIXON CRUCIBLE Co.

THE DAVENPORT TRADE.

The jobbing trade in Summer goods is practically over. The usual advance orders for Fall and Winter trade have been placed; hence the business that is being done in Hardware is of an assorting nature in a general way. Orders are made up of a large number of articles and a small quantity of each. The sharp advances in metals, especially tin, etc., has resulted in advancing prices of many commodities, especially those that are galvanized or tinned. The abnormally large cherry crop has produced a famine in Cherry Seeders and there are other lines that are difficult to obtain promptly from manufacturers. Money is not as plentiful as could be wished and collections are correspondingly slow.

SICKELS, PRESTON & NUTTING Co.

THE ST. PAUL TRADE.

The Hardware trade is prosperous in our entire section. Goods are in demand and prices firm. The crop is coming on in good shape,—never having looked more favorable. Surely we have much to be thankful for, because of our living in this beautiful State. The writer has recently returned from a three weeks' trip East and feels there is no signs of a relapse, but rather that all signs point towards continued prosperity. The West is doing well but the East, too, is flourishing beyond any previous experience. We advise the trade to contract for Fall and Winter goods—get them in early and be prepared ahead of the season to do the business. Many retailers are adopting the plan of marking goods in plain figures—so large that the man and woman can read them as they run. In fact, do business in modern ways and don't be afraid to show everybody what your prices are, because people do desire to get along without asking questions and do like to walk around the store and see for themselves what each article cost them. Another good thing is a bargain counter,—all articles on it to be 5, 10 or 15 cents. This is good advertising and wins out.

NICHOLSON FILE CO.,

Providence, R. I.

THE SAGINAW TRADE.

Here forty-three years ago all was lumber and salt business. Our river on each side had saw mills and salt blocks. Schooners and steam boats were loading salt and lumber and our river was a busy thoroughfare. There was not a single bridge across the river, little steamers were used to ferry the people across and rope ferries to take the teams across. Then there were no railroad connections, and passengers had to take a stage part of the way coming or going to Detroit. The Hardware used in this section of the country was only the kind that saw mills used and the pioneer used in his cheap home. Thumb latches were used mostly on the doors, but some used, in a small degree, rim locks and knobs. Now there is no builders' Hardware too good. In the old days stove manufacturers, to beat their competitors, put a No. 9 top on a No. 8 stove; they sold well, for all a customer wanted in those days was to get a stove as near the size of his pocketbook as possible. Now people want the best steel ranges, and where in the old days they used to burn slabs in summer, they now use gas for cooking purposes.

Through the last forty-three years G. W. Morley, president, and Edward W. Morley, vice-president, have been and are now connected with the Hardware company of Morley Brothers. They have seen the crops change from logs, shingles, staves, telegraph poles, etc., to wheat, corn, potatoes, sugar beets, etc. The saw mills are all gone and in their place are furniture factories, lumber tool factories, piano factories, harness factories, horse collar factories, plate glass factories, etc.

At the present time crops in this section look fine. We have had rain enough to keep them in good growing condition. Trade keeps up well for this season of the year, and we believe those who buy for only their legitimate trade will do better than those who over-buy and have to make forced sales to get rid of their overstock. Over-buying we believe is the cause of more cutting than anything else. If all merchants buy discreetly we think they will all make more money and do a better business the coming Fall.

MORLEY BROTHERS.

E. P. Stoughton, vice-president of the Millers Falls Co., having charge of the business in New York, sailed on the steamer Vaderland, June 30. He was accompanied by his daughter. They intend taking a two months' tour of Europe, which, similar to the trip taken two years ago, will include the more interesting portions of the United Kingdom and the Continent as far as Rome. It is the intention of Mr. Stoughton to return early in September in ample season for business, the trip being largely of a recreative character.

THE PHILADELPHIA TRADE.

Having completed the first half of 1906 which has shown very satisfactory results as far as total sales are concerned, in fact our out put during this period has exceeded our best records of any previous year; and from reports received from manufacturers and also from our customers, we feel hopeful for a continuance of the prosperity prevailing at the present time, for the balance of the present year at least.

We might add in connection with our comments on conditions that profits are not what they should be, by any manner of means, considering amount of detail and expense necessary for the maintenance and proper handling of the business. Competition appears to be as keen as ever, if not more so, and no one seems to be willing to pass an order if any profit at all can be figured and we regret to say that we are not as sanguine for an improvement along this line as we are for increased sales.

BIDDLE HARDWARE CO.

THE SAN FRANCISCO TRADE.

Conditions on the Pacific Coast continue bright. Crop prospects, with some exceptions in fruits, are fine, our banks are plentifully supplied with funds, our domestic and foreign trade is large and all of our farm and orchard products are bringing good prices, in some branches away above the normal. Outside of San Francisco all commercial conditions are most excellent, and even in this city trade is active. The foreign commerce of San Francisco keeps up to its former high level. Since the fire we have shipped out large lines of goods to China, Japan, Siberia, Central and South America and the Pacific Islands, and can supply these countries with all the goods they order from us as our shipping facilities are as good as they ever were. We have not lost our foreign trade yet, and do not intend to lose it. We are still and always will be the great export and import metropolis of the Pacific Coast.

In view of what is now to be seen in this port, and has been visible for ten days, the closing lines in the foregoing paragraph may seem like braggadocio, but I think not, and believe that before lasting harm shall come union laborers of the water front who want to remain in San Francisco, and there are many of them, will take another view of things and bring peace to their warfare.

For instance, the present strike on the water front has forced one big steamship line to abandon San Francisco as a terminal. Three days ago Agent S. M. Gray of the great Kosmos line announced that hereafter all the big steamships of the German company would run direct to Puget Sound instead of San Fran-

CONN., U.S.A.

cisco, which has been their terminus for some years for shipping from Europe, South and Central America. The Kosmos line is a member of the United Shipping and Transportation Association, and therefore remained loyal to the other owners during the present trouble on the front, existing now several weeks. But now the owners of the big ships see that they cannot expect to make any more money for a while by sending their cargoes here, so the directors wired Gray advising him of the change.

This will mean a great loss to San Francisco, as the Kosmos line is one of the most important touching here. It is a branch of the great Hamburg-American concern, with principal offices in Hamburg, Germany, and was induced to touch here by the Chamber of Commerce and influential citizens only after a great effort. Now all the labor of these influential persons has gone for naught, for the Kosmos line wants no more of San Francisco and her striking seamen, for the present at least.

A \$100,000 fire visited the trade this week, the losers being the Hardware firm of Holbrook, Merrill & Stetson. The loss was the firm's store in Los Angeles. Policies aggregating \$60,000 were on this risk, but as the Hardware firm is having trouble in getting insurance money for San Francisco fire losses, the same insurance companies being involved in both fires, they don't know how they'll come out.

W. W. Montague & Co. have erected several warehouses about the city to accommodate the storage of their stock. Last week they completed one at Front and Sacramento streets—a large story and a half temporary structure covering a lot 50x120. The space inside is undivided, the stock being piled to the ceiling. Other storehouses of the firm are located in various parts of the town, making delivery in these sections easy.

Articles of incorporation of the Western Manufacturing Supply Company were filed last week. The purpose is to engage in a general foundry, manufacturing and machinery business at Berkeley on this side of the bay. The capital stock is \$25,000, and the directors are James Normand of Marfa, Texas; Montroyd Sharpe, H. F. Anderson and G. H. Normand of Santa Cruz, and James H. Todd of Berkeley.

Ground lease was secured this week by Osborn Hardware and Tool Company at Golden Gate avenue and Polk street for three years. Total rental, \$4,500.

The Brittain Company, dealers in builders' Hardware, carpenters' tools and household utensils, successors to the anti-disaster company of C. H. Philpott & Co. Hardware Company and Olympic house and Sportsmen's house, have opened for business in a large temporary building on Van Ness avenue, near Market street.

A Hardware, tools and cutlery house was opened last week at 1466 Market street, near the City Hall, by Ed. Jones, manager, before the fire, for the Alexander-Yost Hardware Company.

The E. D. Vaut Hardware Company has commenced business at 115 Grove street, mechanics' tools being a specialty.

INDUSTRIAL PRESS ASSOCIATION.

A CHAT ABOUT NAILS.

There is probably no ironmonger in the United Kingdom who does not stock one or more kinds of nails. The sale and even the manufacture of nails have from time immemorial, says a contributor to the *Ironmongers Chronicle*, been associated with the Hardware dealer, and comparatively few years ago most of the leading ironmongers in the country employed nail makers, producing from slit rods the nails retailed. During the last quarter of a century a great change has swept over the nail industries and those useful articles, which were formerly made by hand, are now, to a large extent, entirely manufactured by automatic machinery. In 1830 it was estimated that fully 50,000 men, women and children were employed in the neighborhood of Dudley and Bromsgrove in the manufacture of nails. It is recorded that the first slitting forge was set up, in 1600, near Stanbridge, by a family by the name of Foley, who doled out to the different nailers in the district the slit rods which were afterwards made into nails of different sizes. In the reign of Queen Anne it is stated that nailers worked from 4 o'clock on Monday morning to 9 o'clock on Saturday night in order to obtain the miserable pittance of three shillings per week. The manufacture of hand-made nails also remained a cottage industry, and was generally practiced in small sheds or shops attached to dwellings, and the industry was not unfrequently carried on by the entire family, husband and wife, sons and daughters working together. The greater portion of small nails and tacks were hammered into shape by scantily clad women grouped round crowded forges in the small smithies. There were several grades of nail makers, the most skilful being those who produced the horse shoe nails; other branches included the makers of rose and clasp

nails, while yet again tack makers confined themselves to their special line. The rapidity with which hand-wrought nails were formerly made may be gauged by the fact that a workman has been known to produce 40,000 clasp nails in fourteen days; each of these nails requiring to be struck by a hammer weighing two pounds at least twenty-five times; in the process the iron would require to be heated upwards of forty thousand times. The smallest variety of tacks weighed about four ounces per thousand, and not unfrequently a skilful tack maker would produce tacks weighing not more than twenty grains each. The old May list, once so well known to the trade, embraced upwards of thirty varieties of wrought nails; and many ironmongers remember that in their apprenticeship they had to put up packets of nails for sale, the smaller quantities being decided by tale or number, the larger parcels being sold by the nominal thousand, at the scheduled weight, which generally means that a "thousand" nails only counted about seven or eight hundred. The older type of wrought nails consisted of rose, clasp, dabs, clout, sacking, and brads, to which may be added slate, tray, and saddlers' nails. Some of these names have ceased to be used as the different types have been superseded by the more modified forms of machine-made nails. The hand-made shoe nails, once sold so generally in all parts of the country, which included the somewhat mysterious names of sparrowbills, tips, and clenchers, have long since given way to nails mechanically made. The principal nails now in general use may be grouped under the somewhat broad terms of wire, malleable, patent wrought, cut, and galvanized. To a very large extent the whole of these nails, with which apprentices of the present day are familiar, are manufactured by automatic machinery. Some of the machines are exceedingly complicated, and in the space of this brief account it would be impossible to satisfactorily describe the ingenious machinery which has been invented during recent years.

The machines in which patent wrought iron nails are made were first invented by Mr. Cordes in conjunction with Mr. Ewbank; and Messrs. Cordes (D.S. Works), Ltd., of Newport, Mon., continue to manufacture the well-known "Star" brand nails out of slit iron rods. These rods are conveyed from the slitting mill to the shanking machines, in which they are cut into varying widths, according to the sizes of nails it is intended to make. Powerful machinery presses them into the desired shape, and subsequently the nails are completed in the heading and pointing machines with great speed. Steel nails, on the other hand, are made from nail strips, which on their arrival from the rolling mill, are fed automatically into machines which cut and make the nail in a single operation. Wire nails are manufactured from drawn wire and the complicated machines are automatic in their action. The coils of wire are first pickled in sulphuric acid and all scale removed, then washed and dried. The end of the coil, after being pointed, is inserted in a machine, gripped, and drawn to exact size and made ready for the nail-making machine, where it is operated, the nail head being formed, a pointed cut completing the finished nail; another piece of mechanism throwing it into a pan.

The modern systems under which nails are now retailed stand out in contrast from older methods in which the time of ironmongers' apprentices was taken up counting and weighing.

Manufacturers assist retailers and save valuable time by putting up convenient-sized packages of nails and tacks. Still some hand labor is required in weighing—not counting—nails, and the importance of expeditious work was brought out at the last examination of ironmongers' assistants, in London, where one of the practical tests of proficiency consisted in weighing and packing nails.

THE ENVIOUS WOMAN.

The train had pulled out of the terminal and the conductor was on his fare-collecting tour. In one car there sat alone a woman dressed in deep mourning, her heavy veil having been lifted to allow a breath of air. When the conductor approached her the woman burst into tears.

As she cried as if her heart would burst the conductor asked her what was the matter. She sobbed this reply: "Ten years ago I took my first husband over this road to be cremated; five crematory, and now I am taking my third husband to be cremated years ago I took my second husband on the same trip to the sumed to ashes."

Just then there were heard loud sobs coming from a seat on the opposite side of the car. The conductor turned and saw another woman crying. Approaching softly, he asked the weeping one: "What is the matter, madam?"

Taking her handkerchief from her eyes, the second one in tears answered: "That woman has husbands to burn, while I can't get even one."

WIRE FENCING.

NETTING NEEDED IN AUSTRALIA.

Mr. H. D. Ross, commercial agent for Canada in South Australia in a recent report writes as follows regarding the use of wire netting in that country. What he says will have as much interest with American as Canadian manufacturers:

The government of one of the Australian States is calling for tenders to supply wire netting for rabbit fencing to the value of \$100,000. It has decided to submit the business to public competition. The quotations relative to values are as follows:

| | | | |
|------------------------------|----------|------------------------------|----------|
| 42x1 $\frac{1}{4}$ x17 | \$194.66 | 42x1 $\frac{1}{2}$ x17 | \$161.79 |
| 36x1 $\frac{1}{4}$ x17 | 175.20 | 36x1 $\frac{1}{2}$ x17 | 140.56 |
| 42x1 $\frac{1}{2}$ x18 | 152.37 | 42x1 $\frac{1}{2}$ x18 | 125.26 |
| 36x1 $\frac{1}{4}$ x18 | 130.42 | 36x1 $\frac{1}{2}$ x18 | 107.06 |

These prices must not in any way be considered as quotations for supplies, but merely as a guide to indicate the difference in value of the various grades. 42x1 $\frac{1}{4}$ x17 stands at the head of the list, but it is claimed to be the cheapest in the end. South Australia adopts 36x1 $\frac{1}{2}$ x18. Naturally this demand in one direction for wire netting must tend to influence the market. Wire netting of the above sizes is duty free and should not be confused with wire fencing, which the customs have decided as being dutiable at 20 per cent. ad valorem. There are several wire-netting factories in Australia, one having a very extensive and modern plant, but local makers have to import the raw material.

INVENTORS— BY THE MAN WHO SEES THEM.

Of all the men with whom the technical journalist is brought into contact, the professional inventor is the most to be dreaded. The inside of his head is as well furnished with notions as the outside of his head is with hairs, and nine times out of ten there is as little money in his inventions as there is in his pockets. He brings along a dirty specification and a model, says the *Iron-monger*, craftily constructed from bits of a chocolate-box and of a decorated mustard tin. This model he exhibits at work, and begs for advice and a slight "advance" in coin. The advice we give him, but on the other count our hearts are as that of Pharaoh who knew not Joseph.

The inventor is variously attired, and it is worth noticing that his clothes age with his body. The young and less experienced specimens are well groomed and talk large. They have views about the value of their invention that would take our breath away, did we not apply a special discount to the quotation. One of this class came to see us a few months ago, bringing along 3 feet of gas tubing, a few inches of perforated-iron tube, and a small brass fitting with a cock in it. This was the "Universal Housemaid." He was not the "actual" inventor, he desired us to understand. He was only acting on behalf of a friend. But the invention he wished to show us was the finest "notion" he had ever seen, and would "solve once and for all the great servant question." We mildly asked what domestic duty the apparatus was intended to facilitate. "Sir," said he, "it will light the fire without matches and without dirt." We objected that Mary Ann's protest was against the coal and cinders, which his mechanical maiden would not overcome, but the inventor's friend brushed this aside with an airy assurance that there were thousands in the idea. The "Housemaid" would sell like patent pills at half-a-guinea each, and would cost only sixpence to produce. What did his friend want for it?

As years go by the personal appearance of this type of inventor deteriorates. As his brain becomes more fertile his inventions grow more hopelessly futile and his pockets lighter

and lighter. He is anxious to introduce, and will sell for a few pounds all rights in, an improvement which nobody wants. He would substitute metal for some other material which experience has shown to be completely satisfactory for some specific purpose. We try to impress upon him that a stamped-steel chair will have no attraction for a housewife, who, if unable to afford a Chippendale, would sooner have a wicker one; but he fails to see it. He pities from his heart the lady's lack of appreciation of the truly utilitarian. Why waste money on mahogany and marble when tables can be made with tops of enamelled iron and legs of tube, and washstands from stamped steel? The artistic treatment of furniture, he hints, is being carried to absurd extremes.

But the most fearsome of the inventor tribe is the lady inventor. Once admit her to an interview, and thenceforward she thinks she has a lien on your time and influence for the rest of your life. Almost invariably she begins by stating that she knows nothing about business, but that So-and-so (whom ever after we hate with a profound sinerity) sent her along. She produces the invention, "patented in all countries," from a reticule—we believe that is the proper term to apply to what is a bag obviously made from a piece of discarded skirt. Ordinarily it is some trifling device for domestic use, but "Don't you think I ought to get two hundred pounds for it? It can be sold for a penny, and you know the man who invented the penny pencil-protector made thirty thousand pounds out of it." We inwardly curse that penny-pencil party. We do not believe that he ever lived, but if he did and is now rubbed out we trust that he is undergoing the torture on the point of the pencil due to him. He merits a just punishment; he should be hoist by his own petard. Still, we listen to the lady inventor's tale and send her along to somebody else, who henceforth hates us even more violently than we hate the man who sent her to us. We rejoice to be thus easily rid of her; but, alas! our self-congratulations are premature. She returns for more introductions. "Mr. Thingummy does not think well of my invention." We always thought that "Mr. Thingummy" was a man of sound judgment; we are now certain of it. We send the fair applicant elsewhere, and in the end, perhaps, she disposes of her patent. But she has not finished with us. In her gratitude she sands us samples, which we examine and cast into the wastepaper-basket, after penning a few lines of good-natured comment about the "capital little counter-line which has been introduced by Takein & Tookin." Thank Heaven! that's the end of the matter. Not a bit of it. Letters follow from the persistent fair one, pointing out that her invention has been "misdescribed in certain most important particulars." We do not want to cause her serious injury, she feels sure, so she asks us for a correction "to appear in your next issue for certain." The correction appears, and for five months all is peace. Then comes an application for the return of the samples, and, when these are not forthcoming, more letters of protest on her part and explanation on ours. In the end, we are almost convinced that there is a modicum of truth in her parting charge that we are "mean, spiteful wretches to treat a woman that way."

ONE GOOD WAY.

"My wife sent \$2 in answer of an advertisement of a sure method of getting rid of superfluous fat."

"And did she get the information she wanted?"

"Sure, she got a reply telling her to sell it to the soap man."

HAMILTON RIFLES — Model 19

"Take Down"

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED JUNE 25, 1906.

- 405,802. **SAD IRON.** A. Reinke, Cleveland, Ohio.
405,807. **WASHING MACHINE.** R. P. Starbuck, Harrisville, W. Va.
405,930. **WASHING MACHINE.** M. P. Wallace, Dalton, Ga.
405,931. **SPRING HINGE.** G. W. Warner, Freeport, Ill.
405,982. **COMBINED ANVIL AND VICE.** H. H. Brandes, Coryden, Ky.

PATENTS ISSUED JUNE 26, 1906.

- 824,219. **NUT LOCK.** F. S. DeVito and A. Meyn, New Orleans, La.
824,264. **COMBINATION TOOL.** J. B. Runner, Indianapolis, Ind.
824,267. **WRENCH.** J. W. B. Turk, Poteau, Ind. Ter.
824,286. **MOP WRINGER.** J. V. Cook, Chicago, Ill.
824,360. **VICE.** J. Hornby, New York, N. Y.
824,370. **LOCK.** P. Magaro, No. 3, Steelton, Pa.
824,392. **LOCK.** H. P. Townsend, New Britain, Conn.
824,499. **WRENCH.** P. Matusak and G. Slaine, Greensburg, Pa.
824,529. **WASHING MACHINE.** C. Dietz, Cincinnati, Ohio.

COTTON-STALK PAPER.

"It has been demonstrated," says the *Baltimore Manufacturers' Record*, "that all grades of paper, from the best form of linen to the lowest, can be manufactured from cotton stalks. In addition to this, a variety of by-products, such as alcohol, nitrogen, material for gun cotton and smokeless powder, can be secured in paying quantities. The time is not now far distant when paper plants equipped with all modern machinery and devices for making paper and the utilization of the other by-products referred to will be built and placed in operation throughout the cotton-growing States of the South. The establishment of these mills for the manufacture of paper from cotton stalks will develop a new industry of enormous proportions and institute the utilization of a waste product which at the present time has comparatively little or no value. It will prove the entering wedge of checking the present increasing cost of paper. It is estimated that on an area of land producing a bale of cotton, at least one ton of stalks can be gathered. Upon this basis of calculation this new industry can annually depend upon from 10,000,000 to 12,000,000 tons of raw material. This will not only furnish necessary supplies to meet all home demands, but also permit of the export of pulp or finished products to foreign countries. At the present time there is approximately \$287,000,000 invested in paper mills in the United States, with but few plants located in the South. The bulk of the material going into the manufacture of paper at the present time is spruce pine, which is annually becoming more expensive in the depletion of the forests and the high prices which such timber commands in the markets for other uses. The utilization of a waste product such as the cotton stalk, manufactured into commercial paper, will be a boon of inestimable value to the whole country."

RÉCENT TRADE PUBLICATIONS.

J. H. WILLIAMS & Co., manufacturers of iron, steel, copper, bronze and aluminum drop forgings at 150 Hamilton Avenue and Richards Street, Brooklyn, N. Y., with Western office at 18 South Clinton Street, Chicago, have favored us with their catalogue, which includes in its contents Engineers' Wrenches, Check Nut, Hexagon Box, Heavy, Textile Machine, Carriage Makers', Construction, Structural Track, Flat Handle, Car, Set Screw, Square Box and Cap Screw Wrenches; Pin, Light Hook and Face Spanners, Tool Post Forgings, Crank and Balance Handles, Machine Handle Forgings, Clamps, Lathe and Milling Machine Dogs, Caliper Gauges, Eye Bolts, Hooks, Wire Rope Sockets, Thumb Screws, Flanges, Pipe Vises, Crank Shafts, Connecting Rods, Valve Stem Forgings, Levers, etc., etc.

WABASH SCREEN DOOR CO., 1120-1123 Marquette Building, Chicago.—Catalogue of the Wabash Washboards which are manufactured of various materials, and includes the "Solidus," made of wire glass; Wabash Glass Chief, of corrugated glass; Enamel Chief, of Blue Enamel, with wave crimp; Brass Chief, claimed to be the best brass board made; the Delta Star, of solid zinc with indented pencil crimp; the Dixie Star, of the same material; Wabash Star and Memphis Star, also of solid zinc; Cable Coil, double zinc surface; Majestic, Wabash Globe, Pon Honor, Southern Belle, Memphis, Globe, Household Cable, Eagle, Marcel Wave, Zig-Zag, Eagle Wave and Dixie Globe, all with double zinc surface, and a full line with single zinc surface, including the Best, Southern Globe, Magnolia, Princess, Angle, Eureka, Midget, Baby Grand and Combination Wood and Zinc Boards.

THE IMMIGRANT AS AN ECONOMIC ASSET.

Discussing the worth of the immigrant as an economic asset, the *Wall Street Journal* figures that 820,000 of the male and female immigrants arriving in this country last year were adults, and were here to work. Their yearly earnings do not fall much short of \$300,000,000. This sum is based on the assumption that 580,000 of the 820,000 immigrants were males capable of earning an average of \$1.50 a day for 250 days in the year, and that the 240,000 females work 300 days for \$1 a day. Our contemporary thinks it is a liberal estimate to assume that they spend 66 two-thirds per cent. of their total income, which would leave a margin of \$100,000,000 for a surplus account. Moreover, when the immigrant enters our ports he has to have a certain sum to maintain him for a time. If each arrival of those aged fifteen years or over be required to have \$25 in cash, the total will reach \$20,500,000, which means an annual increment to the country's purchasing power. As an element in the elasticity of demand, this is one of the factors which has made for the continuous prosperity of the United States during the past decade. In other words, reasons the newspaper quoted above, this inflowing tide of energy is a dynamic, not a static, factor in the development of national wealth.

A HOT SPELL.

The local grocer was once hoaxed by Mark Twain. Mr. Clemens had ordered an invoice of pepper. In the store a few days later Mr. Clemens casually remarked that the pepper was half peas. The grocer indignantly protested.

"How do you spell pepper?" drawled Mr. Clemens, in a lull of the oburgatory storm. It took some time for the grocer to discover the jest and a little longer to appreciate it.

A ROUND OF SUCCESS

comes to the Dealer who handles

"Coes"

Genuine
Steel-Handle
Screw
Wrench

30 %

Stronger
Than Any
Other Wrench
Made

The ★ "Coes"

is the "toughest proposition"
for the toughest job.

It is all metal, of highest grade,
placed in such form as to give 30%
more strength than substitutes of
equal size or so called "equals".

The wearing surfaces are harden-
ed and carefully tested.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Buffalo, N. Y.—Buffalo File Renewing Co., has been incorporated to manufacture and renew files; capital, \$10,000. Incorporators: William S. Johnson, Harry C. Jones, C. McQuaid, all of Buffalo, N. Y.

Camden, N. J.—The Contractors Tool Co. has been incorporated to make contractors' tools, machinery, etc.; incorporators, C. P. Calver, Philadelphia; J. Walton Calver, Jr., John W. Calver and Wilfrid B. Wolcott.

Dahlonega, Ga.—A company known as the Dahlonega Handle Factory was organized some time ago, and have constructed a plant with a capacity of sixty dozen handles per day. The company proposes to utilize the hickory timber which is so abundant in this section in the construction of handles of tools of different kinds. H. D. Gurley is president, J. F. Moore treasurer and M. J. Williams manager.

Detroit, Mich.—The plant of the new Independent Stove Co., is being completed at Sidney avenue and the D., G. H. & M. railroad. The concern was incorporated three or four weeks ago, the principal stockholders being William Robinson, formerly with the Art Stove Co.; J. E. Ellis, now assistant purchasing agent for the Michigan Stove Co., and Robert Waddell, traveling salesman for the same concern.

Greensboro, N. C.—A charter has been granted to the Glascock Stove and Mfg. Co. Capital \$15,000, subscribed by G. L. Glascock and others.

Nashville, Tenn.—The Southern Stamping Co., of which W. B. Greenleaf is president and general manager, is a new industry which has only recently opened for business in Nashville. Mr. Greenleaf is from Chicago, and is an experienced manufacturer of harness Hardware. The Southern Stamping Co., is located at 913 Church Street, and it manufactures all kinds of harness Hardware, bridle rosettes and stamp work. The company also manufactures dies and tools for patents in metal articles.

Newark, N. J.—The Harrison & Knight Mfg. Co., has been incorporated to manufacture machinery and tools, capital, \$300,000. Incorporators—Frank A. Harrison, William H. Knight, and Avarad S. Knight.

Newark, N. J.—The Matthews Company, manufacturers of Hardware, have filed articles of incorporation. Capital stock, \$100,000; incorporators, H. B. Matthews and O. D. Jamouneau of Newark, and W. D. Smith, of Edgewater; registered office, 112 Arlington street.

New York, N. Y.—Haws-Lanna Co., has been incorporated to manufacture woodenware, etc.; capital \$150,000. Incorporators Samuel B. Howard, J. Disbrow Baker, Arthur W. Britton, all of No. 135 Broadway.

New York, N. Y.—Sectional Weight Co., has been incorporated to manufacture weights and hardware; capital, \$5,600. In-

corporators: William H. McCord, Greenwich, Conn.; J. B. Southard, Cold Spring, N. Y.; William C. Post, Jersey City, N. J.

New York, N. Y.—William E. Burroughs Co., has been incorporated to manufacture machinery, tools and builders' supplies, etc.; capital, \$10,000. Incorporators: William E. Burroughs, No. 132 Nassau Street; James M. Livily and Ernest A. McConnell, No. 116 Nassau Street, all of New York.

Portland, Me.—Universal Tool company has been incorporated, capital stock, \$50,000; incorporators, Edwin L. Furman, Eli Hogan and O. P. McGee.

Unionville, Conn.—The H. C. Hart Co., has been organized with a capital stock of \$25,000, to manufacture cutlery and hardware. The business was established as a co-partnership by Ernest M. Hart and Willis O. Hart.

San Pedro, Cal.—The Los Angeles Metal Stamping company has secured fifty acres of land from the Southern California Dock and Terminal company. The contract for the work on a large plant to be located on this site has been let and calls for completion of the work within six months. The building will be entirely of steel and concrete and will cost \$250,000. The company will manufacture staple Hardware and roller skates. It will have its own wharves and warehouses and employ 500 men.

Worcester, Mass.—Brown-Davis Hardware Co. has been incorporated for the purpose of dealing in hardware, and as toolmakers, machinists, founders, metal workers, etc.; capital, \$100,000. President John W. Brown, No. 599 Maine Street, Worcester, Mass.; treasurer and clerk, F. Austin Wilson, No. 294 Washington St., Boston, Mass.

Changes and Improvements.

Buffalo, N. Y.—The Republic Metalware Co. is erecting a large addition to its plant, consisting of a five-story brick warehouse and office building, a galvanized building and retinning building, each one story in height.

Burton, O.—The plants of the Burton Handle Co and the Burton Mfg. Co. have been sold to E. H. Johnson, of this place, who will take possession at once.

Chelsea, Mich.—The Glazier Stove Co. has broken ground for a new power house that will be 75x100 feet. That is the second large building the company has built this season, the first one being 50x150. The new power plant will be built on the latest ideas known for this kind of building.

Cleveland, O.—The Champion Rivet Co. are erecting a new manufacturing plant on the Erie Railroad, where a 23-acre site has been secured. The plant will consist of a main building, 350 by 700 feet, and one-story high. There will also be a forge shop 100 by 300 feet, and 40 feet high, built of structural steel and concrete. There will be an independent power plant for operating all machinery by motors, and boilers, engine and generator giving about 700 horsepower capacity will be installed.

Cleveland, O.—The Parish & Bingham Co. manufacturers of stampings and sheet metal goods, are erecting a two-story building, 47 by 218 feet, of brick and steel, and will install additional presses and other machinery.

Columbus, O.—The United States Hoe and Tool Company has increased its capital stock from \$150,000 to \$200,000.

Erie, Pa.—A permit has been granted to the Odin Stove Works for the erection of an addition to the plant on West Twelfth street, between Myrtle and Chestnut. The addition is to be one story high, will be of brick construction and will cost \$9,975.

Kansas City, Mo.—The Eagle Tool Co. of Cincinnati, O., an old established and reliable firm doing business for forty years, manufacturing all kinds of tools, railroad and iron supplies, metal spinning and labor saving devices, have decided to make Kansas City their western headquarters. J. F. Knisely is manager.

Little Valley, N. Y.—G. C. Sherman's razor case factory, which has been in operation here during the past year or more, has been sold to parties at Geneva, N. Y., and will be removed hence.

Marion, Ind.—C. F. Morris, proprietor of the Morris hotel, has purchased all the stock of the Morris Hardware Company, and will conduct the factory himself. The plant is on East Eleventh street, near the Big Four railroad. It is valued at \$12,000, and one of the items of value is a plating outfit, costing \$5,000. The factory makes Hardware novelties.

North Milwaukee, Wis.—The E. R. Wagner Manufacturing Co., makers of vehicle Hardware, sheet metal, stampings and Hardware specialties, has under way a large addition to its present factory, consisting of a fireproof one-story structure, covering 25,000 square feet of floor space. Equipment will be moved into the addition from the old building, although it is possible that some equipment will be needed in handling goods and also heating apparatus.

St. Louis, Mo.—The Schlueter Mfg. Co. has purchased the building on the southeast corner of Broadway and John Avenue, containing about 45,000 square feet of floor space. The company intends to manufacture a complete line of pieced, stamped and japanned tinware, and has purchased complete equipment, including power cutting and drawing presses, double seamers, wiring machines, etc., from the E. W. Bliss Co. of Brooklyn, N. Y. It is expected to begin operations in the factory about July 15. J. A. Schlueter, who is actively interested in the enterprise, was for seventeen years superintendent of the St. Louis Stamping Co. of St. Louis.

Miscellaneous.

Castile, N. Y.—The stockholders of the Castile Chilled Plow Company have elected the following directors: George H. Bush, S. A. Lathrop, S. L. Strivings, F. W. Shumaker, A. L. Shumaker. The directors organized as follows: President, George H. Bush; vice-president, S. A. Lathrop; secretary, A. L. Shumaker; treasurer, S. L. Strivings; manager, F. W. Shumaker.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Beaumont, Tex.—The Nichols Mfg. Co. has been incorporated to manufacture fire-arms, sporting goods, tools, etc. The incorporators are: C. M. Nichols, L. J. Kopke, John Fitzgibbon, W. J. Kalter and H. Bohrer, and the capital stock is \$20,000.

Metamora, Ill.—Bride Bros. have recently established a retail Hardware and sporting goods store.

Montreal, Canada.—John Millen & Son, the well-known Montreal jobbing house, has been incorporated in Canada, with \$100,000 capital. The incorporators named are John Millen, W. Strachan and F. W. Sharp, all of Montreal.

Nashua, N. H.—William F. McCarty has opened a store on Bowers street.

New Orleans, La.—A new building is to be erected for the Abbott Cycle Co. on Baronne street, by the Equitable Real Estate Co. The front will be of pressed brick and plate glass and it will occupy a space 100x100 feet and be two stories in height.

Pueblo, Colo.—A. Mayerson has engaged in the bicycle business under the firm name of the Chicago Bicycle Mfg. Co. They are located at 324 North Santa Fe Avenue where the repair shop is equipped with a large enamel baking oven, a brazier and complete facilities for the manufacture of new wheels with the exception of tires, spokes and rims.

Williamsport, Pa.—L. M. Cressman, formerly with the Williamsport Machine Co., also the Demorest Bicycle Manufacturing Co., has opened a bicycle repair and sales-room at 246 William street.

Changes and Improvements.

Akron, O.—At a meeting of the Automobile Tire Association at New York recently, notice was given by a representative of the B. F. Goodrich Co. of the Com-

pany's intention to withdraw from the tire association in September, when the contract between the manufacturers expires.

Berkeley, Cal.—The California Powder Works at Berkeley, Cal., which is the Pacific Coast branch of the DuPont Powder Co., of Wilmington, Del., has increased its productive capacity. Some time ago a 600-h. p. steam turbine was installed and now an order for one of 750-h. p. has been placed.

Enid, Okla.—The Hardware and sporting goods firm of Gibbs & Stout have been succeeded by Gibbs & Shaklee. The business will be continued on a much larger scale than heretofore.

Hunter, Okla.—The retail Hardware, sporting goods and agricultural implement business of J. C. Heim has been succeeded to by the Hunter Hardware Co.

Philadelphia, Pa.—The Consolidated Sporting Goods Mfg. Co. have succeeded Treavy & Co., of the same city.

Racine, Wis.—The Racine Boat Co. has purchased a tract of land on which a new plant will be built. This tract will give a river frontage of 600 feet. The new buildings will be designed especially for the manufacture of boats.

Wilcox, Neb.—Joseph Wright has sold his sporting goods and Hardware store to David Whedean, who will conduct it along the same lines as formerly.

Embarrassments.

Kingston, N. Y.—A petition in bankruptcy has been filed against Louis E. Sexton, dealer in fishing tackle and sporting goods. Judge Ray of the United States district court appointed Herman T. Wood of Kingston receiver of the assets, which are estimated at \$1,000.

Burglaries.

Alexandria, Va.—The Hardware store of James F. Carlin & Sons was broken into recently and sixty-two pistols and a lot of cartridges stolen. The value of the pistols was about \$300.

Miscellaneous.

Los Angeles, Cal.—After months of inactivity, part of the old Los Angeles Motorcycle Club, with some new blood, met in the Y. M. C. A. building on South Hill street, to the number of forty-three interested riders and formed a new Los Angeles Motorcycle Club. C. H. Day was chosen chairman and Miriam Smith secretary and a by-laws committee was appointed consisting of F. E. Carrol, A. L. Hamilton and F. A. Burnwood. L. A. Morrison was made temporary captain.

Scranton, Pa.—The following officers have been nominated for the Electric City Wheelmen: For president, Jacob Pfeiffer; for vice-president, Benjamin Allen; for secretary, E. Barry Davis; for directors, Walter Evans and Oscar Oswald.

PATENTS ON SPORTING GOODS.

It is surprising to one familiar with the *Official Gazette* issued by the United States Patent Office to note how many patented articles appear each week that come under the classification of games and sporting goods. The greatest percentage of these relate to improvements in firearms or hunters' supplies. Fishing tackle is next in order, with reels and rods being the particular articles to which the inventive minds have turned. Then, of course, there are hundreds of patents granted each week for other articles such as non-refillable bottles, railroad-car devices and what not, that make the *Official Gazette* an extremely bulky volume of more than 1,000 pages. It is not generally known that the patent office is one of the government bureaus that pays its operating expenses with something to spare. The annual report of the commissioner of patents for the year 1905 shows receipts of \$1,806,758.14 and expenditures of \$1,479,633.22, leaving a balance of \$327,124.92. This, added to the surplus patent fund now in the United States Treasury, makes over \$6,000,000 which inventors have paid to the government in excess of expenses. The number of applications for patents has been so great of late that some divisions of the office are several months behind in their work.

GAS STOVES FOR ONTARIO.

Consul James M. Shepard, of Hamilton, responding to a Pennsylvania inquiry, says that while there are several makes of Canadian gas stoves and ranges on the market, investigation in the three principal cities in that consular district shows that American makes have the decided preference. Mr. Shepard continues:

The manager of the natural gas company here informs me that they expect to make 3,000 connections this year, and my reports from Brantford and Galt show proportionate prospects. Those considering this market should send representatives through the whole territory supplied by the Dunnville gas fields at an early day, visiting the cities named and others farther south. The demand is on, and this section is prosperous and progressive. The tariff on stoves is 25 per cent. of the actual selling price at point of origin, and the so-called "anti-dumping clause" recently added to the customs regulations provides severe penalties for undervaluation or "export prices;" hence representatives should become thoroughly familiar with laws and regulations governing imports.

DEMAND FOR AMERICAN ARTICLES.

Consul B. M. Cunningham, of Stavanger, Norway, reports that there is demand for several American articles in that market. He says:

There is a splendid field here for the introduction of modern cook stoves and ranges. Ninety-five per cent. of the bread consumed is bought at the bakeries, the stoves not being equipped with ovens for baking bread. American shoes would sell well if they were kept in stock. Very few farming tools are manufactured, and those that are made for the local trade do not compare at all favorably with the American make. In the Hardware line one can buy almost every kind that there is a general demand for, but the prices of the American brands are higher than the domestic article.

GOT BUSY.

There was a young fellow named Syd,
Who kissed a girl on the eyelid.
Said she to the lad:
"Your aim's mighty bad.
You should practice awhile." So he did.

BARNES TOOL COMPANY
New Haven, Conn.

The Dealer's Reputation Depends on the Quality
of the Goods he Sells.

H & R REVOLVERS

are known around the world for their safety, accuracy, durability, perfect design, and general superiority.

Only the most skilled mechanics and only the finest quality of material employed in their manufacture.

Every piece is finished to the smooth part of an inch and fits perfectly, *no rattle* in "H & R" such as a quick shake reveals in other makes. Every revolver that leaves the factory has passed the most rigid inspection and is guaranteed perfect.

Barrel and cylinder drilled from solid piece of finest forged steel; solid steel frame; handsome rubber stock affording good grip.

Noted for smooth action, perfect accuracy and power.

Don't experiment with an unreliable make because low price is offered as a tempting bait. The retail price ranges from \$2.50 to \$8.00, and each model is the greatest value ever offered for the price.

They are the kind that do not come back, but give permanent satisfaction.

Put in a full line and you will be pleased with the results. Your jobber can supply you.

WHERE DOES THE MONEY GO ?

One dealer writes: "My sales amount to \$600 per week. I make 20 per cent. profit on everything I sell, my total expenses are \$80 per week—still I am not making money—What's the matter?"

Why that's easy—failure to record charge sales—carelessness or dishonesty of clerks, or a faulty system of keeping accounts.

Our Standard system gives you a check on all leaks. Costs you nothing to learn all about it—saves you money, time and worry after you do.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

*Quality
 Tells*

When Henry Disston was asked the
 question:
 "What do you put in your saws?"
 He replied:
 "Good steel and honest work."

**UPON THIS FOUNDATION IS BUILT
 DISSTON QUALITY**

"If you want a saw it is best to get one with
 a name on it that has a reputation. A man who
 has made a reputation for his goods knows its
 value as well as its cost and will maintain it."

HENRY DISSTON & SONS, Inc.
 Established 1840.
 PHILADELPHIA, PA.

Every Hardware Dealer

recognizes that an advertised article is four times easier to sell than an unadvertised one.

We have appropriated this season a good many thousand dollars for advertising our products in the large papers and magazines of national reputation. You are certain to have calls for:

The Hartmann Stockade Wire Fence
The Hartmann Steel Picket Fence
The Glen Steel Folding Mat

If your stock on these goods is low just drop us a line. You can't help selling them and run no risk in stocking up.

GLEN MFG. CO.
160 Mill St.
ELLWOOD CITY, - PA.

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

ASBESTOS SAD IRONS

AN IRON FOR EVERY PURPOSE

HOT WEATHER BULLETIN

¶ Ironing is pretty tough on the women in the hot days of summer. ¶ And it is an instance of the Irony of Fate that, when ironing is most fatiguing, there's just so much more of it. ¶ White dresses, shirts and shirtwaists, underclothes, and a host of other summer garments---how often they must be ironed! ¶ Do you know that the features of Asbestos Sad Irons appeal more to women in the summer than at any other time? ¶ If only your salespeople would show up these features earnestly and intelligently to the perspiring women who iron, we know that the result would be what you want most of all---sales!

¶ Let us send your clerks some pointers.

¶ We wish to mention merely a few of the hot weather features of Asbestos Sad Irons: ¶ 1st. The handle is always cool and comfortable because of the asbestos-lined hood with its dead-air space. Heat cannot get to the handle either by conduction or radiation. ¶ 2nd. The "Asbestos" retains heat longer than ordinary irons. When it has once been thoroughly heated, the fire can be "checked," thereby reducing the temperature of the room. ¶ 3rd. Frequent trips to the stove are unnecessary, so that the stove can be in one room and the ironing done in another. ¶ Just consider the advisability of making Asbestos Sad Irons a hot weather special. ¶ Ask your jobber about our Free Display Stand proposition.

Sectional View of an Asbestos Laundry Iron, Showing how they are built.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL
with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL
with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE RIGHT SPACE SPICE CABINET
is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

Wyeth Hardware & Mfg Co., St. Joseph, Mo., have recently issued a general Hardware catalogue of the loose-leaf type. The book contains 1,500 pages, and for the convenience of the trade a list of approximate prices is included. The sections devoted to Builders' Hardware and Cutlery will be found of special interest. The issue consists of 500 copies.

The Connecticut Hardware Dealers' Association, at their meeting at the Hotel Pequot at Morris Cove, elected the following officers: George J. Bassett of New Haven, president; James DeF. Phelps of Windsor Locks, secretary; F. A. Farrar of South Manchester, treasurer. The following presidents of their respective cities were also elected: Irving C. Treat, president of Hartford; George H. Baker, president of New Haven; Mr. Mott, president of Waterbury, and A. H. Abbe, president of

Nicholson File Co., Providence, R. I., have favored us with samples of their Nicholson and K. & F. File Signs, which they have recently gotten out. It is the desire of the company to furnish these to retail Hardware dealers, sending the same by mail, or to the wholesale trade in quantities to be shipped with goods. These signs are very artistic and striking, and will aid the Hardwareman in the sale of this excellent line of goods.

Owing to the inability of the Savage Arms Company to take care of the enormous business tendered them on their well-known rifles, it has been necessary for them to award contracts increasing the size of their plant. The contract for one building, which will give them about 20,000 square feet floor space, has already been awarded, and will be completed in the shortest possible time. Other contracts for additional buildings will be awarded shortly.

"A Concise History of Lead Pencil Making" is the subject of a speech delivered by John A. Walker, vice-president and general manager of the Joseph Dixon Crucible Company, Jersey City, N. J., before the members of the "Boost Club," New York, recently. A copy published in pamphlet form has just been received and forms very interesting reading.

W. C. Toles Co., Irving Park, Chicago, Ill., manufacturers of Rapid Acting Vises for Wood-Workers, and Manual Training Benches, have issued a new catalogue, in which are contained many illustrations of the lines of goods manufactured by them, and testimonials from various training schools in which their benches are used, as well as exterior and interior views of the schools. A long list of the educational and other institutions that are using their vises and benches for manual training is given, and the catalogue will be found an interesting one in the special lines mentioned.

The National Supply Co. of Lansing, Mich., who were thrown into bankruptcy on the 22nd of May and adjudicated bankrupt June 25, are now taking inventory and appraisal, after which the stock will be offered for sale. It has not yet been definitely decided whether the stock will be sold retail or in bulk. The present condition of affairs in Lansing offers splendid opportunities for any person interested in a Hardware line.

C. A. Hoagland, of John H. Graham & Co., recently entertained at luncheon and dinner the traveling men, office force and two members of the firm, Wm. A. and Geo. A. Graham, at his home in Griggstown, N. J., there being 18 present. The good time was in celebration of the twenty-fifth anniversary of his business connection with the above mentioned house. Congratulatory remarks were made by all, and a number of gifts were presented Mr. Hoagland. The Messrs. Graham remembered him with a sterling silver tea set, and the traveling and office staff with a pair of cut-glass vases. The New Departure Mfg. Co., for whom John H. Graham & Co. are agents, presented him with a rare German tea set in pottery, inlaid with silver; these gifts being evidences of the respect and esteem in which Mr. Hoagland is held by those who were his guests on this occasion.

Imperial Bit & Snap Co., Racine, Wis. Catalogue No. 6 of Saddlery and Wagon Hardware, including Swivel, Double Loop, Round Eye and Open Eye Snaps; Martingales or Choke Strap Snaps; Combined Neckyoke and Roller Snaps; Breast Chains

and Double Snaps; Safety Breaching Hooks, Tug, Halter, Belly Band and Harness Loops; Spread Rollers, Rain Supports and Guards; Line Holders, Trace Carriers, Buckles and Shields; Hame Clips, Line Buckles, Trace Chains, Check Hooks, Harness Rings and Hangers; Breast Strap Slides, Couplings, Hame and Tug Hooks; Chin Strap Buckles, Hame Tugs, Curry Combs, Strap Hooks and Repair Buckles; Shuffle, Express, Nickel Ring, Fire Department and Mule Bits; Whip Sockets, Rain Holders, Buggy Seats, etc., etc.

THE WHITE MOP WRINGER.

The White Mop Wringer Co. of Fultonville, N. Y., is circulating a neat Booklet, envelope size, illustrating its several sizes of Mop Wringers and setting forth the many advantages of the "White."

It is also circulating a larger Booklet, entitled "Wringers and Wringers" treating on the general principles of "Press" Mop Wringers, of which it is the originator and patentee.

The mechanism of the "White" is such that for wringing powers it is to be not approached by anything. Its durability is attested, not only by the company's guarantee, but by the thousands and thousands which have been in daily use for years throughout the country, and the ever rapidly increasing demand.

AN INTERESTING EXHIBIT.

The Davies Automatic Shear Co. will exhibit their Screwless Springset Shears at the House Furnishing Goods Exhibition at Madison Square Garden, August 6th to 11th, and any of our readers who may visit that Exhibition will find this particular exhibit a most interesting one. A shear without a screw is, in itself, an interesting proposition, as from time immemorial it has been considered impracticable to put together a first-class, practical, everyday shear in any other way than by means of a screw or threaded bolt. We understand that this shear is a thoroughly practical one in every respect, and in actual use eminently satisfactory.

A CONVENTION OF SALESMEN.

In accordance with their annual custom, the Rochester Stamping Company and Robeson Cutlery Company, of Rochester, N. Y., held their annual salesmen's convention June 25-30. This annual gathering was held in keeping with the progressive business methods of this joint company. It had for its object the furnishing of practical information concerning the production of the various lines of goods and the interchange of ideas upon the still greater promotion of trade throughout the country. The social features were not overlooked. Automobile rides about the city, banquets and visits to nearby resorts formed a pleasant feature of the week's programme.

About fifty of them, traveling all parts of the United States and Canada, had gathered in Rochester, many of them being attended by their wives. The Powers House was made their headquarters. The various sessions were held in the assembly room of the company's large factory building on Anderson Avenue, which had been handsomely decorated for the occasion.

A MODEL DEPARTMENT STORE.

The Bohemian Bazaar, 534-538 Blue Island Avenue, Chicago, Ill., is about to build at the above address a five floor fire-proof structure, 72 by 100, to be used as a model department store. They desire to get in touch with manufacturers and jobbers of Hardware at once.

STEVENS ABRIDGED CATALOGUE.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are distributing their latest Abridged Catalogue, which embodies illustrations and detailed descriptions of all their staple numbers. This includes the new No. 80 Repeating Gallery Rifle, which will be ready in September, Stevens "Little Scout" No. 14 and No. 325 Double Barrel Hammerless Shotgun. The two latter new models are now on the market. These catalogues are handy booklets for ready reference, for circularizing purposes or for individual distribution at retail stores. The company will gladly forward to any Hardware or sporting goods merchant handling firearms a liberal quantity of these booklets, imprinted with firm name and address, the transportation charges to be borne by the trade. Shipments will be made either by freight or express, as specified by the dealer.

JULY 25, 1906

Editorial Trade Review

The general business situation remains without change, there being an active demand for goods, and manufacturers and jobbers express themselves as having all the business they can well take care of. With the manufacturers especially is this condition of affairs noticeable, and so pushed are they with orders from their regular trade that they almost feel as though they could not do justice to any new customers. However, in several instances factories are beginning to catch up with their orders, and are accumulating stock for their requirements in the Fall. In a great many lines dealers are inconvenienced by the length of time taken to fill orders given by them. As is natural at this season of the year, there is not quite the same attention given to the details of business, but there is, nevertheless, great activity among both the manufacturers and jobbers, and there is a feeling of confidence on all sides.

In the Fall it is expected that a large trade will be done and if the prospects for good crops are realized business will be of great volume.

New records are being made in foreign trade, in which Hardware continues to occupy a prominent place, and there is every indication that this condition of affairs will continue to exist. Those manufacturers who are the most far-sighted are developing foreign trade in every way possible, while taking the best of care of the home trade.

FOREIGN COMMERCE OF THE UNITED STATES FOR THE FISCAL YEAR 1906.

The foreign commerce of the United States in the fiscal year just ended aggregated 2,970 million dollars, thus falling but 30 millions below the 3-billion-dollar line. If the trade with Porto Rico and Hawaii, which was included in our foreign commerce prior to their annexation, were added, the total would materially exceed 3 billion dollars. Both imports and exports exceed those of any earlier year.

The total imports of the year were 1,226 million dollars, exceeding the highest record of any earlier year (1905) by 109 millions, and the exports were 1,744 millions, exceeding those of the highest record year (1905) by 225 millions. The excess of exports over imports was 517 million dollars, exceeding that of 1905 by 116 millions, but falling below that of each year of the period 1898-1901. Comparing 1906 with the figures of five years earlier (1901) imports show an increase of 403 million dollars, and the exports an increase of 256 millions. Comparing the figures with those of ten years earlier (1896) the imports show an increase of 447 millions, and the exports an increase of 861 millions.

An analysis of the trade figures for 1906, with the purpose of determining the classes of articles in which this growth of imports and exports has occurred, can not now be made in precise terms, since the Bureau of Statistics of the Department of Commerce and Labor has not yet completed the details for the twelfth month of the fiscal year. Taking, however, its figures of the full imports and exports of the year and basing an analysis thereof upon that made by the Bureau for eleven months, it would appear that about 970 million dollars of the exports were agricultural products and about 600 millions manufactures, the remainder being products of the mines, fisheries, forests and miscellaneous. These figures, if approximately accurate (and they are based upon the Bureau's analysis for eleven months), would indicate an increase of approximately 25 million dollars in agricultural exports and an increase of 190 millions in exports of manufactures since 1901, and an increase of 400 millions in agricultural products and of 372 millions in manufactures since 1896.

On the import side a similar analysis shows that the total of 1,226 million dollars' worth of imports in the full year is composed of approximately 595 million dollars' worth of articles classed as "manufacturers' materials," 205 million dollars' worth of articles classed as "manufactures ready for consumption," 175 million dollars' worth of merchandise classed as "articles of voluntary use, luxuries, etc.," and about 255 million dollars' worth of "articles of food and animals." These figures are necessarily approximate and based upon the known details for the eleven months and the known total of imports for the twelfth month of the year. Should they prove approximately accurate they would indicate that of the increase of 403 million dollars in imports in the past five years about 245 millions occurred in "manufacturers' materials," 75 millions in "manufactures ready for consumption," a little over 50 millions in "articles of voluntary use, luxuries, etc.," and about 33 millions in "foodstuffs and animals." Comparing 1906 with 1896, the increase in all imports is 447 millions, of which about 290 millions occurred in "manufacturers' materials," 60 millions in "manufactures ready for consumption," 80 millions in "articles of voluntary use, luxuries, etc.," and 18 millions in "foodstuffs and animals."

SIR JOSEPH WARD, PRIME MINISTER OF NEW ZEALAND.

For several years New Zealand—thirteen thousand miles distant in the South Seas—has been regarded by many people as a kind of Utopia. Its new Prime Minister, Sir Joseph Ward, who has been visiting this country, so describes it. First of all, the New Zealand system of woman suffrage seems to be satisfactory. As to a landed aristocracy, to avoid abuses from which older countries have suffered, the New Zealanders have so legislated that the aggregation of large estates is prevented. The State may acquire estates by compulsion and lease them for production purposes for nine hundred and ninety-nine years; by the creation of this system people have been induced to go into the country instead of settling in cities and creating a class of idlers. As to labor, Sir Joseph protests that New Zealanders do not know the meaning of the term "unemployed," because the opportunity to labor always exists in the interior, information being furnished by a system of employment bureaus under which surplus of labor in one place is reported all over the country; persons registered at the bureaus are transported by the State to the places where there is a dearth of labor. Furthermore, any one over sixty-five years of age receives a pension. The people as organized in a Government, declares Sir Joseph, form the only power which can grapple with these and other problems, hence the Government has assumed ownership and control of railways, telegraphs, telephones, life insurance, etc. Whenever railway earnings increase over a certain percentage, the rates are proportionately lowered; it is by these low rates that the New Zealanders are able to compete with other countries, although they have twelve thousand miles of water between them and the English home market. The telephone system is run at a charge of \$25 a year for domestic service and \$35 a year for business service, and there is no limit to the number of messages. Cities and towns own their lighting and water works. Finally, the Government has acquired the coal mines, because the price of coal has been excessive; and, adds Sir Joseph, if the same thing happened with the ice supply, the Government would acquire it in the same way. The special reason for Sir Joseph's visit to this country was to obtain reciprocity. New Zealand is ready to make a ten per cent. reduction in her tariff to the United States (the same reduction now made to Great Britain) in return for a like concession, and is prepared to make such a treaty binding without action on the part of the New Zealand Parliament.

HOW TO WRITE SHOW CARDS.

Nothing adds more to the finished appearance of a stock of goods and to the pleasure and convenience of the customer than a profusion of attractive price cards. They save the answering of many questions and often decide a sale to some customer whom richness in fittings and appearance of stock or natural dislike to ask prices on something she fears may be out of her reach might otherwise turn away. Try it on yourself; which window display of fancy shirts appeals most to you, the one bearing no price cards or the one with cards denoting what each shirt in the window would cost you? The display with prices, of course. In showing the goods you are only telling part of the story. The price is the essential thing.

If the price cards add effectiveness to the window display, they will to the interior display, for the same reason. Not only do many individual merchants lose sales by not displaying prices, but the general body of merchants are losers in proportion to the number among them who fail to show prices. People who buy goods are of three classes: The ones who are out to buy and know what they want, the ones who are out to buy and won't know just what they want until they see the prices, and the ones who are not out to buy but are pretty liable to buy if something that appeals to them is placed where they can see it.

Price cards will help the first class, help and catch many of the second class, who otherwise might give up the intention of buying, and awaken many of the third class to the fact that here is something that they should have. The man who is most persistent in going after the third class is the one who will sell the most goods, and the most effective way of getting at the people in that class is by neat, tasteful display of goods, always accompanied by prices. Nowadays most merchants follow the one-price idea, and so can consistently show prices.

But the average merchant does not know much about price cards. He fears that they are expensive to buy—and false economy prevents him from even taking steps to correct this wrong impression and he doesn't know how to make the cards himself. Price cards are not difficult—and certainly not expensive—to make. A little practice, a comparatively small outlay for paraphernalia is all that is needed, and the work is extremely attractive.

The necessary utensils are: Two or three pointed sable lettering brushes, a flat stick or knife for mixing paints, two cups for water, a few assorted pens, some white stick chalk, a soft pencil, some sponge rubber for erasing, a half-dozen thumb tacks, some mucilage, a rag or two, a long ruler, the cardboard and some paint. The whole outfit need not cost more than a couple of dollars, or three at the most. The number of brushes needed depends upon the number of colors you intend using, never using a brush in more than one color. The two cups of water are used for rough cleaning, and the other for finishing the cleaning of the brushes. The pens are for straightening rough edges and corners, the chalk and pencil for rough drafting of the design on the card preliminary to painting.

Cut your brush handles to five or six inches in length. Use only your stick or knife for mixing. Always wash a brush thoroughly immediately after using, gently squeezing it dry. Dry paints, mixed with water and mucilage are the most satisfactory. To prepare, cut the paint with alcohol, mix thoroughly with mucilage to the thickness of heavy syrup. Add water in driplets occasionally, without making your mixture too thin.

In using a pen, thin your paint to one third of the thickness used for the brush.

Have your cards fairly uniform in size and shape and style of lettering, and entirely uniform in color. Black letters on white cardboard is the simplest combination, though white letters on the black background is the most effective combination and the cards are less easily soiled. The only drawback, which is soon overcome by practice, is the fact that white paint is harder to handle than black. Where black letters are used on white cardboard, gold or gray shadings may be used effectively. Gold letters on white are pretty. Other fine combinations are: Drab card, red initial letters, shaded with white, other letters white; dark green card with white or gold letters; light green card with black letters shaded with white; dark gray card, white letters shaded with gold; red card, white letters shaded with gold; red card, black letters shaded with white.

The cardboard sheet unit is 22 by 28 inches in size. This is called the "full sheet." "Half sheets" are 11 by 28; "quarter sheets" 11 by 14; "eights" 7 by 11. These are standard sizes. A small charge for cutting is added when smaller sizes are ordered. Eight and ten ply are the best weights for ordinary use. The cardboard should be colored on both sides, as often it is desired to letter both sides.

Now we will assume that the card-writer is ready to begin. First, roughly sketch, with chalk if it is a colored card, pencil

if it is a white card, your lay-out, using as few styles of lettering as possible, preserving uniformity between the different cards in style and size of letter and figures as far as possible. Then, filling the brush and gently rolling out the surplus on the palette knife or side of the palette, which may be a heavy pane of glass, or polished stone or slate, begin painting. Charge the brush frequently. Make continuous strokes, not too carefully, working with the whole arm movement, striking in the general directions of downward and toward the right of the card. The first trials may not be encouraging, but a very little experience and the accession of confidence will give certainty and evenness to your work. The beauty of the work rests mainly on the straightness of such lines as should be straight and on certainty in vertical strokes. The drafting process, if fairly accurate in these respects, will to a great extent guide the brush.

In drafting with the pencil or chalk, be careful to give the letters their proper widths. Using one inch as the basis of comparison, and calling the capital letter I an inch wide, the other capital letters should have the following widths:

2 inches—J
2¼ inches—E F G H L N P S T U V Z.
2½ inches—A B C D K O Q R X Y.
3 inches—M.
3¼ inches—W.

The corresponding lower case letters would then have the following widths:

¼ inch—i l.
⅓ inch—j r s.
½ inch—f t.
⅝ inch—a b c d e g h k n o p q u v x y z.
⅞ inch—w.
1 inch—m.

Irregularities of a bold-face letter will be less apparent and less unsightly than the same irregularities in a slight letter. When through painting and the paint is dry, erase pencil marks with the sponge rubber. Fancy show cards are easily made by cutting out small pictures or designs from anything from a magazine to a Japanese fan, sticking it on one corner of the card and painting around the edge to hide the fact that it is not actually painted right on the card, after which the letters may be worked in. Fish glue is best for such pastings. A very little practice will accomplish wonders, and soon the operator will find himself quite willing and able to tackle almost any kind of a card-writing job.

WINDOW DISPLAY TO DEMONSTRATE QUALITY.

Usually the most effective window displays are so simple that the first impulse of wonder is that they have not been in general use long ago. Such a one attracted the attention of the writer a few days ago; not a conspicuous one perhaps, but one that certainly appeals with a good deal of force to the thoughtful customer who wants to get good quality for his money.

Arranged around the window in a semi-circle is a block of each metal used in the various articles in that particular store, iron in all its grades and classes, not only the more general terms of cast and wrought iron, but the sub-divisions and special process irons in general use, black iron, white iron, Russia iron, gray iron, silicon iron; also the various grades of steel, nickel, copper, aluminum and the various alloys also have their proper places, the idea being to create as strong an impression as possible respecting the wide range of metallic resources at the command of the manufacturer.

Over the display were the words in conspicuous letters, "Each has its special place and properties. In the goods we handle all are given the places where they wear the best. Come in and let us show you."

While this display was up the newspaper was briefly educating the public each day on some of the properties of some one metal that rendered it especially adapted to certain uses and totally unsuitable for other uses. It worked almost a revolution in the Hardware trade in a community where cheap department-store goods were cutting in and where unthinking people just considered that "iron is iron and steel is steel," and so continued to invest in the low-priced goods and to wonder why things manufactured now "don't wear like they used to." It shook up their understanding when they fully realized the many forms of iron now on the market and set them to asking questions. Needless to say this means that the dealer adopting it must himself be posted on the properties of all the metals he shows; must have some idea of their relative cost; must be able to tell why one is better than another for one purpose and not so good for another; in short must be prepared to back up the inquiries he instigates with intelligent answers.

Perhaps it is also needless to suggest that this is not a good display for the man who deals exclusively in cheap, shoddy goods and gives no thought to quality. It is to his interest to remind his customers of it as little as possible.

To heighten the first effect of the display and render it more attractive there is ample scope in the back-ground; mining scenes, manufacturing plants or specimens of the finished articles in which the metal in question is given its proper use. In this, however, as in all window displays, care must be taken not to fill the back-ground up with so much detail that the effect of the real object will be buried.

BACKING THE GUARANTEE.

"I never will buy a guaranteed article again."

The words, overheard by the writer in a Hardware store recently, attracted his attention and set him to wondering why guaranteed articles were not as good as any other. Then the reason came.

"I paid an extra price for this because it was guaranteed; now you refuse to protect the guarantee, and I might better have taken a cheaper article and taken my own chances on it."

The particular case under discussion was rather uncommon, but not entirely unique, and from its very peculiarity brings up certain questions with all the more force. A customer had purchased a sythe on a guarantee near the end of the season and had little occasion to test it till the following year; then it proved unsatisfactory, but the time covered by the guarantee had expired, and the dealer, being no longer backed up by the maker's guarantee felt unable to make good the loss. As a consequence the customer, and probably the friend that was with him, left the store in a dissatisfied frame of mind that would make them easy marks for a competing house. But the greatest loss of such an incident to the Hardware trade is the shattered faith in the virtues of a guarantee.

With appliances for covering defects and imitating the outward appearance of a higher quality, the main protection a customer now has against cheap and worthless stuff is the guarantee of the maker, and the reputation of the maker or of the dealer from whom the article is purchased. Those are the two pegs upon which quality can hang her arguments with which she is to defeat shoddiness, and to weaken either of these is to endanger to that extent the entire legitimate Hardware trade and put the Hardware store in competition with the scrap pile.

The value of the dealer's reputation has been pretty thoroughly discussed, but is something that only comes to him with time and patient hard work, the same way the manufacturers does. The value of a guarantee, the other distinguishing feature from the junk dealer, is so vital to the man with a reputation still to make that the real question is, not whether the guarantee shall be protected, but just how far the dealer or maker is justified in going beyond the original terms of his guarantee to meet and satisfy a customer.

A certain insurance company comes into mind as an illustration that has long since gone the way of all things fishy, not so much from lack of resources as from obtaining a reputation for contesting claims overmuch. Some of those claims may have been dishonest ones; that couldn't be made known as widely as the fact of the contest was known and that company could better have afforded to pay some unjust claims rather than obtain the reputation of fighting all claims.

A good many guarantee claims had better be settled to the customer's satisfaction if he has anything like reasonable ground upon which to base a claim rather than shake the customer's faith in guaranteed goods, even though the claim itself falls somewhat outside of the intended ground. It will pay the maker in the end to adopt his liberal policy and back up the dealer. It will pay the dealer to make good himself if the maker fails to back him up—and then take this revenge on the maker by changing the line of goods he handles. Whether the claim is made within the limits of a certain number of days from date of purchase, or even if the line has in the meantime been found wanting by the manufacturer himself, and replaced by a more satisfactory line, whenever a guaranteed article is brought in that has been broken or that fails to work through some easily distinguished defect in make or material, and not as the result of long wear or unreasonable strain, both maker and dealer ought to consider that their personal reputation is on trial and should endeavor to vindicate that. To do so it is not necessary to establish another reputation as an "easy mark;" that is not a desirable business producer. But the man who guarantees that a certain thing will work this year ought to be equally willing to put his shoulder behind it another year, provided its failure can be proven without a doubt to lie in defect and not in abuse or neglect. In other words, it should not matter greatly whether

the year's service it is guaranteed to give be taken out of it the first season or not till ten years afterwards, so long as the fault is plainly due to the machine and not to the owner. This isn't so much of a hardship as it looks. The real test of a guarantee with any article of sufficient merit to justify one, lies in the first few times of using, when all the parts are new and the strain greatest.

Just another suggestion regarding the keeping of a guarantee. Do not, on any account, let it appear as an unwilling concession. If you feel it advisable to make good, do so promptly, cheerfully, willingly; if not, refuse at once, but do not haggle or grumble. Many a dealer has spoiled the advertising value of his own acts of courtesy or justice by going about it with a sour face. To take another illustration from one of our biggest insurance companies; a certain policy was suddenly payable under conditions that at the start made it seem open to question. Without waiting to contest the matter or to haggle, the representatives made a quiet and prompt investigation, pronounced the claim just and the policy was paid without a murmur; then the incident was used with telling force for advertising purposes. In the same way, whenever a guarantee claim comes up for settlement, meet it willingly, promptly and with open arms. Ask whatever questions are necessary to satisfy as to its reasonableness; investigate if you think best; but do it willingly and promptly; as though you wanted to do full justice and not as if you were hunting around for some knot-hole to crawl out of.

SAD IRON PSYCHOLOGY.

The Dover Manufacturing Co. believes that dealers could largely increase their sales of any commodity were they to give more attention to the education of their salespeople. Science in salesmanship is coming more and more to the front. In fact, all departments of business are being studied from a scientific standpoint. The right to use the word science in some instances may be disputed. However, there is considerable truth in some of the claims that are being set forth.

Sad Iron Psychology is a new idea applied to the sale of Asbestos Sad Irons. The definition of this term is, "The adaption of the demonstration to the circumstances of prospective customers." The Dover Manufacturing Co. believes that the application of this principle will result in increased sales of Asbestos Sad Irons. Salespeople can sell more Asbestos Sad Irons if they demonstrate the goods from the viewpoint of prospective customers. Here is the woman, for instance, who does all her house-work with her own hands. She is interested in Asbestos Sad Irons because they relieve ironing of its drudgery and make hard work easy. She is practical. Therefore she is interested in *practical laundry tools*.

In talking Asbestos Sad Irons to such a woman, the salesman should show them up from a practical standpoint. The practical woman is interested in the styles of Asbestos Sad Irons that will be best adapted to the class of ironing which she does. The chances are that she will want a Laundry Set because most of her ironing consists of plain garments. However, such a woman will also be interested in the smaller irons which are to be used in putting the finishing touches on certain kinds of garments. Since this woman does her own ironing, she is especially interested in the comfortable handle feature of Asbestos Sad Irons. She does not like the idea of grasping a handle that becomes almost red hot and scorches her fingers and wrist. Furthermore, she is interested in Asbestos Sad Irons from an economical standpoint, and the salesman should show how they save fuel by retaining heat for a long time. The finish of Asbestos Sad Irons also appeals to such a woman on account of the better quality of work and the saving of fabrics which an elegantly finished iron causes.

Then there is the woman who does very little ironing with her own hands. Most of her work is farmed out; but there are some things that she will not entrust to the carelessness of others. You know how women feel about such matters. There are the finely embroidered shirt waist and lingerie for instance. For the ironing of fine goods a special tool is required. The salesman will be applying Sad Iron Psychology when he shows up the styles of Asbestos Sad Irons that are adapted for such work—the Shirt Waist, French, and Flounce Sets for instance. Women of the latter class are also interested in the cabinets put up in nicely finished hardwood cases. The Laundry Irons in these cabinets, when placed in the hands of the hired girl, will insure a better class of work on the plain work which she does. The other styles in the cabinet will be used by the mistress in doing up the garments which she reserves to do with her own hands.

In this connection it might be well to state that the mistress finds a partial solution of the servant question in furnishing her domestics with the very best kind of tools.

"COMMERCIAL AMERICA IN 1905"

"Commercial America in 1905" is the title of a monograph just issued by the Department of Commerce and Labor through its Bureau of Statistics. It discusses the commerce of and commercial conditions in each country of America in 1905 where possible, or in the latest available year where the figures of 1905 have not been announced.

The special purpose of this monograph is to present the latest available information regarding commerce and commercial conditions in the various countries south of the United States, practically all of which are to be represented in the Pan American Congress which is to meet in Rio de Janeiro in the present month, and to supply to the delegation from the United States and to others attending the congress this information in a single volume and in convenient form for study and reference. The work has been under preparation in the Bureau of Statistics for several months, and includes statistics of the imports and exports of each American country by principal articles and the countries from which the imports are drawn and those to which exports are sent.

Great difficulty has been encountered by the Bureau of Statistics in the preparation of this document in view of the fact that more than half of the countries of Central and South America have no satisfactory statistics of their foreign commerce. Statements with reference to their trade were therefore necessarily made up by taking from the records of the principal importing and exporting nations of the world the statements of their trade with the countries in question and supplementing them with such other information as could be obtained from consular reports and other standard and generally accepted publications. By this process the Bureau of Statistics has been able to present a picture of trade conditions in every country and island of America, supplemented with a text discussion regarding production, transportation, and commerce and commercial possibilities of each, and this is followed by a detailed statement of the trade of the United States with each of the countries and islands in question, by articles, during a long term of years.

The total commerce of all America is shown to be \$5,050,027,000, of which \$2,806,119,000 is that of the United States, leaving \$2,243,908,000 as the total commerce of all American countries other than the United States, imports and exports being combined to form these grand totals. Considering imports separately, the total for all America is \$2,184,377,000, of which \$1,179,135,000 is the imports of the United States, and the remaining, \$1,005,242,000, the imports of other American countries. The exports of all America are \$2,865,650,000, of which \$1,626,984,000 is from the United States and the remainder, \$1,238,666,000, is the exports of all other American countries. Thus, of imports into all America about 54 per cent enter the United States, and of the exports from all America about 57 per cent go from the United States.

Turning to the countries south of the United States, the chief subject of interest at the present moment, the monograph shows that the imports of all American countries and islands laying south of the United States aggregated 732 million dollars in the latest available year, and the exports aggregated \$1,003,000,000. Of these imports the United States supplies 189 million dollars, or practically 26 per cent; of the exports the United States takes 350 million dollars, or practically 35 per cent.

The general fact that the United States supplies 26 per cent. of the imports of the American countries lying south of her harbors, and takes 35 per cent. of their exports, suggests a fairly satisfactory trade relation between this country and her Spanish-American neighbors. An analysis of the figures, country by country, however, shows some sharp contrasts in the shape which the various countries take of their imports from the United States and the share of their exports which they send to this country.

In those countries whose ports or consuming centers have shorter transportation routes to this country than to Europe the share of their imports drawn from the United States is larger than from any other country. In those countries from which the steamship route to the United States is not materially shorter than to European countries, the share of the imports supplied by the United States is small, even though the share which she takes of their exports are large. In the former group, in which the length of transportation routes to the United States is less than to Europe, are included Mexico, Central America, Colombia, Venezuela, the Guianas, and the West Indian Islands, and the

share of their imports drawn from the United States ranges from 25 to 75 per cent., and averages for the entire group 47 per cent. In the second group, from whose ports the steamship routes to the United States are not materially shorter than those to Europe, are included Brazil, Uruguay, Paraguay, Argentina, and the entire western coast of South America, and the share of their imports which they draw from the United States ranges from 25 per cent. downward to 3½ per cent, and averages for the entire group 12 per cent.

The aggregate imports of the first-mentioned group (in which the length of transportation routes to the United States is less than that to Europe) are 285 million dollars in the latest year for which statistics are available, and of this 134 millions or practically 47 per cent. was drawn from the United States. Of the second group (from whose ports the steamship lines to the United States are not materially shorter than those to Europe) the aggregate imports are 446 million dollars, and those drawn from the United States 55 millions, or a fraction above 12 per cent. Porto Rico, now a customs district of the United States, is not included in the above calculations. The United States supplied in the fiscal year 1905 84.5 per cent. of the \$16,536,259 worth of merchandise entering that island and took 83.5 per cent. of the \$18,709,565 worth of merchandise sent out of the island.

In the first group of countries (which have shorter transportation routes to the United States than to Europe) Mexico, with direct railroad routes to the United States, takes 58 per cent. of her imports from this country, Cuba 45 per cent., the Central American countries 43 per cent., Colombia 44 per cent., Venezuela 36 per cent., West Indian Islands except Cuba and Porto Rico 35 per cent., Santo Domingo 60 per cent., Haiti 75 per cent., and the Guianas, colonies of European countries, 24 per cent. Of the second group the countries (from whose ports the steamship routes to the United States are not materially shorter than those to Europe,) the share of the imports drawn from the United States is in the case of Ecuador 25 per cent., Peru 18 per cent., Argentina 14 per cent., Brazil 11 per cent., Chile 9 per cent., Uruguay 8½ per cent., Bolivia 6½ per cent. and Paraguay 3½ per cent.

The share of the exports of these countries which is sent to the United States is largely determined by our local demand for the products of the individual countries. Cuba, whose chief exports are sugar and tobacco, of which the United States is a large importer, sends to the United States 86 per cent. of her total exports. Haiti, whose chief export is sugar, sends 94 per cent. of her exports to the United States; Santo Domingo, which also exports chiefly sugar, sends 68 per cent. of her exports to the United States; the Central American States, exporting fruits and coffee, of which the United States is a large importer, send 42 per cent. of their exports to this country; Brazil, whose chief exports are coffee and india rubber, of which the United States is a large importer and consumer, sends 50 per cent. of her exports to this country; and Mexico, whose most important exports are sisal grass, copper, lead, hides and skins, coffee and various tropical products, of which the United States is a large importer, sends 68 per cent. of her exports to this country.

The causes of this sharp contrast in the share of the imports drawn from the United States by the two groups of countries are suggested by a study of the map and the routes followed by the steamships upon which the South and Central American countries are entirely dependent for their transportation of imports and exports. The most easterly point of the South American Continent, which all steamships must pass in their routes, to and from the ports of Eastern and Western South America, is much farther East than the principal commercial ports of the United States. The distance which a steamship must travel from that point to New York is greater than to Southwestern Europe, and but little less than to the principal commercial ports of Northwestern Europe. With the large supply of European owned steamships running regularly between South America and the ports of Europe, and the comparatively small supply running to and from the ports of the United States, the trade of the South American countries naturally trends toward European ports, and this is intensified by the fact that much of the trade, finance, and banking facilities of South America are also in the hands of or controlled by Europeans.

The fact that Brazil sends direct to the United States over 800 million pounds of coffee and 35 million pounds of india rubber annually; that Argentina sends 40 million pounds of wool

and 29 million pounds of hides; that Chile sends 60 million pounds of nitrates, and that Brazil, Argentina and the countries of the West coast of South America send in addition to this over 17 million dollars' worth of miscellaneous merchandise suggests that the vessels bringing this large quantity of merchandise should offer ample facilities for direct shipments from the United States to those countries on the return trip. This result, however, is not realized, since a large proportion of the vessels bringing this merchandise from these South American countries to the United States take cargoes from this country to Europe where, after discharging those cargoes, they reload with European merchandise for South America, thus by these triangular voyages materially reducing the opportunity for direct shipments from the United States to South America.

The following table, taken from the monograph above described, shows the imports and exports of the various countries south of the United States and the share thereof drawn from or sent to this country in the latest year for which statistics are available:

| Countries. | Imports. | | | Exports. | | |
|----------------------|---------------------|---------------------|------------------------------|---------------------|---------------------|----------------------------|
| | Total. | From United States. | Per cent from United States. | Total. | To United States. | Per cent to United States. |
| | Millions of dollars | Millions of dollars | | Millions of dollars | Millions of dollars | |
| Argentina..... | 197.9 | 27.9 | 14.1 | 311.5 | 15.2 | 4.9 |
| Bolivia..... | 8.3 | .6 | 6.7 | 8.9 | 0.0 | 0.0 |
| Brazil..... | 125.8 | 14.0 | 11.1 | 191.4 | 96.4 | 50.4 |
| Central America..... | 20.3 | 8.8 | 43.3 | 31.3 | 13.2 | 42.2 |
| Chile..... | 57.4 | 5.1 | 8.9 | 78.8 | 11.2 | 14.2 |
| Columbia..... | 11.1 | 4.9 | 44.3 | 18.5 | 6.8 | 37.0 |
| Cuba..... | 94.8 | 43.0 | 45.3 | 110.2 | 95.3 | 86.5 |
| Ecuador..... | 5.4 | 1.4 | 25.3 | 9.1 | 2.3 | 25.8 |

| Venezuela..... | 5.4 | 1.9 | 35.9 | 7.7 | 2.7 | 35.7 |
| West Indies..... | 46.2 | 16.5 | 35.1 | 33.2 | 13.1 | 39.5 |
| Total..... | 730.6 | 189.3 | 25.8 | 1,062.8 | 350.2 | 34.9 |

a Except Cuba and Porto Rico.

NOTE.—Porto Rico, now a customs district of the United States, is not included in the above list. The total value of the merchandise entering the island in the fiscal year 1905 was \$16,436,250, of which \$13,974,070, or 84½ per cent, was from the United States. The value of the merchandise shipped out of the island in the same year was \$18,709,563, of which \$15,633,145, or 83¼ per cent, was sent to the United States.

THE LAWS OF LEVERAGE.

It is freely admitted that time and strength are wasted by most of us until we begin to study the principles underlying our work and applying them. A novice strains himself almost to death and accomplishes nothing, while the expert performer goes through the same stunts with careless ease and grace. Wherever we go in arts and professions it is the same; probably because we do not get into the proper focus, so to speak, and allowing natural forces to work with us, our muscles, brain and instruments. There is a trick in being just far enough away from our work or near enough to it, and at the same time leaving gravitation or other powers of nature to take a hand. So common an art as shoveling dirt may be done on precisely scientific principles. With the proper tools a laborer can do more than with others, if he knows how to use them at all. There is much even in standing in the right position, but all things being equal, mechanical principles affect conditions. A knowledge of the laws of leverage, for instance, has enabled the Avery Stamping Company, of Cleveland, Ohio, to manufacture plainback shovels and spades which laborers everywhere appreciate very highly. With these shovels they can get right down to their work, because the bend in the handle is at the blade. In other shovels of the plainback type the bend is four inches off. This extra length is added to the length of the handle of The Avery Company's shovels, making it about 40 per cent. easier for workmen to pry up a shovelful and keep it in balance. Anybody who has experimented with steelyards and has realized that a slight shifting of the pivot would make a considerable difference in the distance at which it would be necessary to set the sliding weight in order to balance the load at the other end. The same characteristics are present in shovels and spades, being most ingeniously taken advantage of in the manufacture of the product of The Avery Stamping Company. A catalogue for their goods with full description may be had on application direct by all readers of *HARDWARE*.

DEATH OF LORING COES.

Loring Coes, President and Treasurer of the Coes Wrench Co. and Loring Coes & Co., died at his residence in Worcester, Mass., Friday, July 13, at the age of ninety-four.

He had a most remarkable career as inventor of the Screw Wrench, and for sixty-five years as manufacturer of wrenches and machine knives. Born in Worcester April 22, 1812, he worked on his father's farm up to the age of fourteen, when he became an apprentice in the carpenter trade. Having learned this trade, he turned to pattern-making, and up to recent years exercised his ability in the building of experimental machines of wood, and models of tools, afterwards patented by him. From pattern-making his inventive genius turned to the problem of the one-handed screw wrench. Two styles were extant at that time: One of English invention and the other known as the Springfield or Merrick Wrench. Both these wrenches required the use of both hands in their manipulation, and Loring Coes was the first to conceive and work out the one-handed screw wrench idea. April 16, 1841, a patent was issued to Loring Coes, on this new wrench, and subsequently he and his brother, Aury G. Coes, formed a co-partnership under the name of L. & A. G. Coes for the manufacture of wrenches under the patent. At first they started with three hands. In 1848 they were employing from 12 to 15 men and were producing from 500 to 600 wrenches a month. New machinery was constantly added to turn out more wrenches which had become very popular with mechanics.

In 1901 a superior model wrench was designed and patented through the management of Loring Coes & Co., Inc., and this in turn was supplanted by twin models, with wood and iron

LORING COES.

handles. Since the consolidation of the two companies under a single ownership both branches of the business have developed very rapidly, the product being greatly increased in volume, with corresponding improvements in design.

Mr. Coes gave much thought to the development of the shop end, his work including the invention of new machinery and improvements in processes of manufacture. He had practically never been ill in his life until his last sickness. Possessed of a wonderful constitution and living the simple life, Mr. Coes was intellectually and bodily sound many years beyond the usually "three score and ten."

At last heart trouble asserted itself. Mr. Coes recovered from the first attack but his great age was against him and he finally succumbed. Mr. Coes was a man of quiet tastes. Though interested in public affairs, he was not active in politics. He served his city as a representative in the Massachusetts Legislature and as an alderman and common councilman. He was a director of the Worcester Electric Light Company and the City National Bank. Mr. Coes was a very enthusiastic and expert fisherman and in the Spring of 1905 made his forty-seventh consecutive annual visit to the trout and salmon regions of Maine.

Mr. Coes married Mrs Harriet R. Reed of Attleboro, Mass., in 1834. Mrs. Coes died in 1901. They had four children, only one of whom, Chester E. B. Coes, is living. Another son was Frank L. R. Coes, father of Frank L. Coes, vice-president and manager of the Coes Wrench Company and Loring Coes & Co., Inc. Mr. Coes left two great-grandsons, the sons of Frank L. Coes.

THE MAN BEHIND THE COUNTER IN THE HARDWARE STORE.

LETTER No. 2.

MY DEAR NEPHEW:

Your letter gave me great pleasure, and I'm very glad that you are being given an opportunity to wait on customers, but before I tell you anything else I want to tell you not to get a "swelled head." Because now you have been given a job behind the counter don't be or feel too important to do any job about the store. Be busy at something all the time.

Well do I understand how you feel about being afraid of making mistakes. Use your head—think about things—that's what you have been given brains for. And because you did make that blunder and got things so balled up, don't be discouraged, but just try to do better. Remember, my boy, that the reason there were not any great officers in the Chinese army was because when a general was defeated the Emperor had his head cut off. Success often comes through failure. You learn your weak spots and can strengthen them. Of course, you'll make mistakes—the fellow that never makes mistakes never makes anything. But be careful not to make the same mistake twice—guard against that.

I was glad to know, my boy, that you are tired when night comes. That is a good sign. But don't be tired in the morning, and don't you let any one about the Hardware store see that you feel tired at any time. Keep busy all the time at something. I've been around Hardware stores all my life, and I've yet to find the store where there wasn't something yet to be done. Years ago your Uncle Pete worked for A. T. Stewart in New York. Pete was only a boy salesman in the dress goods department. It was a very quiet day in February, nasty weather outside and nothing doing in the store. The fellows were just lounging around in little knots of two or three. Mr. Stewart came through the department. The inactivity of things evidently annoyed him. for in a moment he came back again, spoke a few words to the head of the department. Uncle Pete said he and other fellows spent the rest of the day moving all the goods from one side to the other side of the department and the next day re-arranging and piling the stock. No one can dispute the fact that A. T. Stewart was a successful and a great merchant—even when everything was spick and span and there seemed absolutely nothing to do, he wanted people busy. He wanted an air of activity about his store. It gave a good impression—it will in that Hardware store where you are; work to accomplish something, but work any way.

Now that you are beginning to have an opportunity to wait on customers, there are some things to think about. First of all, you should bear in mind that when a person comes into the store it probably is either because then or at some future time that person intends to make a purchase. A woman may come in asking the price of some article in the window—do not be content to simply give the price—strive for the opportunity of showing her the article. Prove your willingness to show her all you can about it—and if your store has other articles of similar kind call her attention to them. Be attentive to the customer. Make that your one business at that moment.

The other day your aunt was in New York and went into a Hardware store to purchase a pen knife. She told me afterward that never again would she go into that store unless she absolutely had to, the clerks were so inattentive. One clerk was showing her a knife and stepped back to talk to another clerk and had a "don't give a d—" expression on his face, and such an air about him that would lead one to believe he thought he was doing the favor in waiting on the customer. That store probably is losing business, and some of those chaps will soon be looking for a job.

I don't consider it any great thing to be able to just sell that article your customer comes in and asks for, and I guess your employer doesn't either. The fellow he is looking for is the one who not only does that—if he can't do that he can't hold his job—but as I say, the fellow your proprietor wants is the one who does more than that. When a woman comes in to look at a wash tub and you sell her one, and before she goes out the store you also call her attention to a new meat chopper or coffee pot and sell her one of these, then you may be beginning to be of some value—you will be making headway.

Use your head and work intelligently. In addition to push, you must have tact and discretion. Don't work stupidly like the fellow I heard of clerking in the drug store. The druggist was giving him some instruction and said: "You clean well and sweep well, but you are not as good a salesman as you should be. To be a good salesman you must push things a bit. Call each patron's attention to some article he needs. In this way you may often effect an extra sale." That afternoon an elderly woman came for a stamp. Now came the boy's opportunity. "Anything else, ma'am—hair dye, cosmetic, wrinkle remover,

face powder, mole destroyer, skin rejuvenator, flabby ———?" But the woman was gone before the alert boy had finished his catalogue of articles he thought she needed. So I say, my boy, work intelligently.

Another thing to cultivate is cheerfulness. I remember your father was a star salesman—and some years ago before his long sickness was considered the best cutlery salesman in the United States. And he told me once that he thought a man could sell more goods by having a cheerful face and happy smile than by using cigars and other entertainment, and he proved that he could.

That head clerk there in the store should be your best friend. Write me a little more about him, and I'll give you a pointer or two.

UNCLE ED.

THE END OF THE COAL MINERS' SUSPENSION.

The soft coal operators and mine employees of Eastern Ohio and Central Pennsylvania, in compromising their differences at joint conferences last week, brought to a close the coal-mining suspension in all the States. Thus of the more than three hundred thousand hard and soft coal mine employees of the United States who quit work on March 31, under the advice of their union leaders, only an insignificantly small number of bituminous coal miners continue in idleness. By far the larger number of the soft coal mine workers have resumed their usual employments in the mines under the provisions of district (State) agreements entered into separately in each district between union officials and representatives of the operators. In each of the districts the United Mine Workers have made some concessions as to conditions of employment, and the operators have restored the 1903 wage scale. This brings to the employees an increase of 5.8 per cent, in wages over those paid the past two years. Although the wage increase is uniform, the concessions on other points by the miners vary in the different States, and the former Inter-State Joint Conference, broken up in March, is still inoperative. Some of these interesting concessions are:

No interruption of work on account of grievances; matters of controversy to be submitted to arbitration.

Employment of non-union men not to be a matter of grievance.

The district conferences have extended through more than three months. For the greater part of this time over one hundred and fifty thousand coal mine workers have been idle in some ten States. The fact of their being scattered over such a wide area accounts largely for the lack of public interest, as reflected in the newspapers, which has been given to this most remarkable phenomenon of our industrial life. This is also due partly to the absence of disorder and lawlessness. To the best of our knowledge there have been only three instances of serious disturbance of the peace, two of these taking place in Pennsylvania and one in Ohio. Under the conditions prevailing in this industry at the beginning of 1906, it is considered possible that if there had been no suspension by the mine workers, the coal mine employees in many States would have been able to find employment for only a part of the time during the Summer months. The operators and consumers had an exceptionally large supply of coal on hand. The suspension of mining has reduced this surplus. The peaceable settlement of the suspension is to our minds another evidence of the practicability of the joint conference method of adjusting industrial controversies through the trade agreement, even after the dispute or contest has proceeded to the point of an open rupture of working relations.

FOOD INSPECTION HERE AND ABROAD.

As a result of the agitation in the United States against uncleanly and unsanitary conditions in Chicago packing-houses, traffic in American canned meats has suffered a check which is serious, even if it proves to be only temporary. European countries, England especially, are visiting upon the packers the consequences of being found out. As a result, however, of the meat inspection law which the agitation secured, American canned meats are certain to be vastly improved in quality and are likely to be the best in the world. President Roosevelt, in response to a statement made by a conference of grocers in Sheffield, England, concerning the necessity for Government certification of canned meats, sent to the American Ambassador the following message:

You are at liberty to inform the Grocers' Federation that under the new law we can and will guarantee the fitness in all respects of tinned meats bearing the Government stamp. If any trouble arises therewith, protest can at once be made, not merely to the sellers of the goods, but to the United States Government itself.

No stronger assurance could be made that the meat inspection law will be enforced. This does not mean, of course, that the American Government is going into the meat-packing business; but it does mean that impurity in the product will be regarded as *prima facie* evidence of violation of law, and that the packers and inspectors will be made, by the power of the Federal arm, to render an account for it. The British, who have been especially keen in their criticism of the American packing industry, have, meanwhile, had their complacency somewhat disturbed by the report of the Inspector of Factories and Workshops. He tells of conditions in England as bad as anything revealed in America; of jam-pots washed in foul liquid; of dirty clothes sorted in bakeries; of sausage factories which are dilapidated and unsanitary. The American method of cleaning up publicly may work incidental injury to trade and put a smirch upon the National reputation, but it is effectual. We commend the method to our European cousins.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

THE CUSTOMER MUST PAY AGAIN.

QUESTION: Our Company elected one of our stockholders secretary of our Company and the said Secretary sold one of our customers a Buggy and it was understood that said customer was to have our regular terms of sixty days to pay for the buggy and the said Secretary left our Company, with our consent, and sent in his resignation at the same time. and we notified our customer over the telephone. not to pay any money to said Secretary, as he was not with us any more and he said that he would do as we said; we find on going for the amount due us that our customer has paid our former Secretary the amount and the Secretary has given him a receipt of one of our regular blanks signed Secretary. Can we hold our customer for the amount? Said Secretary applied said amount to his own use.

REPLY: When your Secretary resigned from your Company his actual authority to act for it ceased. When you notified your customer that the Secretary had left you and directed the customer to make no more payments to him, his apparent authority also ceased. It follows that payments to your Secretary, after notice, would not be a defense to an action brought by your Company to collect the account; and that you can hold your customer liable for the same. The principal difficulty in proof may, however, arise from the matter in which notice was given. You may find it difficult to prove that your customer actually received your telephone message, if he denies it.

CONDITIONAL SALE—MUST BE FILED IN NEW YORK.

QUESTION.—We sold a customer a steel range to be paid for in installments, the title to remain in us till the last installment was paid. The bill of sale was drawn up, but never recorded. He afterwards gave a chattel mortgage on the range to a third party and has not paid either the installments due or the amount due under the chattel mortgage. Who has the better right to the range?

REPLY.—In New York the question turns on the good faith of the chattel mortgagee at the time he took the mortgage. If he had notice of your rights then, his claim is subordinated to yours. But if he took the mortgage, supposing your customer owned the range and without notice of your rights, and your bill of sale was not filed, his mortgage must be paid first. The New York Lien Law provides: "All conditions and reservations in a contract for the conditional sale of goods and chattels, accompanied by immediate delivery and continued possession of the thing contracted to be sold, to the effect that the ownership of such goods and chattels is to remain in the conditional vendor or in a person other than the conditional vendee, until they are paid for, or until the occurrence of a future event or contingency, shall be as void against subsequent purchasers, pledges or mortgages in good faith, and as to them the sale shall be deemed absolute, unless such contract of sale, containing such conditions and reservations, or a true copy thereof filed as directed in this article." Prior to 1905 this statute did not apply to sales of household goods, vehicles, farming machinery, etc., but these exceptions were all repealed in 1905 so that it is now necessary for a person

selling any article on conditional sale, to file a copy of the contract in the office of the City or Town Clerk where the purchaser resides, in order to protect his rights against third parties.

CONTRACT NOT TO SUE—WHEN VOID.

QUESTION.—A building contract provides that "in the event of the first part failing to comply with the provisions of this contract, the party of the second part expressly agrees not to bring any action or suit for the breach thereof; but all questions in dispute shall be left to _____ as arbitrator, whose judgment shall be final." Does this provision prevent us altogether from bringing a suit in case the contract is broken?

REPLY.—It does not. It is in effect an agreement that the party breaking the contract shall not be answerable in an action for its breach. Such a stipulation, entirely ousting the courts of jurisdiction, has been repeatedly held to be void, upon the ground of public policy.

"SALES OF GOODS IN BULK"—LEGISLATION.

QUESTION.—Is there anything to prevent a retail dealer who is in debt from selling his entire stock in trade to a purchaser, and will the purchaser take the goods free from the claims of the seller's creditors?

REPLY.—Until the passage of recent statutes, there was nothing to prevent a retail dealer from selling his entire stock to a single purchaser; and if the purchaser took the stock in good faith and paid fair value for it, the seller's creditors had no remedy against the purchaser. Recently many of the States, to prevent fraud, have passed statutes to cover this state of facts. The New York Statute passed in 1902, which is a fair sample of such legislation, provides that: "A sale of a portion of a stock of merchandise other than in the ordinary course of trade in the regular and usual transaction of the seller's business, or the sale of an entire stock of merchandise in bulk, shall be fraudulent and void as against the creditors of the seller." unless the seller and purchaser shall make an inventory at least five days before the sale, and the purchaser shall at least five days before the sale notify each of the seller's creditors of whom he has knowledge, or can acquire knowledge, of the sale and the proposed price to be paid. In New York this statute was held to be unconstitutional on the ground that it invaded the right of personal liberty and private property. Similar statutes have been adopted in upwards of twenty of the States. They have been held valid in Massachusetts, Connecticut, Tennessee, Washington and other jurisdictions, while in a few States, such as Ohio and New York, the Courts have refused to sustain them. The New York statute has now been amended so as to provide that such sales shall be only *presumptively* fraudulent. It is uncertain what view the courts will take of the amended statute. Most of the States uphold such legislation, which is aimed to suppress an evil that is almost universal.

GEORGIA HARDWAREMEN ORGANIZE.

The call for a meeting of the Hardware dealers of Georgia at the Hotel Lanier, Macon, on July 17th, was responded to by a large number of Hardwaremen from all sections of the State, and the meeting was from the outset a most interesting and enthusiastic one. The first work of the body was to elect officers. This was done at the morning session and resulted as follows: W. W. Robinson, Dublin, president; W. G. Raines, Statesboro, first vice-president; J. C. Hollingsworth, Dawson, second vice-president; C. M. Tillman, McRae, secretary and treasurer. Executive Committee: W. W. Robinson, Dublin; C. M. Tillman, McRae; J. J. Golden, Tifton; D. A. Smiley, Clexton; George W. Woodruff, Winder. The work of the afternoon was of vast importance to the body. At this session the committee on by-laws and rules was allowed to make a report and after the work was done the body was declared a permanent organization. It began its existence with the leading Hardwaremen of the State at its back and great good to the members is promised from the organization. All Georgia's principal cities and towns were represented in the meeting, and those who took part in the deliberations proceeded in a business-like manner to incorporate their wishes in the objects of the union of Hardware interests. The next session of the newly organized body will be held in Tifton. The by-laws and constitution were completed in the afternoon and accepted. The large number of business men interested are highly pleased with the results of the day's work. Fair freight rates and the adjustment of claims in the shipment of goods were discussed in addition to the formation of the organization.

"Uncle James, what is 'honorable mention?'"
"Honorable mention," my boy, is the hole in the doughnut."

RECENT TRADE PUBLICATIONS.

HENRY DISSTON & SONS, INC., Philadelphia, Pa., owners of the Keystone saw, tool, steel and file works, have issued a new illustrated price list in which some of their leading products are described and illustrated. Regarding their special process for making the steel in their own works, the manufacturers say: "This process, the outgrowth of careful experimenting, was made possible by a thorough knowledge of the requirements of saws, the importance of having a steel particularly adapted to meet these requirements and the policy of always making quality the first consideration. We have manufactured crucible saw steel since 1855, and have reached a degree of perfection in this specialty that has never been attained by any other house." Included in the contents will be found illustrations of the Diss-ton Inserted Tooth Saws, Rift Saws, the Goulding Bit, Trenton Tooth, Prosser Tooth, Gullet Tooth, Solid Tooth and Circular Saws; Edger Saws, Top Saws, Shingle and Heading Saws, Concave Saws, Grooving Saws, Bilge Saws, Machine Knives, Metal Slitting Saws, Milling Saws, Patent Ground Saws, Pond Ice Saws, Cross Cut Saws, Cross Cut Handles, Cross Cut Saw Tools, Saw Mandrels, Speed Indicators, Saw Gummers, Cutter Grinders, Band Saw Swages, Hand Presses, Tools for Repairing Saw Sets, Saw Clamps, Band Saws, Hand, Panel and Rip Saws, Gauge Saws, Compass Saws, Ship Carpenters' Saws, Pruning Saws, Wood Saws, Butchers' Saws, Hack Saw Frames and Blades, Plastering Trowels, Brick Trowels, Pointing Trowels, Cane Knives, Machetes, Post Hole Diggers, Machinists' Tools, Marking Guides, Levels, Combination Squares, Mitre Squares, Bevels, Screw Drivers, Shafting Levels, Plumbs and Levels, Trammel Points, Saw Cutters, Plumb Bobs, Crout Cutters, Corn Graters, Potato Shredders, etc., etc.

FLETCHER, TERRY & Co., Forestville, Conn., manufacturers of Glass Cutters and Light Hardware, have issued their catalogue for 1906. These cutters are known to the trade as the Leader, Champion, Favorite and Handy. They also manufacture Interchangeable Circle Cutters, Improved Circle Glass Cutters and "Special" Brand Glass Cutters. Illustrations are given of the Little Mend Soldering Set, for mending anything in the metal line that leaks; also of the Vest Pocket Companion, which is a new design for a combination tool, fits in the vest pocket and comprises following tools: Glass Cutter, Glass Breaker, Cork Screw, Scale, Bottle Unsealer, Point, Square and Point Pusher; Ivy Key Wood Faucets, Sprague Can Openers, Combination Cork Screws and Can Openers, Small Pocket Wrenches, Tack Pullers, etc. This is a very useful line of goods, and the catalogue will be found of interest to the trade.

FEDERAL MFG. CO., 162 and 172 West Long Street, Columbus, Ohio, have favored us with their catalogue of Gas, Electric and Combination Fixtures and Columbus Gas Arc Lamps and Lighting Supplies. This is a very artistic line of goods, and includes Ell Pendants, Combination Pendants, Wall Brackets, Ell Stiff Brackets, Hall Harps, Stamped Bracket Backs, Brass Pillars, Gas Shade Holders, Stamped Burner Cups, Lava Gas Tips, Indoor Lamps, Outdoor Lamps, Porch Lamps, Portico Bracket Lamps, etc. The company state: Our fixtures are constructed of cold drawn polished steel tubes. The shells are from brass sheets. The gas keys are heavy and strong, making the fixture rigid, durable and graceful. Finished in oxydized copper or polished brass.

PULLMAN MFG. CO, Rochester, N. Y., 1906 catalogue of Sash Balances and other Hardware Specialties. A full line of Sash Balances is shown, such as Regular, Cabinet, Rail Car and Marine Balances, and among their Hardware Specialties will be found their Steel Ball-Bearing Floor Spring Hinge, Screw Driver Adjustment, Coil Door Spring, Spring Curtain Rod, Gate Spring, Screen Spring, Screen Door Check, Spring Door Holder, Ventilating Sash Lock, Steel Sash Pulley, Bronze Wire Sash Cord, Aluminoy Sash Ribbon, Sash Chain, Automatic Ventilator, Coat or Waist Hanger, Trouser or Skirt Hanger, etc.

STRANSKY & Co., 29 to 31 Cliff Street, New York. Catalogue No. 22 of Stransky Steel Ware, "The Ware That Wears." Some of the illustrations are in colors, showing their imported quadruple coated sapphire, turquoise, copperoid, white, olive, garnet, Alaskan, Australian, African and Siberian topaz; Brazilian,

Mexican, Roman and Peruvian onyx wares. Their "Enameled Ware Beyond Compare" is also illustrated, showing such utensils as Sauce Pans, Berlin Kettles, Stew Pots and Pans, Pot Covers, Preserving Kettles, Cooking Pots, Stock Pots, Oval Boilers, Vegetable Cookers, Ham Boilers, Dutch Ovens, Coffee Pots, Tea Pots, Tea Steepers, Tea Kettles, Milk or Cream Boilers, Pudding Dishes, Bread Raisers, Pudding Pans, Milk Pans, Wash Basins, Refrigerator Pans, Water Pitchers, Mixing Bowls, Bath Tubs, Dinner Plates, Pie Plates, Bread Pans, Roasting Pans, Fry Pans, Fish Kettles, Steam Cookers, Soup Strainers, Colanders, Soap Dishes, Tooth Brush Holders, Funnels, Trays, Sponge Holders, Dinner Pails, Canisters, Cuspidors, etc., etc. This is one of the most comprehensive catalogues that have come to our attention, and no dealer should fail to write for one, for the line of goods is a very complete one.

DOVER MFG. CO., Canal Dover, Ohio. Illustrated general catalogue of Asbestos Sad Irons. In an introductory note, the company say: "Asbestos sad irons are made in a variety of shapes, sizes and weights and packed in various combinations to provide the proper tool for every grade of ironing. Each style of asbestos sad irons is in demand for its particular purpose. We originally made only laundry irons. Subsequently we added to our line as a demand for other styles was indicated by calls from the trade and from consumers. The multiplication of styles naturally resulted from the requirements of our customers. It therefore follows that the trade should show the complete line of asbestos sad irons in order not to lose sales on any particular style. We co-operate with the trade by furnishing goods that satisfy the consumer; by placing the irons in convenient packages and crates, by advertising in publications which women read: by furnishing printed matter and electrotypes; by strictly maintaining fixed minimum prices. Inquiries will receive prompt and careful attention." Included in the contents will be found Laundry Sets, Pressing Irons, French Sets, Shirt Waist Sets, Flounce Sets, Flounce Irons, Sleeve Irons, Polishing Irons, Tourist Sets, Tourist Irons, Asbestos Family Cabinets, Laundry Cabinets, French Set Cabinets, Parts and Repairs.

J. STEVENS ARMS & TOOL CO., Chicopee Falls, Mass. Illustrated catalogue of Stevens Rifle Telescopes, including the Favorite, Little Krag, Ideal, Off-Hand Target, Little Off-Hand and Stevens Special; Telescope with Aperture and Pin Head; New Model. Reliable and New Pistol Telescopes; Stevens Multiscopes and Ideal Detachable Mountings; Winchester, Marlin, Savage, Remington and Colt Telescopes. Angles of field, eye relief, and diameter or tubes of the Telescope are also given, with price list of Telescope Mountings, and component parts of same. This catalogue should be sent for by the dealer.

RACINE BOAT CO. INC., Racine, Wis. Catalogue of Motor Boats, Auto Boats, Turbine Boats, Row Boats, Canoes, Hunting Boats, Sailing Boats, Boat Attachments and Fittings and Marine Motors. This company are designers and builders of Gasoline and Steam Launches, Sailing Yachts, Duck Boats, etc., and the catalogue will be found an interesting one.

F. SMITH & SON, INC., Clinton, Iowa. Catalogue and price list of Bull Dog line of Ladders, Step Ladders, etc., under the names of Painters' Standard, Electric, Clinton, Clinton Special, O. K., Household, Favorite, Ideal and Hawkeye. They also manufacture Painters' Trestles, Long Ladders, Extension Ladders, etc.

N. N. HILL BRASS CO. AND WATROUS MFG. CO., East Hampton, Conn. 1906 catalogue M3 of Bells and Toys. These companies are a branch of the National Novelty Corporation, 826 to 828 Broadway, New York, and manufacture Nickel Plated Chime Bell, Dumb Bell, Teething Ring and Cold Roller Steel Sleigh Bell Rattles, Boys' Driving Reins, Tea Bells, Telephone Chimes, Giraffe and Swiss Chimes, Push Toys, Dancing Clowns, Buzz Chimes, Push Jockey Chimes, Bell Toys, Hoop Chimes, Call Bells, Bicycle, Sleigh, Door and Cow Bells, Electrical Gongs and Bells. This is a very complete line of novelties, and the catalogue may be had upon application.

NEW GOODS AND SPECIALTIES

MYERS' UNIVERSAL PUMP JACK.

F. E. Myers & Bro., Ashland, Ohio, have added to their line of pumps the Universal Pump Jack, which is shown in the accompanying illustration. The Meyers Universal Pump Jack is back geared 6 to 1, has 5 inch, 7½ inch and 10 inch stroke, and can be attached to any windmill pump, making an equipment adapted for use with belt power, windmill, or hand, designed to be connected up without disarranging the pump or pipes. It is

on a substantial bell-shaped base, which surrounds the pump, and can be bolted securely to the platform making a permanent job. It is a strong, practical device, and can be attached to any pump already in the well without disturbing the pump in any manner, and is fully guaranteed by the makers.

"THE SHEAR OF THE YEAR."
cutters and grinders, 168 S. Clark Street, Chicago, Ill. The manufacturers of "The Shear of the Year."

"THE YEAR."
to the construction of their
drawn together without

the use of a screwdriver. A turn of the milled nut tightens or loosens the blades by forcing the forked head under the head of the pin which passes through both blades. By a few turns of the milled nut the blades can be taken apart, which eliminates all use of the screwdriver for taking apart, or taking up lost motion.

THE MAJESTIC CHUTE.

The Chappell Furnace Co., Morenci, Mich., are the manufacturers of a valuable improvement in the way of a coal, wood or vegetable chute, which the trade ought to take hold of with avidity. It has so many desirable advantages over anything else of the kind that it should meet with a large sale on its merits. We give an illustration of it herewith. It is made of heavy steel

FIG. 1.—THE OLD WAY.

and cast iron, to fortify it against the rough handling which careless coal deliverers are apt to show when filling a cellar with coal. The door has a self-locking device to enable the coal man to close and lock it before leaving the premises. It can be unlocked easily from the inside, but from the outside it would be an impossibility. The adjustable hopper is so arranged that it will receive all the fuel either from basket or shovel, and will

FIG. 2.—THE NEW WAY.

avoid scattering of coal upon the ground. The hopper can also be swung into the chute to allow the door to close flush with the wall, presenting a compact and neat appearance. When the chute is open, ready to receive the fuel, the door swings upward and is automatically locked, thereby protecting the siding above the opening.

SNAP HOSE COUPLING.

Nelson & Morrison Co., Box 57, Boulder, Colo., are introducing the Snap Hose Coupling illustrated herewith. It is made of brass in two parts: No 1, on which are the locking dogs and

snap, and No. 2, having a cone shaped head. No. 1 is interiorly threaded with the ordinary hose thread, while No. 2 is made either threaded to screw into the old style coupling, or corrugated to fasten into the end of the hose. In No. 1 is a rubber washer to make a tight joint when the water flows through without pressure, while the harder the pressure is the tighter the joint becomes. When placed between two pieces of hose already fitted with the old style coupling the No. 1 is screwed on the old style male, and No. 2 is screwed into the old style female, where they are permanently left. For use

SNAP HOSE COUPLING.

on a hydrant cock No. 1 is secured on and left there, placing No. 2 on the hydrant end of the hose. When locking the coupling the cone head of No. 2 is dropped into the stationary locking dogs of No. 1 and pulled over until it is caught by the spring dog or snap. Pressing on the back end of the snap releases the parts. The cone head of No. 2 swivels in the locking dogs, which prevents twisting and kinking the hose. The couplers are packed a dozen in a compartment box with display cover.

MAJESTIC ROTARY WASHER

Richmond Cedar Works, Richmond, Va., are the manufacturers of the Majestic Rotary Washer shown in the accompanying illustration. The tub is made of seasoned Virginia white cedar, and has either flat hoops or electric-welded wire hoops, the latter sunk in grooves, which makes it impossible for them to fall off. This washer is fully corrugated on the inside only and the steam cannot escape through the top of the machine.

MAJESTIC ROTARY WASHER.

There is nothing on the inside to catch the clothes, and the most delicate fabric can be washed in the "Majestic" without injury. All castings are aluminum-coated, which gives the machine a very handsome appearance. The ball-bearings and the well balanced fly wheel will almost make it run itself. Every Majestic Washer is fully guaranteed. This machine operates in either direction. This company are also manufacturers of the Electric, Lightning, Rapid and Columbia Washers.

FULL MOUNTED HERCULES SCREW PLATES.

The E. F. Reece Co., Greenfield, Mass., are introducing Full Mounted Screw Plates, as shown in the accompanying illustrations, the distinctive feature of which is that no changing of

FIG. 1. FULL MOUNTED HERCULES SCREW PLATE.

dies is required, as a stock is provided for each die, so that dies are always ready for instant use. The goods are put up in sets or complete assortments, including stocks, dies and taps, as illustrated in Fig. 2. The plates are alluded to as being strongly and substantially constructed, but at the same time

correctly proportioned and not too heavy. In this connection it is pointed out that the stocks are rightly proportioned for all the different sizes which a set is intended to cut. The stocks have knurled handles, to insure a firm hold even when the handles are oily. The stocks contain the Reece adjustable dies, the same as are furnished in the Reece adjustable guide screw

FIG. 2. ASSORTMENT OF HERCULES FULL MOUNTED SCREW PLATES.

plates. The manufacturers explain that one advantage in having more than one die in a stock is that the screw plates can in this way be furnished at a low price, because less labor and material are required in making them, while not reducing the efficiency of the plates. The goods are furnished in four standard assortments and may be obtained with or without the wooden cases.

WRIGLEY'S PATENT FLEXIBLE AUGERS.

Samuel Lewis, 126 Pearl Street, New York, is the sole agent for Wrigley's Patent Flexible Augers, an illustration of which we give herewith. These Augers are sanitary devices for quickly and thoroughly cleaning and removing obstructions from all kinds of sewer pipes, drain pipes, boiler flues, etc., effecting a large saving over present methods, and accomplishing the desired results much more expeditiously, and without the necessity of taking up floors, tearing down walls, digging up lawns, tearing up pavements, etc. Wrigley's Flexible Augers will remove

WRIGLEY'S PATENT FLEXIBLE AUGERS.

obstructions, not only in a sewer, but in other pipes. The makers state that the Auger will go completely through any kind of closet. It will also clean and remove obstructions from all kinds of pipes leading from sinks, wash bowls, bath tubs, etc. For sewer pipes, boiler flues, etc., they supply the Wrigley Flexible Auger working on reels and carrying any length and size of coil wire desired, with necessary parts for use in different pipes.

THE CLAUSS AUTOMATIC STROPPER.

The Clauss Shear Co., Fremont, Ohio, are introducing to

FIG. 1.—CLAUSS AUTOMATIC STROPPER.

the trade the Clauss Automatic Strop, an illustration of which we give herewith. This Stropping machine will put an

edge on any razor that will make the operation of shaving enjoyable, because the razor will have a smooth, keen edge which will remove the beard without roughing the skin. Anyone, no matter whether he knows how to strop a razor or not, can do so on this Automatic machine. This Stropper is guaranteed by the company to strop any razor, no matter how dull, provided it was originally properly honed. It will last a lifetime with

FIG. 2.—CLAUSS AUTOMATIC STROPPER. AUTOMATIC STROPPER.

ordinary care. As this stropping machine will strop a razor very quickly, caution should be used so as not to over-strop the razor. It is better to strop moderately, and if it is not stropped sufficiently to strop again, than to over-strop it, because over-stropping will produce a wire edge, and it will then be necessary to run the edge of the razor gently over a piece of wood to remove the wire edge and then put the razor in the machine to be stropped again.

SAVAGE ENGLISH MODEL SINGLE SHOT RIFLE.

In the early part of the season, the Savage Arms Company placed on the market the Target Model shown in the above cut, fitted with an English pattern stock, to suit the English market. They report that this rifle has not only proved to be as popular as they anticipated in England and other foreign markets, but also has met with a splendid sale in this country. It can be furnished with two different styles of sights. The one

SAVAGE ENGLISH MODEL SINGLE SHOT RIFLE.

as the Style "C." listing at \$6.50. They also can be fitted with the Ivory Head Front Sight, listing at \$7.50, the same as the regular Target rifle. For prices and further information apply to the Savage Arms Company, Utica, N. Y.

"FLEXIBLE FLYER" COASTERS.

1107 Market Street, Philadelphia, Pa., manufacturers of the "Flexible Flyer" Coasters, in order to help the circulation of 25,000,000 copies. The "Flexible Flyer" is made of the finest steel and is equipped with steel supports, straight

grained hardwood frame and seat. It is light, yet practically indestructible, and handsomely finished. It is claimed to be lighter and at the same time much stronger than ordinary sleds, and the strictly parallel runners make it easier to pull and faster in coasting.

The runners of the "Flexible Flyer" are of T shaped spring steel, very strong and rigid vertically, but free to bend sidewise. They are absolutely true and stay so, making it slide very easily while walking up hill or pulling on level ground. But when it is desired to steer on the hill, a touch on the crossbar curves both runners, the whole runner going in its own track, without plowing the snow, without dragging the foot. The sled—unhampered—shoots on at full speed, a sure winner. It is fast—it is not only a sure winner for speed, but also for distance. We give an illustration of the "Flexible Flyer" No. 6, which carries six grown persons, and is one of their most popular sleds.

"WATROUS" AUTOMATIC DOOR CATCH.

Is made by the E. L. Watrous Mfg. Co., Des Moines, Iowa. It is used on screen doors, storm doors, office gates, etc. Any one can put it on in two minutes. It is claimed to be the neatest,

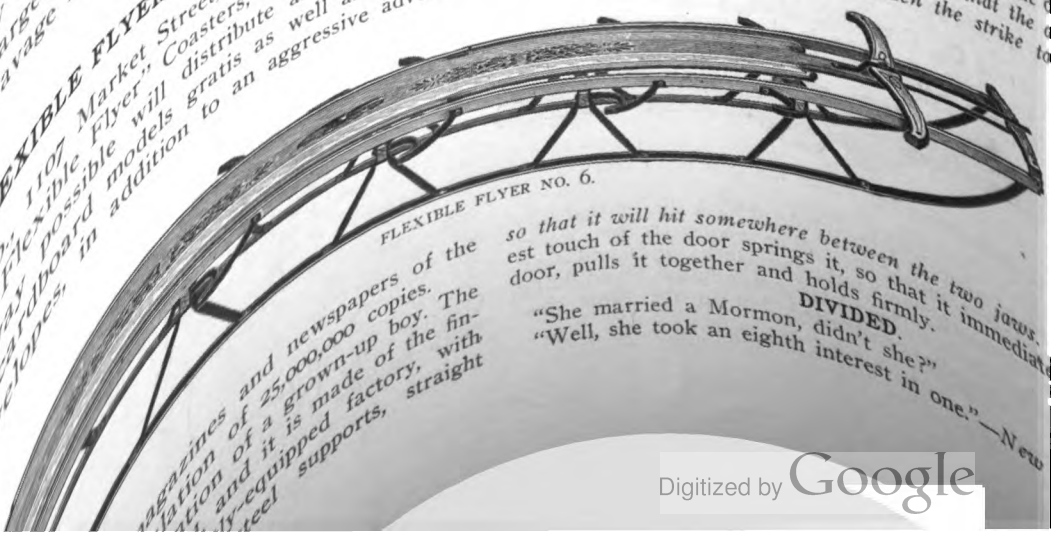

OPEN.

cheapest, and quickest acting door catch on the market. It needs no templet. It has the lightest trip and strongest hold. The "Watrous" holds the door tightly shut and prevents it from sagging open at the top or when standing ajar. It will work on the top or side of a door. On left hand door the cam should

CLOSED.

be uppermost. On a right hand door it should point downward. All that is necessary to do is to place it so that the outer edge is flush with the door jamb, and attach the strike to the door

FLEXIBLE FLYER NO. 6.

so that it will hit somewhere between the two jaws. est touch of the door springs it, so that it immediately door, pulls it together and holds firmly.

"She married a Mormon, didn't she?"
"Well, she took an eighth interest in one."—New York

OUR BRITISH LETTER.

London, July 10, 1906.

THE VISIT OF AMERICAN ENGINEERS.

The Iron and Steel Institute, whose membership includes representatives of all the iron and steel making industries in the world, will hold a joint meeting with the American Institute of Mining Engineers, in London, on July 24, 25, 26. The Lord Mayor of London has consented to act as chairman of the London Reception Committee, and an interesting round of visits and engagements has been planned. The general meeting of the Institute will be held at the Institution of Civil Engineers, Westminster, when the American Engineers will be welcomed by the President, R. A. Hadfield, of Sheffield, and addresses will be delivered by Sir James Kitson, Bart., M. P. and others. In the evening of the same day, the Lord Mayor and Lady Mayoress will give a reception at the Mansion House, the official residence of London's Chief Magistrate. On Wednesday, the 25th inst., the general meeting of the American Institute will be held, under the presidency of Robert W. Hunt, of Chicago, and on the following day a joint meeting of the two Institutes will take place. The works of J. I. Thornycroft & Co., Ltd., at Chiswick, makers of motor traction vehicles, etc.; J. & E. Hall, Ltd., at Dartford, makers of refrigerating machinery for blast furnaces, and Fraser & Chalmers, Ltd., at Erith, makers of mining machinery, will be inspected. The hall of the Worshipful Company of Ironmongers, erected in 1745, on the site of a still older hall, will be thrown open to the visitors, and arrangements have been made by which a number of places of interest in the city may be inspected. His Majesty the King has granted facilities for visiting Windsor Castle, and has graciously consented to receive a deputation of the Institute's American guests during the meeting. The banquet in the Guild Hall of the city of London will form a fitting termination of the joint meetings.

The week following, a programme full of interest has been mapped out for the American visitors by the Iron and Steel Institute. A journey of 188 miles by railway express will bring the guests to the ancient city of York, where objects of antiquarian interest, including the mediaeval bars and walls, which still encircle the greater part of the city, and the ancient Norman Castle, will be inspected. Leaving York, Middlesbrough, Durham and Newcastle-on-Tyne, will form convenient stopping places; the party will also visit Fountains Abbey, one of the finest ecclesiastical ruins in England. On August 2, the party will proceed to Glasgow, where arrangements have been made by the committee of the West of Scotland Iron and Steel Institute. They will be entertained by the Lord Provost and Corporation of Glasgow in the City Chambers, and on August 4, leave by special train for Edinburgh, where an inspection of Holyrood Palace and Edinburgh Castle will bring the tour to a conclusion. As the Cardiff meeting of the Institution of Mechanical Engineers is being held in that city from July 30 to August 3, doubtless some of the American visitors will avail themselves of the invitation and welcome offered them by the chief city in South Wales, around which so much interest in connection with the tin plate works of the Principality is centred. It is well within the memory of the members of the English Institute how lavishly they were entertained in America, when Andrew Carnegie was president some few years ago, and doubtless Mr. Hadfield, the president this year, will do his utmost, backed up by an influential committee, to accord the same hearty welcome to American engineers and iron masters.

THE ROYAL SHOW.

The principal event during the past month connected with the Agricultural Implement business, in which ironmongers are interested, has been the show held at Derby, under the auspices of the Royal Agricultural Society of England. It was a very successful event, countenanced by His Majesty the King, who was present, together with a large number of influential estate owners and agriculturists. As doubtless your readers may be aware, the Royal Show this year is a return to the old order of things. For the last three years this important annual exhibition has been held in the vicinity of London, but it has proved a mistake, inasmuch as the inhabitants of this large overgrown city, do not enter into the occupations of rural districts, and have failed to patronize the show sufficiently to warrant the R. A. S. E. continuing it annually in London, as, of course, in addition to bringing under the notice of agriculturists, all the latest and best inventions and machines whereby agriculture can best be carried on, the Society is dependent to some extent upon

the public interest and a "good gate." The show at Derby has fully come up to their expectations, and has once more shown that the Agricultural Shows held from time to time in the leading districts of the Provinces are best calculated to benefit agricultural interests, and indirectly to prove of greater benefit to makers of implements and machines. The show of implements was well up to the standard, and contained a number of important stands of American harvesting machinery, all the leading makers who have branches in this country being well represented. The great popularity of American harvesting machinery, owing to the excellent quality of reapers, binders and mowers, which although light in make, are exceedingly strong, their quality undoubted, and manufactured on such a large scale the makers are enabled to accurately gauge their work, and produce machines with absolutely interchangeable parts; consequently dealers are well satisfied with the facilities offered them for repairing and replacing injured parts, such injuries and breakdowns unfortunately occurring at the most critical time.

The exhibition of gas plant, and the trials which have recently taken place of suction gas engines have been watched with interest by agriculturists, who recognize that the introduction of this type of engine, must tend to revolutionize operations, as they will provide farmers and others with independent plants, in short, small gas works, each one an independent and yet complete installation, providing mechanical power on economical lines; so that machines may be worked, and mechanical power introduced into almost every branch of agricultural work, at the lowest possible cost. Everything which tends to improve the work accomplished and to save manual labor, is a step in the right direction, as the one great thing which British agriculturists have to contend with is the cost of their produce, oftentimes quite out of proportion to the extent of the land farmed, and the amount of produce reaped, rendering it difficult to compete with foreign markets where crops are grown on a much larger scale. Shipping facilities enable foreign producers to reach British markets, oftentimes at a lower cost than British farmers only a few miles away. The extended use of motor traction and road locomotives, whereby produce may be placed quickly and cheaply in the larger towns for sale, has done much to improve the conditions of British agricultural trading during the last few years. Modern improvements shown at Derby were inspected with interest; the progress in agricultural appliances, when compared with similar exhibitions only a few years ago, render such shows attractive, and make it imperative that all interested both in the use and sale of farm requisites, should lose no opportunity of visiting these great gatherings, as they from time to time are fixed in the more important centres in Great Britain.

INTERNATIONAL AND EMPIRE TRADE.

The Sixth Congress of the Chambers of Commerce of the Empire has just been held in London, under the presidency of the Earl of Elgin, the Secretary of State for the Colonies. The gathering was a very important one, and representatives from all parts of the Empire were present. Chief centres of commerce were well represented, and buyers of all classes of goods, including Hardware and machinery, discussed matters connected with the furtherance of the commerce of the Empire, and especially of the relations between the Mother country and her colonies. Commercial matters connected with international commerce were also under discussion. The improvement of the Consular Service was a matter commented upon, it being notorious that the United States and some other countries have energetic Consuls watching the interest of their representative countries very closely, and keenly competing with home markets in different parts of the British Empire.

BUSINESS AND PLEASURE COMBINED.

In my last letter I gave you a full report of the doings of the Ironmongers' Federated Association Conference, recently held in London, and mentioned the different social functions in connection with that event. The Institute of Heating and Ventilating Engineers recently held their meetings at Bath. Several other important trade communities have also indulged in many social functions during the last few months. This tendency to mix pleasure with business has been commented upon by many of the sterner and older types of business men, who have been brought up to regard business as something entirely apart from pleasure, and to look upon the chief occupation of their lives as somewhat dull and monotonous rounds of work and duty, in-

THE WOMEN ARE CRAZY

to get those perfect-cutting **Screwless Springset Shears**. "Perfectly lovely!" "Just splendid!" they exclaim when they take the shear in hand and feel the easy, smooth, velvet-like action.

To a hard-headed hardware man, such enthusiastic expressions may appear unnecessary; but men do not realize how much discomfort women have had to put up with in cutting with the old hand-cramping, screw-connected shear. And no hardware dealer can afford to disappoint his fair customers in a matter so important to them.

Give them **SCREWLESS SPRINGSET SHEARS**, or they will get them elsewhere; for they **WILL** have them.

The cause is plain to see: Perfect spring tension; cuts entire length of blade; roller bearing.

MR. DEALER: Just a hint: Get a pair for your wife or daughter; your next move will be to order a gross for the other men's wives and daughters.

Send for price list and descriptive folder.

DAVIES AUTOMATIC SHEAR CO.,
41-43 Maiden Lane, - - NEW YORK

to which none of the lighter and brighter sides of life should enter. The tendency of the present day appears to be to change all these somewhat antiquated ideas, and to introduce as far as possible, social pleasures, excursions, and visits of inspection to various places of interest and trade gatherings which are now growing so common.

As trade unions have become a necessity to the workingman, so associations and federations appear to have become necessary to successful trading. The isolation of the past is now regarded as an impossible condition of present-day trading, and retailers as well as manufacturers, find that they can only progress in their business careers by becoming attached to some one or more of the associations and institutions which have been formed during recent years for the betterment of trade. The great stores formed on similar lines to the large stores so long associated with the American ideas of trading, are becoming firmly established in this country, and their continued march of progress is being viewed with alarm by British retailers. The large capital employed by many of these trading concerns, place them quite outside of the ordinary lines of retail trading, and enable them not only to buy in the best markets by placing exceptionally large orders, but also to employ competent hands in every department; in fact, taking ironmongery alone, it is well-known that the leading storekeepers, many of whom were originally drapers and grocers, now employ as heads of their Hardware departments, some of the most competent ironmongers this country possesses. Backed by capital and large buying powers, it is easily understood that the small retail trader, unless in combination, is utterly powerless against such opposition.

The Ironmongers' Federated Association is steadily growing, and developing its work. At the present time its energies are devoted towards the completion of the incorporation scheme, and very shortly, that will become an accomplished fact. There are many advantages to be gained by obtaining a charter of incorporation, and when that charter has been procured, the association will become a corporate body with power to act on behalf of its members—its representatives will have an acknowledged status, and its acts and doings will have greater and more far-reaching results than at present. In addition to the opposition met with by the great storekeepers, there is a tendency

in London and other large cities for large individual traders to become complete in their organizations, and by the extent of their stocks to swallow up small businesses in their vicinity, to carry their trading connections into every part of the country, and so lessen the chances of small dealers securing important orders. The remarkable success which has attended the business founded by Waring and Gillow, Ltd., in London, during the ten years it has been running, has recently culminated in the building of an immense erection, stored from top to bottom with an exceptional stock of household furniture and household ironmongery. As an example of complete house furnishers, it would indeed be difficult to find one better worthy to be taken as typical of the larger development of modern house-furnishing than this well-known firm. The opening of their new premises has just been celebrated with unusual splendor, and the public have crowded in large numbers to inspect this latest wonder in retail trading. So great is the renown they have won, that Her Majesty the Queen and the Princess of Wales were among those who inspected the premises and stocks during the opening week.

PANTS.

Pants were made for men and not for women. Women were made for man and not for pants. When a man pants for a woman and a woman pants for a man—these, my friends, are a pair of pants, but these pants do not last. To make pants last, make the coat first.

Pants are like molasses, because they are thinner in hot weather and thicker in cold weather. A fat man cannot keep up his pants in hot weather without suspenders, but a dog can. Men sometimes make mistakes in pants, and these mistakes are called breeches of promise.

There has been much discussion, my friend, as to whether pants is plural or singular. Now in my mind, when a man wears pants, they are plural, but when he does not, it is singular.

EITHER WAY.

"Marie, if James asks you to marry him to-night, tell him to speak to me."

"And, if he doesn't, mamma?"

"Then, tell him that I want to speak to him."

REVIEW OF THE MARKETS.

WIRE NAILS: Prices generally are firmer, and a heavy demand exists, owing to the excellent business conditions, as well as the closing down of some of the mills, and the diminished output of others. Stocks are not accumulating, and the production is being kept as close as possible to the demand. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|--|--------|
| Carloads to jobbers | \$1.85 |
| Carload lots to retail merchants | 1.90 |

New York.—Small lots from store are still in fair demand for immediate wants. Quotations for small lots from store are on the basis of \$2.10 per keg.

CUT NAILS: There is an increased firmness noticeable, owing to the high prices of steel and the scarcity of same, and to the shutting down of the mills for the annual inventory and repairs. Official quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—The local demand is moderate in its proportions. Quotations for small lots from store are on the basis of \$2 per keg.

BARB WIRE: Most of the demand is from the railroads and is fair in volume. From other sources the demand is light. Concessions of 5 cents per 100 pounds from regular quotations are sometimes reported. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | | |
|--|--------|--------|
| Jobbers, carload lots | \$2.00 | \$2.30 |
| Retailers, carload lots | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: Liberal contracts are being placed for Wire by the fence manufacturers, exceeding in volume the orders given at this time last year. Prices are firmer, as some of the mills are closed down, and steel is higher in price. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

ROPE: There is a fair demand for the season. Prices for Hemp remain the same, as are also those for Rope. Quotations are as follows:

Cents Per Pound.

| | |
|------------------------------------|-----|
| Pure Manila, 7-16 and larger..... | 12½ |
| B Quality Manila | 11½ |
| Pure Sisal, 7-16 and larger | 9 |
| No. 2 Sisal, 7-16 and larger | 7¾ |

BALE TIES: There is a shortage of Bale Ties noticeable, and the American Steel & Wire Co. find themselves from 30 to 60 days behind on deliveries. There has been a short hay crop in many districts, so that the farmers have found it very profitable to bale their product for shipment into the districts where the shortage exists, hence the increased consumption of ties.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

| | |
|-------------------------------------|----------------------|
| In lots of less than 5 barrels..... | 39 cents per gallon. |
| In lots of 5 barrels or more..... | 38 cents per gallon. |

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

| | |
|---|----------------------|
| Doubled Boiled Linseed Oil, 2 cents per gallon higher than raw. | |
| Regular Boiled Linseed Oil, 1 cent per gallon higher than raw. | |
| Calcutta Oil..... | 68 cents per gallon. |

THE CLEVELAND TRADE.

Few changes have come in trade conditions since our last report. There is no reason for other than bright anticipations for the future. The attacks upon trusts may affect the stock trusts themselves. The railroads will be benefited by being re-market, but in the end will prove a benefit to business and the

believed from rebating, which was a serious evil to their stockholders and to legitimate business. It is a great relief to feel that such competition is no longer a menace. Legislation enforcing a fair deal by the public utilities, cultivates patriotism and encourages energy and activity in business. The business of transportation lines will be increased with an increased demand for labor. The legislative control of transportation lines will mark an epoch, and prove a blessing if the law is enforced, and the public authorities are giving evidence that it will be. Combinations of labor are more likely to interfere with prosperity than any other combination, injuring themselves most of all. There is an increase of activity and capital investment among the independent oil men. The anticipation of a fair deal greatly encourages them. In the steel, coal and ice trade the same feeling prevails.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

With the exception of a little lull over the Fourth, the demand for goods has continued with very little falling off. Seasonable goods are still moving out in fair quantities, although, of course, the time for the sale of most of these items is drawing to a close. We find that our policy of keeping complete stocks of all the seasonable lines up until the very end of the season is appreciated by the trade, as it enables our customers to make many late sales which they would miss if unable to get the goods promptly. The quantity of seasonable goods which has been sold this year is very large—a good indication of the prosperous condition of trade in this section.

July first brought notices of a number of advances in price—particularly in the line of tools. Other advances are in prospect but are likely to be moderate and such as are fully justified by the heavy demand and the increase in cost of production. Taking into account the upward tendency of the market and the fact that many manufacturers are considerably behind in deliveries, it would seem to be a wise policy for retailers to provide for their Fall wants without delay and to specify early deliveries. This is advisable both in order to avoid having to pay higher prices than present quotations and to have the goods on hand promptly at the opening of the season—an important matter during busy times like these.

Locally, the prospects are for a busy Summer and Fall season. We are advised that the trouble with the coal miners in the central part of this State has been adjusted and that work will be resumed at once. In some parts of the Ohio territory the miners are still idle and the carpenters' strike still continues, but these exceptions to the generally busy condition of all industries in this section are not of sufficient importance to greatly affect general trade. Sales for the present month to date show a very satisfactory increase over the corresponding period of last year.

The vacation season is here and the volume of business coming in gives the lessened working force plenty to do. Most of the retailers in this vicinity make August their vacation month, but we have already had a number of calls from customers who stop off in Pittsburgh on their way to or from the various summer resorts.

THE DAVENPORT TRADE.

Vacation season is on and consequently business is more or less off. The city council forbade shooting blank cartridges on the Fourth, hence we have to carry them over and the kids are allowed to carry their fingers and scarless faces for at least another year. Our city is growing. The Tri-City is growing. Merchants and manufacturers are prosperous and the people are contented and happy. One of our factories has just accepted a single order for \$700,000 worth of goods. Our Commercial Club has their new and elegant club house enclosed and will soon occupy it as their permanent home. The club has also been fortunate in securing the services of Charles A. Steele, as commissioner, who is doing a great work in bringing the buyer and seller in closer relations to each other. He is also locating and encouraging new manufacturing enterprises here, changing and improving the transportation service and advertising this locality generally. The new and elaborate hotel building is progressing nicely and when completed and opened will greatly increase our hotel accommodations, which have not been ample for some time. It is rumored that there will soon be a new savings bank established here.

Providence, R. I.

THE CHICAGO TRADE.

From personal observation we have reason to believe that the crops throughout the Northwest are to be abundant. Prices are certainly good for grain, cattle, hogs and sheep. The purchasing power of the farmer was never greater. Through the farmer comes a demand for most everything kept in stock by a retail Hardware merchant. We argue from the above that the Fall trade is sure to be very promising to the Hardware jobbers who are so fortunate as to be located in this great Mississippi Valley. Already many orders for future delivery are in our hands, and our road salesmen are taking orders for future delivery in quantities larger than usual.

The recent agitation on the question of "special brands" has left the matter unsettled. There are instances where an article of a "special jobbers' brand" has been tried and found to give as good satisfaction, at less money, than a "manufacturer's brand" of a similar kind. A salesman that is loyal to a jobbing house becomes accustomed to sounding the praises of a certain line of goods, the sale of which his house controls, and he prefers to keep on disposing of an article that is an easy seller, and that he can, to a great extent, control in his territory. Now, if the jobber prefers to keep his "private brands" and the customers are satisfied with them, and the salesmen prefer to offer them, it would seem as though the question would take care of itself.

WELLS & NELLEGAR CO.

THE SAN FRANCISCO TRADE.

It does not require a very profound commercial education to perceive that if the West gets a large crop of wheat and corn, the Northwest a large crop of wheat, the South a large yield of cotton and the Pacific slope liberal harvests of grain, fruits, hops and wool, that another year of prosperity is assured the United States. Such is the status today, and San Francisco, now in a mighty hurry to get her fallen buildings up, is highly pleased that all these crops are keeping the factory wheels of the great Atlantic cities revolving and labor fully employed producing what it wants for rehabilitation.

In a recent talk with Mr. Maxwell, head of the few large Hardware stores in Oakland, the trend of his talk carried with it memories of San Francisco's great set-back, for he dwelt on the enormous trade his house has had in mechanics' tools and brick-masons' and stonecutters' implements of trade and staple building Hardware. He had a large stock on hand at the time of San Francisco's disaster, but it was carried away by purchasers post-haste. He not only sold clean out before his wired order east could be delivered, but cleaned out liberal supplies obtained from Los Angeles, Portland, Tacoma and Seattle, and even to this day there is no let-up in the demand of carpenters and jack-of-all-trades who can use a saw, a plane or an adz, for there is work in San Francisco not only for skilled artisans, but undergraduates in the trade as well.

Andrew Carnegie of the Dunham, Carrigan & Hayden Co. and Charles Holbrook of Holbrook, Merrill & Stetson are members of a body of prominent San Franciscans representing the Merchants' Association, the Chamber of Commerce, the Merchants' Exchange, the San Francisco Board of Trade and the Manufacturers' and Producers' Association of California. They have accepted this appointment as trustees for the great combination of the commercial holders of fire insurance policy-holders that will strive to defend the rights of San Francisco businessmen whose losses by the recent fire represent more than \$100,000,000. It is well known that a large majority of insurance companies who met with losses by the fire are holding off in payments to policy-holders for a compromise of their indebtedness, principally on the plea that the earthquake broke the water mains and the fire engines could get no water to fight the fire. It is a mighty interesting matter in San Francisco, this insurance trouble; so much so, indeed, that the last week's meeting of the San Francisco Retail Hardware Dealers' Association did what hundreds of other city associations have done, unanimously, resolved that members of the associations would in the future place no insurance with companies settling recent fire losses on less than the "dollar" basis.

In addition to locations heretofore given of Hardware firms revised since the earthquake-fire, there may now be added as follows:

L. H. Kohn, formerly at Polk and Sacramento streets, has purchased a store at 350 Devisadero street and located there.

The San Francisco Hardware Company, now temporarily at 3408 Mission street, will move in a week or two to its permanent location, 16th and Mission streets.

The Mechanics' Hardware Company is the name of a newly established Hardware store at Polk and Fulton streets. Gallagher & Mattlingly are the proprietors.

The Holt Bros. Hardware Company are at Fifth and Clementia streets.

The Williams Hardware & Stove Co. is the name of a new Hardware store in Market street, near Van Ness avenue.

Baker & Hamilton have moved to Third and Berry street, where they will remain until their permanent store is erected.

Chas. M. Sage, until recently of the Basche-Sage Hardware Co. of Baker City, Oregon, has established a Hardware store at 1462 Market street. The trade title is Sage Hardware Company. A. R. Bodmer, for many years with the Baker City firm, has taken the management of this new San Francisco store. Also, the sign of the Sage Hardware Company will this week be stretched across the front of a second store to open at 2024 Fillmore street.

Russell & Erwin Mfg. Co., of New Britain, Conn., has established a permanent headquarters in the Monadnock building.

Fred P. Winchester, representing eastern manufacturers, is now located at 486 Tenth street, Oakland.

INDUSTRIAL PRESS ASSOCIATION.

THE MINNEAPOLIS TRADE.

It all depends upon the crops, and as a whole they never looked better. This is about all there is to it.

The above applies to the future. As to the present, there is a large volume of business locally, but there has not been such sharp competition and absence of profits among the retail trade for the past four years as at present. Throat cutting going on as never before, with no immediate prospects of improvement. One hundred thousand dollars at least loss of profit to the retail dealers of Minneapolis alone this year, and it could all be settled in an hour if half a dozen people would get together and each one give and take a little. We know this can be done, because it has been done, but at present it seems impossible.

W. K. MORISON & Co.

"THE ELEVENTH HOUR."

"Procrastination is the thief of time" and a whole lot of other things. Sometimes a Hardware dealer procrastinates in doing the right thing at the right time because hot Summer days affect his alertness; some forget; some others fail to see opportunities from force of habit. How is it with you, Mr. Dealer?

Do you remember your experience of last Fall and Winter, when you were caught without preparation at the very time when your customers wanted parlor heaters, or cooking stoves, or some other kind of heating apparatus or stove accessories, and they all found you "napping?" They were ready to buy, but you were not ready to sell, because you thought there was "lots of time."

To prevent a like experience this year, order your stoves now. The manufacturers' warehouses may be filled to satisfy the demands of their trade, but you had better complete arrangements for early shipment now, rather than leave it until "the eleventh

hour" and then be delayed. Manufacturers of stoves may have the very best possible facilities for shipping, but let there be a number of dealers who delay ordering or "forget," or think there is "lots of time," and delay in filling these orders will be inevitable. Such delay causes inconvenience or annoyance, to the manufacturer, to you, to your customer and you may lose the latter. Why, then take chances with "the eleventh hour"-way-of-doing-business? You can't afford it. Order your stoves now.

YES, DO!

The Bride—Let's act so that no one will know we have just been married.

The Groom—All right. Then you carry the suit case.

SURPRISING.

Evelyn—Yes, my great-grandmother eloped with my great-grandfather.

Cholly—Just fancy! Old people like that!

+

A small boy rushed up to a doctor's office and shouted, "Say, I want the doctor to come to our house right away." "Who are you?" asked the doctor. "Gee, don't you know me? Why we deal with you regular; we had a baby from here last week."

Look

each ad in the face. It is a salesman. If you doubt his words, write to the firm he represents. If you believe him—write anyway.
Always Mention "HARDWARE" for having "put you wise."

There's a Vast Difference

Between the qualities of 3 in One and its "substitutes." No matter how strongly you recommend it, its qualities will back you up—they won't make a liar of you.

3 in One

is not a dust collector. Does not stay on your shelves. Sells quickly and stays sold. Invariably one pleased customer begets you others.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED JULY 2, 1906.

- 406,022. STOVE PIPE DAMPER. C. D. Bosworth and J. F. Foster, Buffalo, N. Y.
 406,025. DOOR SPRING. E. A. Calahan, Brooklyn, N. Y.
 406,177. PIPE WRENCH. M. W. Morehouse and N. S. Kellogg, Brooklyn, N. Y.
 406,410. MOP GRIP. J. H. Ware, Eureka, Cal.

PATENTS ISSUED JULY 3, 1906.

- 824,707. WINDOW SHADE FIXTURE. J. F. Cannon and M. N. Cannon, Erick, Okla.
 824,785. SAW GAGE. A. H. Hall, Adrian, Mich.
 824,836. PIPE WRENCH. H. S. West, Chicago, Ill.
 824,862. HOE. H. R. Hilton, Port Alleghany, Pa.
 824,954. PLANE. J. H. Shaw, New Haven, Conn.
 824,963. PAWL AND RATCHET MECHANISM. W. Trehwella, Trentham, Victoria, Australia.
 824,984. DOOR LOCK. M. A. Fillamore, Blaine, Wash.
 825,016. SAW GUIDE. I. N. Welch and J. J. Roberts, Loyal, Wis.
 825,063. TOOL HANDLE. C. C. Lawbaugh, Woodward, Iowa.

PATENTS EXPIRED JULY 9, 1906.

- 406,433. ATTACHMENT FOR LAWN MOWERS. F. A. DeLand, Memphis, Tenn.
 406,459. PERMUTATION LOCK. S. C. Munro, London, England.
 406,487. LOCK. W. H. Taylor, Stamford, Conn.
 406,509. DOOR CHECK. W. H. Fouts, Keokuk, Iowa.
 406,524. PRUNING SHEARS AND FRUIT PICKER. B. Jennings, San Jose, Cal.
 406,621. DOOR CHECK. E. I. Blount, Cambridge, Mass.
 406,648. LATCH. J. Hope, Jr., Providence, R. I.
 406,774. GAUGE FOR SAWS. H. Saunders, Perry, Mo.

PATENTS ISSUED JULY 10, 1906.

- 825,306. SHADE AND CURTAIN FIXTURE. W. Felger, West Unity, Ohio.
 825,401. WRENCH. J. Merchens, Chicago, Ill.
 825,473. LAWN MOWER. A. C. Melton, Sedalia, Mo.
 825,479. AUGER BIT. J. T. Parker, Hattiesburg, Miss.
 825,517. SCREW DRIVER. M. J. Cowgill, Victor, Colo.
 825,525. WRENCH. G. E. Dornon, Willowgrove, W. Va.
 825,560. HAMMER. J. H. Smith, Salisbury Mills, N. Y.
 825,620. MOP WRINGER. M. Timothy, Davenport, Iowa.
 825,720. WRENCH. J. C. Hackett, St. Louis, Mo.

NEXT STEP UP.

Do you seek responsibility? Do you know something of all departments? Are you ready to take the next man's place?

It was Frederick P. Olcott, the former head of the Central Trust Co., who advanced this as a rule of success to be most strongly emphasized. "The reason," says he, "that so many bright young men remain clerks all their lives is that they are content to just do their duty and let it go at that. The man who is determined to get on must be ready always to take the place of the man next above him. He must watch the work of his immediate superiors in order that when a vacancy arises he may be able to step in and do the work at once. Too many fellows close their desks as soon as 3 o'clock comes and scoot away to play billiards uptown. The honestly ambitious young man will not be in a hurry to get away, but will find out if some other fellow needs a bit of help, and will stay awhile to give it. By doing so he is not only earning the friendship of the other man, but is learning for himself. That illustrates the chief trouble with labor unions to-day; they stipulate that each man shall do a certain amount of work and will not let him do any more; the consequence is that they make the poorest labor the standard, and prevent individuals who have ability from rising."

A question asked not long ago of James J. Hill brought out an answer along the same line: "Do you believe in a man curtailing his business endeavors and giving up part of his time to relaxation and exercise?"

"Perhaps I believe in it," answered Mr. Hill, "but I do not believe the average young man can afford it, unless he has been so fortunate as to get into business for himself and be his own boss, when he can take days off without interfering with his

business success. When it does arrive, it is apt to be the case that he is too busy with his own affairs to give himself a half holiday.

"The young man who is fortunate enough to be his own boss has only reached that condition by sticking faithfully and conscientiously to his work. If he achieves success he achieves it because he knows what he is doing, because he has been prepared, because he is ready.

"He certainly can not make a business success by going at it blindly. If a man is going to fire off a gun and wants to hit anything he is sure to keep his eye on the gun barrel. He must squint along the hind sight and the front sight."

In the early days when Vreeland first worked for the Long Island Railroad Company he was considered "dead easy," because he could be gotten at any time to help any other man out with his job.

His first work was shoveling gravel on one of the night construction trains. He was even then enthusiastic at being a railroad man with all the term implied, and there was no railroad work that he saw done that he did not observe intently. Soon after he was given the opportunity of inspecting ties at a dollar a day, and while doing this he made himself familiar with the duties of a switchman. "Although the position was humble enough," he says, "I felt that I was well on the road to being president."

"One day the superintendent asked my boss if he could give him a reliable man to replace a switchman who had just made a blunder leading to a collision, and had been discharged. The reply was, 'Well, I've got a man named Vreeland here who will do exactly what you tell him to!'"

He was called in to report and asked a few sharp, short questions from the trainmaster. He wasn't given any time to post himself before going, but he had time to use to good advantage the information he had been picking up along the road. He was given the place and went down to the dreary and desolate marsh where he had to camp out at the switch. A little later the officers furnished him with the luxury of a two by four flag-house, and he settled down to work, in the meantime looking about to see how he could learn a little more railroading.

"The Brunswick station was not far away," he says, "and one of the company's division headquarters was there. I soon got into the good graces of all the officials around the station by offering to help them out with their clerical work at any and all times when I was off duty. It was a godsend to them, and exactly what I wanted, for I had determined to get into the inside of the railroad business from one end to the other. Many is the time I have worked until 12 or 1 o'clock in that little station, figuring out train receipts and expenses, engine cost and duty and freight and passenger statistics of all kinds. As a result of this work I quickly acquired a grasp of the details of railroad work in all its stages."

The next step in his career did not suit Vreeland at all, as his switch was a temporary one, and he was discharged. But what he learned in the offices came in later, and his next rise was accomplished by his old trick of having his eye on the job ahead of him.

While at this he learned something about another branch of work from a brakeman, and soon after was put on as one. From here he was jumped over the heads of older brakemen, and told to take out a train one morning when the conductor was off.

Soon after the road changed hands, and he was detailed to take out a train which was to convey the officers of the road. On the trip he was the only one who could answer questions that were asked, and when the knowledge he had picked up at the station came in he was retained with the new company in a position which was close to headquarters.—Ex.

IMPRESSION OF A CONGRESSMAN.

His life is rosy, without doubt,

His sorrows are but few.

With lots of things to talk about

And nothing mush to do.

Washington Star.

GENERALLY ADMITTED.

Whate'er may be said of a sweetheart—

"Too giddy," "too old" or "too new"—

There's one point that admits of no question—

She can't be "too good to be true."

THE LONG AND SHORT OF IT.

I long to catch some rich girl's eye

Whom I may court.

I would not long so much if I

Were not so short.

—*Brooklyn Life.*

BEFORE THE DAYS OF CLOCKS.

Curious it seems to find some of the most ancient and primitive contrivances for keeping time still in use in these modern days. In many churches as well as in monasteries and convents the graduated candles whose invention is popularly attributed, though doubtless mistakenly, to King Alfred are even now employed for reckoning the duration of prayers; and the same may be said of sand glasses, which, for the matter of that, are preferred by not a few twentieth century cooks as a convenient substitute for the clock in timing the boiling of eggs. As for the sun dial, it is probable that no timekeeping invention dates back to so early an epoch. It was well known to the people of Babylon, from which great metropolis of the East the first instrument of the kind was brought to Jerusalem about 700 B. C.

It happens that many ancient sand glasses have been collected by the Smithsonian Institution in Washington, some of them dating far back in the Middle Ages, and the scientists of that establishment, thinking it worth while to test them, have discovered that they are very inaccurate, some of them varying from correctness by as much as seven or eight minutes in the hour, one way or the other. The obvious, though rather curious, explanation of this fact seems to be that when they were made they were timed by the candle, clocks not having been as yet invented and no better standard being obtainable. Such candles, like any others, were sure to burn more slowly at the beginning than later on, hence their lack of reliability.

Candles of this sort were shielded from the wind by a screen of horn, and at this very day one may buy them, exactly like those of long ago, in England and elsewhere in Europe. Curiously enough, the savages of the South Pacific employ for the same purpose a device very similar in character, which consists of a number of the oily nuts of the candlenut tree strung close together on the midrib of a palm leaf. The string thus prepared is hung up, and, the topmost nut being ignited, it burns slowly downward. Being of nearly uniform size, the nuts burn for just about ten minutes apiece, taking fire one from another in succession, and thus six of them are consumed in just about an hour. It is probable that this primitive method of time-keeping is quite as accurate as the graduated candle or the mediæval sand-glass.

Some of the old-fashioned sandglasses were quite elaborate, being arranged in batteries of half a dozen or more, to record the passage of an hour, a half hour, a quarter hour, five minutes, and so on. Very expensive ones were manufactured in Nuremberg, and the finest instruments of the kind were owned by clerical and other dignitaries, the sand used for the purpose being of a round-grained sort, which could be counted on to flow easily and with regularity through the aperture provided. To show that faith in the usefulness of such contrivances has not even yet passed away, the writer may mention that in his own family, only the other day, a newly employed cook, being provided with a sand-glass for timing eggs, boiled the glass with the eggs, for no reason that she was able to explain except that she was, as she understood it, "obeyin' orders."

The two oldest things, perhaps, in the collection of ancient time keepers at the Smithsonian Institution are a time lamp and a water clock of a pattern almost unheard of. As might be supposed without explanation the former apparatus contains oil, the burning of which, through the medium of a wick, marks the passage of the hours. The oil, it should be said, is contained in a small glass receptacle, so graduated as to show by the height of the fluid the quantity that has been consumed, and hence the time that has gone by. As for the water clock, some mediæval Edison must have invented it, so wonderful, is the ingenuity of its construction. It consists of a hollow metal cylinder divided into compartments by partitions which radiate from the centre and suspended by two strings wound about the ends of an axis running through the middle of the cylinder.

The cylinder, which is hung by the strings from a sort of arch, is partly filled with water and is wound up to the top of the arch by revolving it upon its axis. Then, being released, it would promptly run to the bottom but for the circumstance that the water it contains, trickling through small holes from one compartment to another, detains it, gravity being opposed by the weight of the fluid, which has to be carried upward and around as the cylinder revolves. So artful is the arrangement that the cylinder goes round with an exceeding slowness, being compelled to do so by the percolation of the water from one compartment to another, and, in its descent, its axis, by coinciding with hour marks on a graduated vertical scale, indicates the lapse of time.

To be continued.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. 3. WHAT MAKES A CONTRACT?

There are two elements that are always present in a contract, namely, an offer and an acceptance. If either is lacking there is no contract. Not every offer and acceptance makes a contract for a breach of which an action will lie in the courts. If, for instance, I offer to entertain you at luncheon and I fail to appear at the time, there is an offer and an acceptance but no breach of contract. Therefore, we should understand that the offer, in order to lead up to a contract, must be an offer of a contract, that is, something intended to change the legal relations of the parties; so, an offer made in jest, if so understood, cannot lead up to a contract.

As to how the offer must be made no rules can be laid down. It may be made orally or in the form of writing, by signs, by advertisement, and by any number of other ways. A mere wink of the eye or a nod of the head, as in the case of bidding at an auction, may constitute an offer to buy. Acceptance too may be made in any one of many ways, there being no formality required, unless in the case of a few classes of contracts where the statute has provided that a writing shall appear stating the terms. Of these kinds of contracts we shall speak later.

In order to make a contract, the offer must be accepted in the terms of the offer. If there is any variation between the offer and the acceptance or any conditions attending the acceptance, a contract is not made. Contracts made by correspondence are peculiarly subject to fault in this particular. If the correspondence does not show that the minds of the two parties have met upon identically the same proposition no contract can be implied.

Offers are frequently made to be accepted within a certain time or at a certain place, or in a certain number. The acceptor in order to bind the one making the offer must accept in the terms of the offer to form a binding contract.

Difficulty sometimes arises in cases where the time wherein which any offer may be accepted is not stated. It may be said generally that an offer may be accepted while it continues open; but, where there is no definite time within which acceptance must be made, how long has the offeree within which to accept? The rule of law is that an offer, once made, is presumed to continue for a reasonable time unless it is sooner withdrawn. What is a reasonable time depends upon the circumstances of the case. It is a matter for a jury to decide in a case before it as to whether the acceptance was made within a reasonable time.

Of course, an offer, even although made for a definite time, may be withdrawn at any time. This is not true, of course, if the person to whom the offer has been made has paid or has agreed to pay something to have the offer left open.

This brings up the question of option. An option has no value within the law unless something has been paid, or is agreed to be paid for it. If I voluntarily offer to sell my horse for \$100 and give you a week in which to buy, I may withdraw the offer within the week without being liable to damages for not keeping my promise; but, if you have given me something, no matter how slight, it being of some value, or if you have agreed to give me something or render me some service in exchange for the agreement to hold the offer open, I must do so or put myself in danger of a suit for damages. After a reasonable time has elapsed, the offer being made for a definite time, it is not necessary for one making the offer to formally withdraw it, as the law will presume it to be withdrawn. If the one offering wishes to withdraw before a reasonable time has elapsed, he must communicate the withdrawal by word or act to the offeree.

There are some things that will terminate an offer other than the voluntary act of the one offering, as, for instance, his death or his insanity.

Offers are sometimes made to the general public, no particular persons being specified, as when an offer of reward is made in a newspaper or by posters. In such cases any one may accept if he does so before the offer is withdrawn; and in order for it to be withdrawn the same means must be used as was used in making it public.

In our next we shall treat of the important subject, "Contracts by Mail and Telegraph."

To be continued.

What We Do for You

When you handle Yale & Towne Padlocks

WE furnish you, *free of all cost*, a service which comprehends a Supply Department and personal advertising advice on all matters connected with our Padlocks.

The Supply Department

A "Book About Padlocks" illustrated and showing 53 places in which padlocks are of use.
 A book that really *sells* padlocks.
 A Catalogue showing the Yale & Towne Padlocks you carry.
 Envelopes for your use.
 "The Little Black Box"—an interesting story, splendidly illustrated, two colors.
 Tags for your use.

Package Labels for your use.
 Rubber Stamp for your use.
 Leaflets, two colors, illustrated.
 Street Car Cards.
 Display Signs.
 Newspaper Advertisements.
 Newspaper Reading Notices.
 Cuts (electrotypes or half tones) for newspapers and circulars.

*Each of the above bears your Name
 and Address in a conspicuous place*

Write to us about our Sample Board showing twelve *actual* Yale & Towne Padlocks. Send for 32-page, 2-color, Illustrated Booklet, "SUGGESTIONS FOR SELLING YALE PADLOCKS."

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Albemarle, N. C.—The Farmers' Hardware Company has been incorporated with a capital stock of \$50,000. The incorporators are: S. H. Hearne, S. O. Goode, G. F. Almond and others.

Brandon, Man.—The Kelly Hardware Co. has been incorporated, capital, \$15,000; incorporators: H. E. Kelly, G. F. Williamson, of Brandon; H. Ormond, A. Anderson and W. L. Garland, of Winnipeg.

Cincinnati, O.—The Bremfoerder Hardware and Iron Co., with a capital stock of \$30,000, has been incorporated by Jas. Willey, Robert Ramsey, Geo. P. Stinson, W. D. Breed and Smith Hickenlooper.

Clinton, Okla.—Brown, Robinson & Co. have incorporated with a capital stock of \$10,000 to do a Hardware business.

Columbus, Miss.—The Columbus Hardware Co. has been organized with a capital stock of \$75,000. The new concern will commence business in the four-story building on the corner of College and Market streets, at present occupied by Robinson & Co. The company is composed of A. H. Pegues and Geo. F. McCowan, proprietors of the Pegues-McCowan Hardware Co., and H. P. Sherrod of the Sherrod Hardware Co.

Cowley, Wyo.—The Cowley Lumber & Hardware Co. has been incorporated with a capital of \$25,000.

Cuba, N. Y.—Sisson & Smalley have been incorporated as dealers in Hardware, etc.; capital, \$20,000. Incorporators, B. G. Sisson, B. A. Sisson, Cuba, N. Y.; G. W. Smalley, Belmont, N. Y.

Elkton, Md.—The Roger Witworth Hardware Company has been incorporated with the following incorporators who will serve as directors for the first year: Roger Witworth, William R. and H. Frank Witworth, Mary A.; Elizabeth and Bertha Witworth. The purpose of the company is to conduct a wholesale and retail Hardware business in Elkton.

Estelline, Tex.—The Johnson Hardware Co., capital \$7,500, has been incorporated here. Incorporators: J. H. Cristler, J. A. Johnson and E. L. Biggerstaff.

Govan, Wash.—The Hayden Lumber Co. will open a Hardware store.

Gulfport, Miss.—The charter of incorporation for the Poythress Hardware Co. is being published. The authorized capital stock is \$25,000, with the following incorporators: I. N. H. Poythress, D. E. Bennett, H. L. Blackmar, H. F. Griffin and others.

La Grange, Ga.—La Grange is to have another large Hardware firm, which will open for business in August. The firm is composed of three young men, J. D. Hudson, J. A. Broome, Jr., of La Grange, and A. W. Wheelis, of Atlanta.

Lorain, O.—The Standard Hardware Co. are now the owners of the business which has been operated by the firm of Clotz & Chappell at 1621 Penfield avenue. The concern is a stock company which will be incorporated for \$20,000. The incorporators will be Philip Clotz, A. M. Hodgins, A. A. Demmer and others.

Changes and Improvements.

Altamont, Mo.—McIntosh & Son have sold their Hardware business to J. G. Strasser.

Anniston, Ala.—The Anniston Hardware Co. has filed papers signaling the increase of the capital stock of that concern from \$40,000 to \$100,000. The company was incorporated in 1877.

Baldwin, Kans.—B. F. Stevenson has sold his Hardware store to H. A. Share.

Baltimore, Md.—Eugene E. Johnson through ill health has been obliged to give up his business duties in connection with the firm of Johnson & Johnson, contractors and dealers in Hardware supplies. His interest has been bought by a younger brother.

Chandler, Okla.—S. A. Key has purchased the Hardware store of J. McParland.

Charleston, Ill.—The Cottingham & Snider Hardware store has been sold to Ellis Moore, a resident of Kankakee.

Chickasha, I. T.—The Gilkey-Jarbor Hardware Co. has just vacated the building on Chickasha avenue which it has been occupying as a branch store and moved the goods to the store room adjoining their Third street place of business.

Colon, Neb.—The Nelson-Henning Hardware Co. has succeeded to the business of Charles Nelson.

Diller, Neb.—Thos. Nelson sold his Hardware store to J. L. Henrichs.

Ensley, Ala.—The Smith Hardware Co. will take charge of the Cash Economy store on Avenue E as soon as the stock-taking is completed. The Hardware company recently purchased the stock from A. C. Tice.

Glassport, Pa.—E. A. McKown and W. H. Beattie of Coraopolis, have purchased the Hardware store of A. A. Montgomery.

Grand Forks, B. C.—John Heron has purchased an interest in the Hardware business of H. D. McNeil.

Homer, N. Y.—E. W. Childs has retired, by mutual agreement from the Hardware firm of Williams & Childs.

Idabel, I. T.—Willis Owens has sold his Hardware store to S. McConathey.

Joplin, Mo.—F. S. Briggs of the Briggs Hardware Co. of Neosho, Mo., has bought the entire stock of the Miners Hardware Co., on Main street, and is making arrangements to ship the stock to Neosho.

Kansas City, Mo.—E. Steeltzing has purchased the Hardware business of Gardner & Co.

Lock Haven, Pa.—J. H. Fredericks & Bro., Hardware and stove dealers, are having constructed a large new warehouse on the rear of their building on Main street, in which to handle the additional goods needed to supply the firm's increasing trade.

Louisa, Va.—R. W. Harris of the Harris Hardware Co. of Richmond, has purchased a business lot on Main street, and will immediately erect a store thereon.

Madrid, Iowa.—Mason & Isaacson have been succeeded in the Hardware business by Mason & St. Helen.

Malone, N. Y.—The firm of Short & Wilding, Hardware men, will be dissolved August 15th, the close of their business year, after which one of the partners will take over and continue the business.

Minneapolis, Minn.—The first large building permit to be issued this month is that for the new Hurty-Simmons Hardware Co.'s warehouse on Fourth street, between Second and Third avenues north. The permit was taken out in the sum of \$160,000.

Embarrassments.

Macomb, Ill.—William H. Cooper of Webster Grove and D. O. Cooper of St. Louis, partners in a Hardware business at Macomb, Ill., have filed a bankruptcy petition. The partnership liabilities are \$2,993, with no assets. Hardware and implement firms in several cities are the principal creditors. W. H. Cooper has \$500 individual liabilities and \$99 assets. D. O. Cooper has \$55 assets and no liabilities.

Burglaries.

Cedar Rapids, Iowa.—Burglars entered William & Bunting's Hardware store recently and took away about \$100 worth of knives and razors.

Laurel, Miss.—The store of the Frank Gardiner Hardware and Supply Co. has been entered and robbed of \$90 and four or five pistols.

Louisville, Ky.—Thieves entered the Hardware store of Edward Wolfe, at 1023 Third street recently and stole the following articles: Six dozen razors, four dozen pocket knives, dozen horse clippers, dozen pair scissors and four steel saws.

Napanee, Ont.—Some thief extracted about \$100 from the safe in Boyle & Son's Hardware store.

Salem, Mass.—The safe at Winer & Lubet's Hardware store has been entered and \$330 taken.

Fires.

Humboldt, Kans.—The Ernst Hardware Co. has sustained a considerable loss by fire.

Inavale, Neb.—The Hardware and harness establishment of Sawyer & Knight has been damaged by fire.

Los Angeles, Cal.—Its entire stock heavily damaged and its business home ruined by fire recently, the Holbrook, Merrill & Stetson Co., wholesale Hardware, at 220 North Los Angeles street, already has placed orders for replenishing its stock, and has resumed business. Temporary quarters have been fitted up in the adjoining building, and in these the firm will be housed until its permanent home can be made ready. Loss amounts to about \$50,000, fully insured. The stock, valued at about \$150,000, had been greatly increased since the San Francisco fire, in which the company's store in that city was completely destroyed. Two Los Angeles warehouses are full of the firm's goods and more are on the road.

Macon, Neb.—The Hardware store of W. J. Shepard & Co. has been destroyed by fire.

WANTED—Hardware salesman to travel Montana. Must be posted on general Hardware, sporting goods and tinware. Address, giving age, experience, reference, etc., "Wholesale Hardware," care of HARDWARE.

"ATLANTIC"

High-Grade Wash Boilers

TIN, COPPER and GALVANIZED IRON

Strongest and Best Made Boiler on the Market

"Atlantic" Galvanized Striped Ware

is among the highest grade goods offered to the trade. Made from smooth Galvanized sheets. Heavy wiring and wide seams make it strong and durable. Add it to your line, it is a great seller. New catalogue now on the press. Write for it.

Atlantic Stamping Co., Rochester, N. Y.
185 Ames Street.

Hight's Union Combination Square

All the Combinations available all the time.

**Five Tools in one : 8-inch Try Square, Bevel,
Butt Gauge, Marking Gauge and Mitre**

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.

If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices

and full description sent on application.

The best tool of its kind on the market.

A. W. HIGHT, Box 39, Station B, Toledo, O.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Dallas, Tex.—The Texas Refrigerator & Fixture Co., has been incorporated, with a capital stock of \$6,000, and will manufacture refrigerators and butchers' cooling rooms.

Elmira, N. Y.—A certificate has been filed showing that Robert D. Batterson, of 308 East Water street, and Willis B. Leonard, of 514 West Third street, will do business under the name of the Coffield Washer Co.

Great Barrington, Mass.—Shailor Manufacturing Co. has been incorporated to manufacture buckles, saddlery and Hardware supplies; capital, \$12,000. President, Walter B. Sanford; treasurer, Edward Kelly; clerk, Clarence B. Sabin, all of Great Barrington, Mass.

Hopkinton, Mass.—Workmen are busy getting the store in the Post Office block ready for use by the Great Eastern Shear Company, a new concern that has been organized with Mrs. E. F. Rutland, Miss M. C. Hager and Miss M. E. Fleming in company. Mrs. Rutland, head of the new command, prebe wife of Harrington W. Rutland, of Westborough, of the United Shear

Jersey City, N. J.—Crescent Manufacturing Co. has been incorporated; capital stock \$10,000; incorporators, Henry Bossing, John J. Ranagan, William A. Megrath. The company is to deal in Hardware.

Kalamazoo, Mich.—The National Gas Light Co. has been incorporated, with a capital of \$100,000, and succeeds the Door-bos Brothers Co. The officers are: E. R. Loomis, president; Oscar E. Jacobs, secretary, and John Doorenbos, treasurer. The factory of the Kalamazoo Wagon Co., which is 165 feet long, 37 feet wide and three stories high, has been secured, and all of the machinery in the company's existing plant will be removed to the newly acquired property. An automatic regulating burner, to be used with an inverted gas light, will be manufactured.

Kittery, Me.—C. A. Batchelder Co. has been organized for the purpose of manufacturing and dealing in novelties, machinery, tools and implements of all kinds, with \$75,000 capital stock. Officers: president, Horace Mitchell of Kittery; treasurer, S. J. Morrison of Portsmouth, N. H.

Lancaster, Pa. Ground will soon be broken for the first of the series of buildings of the Lancaster Machine and Structural Works, a corporation formed by the merging of the Anne & Thomas Lancaster Fire Escape Works and the Thomas A. Anderson Machine Co. The capitalization of the new company is \$350,000, and the location of its plant will be in the northern section of the city, between the Pennsylvania and Reading railroads. The ground is 608 by 267 feet, and the plant will consist of a structural shop, machine shop, foundry, blacksmith shops, pattern, tool and core shops and core ovens.

Middletown, Conn. The Briggs Company has filed a certificate of incorporation. The company will have an authorized

capitalization of \$20,000. It will erect or purchase factories and construct small Hardware and metal novelties of all kinds. The incorporators are D. Luther Briggs and Harry E. Powell of Middletown, Frederick Radcliff of Portland and Walter S. Wilcox of Durham.

Muncie, Ind.—The Durham Mfg. Co. has been incorporated with \$20,000 capital stock to manufacture games and novelties. The directors are J. M. Maring, E. B. Ball, James E. Durham and Herbert R. Bard.

Pittsburgh, Pa.—Butler Bolt and Rivet Co. has been incorporated; capital, \$10,000. Directors—John M. Hansen, Pittsburgh; T. H. Gillespie, Butler; William A. Bierman, Allegheny.

Pittsburgh, Pa.—Westinghouse Consolidated Foundries Co. has been incorporated with a capital of \$5,000. Directors—George C. Smith, Walter D. Uptegraff, Pittsburgh; F. D. Seitz, Stewart, Westmoreland county.

Portland, Me.—A. Ulmer Cutlery Co. has been incorporated to make and deal in Hardware; capital, \$10,000. President C. F. Ulmer; treasurer, L. M. Ulmer; clerk, S. M. Reynolds, all of Portland, Me.

Springfield, Mass.—Hunt Mfg. Co. has been incorporated to manufacture machinery; capital, \$25,000. President, David F. Hunt; treasurer, George H. Wilkins.

Changes and Improvements.

Avon, N. Y.—The Champion Drill Co., Ltd., is to be reorganized and its capital stock increased from forty to sixty thousand dollars.

Brantford, Ont.—The Brantford Screw Co. which was considering the advisability of removing from here, decided to remain, and has let the contract for a new factory, valued at \$20,000, to be erected at West Brantford.

Bridgeport, Conn.—The Bridgeport Malleable Iron Co., manufacturers of malleable iron castings, has awarded the contract for an addition to its plant. The structure will be a brick factory building, 77x313 feet.

Chicago, Ill.—The Sturges & Burn Mfg. Co., manufacturers of cans of various kinds and sheet metal specialties, has recently increased its equipment by the installation of three new drawing presses and the addition of special tools and machines for the manufacture of ice cream freezers, a new product just added to their line of manufacture. The company is also considering adding two more drawing presses.

Columbus, O.—The Capitol Lock-Nut and Bolt Co. has removed its offices from the Columbus Savings & Trust Co. to its plant at South Columbus, where an up-to-date building has been erected.

Marion, Ind.—The American Drill Co., manufacturers of grain drills and planting machinery, is erecting a new building, which will be used principally for storage purposes. It will be of concrete construction, 40x400 feet.

New Haven, Conn.—Work has been started on the plans for the new plant which F. P. Pfeighar & Son, manufacturers of Hardware and special machinery, will erect. The plans call for a main building of brick, three stories high, 80x300 feet. There will be several minor buildings.

Shelton, Conn.—The O. K. Tool Holder

Co. makers of machinists' tools and tool holders, has let the contract for a four-story factory, 40x75 feet, of steel and concrete construction.

Springfield, Mo.—The Woods-Evertz Stove Co. is completing a new warehouse. The structure is being erected just north of the main factory building. The building is being erected on a concrete foundation. The super-structure will be iron, thus making the building fire proof. The new warehouse will be 35x100 feet. It will have only one floor but will be practically two stories in height, leaving a large space in which to store the wares turned out by the factory.

Trenton, N. J.—The Skillman Hardware Co. is equipping its plant with a new boiler and engine to increase its power. The boiler was furnished by the John E. Thropp Son's Co., and is of the return tubular type. It is of 100-horse power. The Reeves Engine Co. has the contract for supplying the engine. It will furnish 75-horse power, and will be a compound machine of a special type. These engines are entirely self-lubricating and are noted for their small water consumption.

Woonsocket, R. I.—The American Wringer Co., which has a large plant here and recently decided to reopen for a time its plant at Auburn, N. Y., to catch up with its orders, has found it necessary, on account of increasing business, to build a plant in the West, and within a month work will be commenced upon large wringer works near Minneapolis, Minn.

Waterbury, Conn.—The Blake & Johnson company, manufacturers of brass and iron Hardware, will soon erect a plant on the site which has just been acquired in Waterbury.

Waterbury, Conn.—The Shoe Hardware Co. has awarded the contract for a four-story brick addition. A two-story addition to the boiler-room and a one-story addition to the japanning department will also be constructed.

Waterbury, Conn.—The Steele & Johnson Mfg Co., makers of stamped brass goods, is preparing plans for an additional four-story brick factory 40x100 feet.

Embarrassments.

Buffalo, N. Y.—The affairs of the Western Wire Goods Co., which went into voluntary dissolution about a year ago, have been practically wound up, and Robert Lynn Cox, receiver of the concern, announces that creditors will get about 50 cents on the dollar on their claims.

Cleveland, Ohio.—The assignment of the Van Wagoner Company, manufacturers of hinges, has been made. The assets are estimated at \$5,000. The reason for the assignment is given as lack of capital.

Fires.

Adrian, Mich.—Fire, originating in the boiler room has destroyed the plant of the Adrian handle factory. The loss is estimated at \$10,000.

Dayton, Ohio.—An oil explosion at the plant of the Pneumatic Tool Co. caused a \$90,000 fire recently. The loss is shared by the tool company and the Gem City Tobacco Company. Both plants were almost destroyed.

The Shear of The Year

Not How Cheap--But Quality and Durability.

You don't want the Cheapest, but **The Best**. We claim in our **Patent Adjustment Shear** to give you a Shear that has the advantage over other makes of **Quicker Adjustment and Longer Service**, combined with **Quality and Workmanship**. Requires grinding 1 to 10, that is, other Shears require grinding ten times where ours are ground once. It is not the cutting, but the bearing which dulls the shears.

The **Perfect Feature** of construction of our Shear is the method of drawing the Shear blades together **Without the use of a Screwdriver**. A turn of the milled nut tightens or loosens the blades by forcing the **Forked Head** under the head of the pin which passes through both blades. By a few turns of the milled nut the blades can be taken apart, which eliminates **All Use of the Screwdriver** for taking apart, or taking up lost motion.

Their reputation makes them quick sellers. Try 'em.

COLDWELL LAWN MOWER CO.
NEWBURGH, N. Y.

STOVE MANUFACTURERS

New Incorporations, etc.

Albany, N. Y.—The Empire Furnace & Stove Repair Co. has been incorporated with a capital stock of \$30,000. The incorporators are William Dewey, Frank C. Houghton, Augustus G. Westervelt, Clark G. Westervelt and W. H. A. Mills, Albany, N. Y.

Detroit, Mich.—The Independent Stove Co. have begun operations in their new plant which has been in course of erection at Sidney avenue and the Detroit, Grand Haven & Milwaukee Railroad. The company was only incorporated a few weeks ago, the principal stockholders being William B. Robinson, formerly with the Art Stove Co.; J. Edwin Ellis, assistant purchasing agent for the Michigan Stove Company, and Robert J. Wandell, traveling salesman for the latter concern. The main factory building is 105x107 feet and will be divided into two parts, one being used for the foundry and the remainder for the finishing and erecting shops and offices.

Richmond, Va.—The Cameron Stove Co. was incorporated a few months since for the manufacture of Cameron Steel Ranges and Airtight Heaters. The Cameron Steel Range is of heavy construction and modern design, has an unusually large oven and also large flues, and will burn hard or soft coal as well as wood.

Stamford, Conn.—The Stamford Gas Stove Co., which has been in operation at Stamford, Conn., under a New York charter for the past four years, has re-incorporated under Connecticut law with increased capital stock, and has added to its line the Yale Gas Stove Co.'s heaters, hot plates and factory burners and appliances. Harry L. Sterrett, manager of the Yale Gas Stove Co., New Haven, becomes secretary of the company, bringing his New Haven manufacturing business with him. The new treasurer is John J. Garrison. E. B. Mooney is assistant treasurer and will have charge of collections and correspondence. The company continues closely associated with the Stamford Foundry Co., the oldest stove foundry in America, and occupies a large factory building on the latter's premises.

Changes and Improvements.

Chicago, Ill.—A new foundry building two stories in height, 80x150 feet, is being built by the Home Stove Works. A new power-house is also being added to the plant and new equipment for both buildings is being purchased.

New York, N. Y.—Several important changes in the showrooms and offices have been made by the Union Stove Works, 70 Beekman street. The shipping offices are now located so that excellent light is afforded the clerks. The sales offices are on the same side of the building, further back. This arrangement allows for an unbroken line of samples from the front to the back of the showroom, and the variety of stoves the company offers presents an attractive display. The accounting department and the office of W. J. Myers are in the rear, with every faculty to render the dealings of stovemen prompt and pleasant.

Providence, R. I.—A 250 horse power engine, a 150 kw. generator and two 150

horse power boilers will be installed in the new power house being erected by the Providence Gas Burner Co.

Miscellaneous.

Carnegie, Pa.—H. Adler & Co., Inc., Carnegie, Pa., with Western office and warehouse at 1210 West Tenth street Kansas City, Mo., have issued their catalogue No. 44. This book, which contains 56 pages, 8x11, is devoted to Gas Appliances of the company's manufacture, the Acme Gas Stoves, Ranges, Cookers, Ovens, and Hot Plates. A full-page half-tone cut is used to show the company's plant, which is claimed to be the largest and most complete plant in the United States devoted to the exclusive manufacture of gas appliances. The company's line of stoves, etc., are well shown by half-tone reproductions. Particular attention is called to the Acme Range Burners, of which the company says: "In all our ranges we are using a burner of this style, cast in one piece, including the burned cap, burner pipe and mixer. The mixer collar fits tightly and can be adjusted easily to any opening desired, and is held substantially with a lock screw. The area inside of burner and mixer and the drilling are all proportioned so perfectly that after the mixer collar is adjusted to supply the proper amount of air for the gas being used, the burner will not pop out or catch back at the valve under an extremely low pressure or burn yellow under a high pressure. Our burners do not smother when a vessel is over them, each jet is supplied with oxygen all the way around to sustain perfect combustion. This burner, drilled, shows a test of over 20 per cent. more heat with the same amount of gas than it does sawed, and applies to all drilled burners as compared to the same burner sawed, if the burner is drilled and made properly. When the gas is properly burned in jets it has much more vitality and heat than when burned in sluggish flames, as in a slotted or sawed burner; therefore, we strongly recommend drilled burners. It is easy to burn the gas in slots or flames and cover up defects in the burners; but a drilled burner has to be made right, or else defects are noticeable. A drilled burner uses the gas so much more economically and advantageously that a sawed or slotted burner should never be used. We have a process of moulding our burners clean and smooth on the inside. Most burners are very rough inside, which increases the friction of the gas and air, causes an accumulation of dirt, and injures the operation."

Chicago, Ill.—A display of stoves will be held in connection with exhibits of the Illinois Retail Hardware Association in the Coliseum, Chicago, February 13, 14 and 15, 1907. The manager of the display, G. R. Lott, 1002 West Lake street, Chicago, reports that 90 per cent. of the 280 spaces have already been reserved by manufacturers and jobbers. Among the makers of stoves who have already signified their intention of exhibiting may be mentioned the following: Estate of P. D. Beckwith, Cutler & Proctor Stove Co., Comstock-Castle Stove Co., Detroit Stove Works, Excelsior Stove Works, Estate Stove Co., Fuller & Warren Co., Favorite Range & Stove Co., Germer Stove Co., Joliet Stove Works,

Michigan Stove Co., M. & D. Range Co., Peninsular Stove Co., Robinson Furnace Co., XXth Century Heating & Ventilating Co.

Cleveland, O.—The Champion Steel Range Co. have issued their Catalog No. 7 illustrating their line of steel ranges, hotel ranges, double oven ranges, coal heating stoves, gas heating stoves, gas cooking stoves, gas water heaters and radiators. The company's steel range line consists of the Active Champion line, Champion line, Champion Russia Finish line, Champion-Marquart line, Champion hotel ranges, and Champion combination gas and coal ranges.

PUSH 'EM.

Oil, Gas and Gasoline stoves and the lighter ranges should be pushed with vigor at this season of the year.

Have you a line of samples of Camp Stoves? They are most lively sellers. Some dealers report unusually good business in this line.

Have you ever tried selling stoves on the installment plan? It is far less vexatious than indefinite credit giving.

You can beat last year's sales in stoves, ranges and every kind of heating apparatus if you want to. The chances are better than ever. It's up to you, Mr. Dealer.

STOVE LITERATURE.

Why does the manufacturer of stoves and other kinds of heating devices supply you with it? For the express purpose, we believe, of acquainting you, Mr. Dealer, and your clerks, with the quality and "talking points" of his goods. They are also sent you for distribution among your customers, to convince them that they are the goods they ought to buy.

Why, then, put all this valuable information about so profitable a line as stoves, etc., "in a corner" where they will not be seen? Why use them for wrapping paper? Would it not be far better the moment a new supply of stove circulars arrives, to send them on their way rejoicing—to your customers' homes throughout your town, and to the farmers who do their trading in your store and in your town. A good looking circular—and most of them are well prepared and look attractive—is like a silent salesman who "talks straight from the shoulder." If sent to the home of your customers, direct, it reaches the man or woman you want to reach, and often finds them with enough leisure on their hands to be impressed with the manufacturer's message about his new stove or range.

Every one of your clerks ought to get one of these circulars to "get posted." The gross ignorance of salesmen regarding the merits of certain goods has cost Hardware merchants many a sale, and it may cost you more still, unless your salesmen are instructed properly. "Knowledge is power" is salesmanship. Knowledge on the part of your customers about the latest and best articles for the home, awakens the desire to purchase and possess.

Let each circular, then, be your missionary. Send it "into the highways, by-ways and hedges" and, if it has compelling force it will bring you customers.

Try it and see.

WARNING!

TO WHOM IT MAY CONCERN:

We have been advised that the Automatic door closing device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 1900. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO., Inc., Des Moines, Iowa.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured and Sold 41,430 MAJESTICS in 1905 beside many other makes.

Does that tell the story?

We will verify these figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub

of the Majestic is made of selected Virginia White Cedar, and will stand the action of water a life time. It is bound with our celebrated Electric-Welded Wire Hoops, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the Snow Ball Freezer. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of Virginia White Cedar, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are JOBBER or DEALER write us to-day for particulars and prices which will surprise you.

C. C. C. Saw Clamp

Pat. U. S. Feb. 20, 1906; Canada, April 3, 1906.
Other Foreign Patents Pending.

Is the latest, lightest and best Saw Clamp on the market.

Best For Wood Workers

because it only weighs about a pound, is simple in construction, durable and efficient. Can be carried in the pocket.

Frame is made from the best grey iron, japanned. The clamping part is of rolled steel completely covered with rubber, which holds the saw perfectly rigid, taking up all vibration, and thus saves greatly in the cost of files. It's noiseless in operation.

PRICE 75 CENTS.

Send for further particulars and discounts. Mention HARDWARE.

C. W. Cardwell Mfg. Co.
JAMAICA, N. Y.

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.

Put up in coils 300 feet each.

Patent Metal Reel Frame with each coil. Straps made in four widths: $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ and 1 inch. Patented in all countries.

CARY MFG. CO.,
19 & 21 Roosevelt Street, New York.
Cable Address: CARLEIO

Fresh Meat Is The First Thing

A Steel Spider with the name

"NEVER-BREAK"

Stamped on the Handle is the next, if you don't want a scorched or burnt Chop or Steak.

Have you our Complete Catalogue of Stamped Steel Cooking Utensils?

THE AVERY STAMPING CO., Cleveland, Ohio.
Manufacturers Shovels, Spades & Scoops
of Highest Grade.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finished in natural color of wood. Hoops and castings painted with Royal Blue Enamel.

H. F. BRAMMER MFG. CO.,

1466 W. 2nd St.

DAVENPORT, IOWA.

Wrings the Mop dry

These are the wringers that sell.

Both feet rest firmly on the floor—no danger of upsetting bucket and wetting feet. Pressure that wrings mop is from a *spring*, not from the foot. Two springs, one on either side are independent of each other, pressure adjusts itself to any unevenness of mop—wrings all of mop thoroughly.

Tub is strong and extra braced. Rollers are solid maple and never stick. Attractively labeled—make good display in your store—sure to please customers.

Ask your jobber.

Hight's Union Combination Square

All the Combinations available all the time.

Five Tools in one: 8-Inch Try Square, Bevel, Butt Gauge, Marking Gauge and Mitre

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.

If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices

and full description sent on application.

The best tool of its kind on the market.

A. W. HIGHT, Box 39, Station B, Toledo, O.

WARNING!

TO WHOM IT MAY CONCERN:

We have been advised that the Automatic door closing device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 1900. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO., Inc., Des Moines, Iowa.

WATROUS AUTOMATIC DOOR CATCH

TWO-THIRDS ACTUAL SIZE.

PATENT APPLIED FOR.

For screen doors, storm doors, office gates, etc. Holds the door tight shut and prevents sagging open at the top or standing ajar.

Neatest, cheapest and best acting door catch on the market. No templet needed. Anyone can put it on in two minutes. The lightest trip and the strongest hold. Mounted Model free with each first order of three dozen or more. If your jobber does not carry it, write us and we will give you name of someone covering your territory who does.

Japanned Steel Door Buttons.

Patent Applied For.

OPEN

Half the weight of the cast, much stronger, and will not break. No higher in price and twice as good. Made in all sizes from 1 1/4 to 2 1/2 inches.

CLOSED

Insist on having them. Carried by all leading jobbers. Write us for samples and name of nearest jobber.

C. C. C. Saw Clamp

Pat. U. S. Feb. 20, 1906; Canada, April 3, 1906.
Other Foreign Patents Pending.

Is the latest, lightest and best Saw Clamp on the market.

Best For Wood Workers

because it only weighs about a pound, is simple in construction, durable and efficient. Can be carried in the pocket.

Frame is made from the best grey iron, japanned. The clamping part is of rolled steel completely covered with rubber, which holds the saw perfectly rigid, taking up all vibration, and thus saves greatly in the cost of files. It's noiseless in operation.

PRICE 75 CENTS.

Send for further particulars and discounts. Mention HARDWARE.

HARDWARE

The Lisk Manufacturing Co., Canandaigua, N. Y., in the last week in July, shipped to the leading Hardware dealers of the country a solid trainload, consisting of fifteen cars, loaded with their new Sanitary Enameled Roasters, which are already established in the trade as the most perfect article of the kind, and well deserving the immediate success it has achieved.

That preacher in Fitchburg, Mass., who came out openly in the newspapers the other day, and said he believed in the use of beer, was evidently talking in self-defense. His name was Alex- is W. Stein, and what use would there be for steins if there was no beer.

In our last issue we referred to the Hardware catalogue recently issued by the Wyeth Hardware & Mfg. Co., St. Joseph, Mo., as being an issue of 500 copies. To those at all acquainted with the amount of business done by this enterprising and progressive house, it is unnecessary to say the number should have been 5,000 copies.

Insurance companies have found an earthquake clause handy in San Francisco. Look over your policies carefully in future, they may be encouraged to put in a clause releasing them from liability if the fire loss is caused by a flame.

Henry Stanley Renaud, B. S., LL. B., of Waller & Renaud, Consulting Chemists of 159 Front Street, New York City, has recently been admitted to the Bar of the State of New York as an Attorney and Counsellor at Law. In connection with his work as Consulting Chemist, Mr. Renaud will devote his attention to Chemical, Techno-Legal, Chaico-Legal, Lego-Mining and Patent Cases.

A. Slob has just gone out of the implement business in Sioux Center, Ia. We seldom speak of a business man in that manner, but it is unavoidable in this case. We did not name him.

F. E. Myers & Bro., Ashland, Ohio, have about completed their new warehouse, which has been in the course of construction for some time, taking the place of the one destroyed by fire in January. When the shop and shipping department are again running along in their proper channels, with the additional capacity this will give them they will be able to handle the increasing business which they are at this time receiving, in the most satisfactory manner.

Bank deposits are piling up so rapidly in Kansas City that one bank is about to build a fifteen-story building; probably to keep the wealth from being exposed to the weather.

The annual meeting of the Gilbert & Bennett Mfg. Company was held at the home office in Georgetown, Conn., on July 24. The following directors were elected: David H. Miller, Samuel J. Miller, Edward F. Jones, Charles J. Miller, William H. Hunter. Officers were elected as follows: David H. Miller, president and treasurer; Samuel J. Miller, vice-president and secretary; William H. Hunter, assistant secretary; Edward F. Jones, New York manager; Charles J. Miller, Western manager. The usual dividends were declared.

All good men, and true, should rally to the aid of the lady of Independence, Mo., who is being sued for divorce by her husband on the ground that she sometimes gets home about four A. M. Just stop and think what a precedent such a case will be, if our wives get to bringing suits on the same ground.

E. B. Page, who has been the sales manager for the Bay State Tool Company, Worcester, Mass., has been made general manager of the business.

A Western preacher has had the pews of deaf members of his congregation fitted with telephones, so they can hear the sermon. The next improvement will probably be alarm bells, to be pressed by the minister whenever an undue amount of drowsiness makes itself apparent in the pews.

THE ROSE WATER COOLERS.

The Rose Manufacturing Co., 505-513 West 50th Street, New York, have recently established an agency for the sale of the Rose Water Coolers at 1429 Bush Street, San Francisco, Cal. They made the first shipment of one carload of Coolers, Model A, on July 31, to be followed on the 15th of August by a second carload. It is in contemplation to establish an agency at Chicago also at a date in the immediate future.

A party of men were having a quiet bottle in one of the "joints" of Prohibition Kansas City, Kansas, the other day, when a deputy sheriff drove up in front of the building. The lights went out, all was dark, and a voice cautioned them to be perfectly quiet. In a few moments the lights came on again, and they turned to take another drink.

"Oh, no sah, it's over in this room now," said the porter. The "joint" had actually been moved without their realizing it.

NEW ENGINE & BOILER CATALOGUE

The James Leffel & Co., Springfield, Ohio, have issued a very handsome and complete 52-page catalogue, illustrating and describing their line of Steam Engines and Boilers. The details of construction are plainly shown and fully explained, and the catalogue is one that should be in the hands of any prospective purchaser in the Steam Power Line. A copy will be furnished free to prospective buyers, stating their wants, and addressing the Company as above. In writing for this catalogue please request Catalogue "O".

A reformer proposes to make it a penitentiary offense for a political candidate to give away cigars. This reform wave will encounter no opposition from those who have smoked the cigars.

FIRE INSURANCE AGITATION.

Anent the agitation in the Pacific Northwest to have the various fire insurance companies doing business in Washington, Oregon and Idaho maintain the former rate instead of increasing them 25 per cent., E. M. Evenson, secretary of the Washington Hardware and Implement Dealers' Mutual Fire Insurance Association, has compiled figures in his Spokane office to show that from 25 to 140 per cent. dividends are yielded annually to the stockholders of the various Hardware mutual insurance companies, and that the increase is not warranted.

"There is no excuse for the advance," Mr. Evenson says, "from the fact that many improvements have been made in Spokane and the various cities in the Inland Empire and their water supply systems and fire fighting apparatus are the best in the Northwest."

A San Francisco merchant, when asked which was the best investment, a life insurance or fire insurance policy, said: "A straight life policy for you do not find out your loss until you die."

OKLAHOMA HARDWARE AND IMPLEMENT DEALERS' ASSOCIATION.

The third annual convention of the Oklahoma Hardware and Implement Dealers' Association was held at Oklahoma City July 10, 11 and 12. The Chamber of Commerce Building was the scene of the deliberations. There was a large attendance.

The Committee on Nominations reported the following officers, who were unanimously elected:

President, O. A. Smith, Watonga; first vice-president, Harry Mead, Shawnee; second vice-president, William Murdock, Ralston; secretary, D. C. Patterson, Oklahoma City; treasurer, W. W. Storm, Oklahoma City; executive committee, A. D. Acres, Norman; M. C. Hale, Tulsa; F. M. Spangler, Mulhall; J. M. Cooley, Holdenville; Frank P. Pfaff, Anardarko.

W. J. Pettee, Oklahoma City, was chosen delegate to the National Retail Hardware Association, and Sam Noble, Ardmore, delegate to the National Federation of Implement and Vehicle Dealers' Association. George H. Brett, Ponca City; W. J. Pettee, Oklahoma City, and Harry Mead, Shawnee, were constituted a committee on legislation.

AUGUST 10, 1906

Editorial Trade Review

The vacation season for the rank and file is drawing toward a close, and the laggard feet and hands of the toilers will find plenty to do on arriving at the scene of their labors, for the travelers have started to catch the early orders, and intend making a good commencement for what will prove the record-breaking period of a fruitful year. A bountiful business is expected on every hand; a freedom in purchasing is anticipated which will spring from the willing hands and hopes of the artisan and agriculturist, who have earned the right to make needed improvements by their continuous labors through the year, which increasing expenditures for tools and machinery will expand in proportion to the extension of their facilities. May they experience no setbacks in the programmes planned; no clouds of doubt to set them halting by the wayside; but in the future, followed up by the successes of the past, find in each field of labor all that energy can create or ambition realize.

There is no change in prices of any importance to open the season, as quotations on the average are now regarded as being as low, by comparison with the cost of raw material, as they were a year ago. It is thought by the trade generally that the limitation placed on the production of wire products lately is likely to cause a shortage in the output during the Fall months. It would have been better to heap up stock against a contingency caused by big orders that have been delayed, and a demand for stock requirements that will have a tendency to go on the waiting list.

Manufacturers are still behind their orders in every line, and this is especially true of Builders' Hardware. The country in every direction has devoted a good portion of their surplus profits to the erection of buildings that represent improved conditions, so that the demand for Builders' Hardware has reached an amount that is simply unprecedented. The advances on the lines that have been promulgated of late are warranted by the cost of manufacture, although the large orders given by jobbers at dates previous to the advances will find them competing for the orders of the retailers with an energy in every way warranted by the demand.

Prospects for trade generally were never better. The

harvesting of the crops show conditions that may be regarded as phenomenally advantageous. In every direction we find the illustration made manifest that when the crops are bountiful we create a wealth of generous proportions that permeates all classes and embraces in its prosperity the whole country, fostering every branch of industry as well. Money will be spent by the farmer for needed improvements as never before, record crops of every kind being everywhere in evidence. Industrial and commercial activity are well maintained and in every direction the grand prospect is free of apprehension for the immediate future.

GROWTH OF FOREIGN COMMERCE OF UNITED STATES DURING DECADE 1896-1906.

The foreign commerce of the United States has grown much more rapidly during the last decade than its population. Completed figures for the fiscal year 1906, just presented by the Bureau of Statistics of the Department of Commerce and Labor, show that while the population has grown since 1896 but 20 per cent., imports have grown 57 per cent. and exports 109 per cent. The classes of imports which show the greatest gains are manufactures and manufacturers' materials. Manufactures imported show an increase of 42 per cent., and manufacturers' materials imported show an increase of 95 per cent. On the export side agricultural products and manufactures show the largest gains. Agricultural products exported show an increase during the decade of 70 per cent., and manufactures an increase of 163 per cent.

This increase has occurred in the trade with all of the grand divisions of the world, but is especially marked in the trade with Asia and Oceania. Imports from Europe show an increase of 50 per cent., those from North America of 80 per cent., those from South America of 30 per cent., from Asia and Oceania, 80 per cent., and from Africa 13 per cent. Exports to Europe show an increase of 78 per cent., those to North America an increase of 164 per cent., to South America 107 per cent., to Asia and Oceania 232 per cent., and to Africa 41 per cent.

The actual gains in the decade are, in imports, 447 millions, and in exports, 861 millions; in manufactures imported, 61 millions; in manufacturers' materials imported, 288 millions; in agricultural products exported, 400 millions, and in manufactures exported, 374 millions. In the trade by grand divisions the actual increase in imports from Europe is 214 millions and in exports thereto 527 millions. In the trade with North America the increase in imports is 108 millions and in exports 192 millions. In the trade with South America the increase in imports is 32 millions and in exports 39 millions. In the trade with Asia and Oceania the increase in imports is 92 millions and in exports 98 millions. In the trade with Africa the increase in imports is 1½ millions and in exports less than 6 millions.

Some remarkable changes have occurred also in the routes of travel followed by this increased traffic. Comparing conditions in 1906 with those of 1896, the Atlantic ports show an increase of 329 millions in imports and 426 millions in exports; the Gulf ports, an increase of 50 millions in imports and 262 millions in exports; the Pacific ports, an increase of 17 millions in imports and 57 millions in exports; the Northern border and Lake ports, an increase of 42 millions in imports and 116 millions in exports; while the interior ports show an increase of about 9 millions in imports.

Among the important articles of importation showing an increase are copper, which increased from a little more than one million dollars in 1896 to nearly 26 millions in 1906; manufactures of cotton, from 32 millions to 63 millions (this increase being chiefly in laces and edgings, which grew from 11 million dollars to 34 millions); fibers for use in manufacturing, from 13 millions to 39 millions; manufactures of fibers, from 27 millions to 51 millions; hides and skins, from 31 millions to 84 millions (and of this goat skins alone increased from 10 millions to 32 millions); india rubber, from 17 million to 48 millions; iron and steel manufactures, from 25 millions to 29 millions; diamonds, precious stones, and jewelry, from 8 millions to 42 millions; raw silk for use in manufacturing, from 27 millions to 54 millions; manufactures of silk, from 27 millions to 33 millions; tin for use in manufacturing, from 7 millions to 31 millions; and wool, from 32 millions to 39 millions, while manufactures of wool fell from 53 millions in 1896 to 23 millions in 1906.

On the export side the principal growth occurs in agricultural implements, which increased from 5 millions in 1896 to 25 millions in 1906; breadstuffs, from 141 millions to 186 millions; cars and carriages, from 3 millions to 18 millions; copper and manufactures thereof (not including ore), from 20 millions to 81 millions; raw cotton, from 190 millions to 401 millions; manufactures of cotton, from 17 millions to 53 millions; scientific instruments, from less than 3 millions to 11 millions; manufactures of iron and steel, from 41 millions to 161 millions; leather and manufactures thereof, from 20 millions to 41 millions; mineral oils, from 62 millions to 84 millions; provisions, from 132 millions to 211 millions; and wood and manufactures thereof, from 32 millions in 1896 to 69 millions in 1906.

DO THINGS YOURSELF.

Do things yourself occasionally. Not only will it keep you in closer touch with the details of your business but it stimulates the clerks to see the "old man" isn't above the work that they are employed to do for him. Then it gets the idea into circulation that whenever some unexpected and unassigned task comes up that needs attention, it's the place of the fellow who is "next" to look after it even if it is not in his regular work.

The man who gets the reputation of poking around into odd corners just to see what some of his clerks are about and find fault with them soon loses that close sympathy with them that adds so much to the harmonious working of the force; but the one who is at any time likely to take a hand in doing things and who really does his share while he is pretending to, adds to his own personal influence with his employees, at the same time he is learning how the rest are doing it. That isn't the sort of establishment where the neglected fragments of unfinished tasks are swept behind the protecting counters of good fellowship among the clerks for the reason that nobody knows just when the boss will take it into his head to help about the sweeping.

AVOID TRADE WARS.

Imitation may be the sincerest flattery but it is not always the most acceptable sort to the flattered or the most profitable to the flatterer. It is always commendable to study the methods of our competitors and to improve our own with the results of that study so far as honorable business ethics will permit, but it is neither good taste nor good policy to institute a special drive in stoves just because a similar drive is on tap at the Hardware store across the street; that only invites price cutting and a trade war instead of a profitable campaign to extend the trade in Hardware lines. Better take up something else for the time being and make a special drive in that.

It is one of the agreeable distinctions of the Hardware business that it includes enough variety of subjects of a timely nature at all seasons to permit of enterprise without resorting to the more severe forms of rivalry. When your competitor is pressing stoves instead of cutting in on his prices or endeavoring to prove your own superiority on stoves, take up some equally timely topic like furnaces or blankets. If he is selling skates bid out for sleighs. The average customer only wants one pair of skates and if two dealers bid for the skate trade, it is obvious they must divide the total of the trade between them, even if they do not further curtail profits by price-cutting; while the same customer to whom your rival made his sale is quite as much in the market for a sleigh as though the skates had not been sold. In brief, expend your enterprise in selling goods to the public and not in cutting out some fellow Hardwareman.

THE SUBURBS OF HONESTY.

Keep well out of the suburbs of honesty. Either keep so well within the municipal lines that there can never be a question about where you belong or else come out a whole-hearted honest rogue and done with it. These border residents are so certain to form speaking acquaintanceships with questionable methods that their own position is open to a good deal of question and they are apt to suffer the inconveniences of a shady reputation; at the same time they are under the restraining influences placed upon them by something that they think serves in place of honesty.

There is no greater enemy to the standing of any trade than the man who manages to take every advantage possible of his customers and still remain within the restrictions of the law. That is one of the degrading methods of so many street fakirs that it has placed the faking business nearly on a footing with swindling. An out and out swindler first brings discredit upon himself while a half-way man, a sort of suburbs dealer, divides the discredit between himself and the business he pretends to represent and is therefore a menace to the reputation of his honorable brothers.

DEATH OF CHARLES ADDISON BRAGG.

Charles Addison Bragg, District Office Manager of the Westinghouse Electric & Mfg. Company, Philadelphia, Pa., died at that place on Sunday, July 29, after an illness of over two months' duration. Mr. Bragg was one of the pioneers in the electrical business, he having been associated with the United States Electric Lighting Company as early as 1882. His connection with the Westinghouse Electric & Mfg. Company began in the year 1889, when he was made the manager of the Philadelphia office, which position he filled successfully up to the time of his death. Mr. Bragg possessed a most genial disposition, which endeared him to all with whom he came in contact. He was born and reared in Franklin County, Mo. Following his early education, he attended Yale college, from which he was graduated. He was fifty-six years old. Mr. Bragg is survived by his wife and one daughter.

SUNDAY REST IN FRANCE.

The action of the French Parliament in passing a bill with little opposition making Sunday a day of obligatory rest has given very wide satisfaction in that country. A special clause of the law authorizes the ministers interested to suspend fifteen times a year a day of rest in establishments under State control or private establishments where work is going on in the interest of national defense. The bill allows masters and employers in cases of bakeries, hotels, restaurants, and such places to so arrange their work that employees who work on Sunday shall rest on some other day of the week.

CITY VS. COUNTRY IN THE HARDWARE BUSINESS.

By F. F. P.

The marked difference between the thrift and sales of the average Hardware store in the small city and town compared with that in the large city is often a matter of remark. The Hardwareman in the smaller place more often than not has a store that bears evidence of prosperity and enterprise. He is looked to by a wider constituency for goods, and beyond controversy is regarded as headquarters by mechanics, carpenters and builders, farmers, boys in search of various sporting equipment, and last but not least, the housewives who are in need of such a variety of house furnishings and kitchen utensils.

In the larger cities the ten-cent stores and department stores cut off much or most of the latter branch of trade. The Simon-pure athletic goods stores get the business of the boys, and lovers of sports; the department stores are cutting into the Hardware requirements of the mechanics, carpenters and builders, and last, there are, unfortunately, no farmers in the city. So the big city Hardwareman makes nowhere near the showing, as his opportunities would, at first blush, seem to indicate that he might.

In fact, as a rule, the big city Hardwareman dwells in the doldrums. Conditions have been against him, and he has pegged away along regular lines, without the inspiration that the chance of a victory worth while would inspire. His store many times will be dirty enough to drive away the last remnant of the women's house furnishing trade. The windows are often unattractive, with displays unchanged for a month or two, and there is little attempt to specialize or divide the store into departments. The greatest semblance of activity is in the stores on the streets thronged by the suburbanites who are seeking the cars or ferries to take them to their homes. The commuters are good buyers of Hardware and auxiliary lines, garden hose, bolts, screws, hooks, hatchets, spades and hundreds of other things. The confirmed New York cliff dweller hardly knows a garden hose from a rubber tire.

Of course, there are conspicuous exceptions to this big city drying up of the exclusive Hardware stores—exceptions enough to prove that an intelligent and courageous conduct of the business will bring its due reward. Take the case of Hammacher, Schlemmer & Co., of New York, whose business is greater than that of many jobbing houses. Yet they are strictly retailers. That is, they sell to consumers, although some of their consumers, furniture manufacturers, for instance, all over the country, buy thousands of dollars' worth of goods from them yearly. The business of Hammacher, Schlemmer & Co. is departmentized to a fine point, and each branch, including the comparatively new one of apparatus for manual training schools, is strongly worked through salesmen and good literature from Mr. Park's advertising department.

The instance of White, Van Glahn & Co., in Chatham Square, and also Forty-second Street, New York, may also be cited as those of up-to-date Hardware stores, and there are a number of others in the metropolis. In Philadelphia J. B. Shannon & Sons and the Supplee Hardware Co. are conspicuous examples of the

success that may be wrought by modern window display and care and ingenuity in advertising.

Buffalo has two notable instances of what may be done in expanding a Hardware business through departmentizing the store and adding lines which, though kindred, are by no means part of the average Hardware dealer's stock. We refer to Walbridge & Co. and Weed & Co. One of these firms carries trunks, and recently had a fine trunk and bag window in at the height of the trunk-buying season. If course the business of these firms was partly an outgrowth of a firm foundation of many years' standing, yet in both we may rightly infer that their systematization of their business was in response to opportunity and prompted as well by a desire to counteract the efforts of department and ten-cent stores to run away with a portion of their business.

An intelligent metropolitan dealer recently said: "I have to carry a big stock, including the unusual things that people can find nowhere else. If a woman wants a clothes line or a refrigerator she will go into the nearest place. If she can get anything in my line elsewhere she will do it. But when a man or woman is stumped in the Hardware line, they will come to me." This dealer is ranked as among the successful members of the trade. Yet his store, though fairly large, is all cluttered up on the inside. There are no uniform stock boxes. House furnishing goods are not separated at all from other stock. The windows are fairly dressed, but the panes are small. The store is not on a par with the appearance of the rest of the establishments in other lines on the same street. Of course it is little wonder that women do not make it headquarters for house furnishing goods.

It is evident that to capture his share of the trade the average big city Hardware dealer must follow the lead of those we have mentioned who have modernized their business so successfully. True, more capital, higher organizing ability and closer systematization are required, but the city man by a stronger policy can hold and increase his trade.

AN ADVISOR OF SALESMEN.

A booklet issued by a St. Louis manufacturer contains the following advice for salesmen:

Do not make yourself unhappy by comparing your territory with that of a more fortunate man. If you will only be patient, his contentment and your desire may put you there.

There are two rules to follow in order to make a success of salesmanship. The first is to get the orders away from the other fellow. The second is to keep the other fellow from getting them away from you.

It does not pay to make a customer make a fool of himself.

An education may be a matter of pride, but it is not nearly as essential to success as are ambition, common sense, loyalty and health.

To make a really good impression on a customer you must make him pleased with himself rather than with yourself.

Don't reserve your good words of your competitor for a resolution to be sent to his bereaved relatives. Say them now, while he is alive and competing.

Much depends on knowing a big thing from a little one.

We all hear a heap of bad things said about us during our life time, but in the end we will find that the bad things that they didn't know about us will about offset the bad things they said about us, and that ought to help some.

PHILOSOPHY FOR BLACKSMITHS.

It is not often, but occasionally we receive a letter from a subscriber expressing discouragement and the conviction that the blacksmith trade is not attractive from any point of view, says the *Blacksmith and Wheelwright*. We have in mind one who wrote us the other day that he was "disgusted with the dirty, hard, poorly paid work." Now we are not going to say that this feeling does not come to many upon occasions. But the same sensation of unrest, weariness and dejection is sometimes experienced by those of every other trade, profession or calling.

Clergymen are despondent at the results of their preaching and praying; doctors are downcast at the effect of their diagnosing and prescribing; lawyers at their pleading and advising. Farmers get disheartened at the outcome of their plowing, sowing and reaping, and all other workers at the result of their toiling and mowing, their grunting and sweating. But in comparing one trade or profession with another it will be admitted that the blacksmith has a little the best of it in the matter of things which make for happiness. Possibly the farmer gets as good a combination of brain and hand-work, and that in the open air. But he lacks something in his free association with his fellowmen, which perhaps more than any other one thing gives true content. The blacksmith trade gives good digestion, bless-

ed sound sleep and independence; and these are the only sources of real happiness. As to fame and fortune, no man is master of them, the testimony of philosophers and wisacres to the contrary, notwithstanding. There was never a greater untruth uttered than that "Every man is master of his own fortune." No man is master of it. Every man is master of his own actions, of his own efforts, of his own relations with his fellowmen, but he is not master of his own fortune.

The wise old philosopher was right: It is not in the power of mortals to command success; but we can do more; we can deserve it. And when a blacksmith or those who pursue any other calling do this, when they are true to themselves and to their fellowmen, when they have made honest, earnest, sustained effort, they have really secured the only success that is worth achieving.

Possibly we have not made the foregoing sufficiently clear or pointed to encourage our friend who is "disgusted with the dirty, hard, poorly paid work," but this is its prime purpose.

CHEAP TOOLS MAY BE DEAR.

Complaint is often made by manufacturers of tools that certain parts of the country demand something cheap, cheaper as to cost price than really first-class tools can be made for.

This tendency to buy cheap tools is to be regretted, because tools whose purchase price is low are in fact, now cheap, as a rule, when the accuracy, durability and efficiency are borne in mind; but often in the end, for more expensive than the high grade tools.

These really very important facts are not carefully enough weighed by purchasers. Not only does the bother caused by an inaccurate tool cause great delay and often prevent the sale of the article made upon the tool, but the longer life of the fine tool usually makes it in the end cheaper.

It is well once in a while to stop and ask: "Where is there one great tool manufacturing concern that makes a specialty of cheap tools?" There is none. The cheap tool man, like the "Cheap John" man, never gets beyond the limits of the ordinary, either as to his product or his reputation. Besides, one never knows to what extent it is safe to guarantee goods made on a cheap machine.

In these times of fierce competition, quality goes far toward securing the business, and no man ever made a reputation for fine work by using cheap tools. "You can't make a silk purse out of a sow's ear," is an old adage that carries a large amount of truth with it. If you are a good mechanic you do not recommend your work as the cheapest; if you are a wise mechanic you will not buy the cheapest tools on the market, for that means that they are of the least value.—*Crow Bar*.

GEORGIA RETAIL HARDWARE ASSOCIATION.

At a well attended meeting at Macon, on the 17th ult., the Georgia Retail Hardware Association was formally organized. The new association has started on its career with a membership of about 60 of the best known merchants of the State. The following officers were elected: W. W. Robinson, Dublin, president; W. G. Raines, Statesboro, first vice-president; J. C. Hollingsworth, Dawson, second vice-president; C. M. Tillman, McRae, secretary-treasurer. The Executive Committee comprises Messrs. Robinson and Tillman and J. J. Golden, Tifton; D. A. Smiley, Claxton, and George W. Woodruff, Winder. M. L. Corey, Argos, Ind., secretary of the National Retail Hardware Association, was present at the meeting and took a conspicuous part in the proceedings. It was determined to hold the next meeting at Tifton.

DISTRIBUTION OF PATENT OFFICE MODELS.

It appears, according to an act of Congress passed on June 22, 1906, the Secretary of the Interior is authorized to dispose of a part or all of the model exhibit of the Patent Office, either by sale, gift, or otherwise. Acting Commissioner E. C. Moore has issued a notice to the effect that immediate requests from polytechnic schools and colleges having technical courses for portions of the exhibit will be considered in the disposition of the models.

It is presumed that the pressing need of additional space in the Patent Office building is the reason for this general clearing out of models.

An opportunity is now afforded for technical schools to secure models of interesting and well-known inventions pertaining to important industries. Inquiries should be addressed to the Commissioner of Patents, Washington, D. C.

There is no accounting for the lack of sentiment displayed by some public officials. A Kansas City judge recently sentenced a boy to school for the feeble-minded because he had a mania for kissing pretty girls.

PROFIT MAKING LINES

A merchant is not so much interested in the volume of his sales as in the net profits, and his profits depend on the class of goods he sells.

The J. Stevens Arms & Tool Co. of Chicopee Falls, Mass., have given careful consideration to the matter of the merchant's profit, believing that the merchant of to-day demands goods not only having intrinsic value and that satisfy the trade, but goods that

STEVENS' ORIGINAL FACTORY PLANT.

bear the seller a profit greater than the expense of conducting his business.

The tendency of merchandising to-day,—mainly because clerks in the large stores are mere machines,—is to sell goods that there is a demand for, in fact that which sells easiest. Realizing this condition, the Stevens Company have for some time carried on a publicity campaign among consumers, so when a boy, youth or man thought of firearms, he would immediately associate "Stevens" therewith, and if he desired to buy, would inquire of the

have 1500 regular employees on their pay-roll, and are unable to supply the demand—i. e.—the demand for their goods increases faster than their increased capacity can manufacture them.

Ten years ago they could fill orders complete. To-day they are unable to fill an order for assorted rifles, for pistols, for double barrel shot guns, or for single barrel shot guns complete. This shows that the goods are popular with the masses, give satisfaction and have merit, else this steady increased demand would not continue, for the Stevens firearms have been on the market over forty years, and justly earned the reputation they bear for accuracy, durability and workmanship surpassed by none. For extreme accuracy in target work the Stevens and Stevens-Pope rifles hold all records at home and many abroad. The Stevens-Pope barrels as now made are superior in every way to those heretofore supplied, and for target shooting Stevens, Stevens-Pope and accuracy are synonymous.

Some time since when the United States Government team was sent to Bisley, England, to compete for the Palma trophy against the picked teams of other nations, the United States Government rifles were sent to the Stevens factory to be equipped with their barrels, and with the rifles thus fitted won the trophy about which, later on, there was so much contention which finally resulted in the return of the trophy, because the rifles used were not of government make entire. The English report stated "The United States team had their rifles fitted with superior barrels of a private maker," proving conclusively the superiority of the Stevens production.

The J. Stevens Arms & Tool Co. made shot guns 35 years ago in a small way for about 10 years, then discontinued the shot gun department, owing to the high cost of manufacture, and devoted their energies to rifles and pistols, but in 1901 they again took up the manufacture of single barrel shot guns, and immediately took first place in volume, variety and quality. The follow-

retailer for the same, thus creating a demand that the retailer could easily supply at a satisfactory profit.

The Stevens Company impress on the consumer that goods of their manufacture are high in quality, yet low in price, and this especially appeals to the "Bargain-Hunter," and this includes nearly all of us. Everyone tries to get the best possible value for the money expended, hence if Stevens Firearms are so advertised as to create a demand therefor, give the purchaser satisfaction, and the merchant a profit, it is certainly the ideal line for any distributor to handle.

That the Stevens policy is along popular lines is shown by their having many imitators, some copying their entire plan bodily. The high quality of the Stevens goods and the popular prices, with the Stevens profit to the distributor and price protection have resulted in their phenomenal growth, as ten years ago the J. Stevens Arms & Tool Co. occupied the building shown in cut, Fig. 1, had "rooms to let" and employed but 44 workmen. They own and occupy to-day three large factories, giving them over eleven acres of floor space, are constantly adding to their present space, which is everywhere crowded to its limit, and have rented all available room in proximity to their factories. They

ing year they added double barrel hammer guns, and in 1903 double barrel hammerless, and are now the largest makers of popular priced double barrel shot guns in America, and having passed the experimental stage in the shot gun department, are supplying strictly first class goods at moderate prices, giving at all times value received, to the satisfaction of the user, as well as profit and protection to the distributor.

During the past six years they have added two or three distinct new rifles or shot gun models every year, until they have the largest line of any firearms maker either at home or abroad. Their line includes rifles; telescopes and accessories such as cleaning rods, gun grease, etc., etc. They are also makers of the Stevens-Duryea Automobiles.

THE COY MAIDEN.

"And hast thou ever loved before?"

He asked. "I pray thee, speak!"

She blushed. Her sweet eyes sought the floor.

She answered, "Not this week."

—Baltimore News.

A SAFE RAZOR FOR CORNS.

Shaving razors are not made to cut corns. To so use them is awkward and dangerous. Here is a razor made purposely to cut corns properly and safely. It has a short blade with rounded end, rigid handle and a safety guard, which enables one to pare off the corn without a possibility of digging or gashing either toes or thumb. It is the Star Safety Corn Razor, made by the makers of the Star Safety Shaving Razor, and equal to that famous razor in quality and efficiency.

STAR SAFETY CORN RAZOR.

Kampfe Brothers are advertising the Star Safety Corn Razor in spaces of from one-quarter to one-half pages in the leading publications of the country best adapted to their use. The total circulation of the periodicals used is seven and one-half million copies per issue. With the first order from a dealer of not less than one dozen Star Safety Corn Razors, they furnished a black cloth show case, doe-skin lined with a glass top and a neat glass sign, having six Corn Razors on display and six in the lower compartment. For the dealer who takes advantage of the publicity given to an article of merit which is extensively advertised by advertising locally this same article, Kampfe Brothers will furnish electros of the Star Safety Corn Razor for use in local newspapers.

WITH GUARD THROWN UP.

Each Corn Razor is enclosed in a black leather pocket for protection. This illustration shows guard thrown part way back for cleaning or sharpening. The blade can be stropped like a regular razor. When in use the guard fits over the blade. The restricted retail price is \$1.00 each, which shows a liberal profit to the dealer. Descriptive booklets and quotations will be mailed to any dealer mentioning **HARDWARE**.

MANUFACTURE OF GALALITH.

NEW FACTORY AT PARIS—SHAPE OF PRODUCT.

The manufacture of galalith, a new composition made from casein that is likely to supplant celluloid and other substances, was recently reported on by Consul Brunot, at St. Etienne. Further particulars furnished by Vice-Consul-General A. E. Ingram, of Paris, in connection with a factory established at Levallois-Perret (Seine), just outside of Paris, will also prove of interest, owing to the many inquiries on the subject:

This company has also a factory at Harburg-sur-Elbe, Germany, and the factory at Surgeres (Charente Inferieure), mentioned in the former report on the subject, is devoted simply to the separation of casein from milk for this purpose. Galalith is a plastic substance made by a patented process from the casein in skim milk, 60 liters (126.78 American pints) of skim milk furnishing 1 kilogram (2.20 pounds) of galalith. This substance is made in all colors, and excellent imitations of tortoise shell, amber, coral, ebony, horn, etc., are produced. It possesses the advantage over celluloid in being odorless and absolutely inflammable, since it contains no camphor or similar ingredients. In hardness it resembles horn, and it can be worked in a similar manner; it takes a high polish, and is not affected by oils, ethers, benzine, etc.

The material is now being sold, in the rough, unpolished state, in plates about 15.74 by 15.74 inches or 19.68 by 31.49 inches, or in rods 29.52 inches to 39.37 inches in length, at net prices varying from \$0.96 to \$1.54 per kilogram, depending upon the color. The plates are approximately 1.16 inches in thickness, and the rods 3.16 inches in diameter.

THE SUCCESSFUL SUITOR.

He laid his true heart at her feet.
His rival better planned
Who laid, with shrewdness hard to beat,
His check book in her hand.

—Philadelphia Ledger.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED JULY 16, 1906.

- 406,918. WASHING MACHINE. J. L. Knoll, Lebanon, Pa.
- 406,957. VISE. C. H. Robinson, St. Paul, Minn.
- 406,980. DOOR FASTENING. E. N. Warner, Rocky Hill, Conn.
- 406,993. COMBINATION TOOL. J. T. Carter and W. Koepe, Warrenton, Tex.
- 407,055. POCKET KNIFE. W. Brede, Hamakua, Hawaii.
- 407,130. WASHING MACHINE. D. D. Shannon, Ovid, Mich.
- 407,152. WASHING MACHINE. G. M. Beck, Frankfort, Ind.
- 407,228. WASHING MACHINE. G. M. Miller, York, Pa.
- 407,262. COMBINATION LOCK. J. F. Thompson, Chicago, Ill.

PATENTS ISSUED JULY 17, 1906.

- 825,889. STOVEPIPE THIMBLE. T. W. Bright, Elk, W. Va.
- 825,939. WASHING MACHINE. J. H. Schoregge and T. Schoregge, Sioux Falls, S. D.
- 825,943. INVISIBLE HINGE. J. Soss, New York, N. Y.
- 826,049. SAW HANDLE. O. F. McKinney, Montesano, Wash.
- 826,153. WRENCH. A. H. DeGross, Little Genesee, N. Y.
- 826,187. DOOR KNOB ATTACHMENT. J. L. McSpadden, H. L. Wilkie and W. H. Lewis, Detour, Mich.
- 826,353. COUPLING RETAINING MEANS FOR METALLIC HOSE. R. B. Panton, Williamsport, Pa.
- 826,401. WRENCH. C. C. Bull, Lester, Iowa.

PATENTS EXPIRED JULY 23, 1906.

- 407,333. SAW HANDLE. J. A. Corey, Rockville, R. I.
- 407,357. DOOR HANGER TRACK. J. G. Lane, Poughkeepsie, N. Y.
- 407,371. NAIL EXTRACTOR. A. Rosenberger, Chicago, Ill.
- 407,405. LATCH. Wm. Kneen, Barrow-in-Furness, County of Lancaster, England.
- 407,436. SIGNAL LANTERN. A. R. Gibson, Cleveland, O.
- 407,438. SAW SET. M. H. Gross, Abilene, Kans.
- 407,453. WASHING MACHINE. D. Savage, Bloomsburg, Pa.
- 407,470. LOCK. O. B. Haglund, Nykoping, Sodermannland, Sweden.

PATENTS ISSUED JULY 24, 1906.

- 826,554. SADDLE IRON. A. J. Farrell, Litchfield, Ill.
- 826,579. COMPOUND TOOL. W. B. Jones, Quito, Tenn.
- 826,728. PIPE WRENCH. J. G. Lind, Providence, R. I.
- 826,762. GARDEN CULTIVATOR. T. K. Colegate, Harveyville, Kans.
- 826,769. SLIDING JAW WRENCH. A. D. Davis, Baggs, Wyo.
- 826,894. HANDLE FOR TOOLS. R. H. Shaller, Forestville, Conn.
- 826,921. SAW HANDLE. J. W. Cox, Darling, Miss.

PATENTS EXPIRED JULY 30, 1906.

RECENT TRADE PUBLICATIONS.

WHITE WAGON WORKS, Sheboygan Falls, Wis. Illustrated catalogue of Combined Coasting Wagons and Sleighs. These wagons are known as the Pony, Teddy, Coaster-Express, L. & C. Portland Special, Our Bob, Our Joe, Reciprocity Bill and Big Four. These goods are such as would appeal to juveniles, and would prove strong sellers wherever introduced.

HILL-STANDARD MFG. CO., Anderson, Ind. Booklet entitled "Facts About Tool Holders." Illustrations and descriptions are given of the Hill Diamond Point Turning Tool, Off-Set, Cutting-Off Tool Holders, Straight Shank Cutting-Off Tool, Boring Tool, Side Tool, Eberhardt Turning Tool, Threading Tool, U. S. Standard Cutter, Drop-Forged Lathe Dogs, Key Seaters, Machine Vises, Crank Turning Devices, Drill Holders, Automatic Cold Saw Cutting-Off Machines, etc. The catalogue may be had for the asking.

ANDOVER STAMPING CO., Andover, N. Y. Catalogue "1" of Household Specialties, illustrating a large variety of goods, including their Favorite Roaster, Furniture Polish, Numbering Plates and "New Era" Cooker Combination. A line of Silica Steel Enameled Ware is also shown, including Tea and Coffee Pots, Tea Kettles, Pie Plates, Pudding Pans, Preserving Kettles, Sauce Pans, Wash Basins and Dish Pans. The Alberta Cooking, Preserving and Steaming Kettle is described and illustrated, their new Patent Bake Pan, Combination Dipper, New Queen Chopping Knife, Perfect Scraper and Cleaner, Perforated Kettle Cover, Acme Door Holder, Raymond Carpet Whip, Shaker Sifter, Self-Sealing Pie Tins, Gilmore Grater, Hoyt's Patent Spring Clothes Pin, etc., etc. Every article necessary to the household will be found within its pages, and the dealer should write for the same.

SAMUEL WINSLOW SKATE MFG. CO., Worcester, Mass. Ice Skate Catalogue for 1906 illustrating their Hockey Skates, under the names of "College Hockey," "College Hockey L" and "Janus." Canadian pattern, for men and women; St. Nicholas Rink Skates, with heel button and key toe clamp; Wood Top Skates, with full strap and heel screw; "National Club" Skates, Speed Skates, Skates for Sailing, Children's "Double Runner" Skates, and Ankle Braces to be attached to any skate. A telegraph code is also included, and instructions for ordering goods, as well as a price list. This company also issue a special Roller Skate Catalogue. Either catalogue may be had upon application.

FERROSTEEL COMPANY, Cleveland, Ohio. Catalogue of Registers and Ventilators in various designs, including Moorish and Plain Lattice; Wrought Steel One-Piece Screens, Asylum Registers, Convex Wrought Square Registers for shallow flues and thin partitions; Convex Circular Top, Moorish; Round Registers, Faces and Borders, Round Gratings, Heavy; Ventilators, Ventilating Plates, Smoke Pipe Registers and Ceiling Plates, Pedestal Registers, Special Side Wall Registers, Wall Frames, etc., etc. Dimensions are also given, and a price list is included. In a prefatory note, the manufacturers say: "We have practically attained the ideal conditions desired by all users of Wrought Steel Registers, namely, a maximum of air capacity combined with rigidity, strength and lightness. Wrought Steel Registers are much lighter than Cast Registers and it is also true that they do not break; on the other hand steel has certain well-known inherent properties that Cast Iron has not. We believe by careful attention in construction that we have minimized these properties and that the Ferrosteel Company's Wrought Steel Register is the most desirable of any of this type of goods now before the public."

PHOENIX WIRE WORKS, Detroit, Mich. Catalogue No. 32 of Window Guards, Door Grilles, Transom Grilles, Balcony Railing, Stair Railing, Area Railing, Illuminating Sidewalk Tiling, Concrete Sidewalk Tiling, Ornamental Stairs, Fire Escapes, Porticoes, Wrought Iron Gates, Hay Racks, Mangers, Water Troughs, Hitching Posts, Stall Partitions, Wickets, Wickers, Counter Railing, Office or Bank Railing, Floor Railing, Elevator Enclosures and Cars, Steel Wire Fence, Settees, Chairs, Entrance Gates, Weather Vanes, Cresting, Mausoleum Doors, etc. These goods are made in very handsome and artistic designs, and the catalogue will prove an interesting one.

THOMSON DROP FORGE CO., Plantsville, Conn. Booklet of their "Indestructible" line of Screw Drivers. Included in the contents is the "Sterling" and "Economy" Machine Screw Driver, "Sterling" Pony and Cabinet Screw Driver, Thomson's Drop-Forged Special Screw Driver, "Sterling" and "Economy" Ice Pick, "Sterling" Awl and Drop-Forged Screw Driver Bits.

GEORGE H. STAHL, Quincy, Ill. Illustrated descriptive catalogue of Excelsior Incubators and Brooders, showing the Standard Excelsior, Simplex-Excelsior, Perfected Excelsior, The Wooden Hen, I. X. L. Hen and Brooder Combined, New Excelsior Compartment Brooder and Hen Brooder. The Excelsior Infant Nursery for use by hospitals and physicians is also shown. Various Poultry Foods are described, and Grinding Mills, Clover Cutters, Corn Shellers, Water-Proof Papers for Poultry Houses, Egg Testers, Drinking Fountains for poultry, Galvanized Wire Netting, Handy Carriers, Shipping Boxes, Sprayers, Feed Cookers, etc. Testimonials from every part of the United States are given, as well as from Canada and Cuba, and those interested in this line of goods should write for the catalogue. The Incubators are claimed to be economical and perfect hatching, absolutely reliable and self-regulating.

EAGLE LOCK CO., Terryville, Conn.; New York office, 105 Chambers Street. Illustrated catalogue and price list of Padlocks, including Cast Bronze, Brass and Steel Pin Tumbler Padlocks, Cast Brass Push Key Padlocks, Secure Lever Padlocks, Brass and Steel Master Keyed Padlocks, Corrugated Secure Lever Padlocks, Brass and Steel Spring Padlocks, Combination Padlocks, Secure Lever Bicycle Sprocket Locks, Eureka Padlocks, Assorted Padlocks, Self-Locking Hasp Locks, Dog Collar Locks, etc.

SILVER & CO., 304-314 Hewes Street, Brooklyn, N. Y. Catalogue No. 16 of House Furnishings. A line of Coffee Pots is illustrated under the names "Marion Harland" and "Old Dominion;" Royal and Crown Roasters; Round-Loaf Baking Pans, Cake Moulds, Perforated and Plain Bread Pans, Potato Mashers, Fruit, Beef Tea and Cabbage Presses; Egg Poachers, Timers and Beaters; Bread Cabinets, Toasters, Broilers, Steam Cookers, Flour Bins, Alcohol Stoves, Measuring Glasses, Ice Cutters, Glass Rolling Pins, Sink Strainers, Night Lamps, Gas Burners, Milk Sterilizers, Lemon Squeezers, Soap Dishes, Bath Tub Seats, Bath Cabinets, Oil Heaters, Oil Cook Stoves, Gas Heaters, Gas Cooks, Hot Plates, Ovens, etc., etc. This will be found a very interesting and complete catalogue.

ONEIDA COMMUNITY, LTD., Oneida, N. Y. Illustrated price list of Game Traps and Chains, which includes their Newhouse Game Trap, for rats, gophers, muskrats, minx, foxes, otter, beaver, wolves, bears and grizzly bears. The company also illustrate their Newhouse Clamps, Wolf Trap Wrenches, Victor, Hawley and Norton Traps, Jump Traps, Halter Chains, Dog Chains, Coil Chain, Cow Chains, Picket Chains, Wagon Chains, Sash, Trace and Key Chains, Dog Collars, Snaps, etc. They also give some illustrations of their "Avalon" design in "Triple-Plus" Silverware, and a few pieces of the plainer styles of their manufacture. Particular attention is called to their department of Fruits and Vegetables, of which the company say: "Since 1851 we have packed at Oneida, N. Y., a line of Fruits and Vegetables raised, as far as possible, on our own large farm. The fact that we are located in the very finest territory for growing vegetables and many of the fruits, together with the scrupulous care we have always employed in packing, and the fact that we are able to harvest each crop at the moment when it has reached its highest perfection, and put each product in the cans fresh from the fields—these advantages, aided in later years by accumulated experience, have built up a reputation for our food products in which we have always taken a pardonable pride. We are willing to furnish to customers of our other departments, for use in their own families, sample assortments at wholesale prices. A complete list will be sent upon application, showing over 225 varieties, including Fruits, Vegetables, Jellies, Jams, Fruit Soups, Poultry, Soups and Mince Meat."

NEW GOODS AND SPECIALTIES

WAUPUN WATER MOTOR.

The Althouse-Wheeler Co., Waupun, Wis., are introducing to the trade a line of Water Motors, as illustrated herewith. They are made in sizes ranging in power from that of a sewing machine up to 5 h. p. or more. The power of the motors depends upon the water pressure, as, for instance, if the pressure from water works in a city or town is from 25 to 50 pounds to the square inch, the No. 0 motor, the smallest the company makes, will develop $\frac{1}{8}$ h. p., while with a pressure of from 50 to

WAUPUN WATER MOTOR.

100 pounds the same motor develops $\frac{1}{4}$ h. p. The motors are referred to as powerful and durable, giving power that can be instantly applied, and are so simple that they can be operated by any one. Among points of excellence the following are mentioned: That compared with steam engines, the first cost is less; that they cannot freeze up, that they make no dirt nor noise, and that they take up very little floor space. The motors are especially designed to give every ounce of power that can possibly be obtained from the water used. They are alluded to as first-class in make and finish, having iron cases and steel shafts, with adjustable bearings to take up wear. The motors are adapted to driving ice cream freezers, jeweler's and dental lathes, dynamos for electric lights, scroll saws, telephone generators, coffee roasters, meat cutters, washing machines, sewing machines, coffee and spice mills, exhaust fans and blowers, etc.

ROSE AUTOMATIC KNIFE AND SCISSORS GRINDER.

Colonial Supply Co., Wellsville, N. Y., are placing upon the market the Rose Automatic Knife and Scissors Grinder, put up in an attractive and convenient form to meet with a ready sale, and will be noticed in the illustration herewith. This is

ROSE AUTOMATIC KNIFE AND SCISSORS GRINDER.

claimed to be the only practical device for sharpening and keeping sharp the knives and scissors of the household. The manufacturers for special introduction make the following offer on first order only. They will ship this handsome display case and one dozen Grinders just as shown in cut, all charges prepaid, anywhere in the United States, to any merchant giving his order to their salesmen—otherwise all goods are sold f. o. b. factory Philadelphia. Rose Grinders are packed in cartons of one dozen.

DANDY CLOTHES LIFTER AND DRAINER.

Theo. J. Ely Mfg. Co., Girard, Pa., are the manufacturers of a useful device, which is marketed under the name of the Dandy Clothes Lifter and Drainer, and of which we give a couple of illustrations. By the use of this Lifter and Drainer the clothes may be lifted out of a wash boiler without the use of a stick or other devices. In Fig. 2 the drainer and lifter device is

FIG. 1.—ELY'S DANDY CLOTHES LIFTER AND DRAINER.

shown in the boiler. The clothes are held up from the bottom of the boiler to permit the water to flow freely through them, thus materially assisting in the cleaning process. When removing the clothes from the boiler one end of the drainer is lifted to the top of the boiler and suspended on the edge of the boiler by the lower offsets in the uprights. The other end of the drainer is then lifted in the same manner, in which position

FIG. 2.—CLOTHES LIFTER AND DRAINER IN BOILER.

it is firmly held, permitting the water to drain out, after which the clothes may be lifted to the tub. The device may also be used when preserving fruit, permitting the cans filled with fruit to be placed near the bottom of the boiler, from which position they may with care be lifted to the top and sealed. The device is made to fit Nos. 8 and 9 boilers.

WIDE RANGE DRILL CHUCK.

Wide Range Drill-Chuck & Tool Co., Inc., Muncie, Ind., are the manufacturers of the Wide Range Drill-Chuck illustrated herewith. The special points of merit are:

That it is a positive drive and will take practically any drill manufactured without readjusting the chuck in any way. It will also take any and all drills that have had the tangs twisted

WIDE RANGE DRILL CHUCK

off or been worn smooth in a friction chuck and thrown aside as useless, which means a very material saving to any manufacturer; that it is very simple, having no complicated parts to be replaced and no wearing parts to make repairs on the chuck

cost more than its original price. It is steel throughout, and in placing it on trial the manufacturers have always invited the severest trial possible, with the result that it has stood up under every test made. It is self centering and always true, the mechanism of the chuck compelling it to come up true when tightening the chuck. It is very small and compact and perfectly smooth, and taking the range of the drills it will hold into consideration, it is claimed to be the smallest chuck on the market; consequently will drill holes nearer an angle or corner than any similar chuck.

RIEK'S CHRISTMAS TREE HOLDER.

Rhineland Mfg. Co., Rhineland, Wis., are manufacturing the Christmas Tree Holder shown in the accompanying illustrations. In Fig. 1 it is shown ready for use, and in Fig. 2 folded for shipping or storing. The standard is made of band iron, $\frac{1}{8}$ inch thick and $\frac{3}{4}$ inch wide. The base measures 16 inches and is 10 inches in height. As seen in Fig. 2, the base pieces have the same contour, but are of slightly different size, so as

RIEK'S CHRISTMAS TREE HOLDER.

to fold one within the other. There are holes in the pieces at the bottom, through which screws are to be driven to securely hold the device to the floor of the room or whatever the holder may stand upon. The spur which the parts turn is also used to set the butt of the tree on, so that it will remain stationary at the bottom. The four terminals of the holder have threaded holes near their ends, to take the thumb or binding screws.

FOLDED FOR SHIPPING OR STORAGE.

The tree trunk is passed inside the ring and between the terminals and rests on the spur below. The thumb screws are turned so as to force their points into the trunk of the tree. The holder is thus suitable for use on different size trees down to three inches in diameter, and by the adjustment of the screws the tree may be brought to a vertical position and held there without the use of wires or braces. The holder is finished in green enamel, is neat in appearance, convenient, occupies little space, and the manufacturers claim, will last indefinitely. The holders are carefully put up in 1, 2, and 3 dozen packages, weighing 33 pounds to the dozen.

CAREY'S "STOP-A-LEKE" STYCK.

The Philip Carey Mfg. Co., Cincinnati, Ohio, are introducing to the trade Carey's "Stop-a-Leke" Styck, which we illustrate herewith. It is an elastic compound, in stick form, that will not dry out or become brittle. It can be used during any season of the year, in all climates, as it is unaffected by extremes of heat or cold. In use the leak is prepared by brushing or scraping

CAREY'S "STOP-A-LEKE" STYCK.

away the particles of dust or dirt from around the leak, and then some of the Stop-a-Leke is rubbed into the leak, filling up

the aperture with the same, using for the purpose an ordinary putty knife or some similar tool. In making repairs to water-soaked wooden surfaces, such as boats or wooden tanks, after the surface has become dry, apply the elastic compound and it will stick without difficulty, and it will be impossible for the action of the water to wash it away from the leak. It is claimed to mend leaks permanently and quickly in any kind of roof, around skylights, dormer windows, chimneys, down spouts, gutters, valleys, etc. It is also especially adapted for stopping leaks in boats, water tanks, water jackets, buckets, sprinkling pots, barrels, slop pails, water troughs, tubs, etc. The Styck is $1\frac{1}{4}$ inches in diameter by 10 inches long, and is always ready for use.

DIAMOND HOUSEHOLD HATCHET.

The Diamond Shear Co., Wilmington, Del., are the manufacturers of the Diamond Household Hatchet, an illustration of which accompanies this article. It is claimed by the manufacturers to be a Hatchet that will never come loose in the handle in any service. The handle is first inserted in the eye of the semi-steel casting head, which in casting is made a suf-

DIAMOND HOUSEHOLD HATCHET.

ficient distance apart to allow the handle to pass the spuds, then by machinery the head is forced together. The spuds enter the handle and the high carbon steel blade is placed in position and securely riveted by machinery, making a stiff, compact hatchet for family use, the whole weighing the same as a regular hatchet, which can be retailed at a moderate price, paying the dealer a satisfactory profit. They are put up in boxes of half dozen each, labelled and sold f. o. b. factory.

BOSS ADJUSTABLE HOOK HUSKER NO. 59.

The Boss Manufacturing Co., Kewanee, Ill., are manufacturing a large line of Gloves and Mittens, Corn Huskers, etc., which are well illustrated and described in their catalogue. One of the most popular Huskers is their New Adjustable Hook

BOSS ADJUSTABLE HOOK HUSKER NO. 59.

Husker, Style 59, of which we give an illustration. It has strong steel shield with steel hook, capable of fourteen different adjustments on the hand, the leather used being strong, soft and pliable. They can be furnished in left hand when desired. These goods are standard throughout the country and may be relied upon as giving universal satisfaction. The company manufactures exclusively for the wholesale and jobbing trade.

"DUCK" IMPROVED ROLLER BICYCLE BRAKE.

The New York Sporting Goods Co., 17 Warren Street, New York, are offering the trade the "Duck" Improved Roller Bicycle Brake, of which we give two illustrations. The two rubber rollers of the Brake are pressed to the tire of the front wheel of the bicycle, but as there is no friction between the rubber rollers and the tire there is no injury to the tire. When the

"DUCK" IMPROVED ROLLER BICYCLE BRAKE.

pressure is applied to the lever the rollers come in contact with the tire, but the friction is solely between the hardwood spool and the steel washers upon the ends of the forked axle of the brake. The brake is easily applied to a bicycle. The lower half of this brake can be combined with the regular long-handled lever common on bicycles, and this part is sold separately

WHEN APPLIED TO THE LONG LEVER OF CYCLE.

if desired. Ladies or inexperienced riders prefer the long lever on the Brake, as it can be worked without removing the hand from the grip, but the average rider uses the thumb lever, as it does not encumber the handle bar. The lower half is made $4\frac{1}{2}$ inches long for 20 and 22-inch bicycles, and $5\frac{1}{2}$ inches for 24 and 26-inch bicycles.

"LABOR PROBLEM VS. DIVIDENDS."

A pamphlet of sixteen pages has recently been published of which T. S. Laughlin, president of The Thomas Laughlin Company, Portland, Maine, is the author, which exhaustively deals in the detailed information required by manufacturing companies, that would suggest new thoughts to the employer and employee, demonstrating to them how small a leak in the matter of labor destroys profits and how a little added difference in the matter of labor augments the profits. He says:

"The writer has had practical experience in the matter of labor, as he worked before and behind the anvil in a blacksmith shop for over twenty-five years, starting forty years ago with a single forge and helper as a shipsmith for local work. In 1870 only two customers were added outside the city of Portland; from which has grown the Thomas Laughlin Company, who are manufacturers of the largest line of marine Hardware and fittings in the United States, and whose products are sent to all parts of the world. This has been largely accomplished by always keeping in view three things: modern methods in manufacturing; the

greatest output for the least labor, and a constant improvement in quality. The successful outcome has been three-fold: Lower prices to our customers, higher salaries and wages to our em- that well-known maxim of the buyer, 'Never be satisfied with the present cost.'

We take a few extracts from the contents of the pamphlet, which will indicate its value in reference to the objects to be attained, taking only a single paragraph from under each head.

REDUCTION OF HOURS TO MAKE STOCK WORTHLESS.

If a corporation with fifty thousand dollars capital, employing 50 men at \$3.00 per day, of 10 hours, and working 300 days per year, was making a net profit of \$3,000 per year, or 6 per cent. on its capital stock, and its workmen should demand 8 hours per day instead of 10, without doing any more work per hour, it would amount to a loss of \$9,000 per year, equal to 18 per cent. on its capital stock.

AMOUNT OF INCREASE TO PAY DIVIDENDS.

A corporation with \$50,000 capital, and employing 200 men at \$3.00 per day and not making any profits to pay dividends, could make \$3,000 per year or 6 per cent. on its capital if the product of its employees could be increased one and two-thirds per cent. on the wages paid, or 5 cents per day on each man.

EXTENT OF IMPROVEMENTS NECESSARY TO PAY DIVIDENDS.

A corporation having a capital of fifty thousand dollars, and employing 200 men at an average of \$3.00 per day, of 10 hours, and working 300 days in the year, and was making no profits with which to pay dividends, and improvements could be added so that each man could do one minute more work in each hour, such addition would amount to enough to pay 6 per cent. on its capital stock.

LOST TIME REQUIRED TO STOP DIVIDENDS.

A corporation with a capital of \$50,000, employing 200 men at average wages of \$3.00 per day, of 10 hours, and working 300 days in a year, and making only 6 per cent. on its capital, would not be able to pay any dividends on its capital if the 200 men employed should lose one minute in every hour. If this same number of men should be employed at \$2.00 per day, a loss of $1\frac{1}{2}$ minutes each hour would accomplish the same result. If the same number of men were employed at \$1.00 per day, a loss of three minutes each hour would make the stock worthless as an investment.

REDUCTION OF WAGES NECESSARY TO PAY DIVIDENDS.

A corporation with a capital of \$50,000, and employing 200 men, at \$3.00 per day, of 10 hours, and working 300 days per year, and not making profits from which to pay dividends, by a reduction of 5 cents per day from each man or 1 2-3 per cent., would amount to \$3,000, or 6 per cent. on the capital stock. If the wages paid were \$2.00 per day, working the same number of hours per year, it would be necessary to make a reduction of 5 cents per day from each man, or $2\frac{1}{2}$ per cent. from his wages, which would amount to 6 per cent. on the capital stock.

PROFITS REQUIRED TO GET DIVIDENDS.

A corporation with a capital of \$50,000 and doing a business of \$50,000 per year, would require a net profit of 6 cents upon every dollar's worth of goods sold to pay 6 per cent. on its capital stock.

If the same corporation should do a business of \$100,000 per year, it would only be necessary to make 3 cents on every dollar's worth of goods sold in order to pay 6 per cent. on its capital, and if it should do a business of \$200,000 per year, a net profit of 1 1/2 cents on every dollar's worth of goods sold would pay 6 per cent. on the investment.

NET PROFIT ON EACH MAN TO PAY DIVIDENDS.

A corporation having a capital of \$50,000, employing 200 men, it would only be necessary to make a net profit of 5 cents per day on each employee in order to make 6 per cent. on its capital stock.

NUMBER OF HOURS TO PAY LABOR DIVIDENDS.

A corporation with a capital of \$50,000 and employing 50 men at \$1.00 per day of 10 hours, working 300 days per year and making a net profit of \$3,000, or 6 per cent. on its capital stock, would have to run 8 hours per day to pay for its labor, and the extra 2 hours to make \$3,000, or 6 per cent. on its capital stock.

HUMOROUS LOGIC.

This is an age of progress. We have the horseless carriage, the smokeless smokestack and the payless insurance companies.

Unquestionably it will take a long time to try the Thaw murder case. It is said the estate is worth \$40,000,000.

Fire insurance companies are raising their rates, to get back the money they refuse to pay the San Francisco people.

Of course we all know the American girl marries the titled foreigner merely because he is irresistible. But why do the titled foreigners marry our American girls?

This packing house scandal is more far-reaching than some may imagine. A Des Moines man named Pigg has applied to the court to change his name.

THE WAGNER STEEL SLEDS.

The Wagner Mfg. Co., Cedar Falls, Iowa, are manufacturing a line of Steel Sleds and Coasters, which for strength and durability bid fair to take a leading position among articles of this kind of kindred utility. We present an illustration of their Steel Sleds, which comprise eight different patterns, and 18 different numbers. Among numerous points of great advantage

for a lady's skate, in the muff. They are made in six sizes, from 1 to 6, and in styles as follows:

- No. 80, "Chase," Pigskin, Black, Cloth Lined; strong and durable.
No. 81, "Chase" Pigskin, Tan Color. Extra Heavy, with durable cloth lining

THE WAGNER STEEL SLED.

claimed over other sleds by the manufacturers is the fact that they have a T shaped rounded bottom steel runner, and half-circle benches or knees, the latter so constructed that the circle of the outer support braces against the circle of the inner bow-shaped support, the two being securely riveted to an L shaped steel beam, or top cross-piece, to provide great strength at the place where strength is required on the sled. The runners are made of rounded bottom T steel to insure speed and easy running. The braces come down, one on each side of the runner, and are

No. 82, "Chase" Seal Grain, Dark Green. Extra Heavy, with double cloth lining.

No. 83, Leather, Black.

Wallets for racing skates (sizes 5 and 6) made in grades, No. 81, 82 and 83 only.

The Company has greatly improved its line of Folding Pocket Skates by adopting a reinforced clamp, by which the strength of both heel and toe clamps has been increased.

STEVENS OFF-HAND TARGET PISTOL NO. 35.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are placing on the market the Target Pistol shown herewith. It was brought out to supply the demand for a Target Pistol heavier

STEVENS OFF-HAND TARGET PISTOL NO 35.

SHOWING THE STRENGTH OF SLED.

riveted through its upper part. The runner is therefore firmly held in place in being braced on each side, and this form of construction obviates the use of rivets on the rounded bottom, the heads of which would be liable to catch snow and ice or form some other sort of obstruction. The sleds are finely decorated and of a design that will make them popular.

MARTIN WATERPROOF SKATE WALLET.

The Martin Skate Co., Old South Building, Boston, Mass., are the makers of a line of Waterproof Wallets designed es-

pecially to carry the Martin Skate in most compact form. Each Wallet carries a pair of skates, one in each of the pockets to prevent scratching, which can be carried in the pocket, or

than the "Diamond," at a popular price. The No. 35 Off-hand Target Pistol has a heavy butt, which has made the "Lord," "Conlin" and "Gould" so popular because of their "balance" and "hang." It will be supplied with a 6-inch barrel, weighing 1 lb. 6 oz., and with an 8-inch barrel weighing 1 lb. 10 oz. It is designed for the use of 0.22 and 0.25 rim fire ammunition, the 0.22 handling 0.22 short, 0.22 long, 0.22 long rifle and 0.22 Stevens-Pope armory cartridges. It will be guaranteed to have the accuracy for which Stevens pistols and rifles have earned an international reputation.

CARELESS SHIPMENTS.

COMPLAINTS FROM GERMAN CONSIGNEES.

Consul P. Lieber, writing from Dusseldorf, tells of the carelessness of some Americans who ship goods to Germany, as follows:

Carelessness in packing goods for export and unreasonable delays in transit are causing a great many complaints among the consignees in Europe and are detrimental to the development of our export trade. For example, a case of whisky came with a breakage of 17 per cent., owing to the fact that the bottles were too close to the sides of the box and not protected by a layer of straw or other material. Two steel ranges bought from a factory at Lorain, Ohio, and shipped from there in September, 1905, did not reach Dusseldorf until the last week in May, and were received in a shameful condition and fully one-third of the castings used in the construction of the ranges were broken and had to be replaced by a local foundry at great expense. The ranges were not fastened and bolted down as they should have been; they were simply left loose inside of the box and the handling at the various depots and piers, even if it had been most careful, could not help but to injure the ranges in a manner that had they been shipped to a merchant they would have been refused by the consignee and left at shipper's hands. If we expect to enlarge our export trade this item of packing and quick transportation is of the utmost importance and will be worthy of careful consideration on the part of our shippers.

METRIC SIGNS.

FRENCH RULES FOR ABBREVIATIONS.

The French minister of public instruction has decided that all teachers throughout France are in future to employ the following distinctive abbreviations for the various weights and measures: For denoting length—myriametre, Mm; kilometre, Km; hectometre, Hm; decametre, dam; metre, m; decimetre, dm; centimetre, Cm, and millimetre, mm. For areas—hectare, ha; are, a, and centiare, ca or m. For measures of bulk (timber), decastere, das; stere, s or m, and decistere, ds. For measures of mass and weight—tonne, t; quintal metrique, q; kilogramme, kg; hectogramme, hg; decagramme, dag; gramme, g; decigramme, dg; centigramme, cg, and milligramme, mg. For measures of capacity—kilolitre, kl; hectolitre, hl; decalitre, dal;

litre, l; decilitre, dl; centilitre, cl, and millilitre, ml. The use of the capital letters for the three largest denominations of length are intended to prevent confusion, and all the other abbreviations follow on uniform lines. The employment of full stops between the letters is officially abolished, and k. g. for kilogramme and m. m. for millimetre disappear.

SPAULDING MFG. CO. AND THEIR INJUNCTION.

Judge Edward Whitson, sitting in the Federal Court for the Spokane District, has granted a blanket injunction at the instance of the Spaulding Manufacturing Company of Grinnell, Ia., restraining the Inland Empire Implement & Hardware Dealers' Association, E. W. Evenson, formerly its secretary; M. E. Hay, E. E. Lucas, S. P. Cooke, R. J. Heath of Wilbur, Wash., and John Doe and Richard Roe from "preceding, following in such a manner as to hinder, obstruct, harass or annoy or intimidate" the representatives of the complaining concern. The arguments on the question of making the restrainer a permanent order will be heard in August.

This action is the result of a decision of the implement and Hardware dealers of the Inland Empire to fight Eastern buggy and stove manufacturers, who are charged with sending their products into the Spokane country and peddling them direct to farmers and ranchers. The Inland Empire Association, to whose notice the invasion of the Eastern makers was brought some time ago, has set aside a big protection fund and a lively battle will follow. Officials of the Association say there is more than 70 canvassers for Eastern houses in the field, which they claim rightfully belongs to the local dealers, and it is purposed to rout them.

The Spaulding company is also eager to clear the atmosphere, claiming that its representatives have a right to sell direct to the trade, without the intervention of the dealers.

Washington sends between \$250,000 and \$275,000 East every year, the local dealers say, and they believe it is their duty to protect themselves against peddlers. The buggy business has been made the subject of a State license of \$200, in the interest of local trade. Judge Warren of the Superior Court of Davenport, recently declared it illegal, but Judge Huneke of the Superior Court of Spokane County, held shortly afterward that it is constitutional and can be enforced.

OUR CANADIAN LETTER

(By Our Special Correspondent.)

TORONTO, August 5, 1906.

WESTERN CANADA CONVENTION.

The semi-annual convention of the Retail Hardware and Stove Dealers' Association of Western Canada was held on July 25 at Winnipeg, the Chicago of the Canadian Northwest. As usual the attendance was only about half the number which enrolls at the annual meetings in February, but with about thirty on hand in the busy harvest season the Association shows ample signs of life and activity. In his semi-annual address, President A. J. Falconer, Deloraine, Man., referred to the existing relations between the jobbing trade in Western Canada and the retailers, saying that with one exception the relations were satisfactory. A Duluth jobbing house which has established a branch in Winnipeg, however, was, he said, openly selling to consumers, and had treated with contempt the protests of the Association's officers, defying the organized retailers, and saying they intended to continue to sell as much or as little as they pleased to anybody in or out of the trade. The president suggested as a possible remedy the establishment of a "buyer's exchange," the retailers investing from \$300,000 to \$400,000 in the co-operative jobbing house. The matter was dealt with later, but the president's suggested remedy was not even referred to again during the convention.

The secretary read an interesting report, showing a splendid growth in the membership of the Association, over 300 out of a possible 400 being now in the organization. Dues were hard to collect in some quarters, owing to the neglect of members, but the Association had a balance of about \$300 in its treasury. Reference was made to the affiliation of the Association last Winter with the Retail Merchants' Association of Canada—an organization comprising all classes of merchants. It was pointed out that no results were yet visible from the affiliation, and the president suggested that the delegates rescind their former action.

A letter was read from the recently organized Ontario Retail Hardware and Stove Dealers' Association, naming its secretary, Weston Wrigley, Toronto, as a fraternal delegate to the Winnipeg convention. In a brief address, Mr. Wrigley referred to the wonderful progress of the Association in Ontario, where about 150 members had been enrolled in the first three months, in spite of bitter opposition on the part of the Retail Merchants' Association. He suggested that a National organization might be formed to govern trade matters and conduct a plan of mutual fire insurance. The two Associations might work together, also, in many ways. For instance, a Winnipeg jobber is said to be selling wire nails to consumers at Port Arthur, Ont., at prices less than the retail trade can buy at delivered at that point. Winnipeg jobbers, too, say they are forced to sell to consumers, as Toronto jobbers do so. Each association could help the other.

RESOLUTIONS DISCUSSED.

The greatest discussion took place over two resolutions introduced—one in favor of forming a Dominion Hardware Association, and the other in favor of withdrawing from the affiliation with the Retail Merchants' Association, the officers of which had shown gross incapacity and discourtesy. The first was carried unanimously, and the latter, after much discussion, left over for action at the next convention.

A strong resolution was adopted against jobbers selling to consumers and the actions of the Marshall-Wells Hardware Co. particularly were severely criticised. Some complaint was also received regarding a metal roofing company. It was decided that the time for action had arrived, and the secretary was given the necessary instructions.

Resolutions were also carried in reference to the lack of satisfactory lien laws in Western Canada, the interference with retailers' help by travelers acting for jobbing houses, urging dealers in farm districts to refuse to give credit from November to April, and in favor of an amendment to the Canadian criminal code preventing business men from entering into price agreements.

A committee was appointed to prepare a draft plan of organization for a National organization, and a resolution of thanks to the Ontario Association and its fraternal delegate was carried unanimously. A resolution of thanks was also tendered the Canadian trade press for its assistance in organizing and building up the Association in Western Canada, this action being taken in answer to a resolution passed at a recent convention of the Do-

minion Retail Merchants' Association, Secretary Trowern of that body (who publishes a small, privately-owned monthly) having made the foolish statement: "You cannot place your hand on a trade paper which was ever helped a trade organization."

The Ontario Retail Hardware and Stove Dealers' Association hold another convention in Toronto on September 4 and 5.

NEWS OF THE TRADE.

J. J. Small has sold his Hardware business at Uxbridge, Ont., to Henry Shelly.

A rumor is again current that Siegel, Cooper & Co., Chicago, will establish a branch warehouse at Toronto.

Weichel Bros., Waterloo and Elmira, Ont., have opened a branch Hardware store at Berlin, and have formed a syndicate to establish a number of five and ten cent stores.

Toronto Hardwaremen have organized a branch of the Ontario Retail Hardware Association.

The annual meeting of the Maritime Wholesale Hardware Association was held at Digby, N. S., a few days ago. Representatives from nearly all of the wholesale Hardware firms in the Maritime Provinces were present. After discussing trade matters in general, the following officers were elected: President, E. K. Spinney, Yarmouth, N. S.; vice-president, John J. Keefe, St. John, N. B.; executive committee, W. H. Sterns, T. Douglas, Percy Simmonds, T. C. Lee, J. R. Mudray and W. H. Smith.

The Peterboro Shovel & Tool Co., Peterboro, Ont., have decided to erect a new brick warehouse, 40 by 100 feet, at a cost of \$3,000.

The Banwell-Hoxie Fence Co., of Hamilton, are to build an addition to their factory to cost \$2,500.

W. G. Pow, head salesman for W. R. Hobbs & Co., Tillsonburg, Ont., and one of Canada's best Hardware window dressers, has joined the traveling staff of the Hobbs Mfg. Co., London.

Thomas H. Leeming, Kamloops, B. C., has sold his Hardware store to N. S. Dalgleish.

H. H. Dryden, Sussex, N. B., has formed an incorporated company to carry on his Hardware and stove business.

The Francis Frost Paint Co., Toronto, has commenced the erection of a \$30,000 paint factory at Toronto Junction.

The John Morrow Machine Screw Co., Ingersoll, Ont., have set aside \$1500 as profits to be shared with their employees.

T. P. McIntyre, sales manager of the Marshall-Wells Co., Winnipeg, has resigned his position to become general manager of the Ladysmith, B. C., Stove and Iron Works. T. L. Waldon, manager of Caverhill, Learmont & Co.'s Winnipeg branch, has been appointed to the vacancy caused by Mr. McIntyre's resignation and F. Ross Newman, manager of the Canadian Fairbanks Co.'s branch at Winnipeg and son of T. H. Newman, of Caverhill, Learmont & Co., Montreal, has taken Mr. Waldon's former position.

Robert D. Munro, of the British-American Paint Co., Victoria, B. C., and son of Robert Munro, managing director of the Canada Paint Co., Montreal, died suddenly on August 1, being only 32 years of age.

The farm implement trade in Western Canada during the present year promises to dwarf anything which has preceded it. The large number of settlers who are advancing in a stream to the fertile plains of the West need a great quantity of implements wherewith to carry on the operations of the farm. Already there has been an increase of from 50 to 150 per cent. over the business done a year ago. At the rate immigrants are going in this increase should steadily grow. In connection with this Western development it is interesting to note that in ten days early in the season, 334 carloads of settlers' effects were received by the Canadian Pacific Railway Co., from the United States side, and during the same time 182 carloads from Eastern Canada were handled at Fort William. This makes an average of 53 carloads of new settlers' belongings going into Western Canada daily. When to the number of farmers represented by these figures are added the business and professional men and artisans who will follow them, the prospective increase for the year becomes truly great.

Kansas always had the name of carrying everything to the extreme, but this is the limit: E. H. Phillips, a Prohibitionist of Winfield, Kans., recently committed suicide rather than have a bench warrant served upon him, by an officer who was formerly a saloon man.

REVIEW OF THE MARKETS.

WIRE NAILS: The trade are doing their best to have their orders booked for Wire Nails, those placed with the mills being reported as exceeding the same month last year. There will be large sales of Wire Nails during the coming season. Notwithstanding concessions of 5 cents per keg have been made on orders exceeding carload lots, the market is quoted as firm and steady. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|--|--------|
| Carloads to jobbers | \$1.85 |
| Carload lots to retail merchants | 1.90 |

New York.—The local demand is very moderate in tone, the hot weather of the past fortnight affecting the requisitions in a modified degree. Quotations for small lots from store are on the basis of \$2.10 per keg.

CUT NAILS: The Cut Nail Association at their recent meeting, July 25, made no change in prices, the previous quotations being reaffirmed. Orders are represented in new business at a concession of 5 cents per keg, but the strength of the market is firm. Manufacturers have been reducing the output of this month by agreement. Official quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—The local demand is a light one, as is customary at this time of the year, quotations for small lots from store being on the basis of \$2 per keg.

BARB WIRE: Contract orders for Fall are now being placed by the large trade, the desire to have the orders booked prevailing. The railroads have been good customers of the mills, concessions of 5 cents per 100 lbs. being made on some large lots in excess of carloads. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | | |
|--|--------|--------|
| Jobbers, carload lots | \$2.00 | \$2.30 |
| Retailers, carload lots | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: The demand during July has been heavy, and exceptional, being in excess of previous requirements at this time of the year. Fence manufacturers are placing their orders for requirements this Fall and Winter. The output has been restricted by a shortage in the supply of steel, making the mills greatly behind in their orders. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

ROPE: The following prices may be said to represent the market:

| | Cents Per Pound. |
|------------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12½ |
| B Quality Manila | 11½ |
| Pure Sisal, 7-16 and larger | 9 |
| No. 2 Sisal, 7-16 and larger | 7¾ |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.;

| | |
|-------------------------------------|----------------------|
| In lots of less than 5 barrels | 39 cents per gallon. |
| In lots of 5 barrels or more | 38 cents per gallon. |

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

| | |
|--|----------------------|
| Double Boiled Linseed Oil, 2 cents per gallon higher than raw. | |
| Regular Boiled Linseed Oil, 1 cent per gallon higher than raw. | |
| Calcutta Oil | 68 cents per gallon. |

THE PHILADELPHIA TRADE.

In these days of extreme activity, one hardly knows what comment to make in addition to all that has been said and written regarding business conditions. Philadelphia, during the week past, has broken records as far as almost unbreakable humid weather is concerned, but in spite of these discomforts, business has continued without any sign of abatement, any more than is usually looked for at this midsummer season, and not so much so as in past years.

Crop reports from all over the country seem to be very satisfactory, which, in itself, is a good sign, and recent advances in prominent lines, whilst not excessive, lead one to suppose that the coming Fall season will be fruitful of good results.

As the year rolls on and the results of each succeeding month show their percentage of increased volume of business over respective months of years gone by, one naturally wonders how long this can continue, and how near we are to the top of the hill of prosperity which we are all climbing at the present time, but from reports in trade papers, etc., there does not seem to be any cloud on the business horizon. Everyone seems to have exceeded their most sanguine expectations for the first half of the year, and from the present outlook, we see no reason why the remaining months should not show equally satisfactory results as their predecessors. Some go so far as to predict even a greater volume, and to suggest a continuance for the first half of 1907. To come down to actual facts, slight advances all along the line seem to be the order of the day, with the exception of those on which competition prevents. Goods are not easily obtainable, and we are compelled to specify further in advance of our requirements than we have for years.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

Now that good crops are assured we can anticipate a continuation of prosperity. It is safe to predict that we shall not have a boom, but in place of it very firm prices and difficulty in securing stocks. Stocks in manufacturers' hands have not been as slow for many years to begin Fall trade, and many mills are behind in filling orders. There will be no dull time to accumulate stocks for Fall orders. A few years since such a condition would have produced a boom in price but we have learned that booms breed panics, and neither is wanted. The large combinations can, and have done much to prevent them. If the financiers in Wall Street could prevent them there, it would be a blessing to the country. Speculation is the bane of legitimate business. The lack of integrity in manipulating booms makes stock dealing gambling, and demoralizes public sentiment. Buying stocks in Wall Street as an investment is regarded immoral. A minister was recently driven from an Ohio pulpit, because he dealt in stocks, and many business men have lost reputation from the same cause. Speculation in purchasing goods is much less in vogue than formerly. Among the large manufacturers 60 days is made the limit of time for delivery where it was formerly six months or a year. This has decreased speculation. The last half of 1906 will equal the first half for business, and 1907 will come with a promising outlook. Political forces are being lined up for the next Presidential election. Roosevelt has made the platform that will furnish material for both parties and the party that the people think mean it most, and are most likely to execute it will win, and as a majority of the people are not likely to be fooled, we may anticipate continuous prosperity. With all our manifest irregularities, pleasure, joy and blessedness are widely enjoyed by the people. In the mad rush to get rich we have trespassed, but indictments will aid in restoring a normal temperature. There is more cause for worship than worry.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

July closed with a good advance over same month in 1905, and August opens with favorable auspices. After vacation of travelers, on the first Fall trip orders are generally for immediate wants, which have accumulated while the men are off the road, but we cannot see any reason why there should not be a large trade the remainder of the year. Reports of the grain crops in the West are very favorable, and farmers will get good prices

for them. Orders in the hands of manufacturers are heavy, indicating the faith of merchants in a busy season.

The announcement by the Pennsylvania Railroad of a reduction in local fares to 2½ cents per mile, and that 1,000-mile books at \$20 may be used by any person or by any number, is a distinct victory for public opinion upon this subject. Low fares promote travel, and make business for both the railroads and merchants.

LOGAN-GREGG HARDWARE CO.

THE SAGINAW TRADE.

We are having the usual trade for this dull season of the year. The weather is warm and the crops look fine and they claim the sugar beet crop will be the finest that they have ever had in this part of the State. It is vacation time and a great many of the proprietors and employees are on the nearby lakes and rivers, fishing, picnicing and boating.

MORLEY BROTHERS.

THE COLUMBUS TRADE.

It has been some time since we made a report. We have been too busy to do anything that was not crowding us, and conditions have not changed much. It is the same old grind six days in the week with plenty to do, and the same troubles still exist—slow shipments, high prices by manufacturers and low prices by jobbers. Manufacturers can and do get advances. Jobbers could but do not. It is such fun to do business, you know.

Building all over Ohio is at high tide and if it were not for the combination among lumber dealers and the extreme high prices for labor, there would be an overflow. Saw and hatchet carpenters are getting 40 cts. an hour, brick layers 65 cts. an hour and others in same proportion, in our city. If you want to buy brick, you must first tell the brick maker who is going to lay the brick and if he is not a union brick layer, you cannot buy a brick. This is true in some other lines. Talk about your combinations, but we don't know of any as unreasonable and arbitrary as the labor unions. A number of our customers say these conditions exist in other and smaller cities throughout Ohio. Moulders in our city have been on a strike for nearly a month, and it looks very much as though the open shop policy will prevail hereafter.

We find the manufacturers in our city are overloaded with orders. Instead of accumulating stock as they usually do at this time, they cannot get goods out fast enough.

Wheat is being threshed and is yielding the highest average ever known. We regret to say that the continued wet weather has damaged many crops after the wheat was in the stock. Oats will not be up to the average. The hay crop was good, and the good old reliable corn crop bids fair to be a record breaker. The outlook for a large apple crop is good. Surely we have been blessed with a bounteous harvest this year. Everything indicates a big fall business. We never had as many goods sold for future delivery as now. With the shortage of goods this season, dealers are getting orders placed early so as to not be short when the demand begins.

THE SMITH BROS. HDWE. CO.

J. H. SMITH.

THE DAVENPORT TRADE.

A very largely attended and intensely exciting political State convention was held in one of our interior towns this week and another State convention is billed for next week. These conventions do not seem to be especially beneficial to trade in general or to have increased the sales of hardware in this State to any great extent; that is our kind of Hardware. We are in the midst of harvest, which naturally keeps the farmer in the fields and out of towns, and are, therefore, unable to report as satisfactorily on the volume of sales as could have been done under more favorable conditions. For the future, everything looks bright indeed. Crops already harvested are good and growing crops promise well. Prices are high, everybody busy and money plenty.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

After visiting about two hundred and twenty towns in our territory, and in each one making inquiries as to the probable harvest, the writer has come to but one conclusion, and that is that the crop will be beyond the average. In visiting some of our newer towns, I was surprised at the progress made in a very few months. Take the town of Max Bass, North Dakota, as an illustration. Eight months ago the place where this town is, was raw prairie. To-day it has about twenty-five business buildings, two banks, and is surrounded by a bountiful harvest. There are all kinds of stores in this town and all but two occupy good buildings. They have main rooms of about 50 by 100 feet, and carry stocks of not less than \$25,000. When we think of this sudden development of town and country, we are surely surprised beyond our ability to comprehend. This town is only one of many which have sprung up during the last two years. Everybody seemed to be happy and glad they came to a new country. Altogether business is fine and we see no reason why our Fall sales should not exceed those of last year.

THE SAN FRANCISCO TRADE.

The other day a local paper was right in saying Hardware conditions in this city are shaping themselves most satisfactorily for both wholesale and retail trades; that since the disaster in April a large number of retail Hardware stores have been established and re-established and show every indication of an active business, and that without a doubt there are enough Hardware stores now in San Francisco to supply the consuming demand for some time to come.

A number of the stores that previously were exclusively Hardware have added household goods and paints to the stock, many have added stoves and there are others who are devoting themselves to tools almost exclusively. One peculiar thing in the re-establishment of the trade is the matter of locations. While the stores are scattered through the city they have located in bunches. For instance, in the immediate vicinity of Van Ness and Golden Gate Avenues, there are nine Hardware stores; four near about Van Ness Avenue and Market Street; three within six numbers of each other at City Hall Avenue and Market Street; five close together near Sixteenth and Mission Streets; three near Fillmore and California Streets, and in the unburned Mission district every block is favored with one or more.

With the recent reports of the annual meetings of the San Francisco Retail Hardware Dealers' Association and the Alameda County Retail Hardware Dealers' Association, the sheet of officers elected was inadvertently omitted. The following were elected:

San Francisco Society—President, F. H. Ellis, Palace Hardware Co.; Vice-President, Edwin Jones, Ed. Jones Co.; Treasurer, Joseph I. Lawless, and Secretary, George L. Everett. With these H. C. Bennett, Bennett Bros. Hardware Co.; Charles M. Sage, Sage Hardware Co., and G. M. Hickman and E. E. Gillo were elected to serve as executive committee.

Alameda County Society—President, Frank Rittigstein, A. Rittigstein & Co., Oakland; Vice-President, L. R. Smith, Smith Bros. Hardware Co., Oakland; Treasurer, Walter Meese, Oakland, and Secretary, George L. Everett, Oakland. Additional to these the following were elected to serve on executive committee: J. W. Armstrong, Berkeley, and John P. Maxwell, Oakland.

There is quite a crowd of Eastern speculators in this city of ruin, buying up scrap steel and shipments are already being made. Large quantities of the scrap are being sent to Chicago and Pittsburgh and will, it is claimed, be cast into beams and returned to this city to be used in rebuilding. The freight to Chicago is \$12 a ton, but to Pittsburgh it runs a little higher. Although it will take over \$20 to get the scrap East, much of it is being bought up and shipped. The price paid for the scrap steel is not high. Most of it sells at from \$2 to \$4 a ton. The material ready for building will bring \$30 a ton or higher, giving a clear profit in handling. The steel in the scrap form is comparatively pure, and is ready to be melted up and cast into beams for building.

The ruins of San Francisco are much more valuable than the richest ore mine, and it is calculated that great amounts of the twisted and useless steel beams will be taken from the ruins and shipped to Eastern foundries. Not only is the steel going out in the scrap form, but large quantities of steel beams, ready for building, are coming in. There was some doubt for a while as to whether enough steel could be secured for the great amount of building to commence shortly in this city. In order to prepare for the immense demand that will be made for the steel girders, they are being shipped in in large amounts. The railroad companies report that there have been large shipments of scrap steel within the last few weeks, and that orders are being placed for a large number of other shipments. Some of the steel is going to points within the borders of the State. One large consignment went to Emeryville, where the Judson Manufacturing Co. is located.

A new store named California Hardware & Cutlery Co., has opened on Van Ness Avenue near O'Farrell Street. S. B. Moe, assistant secretary of the Union Hardware & Metal Co. of Los Angeles, and J. H. Miller and M. A. Johnson of the Southern city, recently from the East, are interested in the enterprise.

H. Barnett has opened a Hardware store at 521 Van Ness Avenue.

Charles M. Curtis, for many years secretary of Dunham, Carigan & Hayden Company, has severed his connection with the company and gone to Seattle and joined the Western Hardware & Metal Company, of which George Boole, formerly manager of the Schwabacher Hardware Company, of Seattle, is president.

Golcher Bros. have succeeded the long established firm of Clabrough-Golcher Co., and opened at 513 Market Street. Two attempts have been made within the past week to rob this store, the loss to the firm in pistols and cutlery being \$400.

INDUSTRIAL PRESS ASSOCIATION.

WESTERN BUSINESS BOOMING.

One of the best evidences of the prosperity in the West is to be found in the large amount of new building that has taken place during the past six months. In many of these Western towns all former building records have been broken. Here in Omaha for two years there has been much activity in the building trade, but during the six months ending July 1st the gain over the same period in 1905 is 46 per cent. This includes a number of large warehouses and business blocks, but the number of small houses erected has been very great and are being well rented as fast as completed. One Hardware man of Omaha said, "The year 1905 was an unusually heavy one, and, therefore, I regard this increase as highly encouraging, and predict that the next six months will make even a better showing." Continuing, this Hardware man said, "The ranchmen of the West and Northwest, the farmers all through the Middle Western country have had four or five exceedingly good years—with good prices—they have been making money, big money, and no small amount of this money is now being spent here in these Western cities."

Keeping pace with the other building in Omaha, the Wright & Wilhelmy Co. are just moving into their new warehouse which joins the former building occupied by this concern. The new building more than doubles the floor space and will add materially to the facilities for handling their enlarged business. The growth of the Wright & Wilhelmy Co. has been remarkable—yet solid, and their trade is loyal and prosperous. In speaking of Hardware conditions to-day and of the past, Mr. Wright said, "Our increase in business has come largely with the general increase in the business of the West. No, we are not enlarging our territory, but we are getting each year more business from our regular established trade." Asked how this was done Mr. Wright replied, "We are constantly carrying a larger and broader stock. We are able to supply our customers' wants promptly—we are taking an especial pride in making complete shipments—the retail Hardware man is expanding his business and we are keeping pace with him." In an interesting but modest way, Mr. Wright spoke of the growth of the business during the past few years. "Why it was only a few years ago, you know, everyone out here was broke. We were almost broke—I had practically nothing left but a post-office address and an appetite and I didn't know when those would be taken from me."

The Lee-Glass-Andreesen Hardware Co. reported trade as being exceedingly good and the outlook very satisfactory. Another good wheat and corn crop is now assured and this guarantees prosperity for the West.

The local demand for a better class of goods was spoken of in the store of Milton Rogers & Son's Co. at 1321 Farnam Street, as being a healthy feature of local conditions. This concern carry an exceedingly attractive line and are doing a good business. Everyone has money out here now, and it's a question whether the farmers will be able to get labor to harvest their crops. With this greater buying power of the people has come a better demand for high-grade goods.

At 1511 Dodge Street is located the up-to-date retail store of James Morton & Son Co. This concern has an exceedingly attractive store, and are constantly enlarging their trade.

Closely affiliated with the Hardware trade here in Omaha is the sporting goods business, and the old established house of the Townsend Gun Co. is the retail store where the Omaha sportsmen make their headquarters. Mr. Townsend is one of those popular kind of men with a strong personality—a true sportsman.

Council Bluffs, Ia., is having its share in the general prosperity of the West. This is shown in the big business being done by the Empkie-Shugart-Hill Co. Not only does this concern carry a complete general line of Hardware, but also, as do all up-to-date Hardware jobbers, carries a good line of sporting goods, cutlery and kindred lines.

The local jobbing house is realizing more and more each year that it is paying best to push the goods in which the gross sales may not be as large, but on which it is possible to make a better margin of profit. The salesman who takes an order for a carload of nails, wire and fencing, may be doing big business, but the salesman who gets down and "plugs" for a general order of assorted Hardware, fishing tackle and small goods, will show his house a better margin of profit and a more satisfactory business in the years' end. Eight per cent on \$800 may look like \$64 profit, but when general expenses are figured—say 11 per cent—this close business in reality shows a loss. And it is on these small lines and sorted orders that the local jobbing house can more successfully compete with the larger jobbers.

HAMMERNAIL

STAR SAFETY CORN RAZOR

Price \$1.00. Simple, Safe, Sure.

NO SKILL REQUIRED. The only "Safety Corn Razor" that can be kept absolutely Clean and Sharp. By drawing the guard back it can be honed or stropped like a razor.

THIS CUT SHOWS GUARD PARTLY OPENED.

With the first order of not less than one dozen we will furnish a black cloth show-case, doeskin lining (with a neat glass sign, as illustrated below) having six Corn Razors on display and six in the lower compartment.

We are advertising the Corn Razor in spaces of from $\frac{1}{4}$ to $\frac{1}{2}$ pages in the ten leading publications of the country best adapted to our use.

If you have the razors it is easier and more satisfactory to your customers to buy of you than to send to us.

The Star Safety Corn Razor is as efficient, well-made and practical in its field as our Star Safety Shaving Razor for shaving; perhaps that is as strong an endorsement as could be given the Corn Razor.

We would like to send you at least a dozen of the Star Safety Corn Razors in our handsome little display case, which is given free with orders of a dozen or more. These razors retail at a restricted price, \$1.00, and show a liberal profit to the dealer.

We trust that we shall have the pleasure of hearing from you.

Thanking you in advance, therefore, for an early reply, we are,

Very truly yours,

KAMPFE BROTHERS

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

4.—CONTRACTS BY MAIL, TELEGRAPH, TELEPHONE.

Every contract includes an offer and an acceptance.

An offer or proposal for a contract may be made in person, by agent, by telegraph, or by letter, and an assent to it or an acceptance of it may be given in the same manner.

If the proposition is made by letter, and is sent by mail, the person making the offer may retract by a subsequent letter which reaches the offeree at any time before an answer of acceptance has been written and put in the mail.

Example: A in Detroit mails a letter on Friday to B in New York offering to sell him five hundred dozen eggs at eight cents a dozen. This letter reaches B Saturday noon. Saturday morning A writes a letter to B withdrawing his offer, which letter reaches B Monday morning, while he is in the act of writing a letter accepting the offer. It is too late for him to mail the letter and thereby accept it.

As soon as an acceptance is put into the mail the contract is closed as to both parties.

Example: On Friday, A in Detroit writes a letter to B in New York, offering him five hundred dozen eggs at eight cents a dozen. The letter reaches B Saturday noon. Saturday afternoon at 3 o'clock B writes a letter accepting the offer and deposits it in the mail box provided by the post office authorities, at the street corner. On the 4 o'clock delivery B receives a letter from A withdrawing his offer. A's withdrawal is too late; the contract was closed at 3 o'clock.

An acceptance by letter takes effect from the time when it is mailed and not from the time of its receipt by the party making the offer.

A retraction, however, takes effect when the letter of retraction is received and not at the time of mailing it.

The law as to the making of contracts by letter, telegraph, etc., grew out of the practice in early days of transmitting communications by private agencies. In an early case it was decided that a sale was complete when the letter of acceptance was mailed in response to a mailed letter containing the offer, the court merely deciding that by sending the offer through the mail the offerer made the mail his agent for the receipt of his acceptance.

The theory is therefore that where a man making an offer uses the United States mails for the purpose of transmitting his offer, he makes the postoffice department his agent, and an acceptance delivered to an agent is the same as if delivered to the principal. It is on this theory that a contract is complete when the acceptance is delivered to the postoffice for transmission; while a retraction is not complete until it is delivered to the person to whom it is addressed, the mail not being the agent of the acceptor but the agent of the offerer, that being the means he has chosen by which to communicate his offer.

The fact that the post has become a public agency and not a private agency, as formerly, does not prohibit the application of the theory; one may make a public agency his own agent as much as he can make a private individual his agent.

So one may be bound when he really does not know that he is bound, as one does not usually know the moment when an acceptance is put into the mails.

If a proposition and its retraction reach the person to whom they are sent at the same instant of time the question arises as to the result of an acceptance. It has been held that if the offer was opened and an acceptance posted before the letter of retraction is opened and read, the contract is binding. If the letter containing the offer is opened and read and afterwards the letter of retraction is read, and then a letter accepting is posted, it is not a contract. The person must have had no actual notice of the retraction at the time when he mails his acceptance in order that the contract may be complete.

If A should send by mail an offer of goods at a certain price, and ten hours later to ensure a sale, send a second offer of the same goods for less money, and B mails an acceptance of the first offer before he receives the second offer, he cannot avoid his first acceptance by writing an acceptance of the second offer and putting it in the mails, stating therein that he avoids his first acceptance. If on receipt of the first offer he mails his acceptance and two hours later receives the second offer of a lower price and then telegraphs his acceptance of the second offer disaffirming the first, he is still bound to the first accept-

ance. A contract once made is irrevocable except by the agreement of both parties. The moment the letter accepting the first offer was posted the contract was complete, even although the acceptance never reached the offerer. Nearly all questions of validity of contracts by mail and telegraph may be answered by bearing in mind that the contract is complete the moment the letter accepting the offer is posted.

It must be borne in mind that the posting of the letter of acceptance, or the sending of the telegram, must be such a posting or sending as puts the communication practically out of the control of the sender; for instance, if the acceptor write his letter of acceptance and place it in his own private letter box to be called for by his own private messenger at a certain time in the day and taken by him to the postoffice, it is not posted within the meaning of the law. Or, if the acceptor give the letter to a messenger, other than a postman or accredited agent of the postoffice department, he has not thereby made the acceptance complete until his messenger has placed the letter in the postoffice box, or the postoffice, or delivered it to an accredited agent of the postoffice authorities, so that if one writes a letter of acceptance and gives it to a private messenger to be taken to the postoffice and a telegram is received withdrawing the offer while the messenger is en route to the postoffice, even although he may be at the very door of the office, the retraction of the offer is sufficient.

(To be continued.)

NOT QUITE.

"Did she understand you were proposing to her?"

"Well, she didn't quite seem to take me."—*New Orleans Times-Democrat.*

WHEN HE GETS IT.

Yeast—What happens when our wife loses her temper?
Crimsonbeak—Oh, I get it!—*Yonkers Statesman.*

HOW IT WAS DONE.

Dolly—Did you girls make anything on your charity ball?
Daisy— Yes; we didn't give it.—*Judge.*

Absolute Accuracy

beautiful finish and strength of shooting is shown in the

FAMOUS Hamilton Rifles

MODEL No. 23

BEFORE THE DAYS OF CLOCKS.*Concluded from our last issue.*

Having a beginning in this simple form, the water clock underwent a high development and wide differentiation. It took the shape, among others, of a series of vessels communicating by tubes that passed through figures of dragons and other images, the floats in some cases being held by grotesque but attractive genii. One apparatus of the kind, which came much later, told the time by the weight of water that came from the beak of a bird and which was received by a vessel on a balance, every pound indicating a certain fraction of an hour. At about the same time there was set up in the capital city of Persia, on the terrace of the royal palace, a somewhat similar clock, consisting of a balance containing twelve metal balls, one of which fell every hour upon a great gong. This wonderful instrument is said to have been sent by the King of Persia to Charlemagne as a gift.

The Chinese, whose pleas on the subject deserve respect by reason of their priority, do not number the hours as we do. They have names for them, the twenty-four hour period being divided by the people of the Middle Kingdom into twelve equal parts, each of which is designated in their written language by a character. In this point, again, they were far ahead of the Europeans, for whom the invention of the modern clock seems actually to have been delayed some centuries by the difficulty of splitting night or day into even fractions. To the ancient Greeks and Romans, for example, this problem appeared insuperable, owing to the wobbling of the earth, which increases the length of the day at one season and diminishes it at another. For a relatively latter day gentleman named Hipparchus was it reserved to offer the suggestion that the time from dawn to dawn might be broken into twenty-four equal parts.

This, indeed, was the keynote of the difficulty, the final solution, of which has appeared in the modern clock, in its highest development, a chronometer that keeps time within a fraction of a second per week. On the main street in any city of the United States business men may be seen daily setting their watches by such infallible timepieces in the windows of jewellers' shops, and even in the China of to-day it is the custom for a gentleman to carry two watches, which he examines anxiously at frequent intervals, in order to make sure that they agree exactly.

And yet even to this day there survives in China and Japan, to show the persistence of such things, a method generally pursued by the natives of keeping time by the burning of so-called "incense sticks," which will burn slowly for half a day without flame. They are divided into lengths for the hours, and being made of sawdust mixed with a certain proportion of gum may be counted on to resolve themselves into agreeably scented smoke at a reasonably uniform rate per inch. Such incense sticks are sufficiently familiar in this country, but, clocks being plentiful, are not commonly utilized for timekeeping purposes.

The Montagnais Indian of Canada, when traveling ahead of a party, sets up a tall stick in the snow, making with his foot a mark to show how far the shadow reaches. By the change in the angle of the shadow his friends, on arriving at the spot, know exactly how far ahead is their guide.

To keep time with reasonable accuracy must have been one of the earliest necessities of man. Hence the remarkable ingenuity of many primitive inventions for this purpose, the utilization of shadows—an idea which had its final development in the sun dial—being probably the earliest, as it was the most obvious. The first sun dial must have been a tree, which may be said to have stood at one end of the path of evolution in timekeeping apparatus, the modern chronometer representing at the other end the final development of such contrivances.

COURTESY IN BUSINESS.

That courtesy is a genuine business asset all will admit—as a proposition. But in actual practice we are in danger of forgetting its importance. The Britisher is said by his more polished critics to be bluff of manner, and in the outside parts of the Empire we endeavor to live up to the established tradition. We too often overlook, if we do not scorn, those little amenities which go to sweeten intercourse in business as in social life. The pace is faster, says the *Ironmonger*, than it was with our fathers, and in the crush we tread on sensitive corns without even stopping to apologize.

This is a mistake even in its commercial aspect. It pays to cultivate courtesy and consideration in our relations with others. The young man of manners rises quicker and higher in the shop or warehouse than his blunter fellow, although otherwise their merits may be equal. And at every stage of his upward progress he wields his added powers in a way that conduces to goodwill and earnest effort throughout the establishment. It is said that over the desk of the president of a large railway system

in the United States is a framed card bearing the inscription, "Not servants, but brothers." That man began as a yard clerk at a small station, and by hard work, coupled with a courteous disposition, he made his way to the very top. His kindness of heart and manner went with him, and he explained the text by saying that any success he had attained as a railway manager was due to the fact that he had treated the employees as friends rather than as menials.

In connection with customers the presence or absence of this desirable thing is made apparent. Brusqueness has driven away many a client, while inattention has kept away many another. Inquiries that might lead to a profitable connection are taken up too late or never taken up at all. This is true of manufacturers, as well as of merchants, and true of them, from all accounts, in all parts of the British dominions. Moreover, where response is made, it is not always made in the happiest terms. An American contemporary deals in a recent issue with this very question of the character of commercial correspondence. And this is its indictment:—"The modern business letter is apt to be so absolutely devoid of the human element that under certain circumstances it does harm in business negotiations. For example, if a prospective customer has come into social contact with the manufacturer, and is accorded the friendly, courteous treatment that a buyer is pretty certain to get, and then receives a letter from the same man concerning the same subject, the contrast between the good-fellowship of the personal conversation, and, perhaps, the entertainment that accompanied it, on the one hand, and the cold-blooded, formal letter on the other, is very marked indeed. There is a happy medium in business letters which it pays to cultivate." Our readers should cultivate this happy medium, dealing in a business-like fashion with business matters, and yet taking advantage of every opportunity to introduce that personal touch which goes so far with most people.

PUMICE STONE.

Pumice, as is well known, is of volcanic origin, being a trachytic lava which has been rendered light by the escape of gases when in a molten state. It is found on most of the shores of the Tyrrhenian sea and elsewhere, but is at present almost exclusively obtained from the little island of Lipari. Most of the volcanoes of Lipari have ejected pumaceous rocks, but the best stone is all the product of one mountain, Monte Chirica, nearly 2,000 feet in height, with its two accessory craters. The district in which the pumice is excavated covers an area of three square miles. It has been calculated that about 1,000 hands are engaged in this industry, 600 of whom are employed in extricating the mineral.

Pumice is brought to the surface in large blocks or in baskets and is carried thus either to the neighboring village or to the seashore to be taken there in boats. The supply is said to be practically inexhaustible. Pumice is used not merely for cleaning and scouring purposes, but also for polishing in numerous trades; hence the fact that the powdered pumice exported exceeds in weight the block pumice. Between twenty and thirty merchants are engaged in the pumice trade on the island.—*London News.*

WOULD TAKE IT.

An Irishman was sitting in the depot smoking the other day when a woman came in and sitting down she remarked:

"Sir, if you were a gentleman, you wouldn't smoke here."

"Mum," he said, "if yez was a lady ye'd sit farther away."

Pretty soon the woman burst out:

"If you were my husband, I'd give you poison."

"Well, mum," returned the Irishman, as he puffed at his pipe, "if yez wus me woife, be jabbers, I'd take it!"

MADE A HIT.

Giles—My wife can drive nails like lightning.

Miles—You don't mean it.

Giles—Sure I do. Lightning, you know, seldom strikes twice in the same place.

KEEP IT DARK.

Harold—What did she say when you turned out the gas and kissed her?

Rupert—She said she felt as if she never wanted to see my face again.—*Ex.*

PERSIFLAGE.

Cabby—I 'ad a beard like yours once, but when I found what it made me look like I got it cut off.

Bussy—An' I had a face like yours once, an' when I found I couldn't get it cut off I grew a beard.

Gillette Safety Razor

NO STROPPING NO HONING

It Pleases
Every User.

The Most
Wonderful Selling
Razor
in the World

It pleases every customer, who in turn brings a new customer.

GILLETTE SALES COMPANY,

Times Building,

New York City

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Anna, Ill.—E. G. Kerth Hardware Company has been incorporated to deal in general merchandise; capital stock, \$10,000. Incorporators, Francis C. Des Rochers, Egbert G. Kerth and William J. Johnston.

Bessemer, Ala.—Long-Lewis Hardware Company has been incorporated. Capital, \$200,000; incorporators, L. A. Lewis and others.

Chicago, Ill.—Michaelis Hardware Company has been incorporated; capital, \$25,000. Incorporators, Frank R. Michaelis, Abram E. Mable and Willard F. Conkey.

Dothan, Ala.—The Stephens Hardware Company has been incorporated; capital, \$77,000; incorporators, J. R. Faircloth and others.

Helena, Mont.—The Helena Hardware Co. has been incorporated.

Humphrey, Neb.—The Murphy Hardware & Implement Co. has been incorporated.

Indianapolis, Ind.—Miller Hardware Co. has been incorporated; capital stock, \$20,000. Directors, William E. Miller, Charles E. Monfort and Charles Thielman.

Lake Village, Ark.—Articles of incorporation have been filed by the Gaines Hardware Company, showing a capital stock of \$40,000, all subscribed. The incorporators are: R. M. Gaines, Mrs. Mary C. Gaines, Herman Carlton, Mrs. Gertrude T. Carlton, J. R. Haynes and John B. Simms.

Lebanon, Ore.—Everett, Kyle & Epperly, Hardware dealers, have incorporated their business.

Middletown, Conn.—A certificate of incorporation has been filed by the Longworth-Weatherby, Company. The company is to carry on a general Hardware business. The amount of the capital stock is \$10,000, and the company will start business with that amount. The incorporators are James Longworth, Mary A. Longworth, William A. Benham and Frederick Weatherby, all of Middletown.

Rupert, Idaho.—The Rupert Hardware Co., Ltd., has been incorporated with a capital stock of \$10,000.

Salina, Kan.—The Pierce Hardware Co. has been incorporated with a capital stock of \$5,000.

San Diego, Cal.—Articles of incorporation of the Ingle Manufacturing Company will be filed within a few days, and when that is done San Diego will have a wholesale Hardware store open and ready for business. This is a new departure in the business of Samuel Gordon Ingle.

Sheffield, Ala.—The Lizzie Lowman Company has filed a certificate of incorporation. Formed for the purpose of carrying on a general Hardware business, the new concern begins operations with a capitalization of \$36,000. The incorporators are B. J. Lowman, S. A. Lowman, J. L. Andrews and L. W. Payne.

Slocumb, Ala.—The Metcalf Hardware Company has been incorporated. Incorporators, P. M. Metcalf, J. E. Cox and W. W. Kirkland.

Spencer, Mass.—A. G. Pease & Company has been incorporated with a capital stock of \$20,000; S. Adelaide Pease, Henry H. Lee, James Hughes, incorporators.

Woonsocket, R. I.—Articles of incorporation have been filed by the Woonsocket Supply Company. Arthur C. Milot, Frank E. Holden and Fred A. Gardner are named as incorporators. The company is to engage in the Hardware and electrical goods business and is capitalized at \$10,000.

Changes and Improvements.

Anderson, S. C.—The Anderson Hardware Company have increased their capital stock from \$25,000 to \$50,000.

Atlanta, Ga.—The King Hardware Company will erect a new \$75,000 building at Marietta and Jones Streets, to be used as the wholesale department of the company. The Peachtree Street store will be used for retail business exclusively.

Boynton, I. T.—Howard Bros. & McCuen have succeeded to the business of the Howard Hardware Company.

Cuero, Tex.—J. R. Nagel & Son of this city will establish a branch Hardware store in Runge on August 1. August Moeller, now with Mistrot Bros. in Galveston, will have an interest in the new store, and will be its manager.

Duluth, Minn.—R. R. Forward & Company have sold their Hardware stock to Minneapolis parties whose names are being withheld from publication at present. Negotiations have been going on for some time. Several men are engaged in taking an inventory. This is the first large sale of any one stock that has been made by R. R. Forward & Company in their going out of business sale. The parties to whom the stock has been sold have not determined whether they will remove the stock from Duluth or set up a new Hardware store in the West End. After the stock has been completely inventoried and has been turned over to the purchasers, it will be known definitely.

Forsyth, Mont.—The H. H. Fletcher Co. has purchased the business of the Forsyth Hardware & Saddlery Co.

Garfield, Wash.—Crumbaker & Wilson succeed R. C. Wilson in Garfield, Wash. The firm does a retail business in shelf and heavy Hardware, stoves, tinware, agricultural implements, paints, oils, sporting goods, etc.

Glasgow, Ky.—W. H. Pace, who purchased the Barnett Hardware stock is preparing to move same to Glasgow. He will ship it in a few days to that city, where he will go into the Hardware business.

Gravette, Ark.—The oldest Hardware store in the city has changed hands, David Roseborough buying out the entire stock and brick block from J. T. Oswalt Hardware Company.

Hamilton, Ont.—A change in the proprietorship of the F. Hamilton Hardware Company, limited, has taken place and P. H. Alexander has assumed possession of the business.

Haskell, I. T.—Carl E. Coover has been succeeded in business by the Coover Hardware Company.

Hastings, Neb.—Moritz & Burnham have purchased the Hardware store of George Chapman.

Laurel, Neb.—Andrew Solso has purchased the Hardware stock of L. C. & G. A. Mittelstadt.

Loomis, Neb.—Lauritson Bros. have succeeded Broom & Lauritson. The retail line carried includes shelf and heavy Hardware, stoves, tinware, agricultural implements, paints, oils, harness and saddlery.

Mitchell, Neb.—C. F. Johnson is selling his Hardware business to the Mitchell Merc. Company.

Peterson, Iowa.—Fred Plagman has disposed of a half interest in his Hardware store.

Stanton, Neb.—Gus Krenzein has purchased the A. M. Wegner & Bro. Hardware stock and taken possession.

Syracuse, Neb.—Brandt & Paap have sold their Hardware store to W. C. Dilworth.

Table Rock, Neb.—Carmichael & Smith, Hardware dealers of this place, have traded their stock of goods to Nemechek Bros. of this place.

Tulsa, I. T.—H. McClure has succeeded to the business of the McClure-Graef Hardware Company.

Uniontown, Pa.—The Schell Hardware Company are making big improvements to their property which has a frontage of 94 feet on the north side of Peter Street, between Arch and Pittsburgh Streets. The present building of the Schell Company is to be increased to three stories in height. The work has already been started. This property has a frontage of 31 feet, 4 inches and extends back 101 feet.

Victoria, Tex.—L. G. Kreisle has succeeded Pridham & Kreisle in the wholesale and retail Hardware and vehicle business. The old firm of Pridham & Kreisle of Port Lavaca, Texas, remains unchanged.

Wadesboro, N. C.—The stockholders of the Planters Hardware Company have elected the following officers: U. B. Blacklock, president, and T. F. Jones, secretary and treasurer. It was decided to build a store house, 76 feet front and 94 feet deep. This building will be three stories and a basement. The capital stock was increased from \$25,000 to \$30,000.

Burglaries.

Louisville, Ky.—The Hardware store of John Fischer, at 1706 Baxter Avenue, was entered by thieves recently, and about \$75 worth of tools and cutlery is missing.

Maywood, Ill.—Burglars entered J. J. Willis' Hardware store at 116 South Fifth Avenue recently and escaped with about \$200 worth of plunder. The store was entered through a window in the rear, which was broken with a stone. The stolen merchandise consisted of revolvers, knives and razors.

Norfolk, Va.—Thieves have entered the Hardware store of M. Levy & Co., 149-151 Water Street, and secured three dozen pocket knives and razors.

Why is the *Marlin* Repeating Shotgun, Model No. 17, the best low-priced repeating shotgun in the world?

By making this gun with a solid frame and a straight grip stock a number of parts have been eliminated. The result is a stronger, simpler, cleaner gun than any other repeating model, and a very much less costly one.

The exclusively *Marlin* solid top and side ejection are features of Model 17, and to these famous *Marlin* ideas are added the new double extractor and a two-piece safety recoil block—devices which repeating shotgun users will welcome.

The *Marlin* breech block and working parts are cut from solid drop forgings. The barrel of

special rolled steel is bored for both smokeless powder and black. The guaranteed *Marlin* pattern of over 325 pellets with $1\frac{1}{4}$ oz. No. 8 shot in a 30-in. circle at 40 yards is maintained in Model 17.

When the ducks come rushing in among the decoys or the grouse roar off through the dead leaves, you cannot be armed with a better, quicker, harder-hitting gun than the *Marlin* Model 17.

It is a first-class quail gun. For woodcock, snipe, prairie chickens, sharp tail grouse or any other bird shooting it is unsurpassed.

Its records at the traps are wonderful.

If your dealer cannot supply you write us direct. A complete description of Model No. 17 is given in our 1906 Catalog. Sent FREE for six cents postage.

TO ALL DEALERS HANDLING FIREARMS

The above is one of seven half-page magazine "ads" to be used by the Marlin Company in their 1906 advertising campaign. These advertisements will be inserted in a list of magazines selected for their *quality*, known to be bought and read by a class of people financially able to buy **MARLIN** repeaters, and having a total guaranteed circulation per month of 5,000,000. Estimating five readers to a magazine, this will give a total for seven months of 25,000,000 readers.

In addition, **MARLIN** goods are advertised in farm papers, hardware papers, sporting goods papers and in many miscellaneous publications.

In our advertisements we ask for six cents in postage stamps. This means that a person must furnish paper and envelope, a two-cent stamp for mailing, include six cents and take the time and trouble necessary to write us a letter. Our object is to cut out catalog collectors, young boys and girls and people who are not interested enough to invest ten cents and the time and trouble necessary.

We reason that if a person is interested enough to do this, it is worth our while to go after him seriously and earnestly, and on all inquirers answering these advertisements and spending ten cents on us we spend more than twenty cents.

We send each and every one a 136-page catalog illustrated with hundreds of engravings, having a beautiful cover in colors and containing a large amount of general information interesting and instructive to all shooters whether they use **MARLIN** repeaters or not.

We send also a copy of our 96-page illustrated testimonial book and a personal letter in which we refer them to the nearest dealer that we know who carries a good stock of **MARLIN** goods and is enterprising enough to follow up an inquirer and try to sell the man a **MARLIN** repeater.

We also send to that dealer the name and address of the party inquiring, thereby putting the dealer and the consumer in direct communication one with the other. We also follow up the customer and urge him to buy through the dealer.

Our advertising campaign each year brings us thousands of inquiries and makes us a great deal of expense and trouble, as you can readily see, but we believe that it pays us and it will pay you if you will take part in it.

If you are interested please write us and give us full particulars as to exactly where you stand on **MARLIN** goods. If you are with us we want to know it and send you some of this business. Write us to-day and tell us whether you want to be on our dealers' list or not.

The Marlin Firearms Co., 89 Willow Street, New Haven, Conn.

HARDWARE MANUFACTURERS' RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Asbury Park, N. J.—Neptune Chemical Company has been incorporated to manufacture metal polish and chemical preparations; capital, \$50,000. Incorporators: John G. Shafto, George J. Bealey, Irving Anthony.

Buffalo, N. Y.—Susquehanna Hardware Mfg. Co. has been incorporated; capital, \$100,000. Directors, O. W. Norris, C. D. Kingston, and S. A. Archer, Buffalo.

Canton, Ohio.—The G. W. Swineford Company has been incorporated with a capital stock of \$25,000. The company manufactures a line of Hardware specialties. The incorporators: G. A. Swineford, Nina C. Swineford, Homer S. Lerch, Luther Day and W. M. Barber.

Chicago, Ill.—Cook Clevis Company has been incorporated; capital, \$10,000, to manufacture Hardware; incorporators, William R. Hogg, Abraham S. Cody, Thomas Huff.

Evansville, Ind.—Papers have been filed showing the consolidation of the Crescent Handle Works, Evansville, and the Hartley Handle Company, Muncie. The capital stock of the new concern, to be known as the Globe Handle Company, is \$50,000, and the directors follow: William A. Hamilton, Albert J. Ott, John K. Slack, Baird W. Hale and George F. William A. and Harry D. Hartley.

Greenfield, Mass.—The Hunt Manufacturing Co., which recently removed its business from Antrim, N. H., to Greenfield, has incorporated in Massachusetts, with capital stock of \$25,000. The company will manufacture a line of apple parers and corers, hand or power, for evaporators, canners, hotels, bakeries and domestic use.

Hartford, Conn.—A certificate of incorporation has been filed by the Monson Company of this city, which will manufacture metal goods of all kinds, including silverware, tools, machinery and bicycle, motorcycle and automobile parts. The capital stock is \$50,000, and business will commence with \$10,000. The incorporators are E. H. Warner, F. H. Williams, Jr., and C. E. Ripley, all of Hartford.

Ligonier, Ind.—Banta Bender Mfg. Co. has been incorporated; capital stock, \$100,000; to manufacture incubators and refrigerators; directors, Len A. Banta, William H. Bender and John H. Hoffman.

Long Branch, N. J.—The Doby & Shinn Manufacturing Co., Inc., will begin the manufacture of mechanics' tools in the old dust pan factory in a few days. Joseph Wanser, who is president and general manager of the new concern, with headquarters at 19 Park Place and 16 Murray Street, New York, said that machinery had been installed and that a force of workmen would be put to work in a few days. The company has bought the dust pan building and lot of Woolley & Edwards and expect to locate a profitable industry in the building, which has been vacant for some time past.

Macon, Mo.—The Lowell Plow Company have moved their offices from the Bles building on Rollins Street to their new office buildings in East Macon. The new factory building is nearing completion and they expect to begin work in all the departments in about three weeks. They have been delayed, owing to the shipment of some of their necessary machinery, also some iron for the construction of their plows. The Lowell Plow Company will employ several skilled laborers in the manufacture of their plows, besides numbers of other employees.

New York, N. Y.—McDowell Scales Co. has been incorporated; capital, \$25,000. Directors—E. A. Montfort, E. L. Barney, Dr. C. A. Hegeman, New York.

Niagara Falls, Canada.—The McGlashan-Clarke Co., Limited, has been incorporated to manufacture cutlery. Capital, \$100,000.

Paris, Tex.—Lee Totten and others have organized a company which has taken over the North Texas Iron Works. The officers are Lee Totten, president; C. J. Turner, vice-president, and J. N. Totten, secretary and treasurer.

Providence, R. I.—With the purchase of the manufacturing building of Barton A. Ballou, at 17 Warren Street, by George F. Rooke of Bristol, there commences the establishment of the Providence Manufacturing & Tool Company. The property consists of a two-story manufacturing structure and has been taken by Mr. Rooke for the purpose of conducting the manufacture of mechanical appliances, tools and other such work and also to do job work. The property is to be improved, another story added to the present building on Warren Street, off Elmwood Avenue, and within a short time Mr. Rooke says that he expects to have a plant employing 60 or 75 hands in full swing. He has already made arrangements to take over the business of another tool manufactory.

San Francisco, Cal.—The California Saw Works has been incorporated by the filing of articles by H. Bird, Margaret A. Bird, J. C. Harghty, A. Harghty and C. F. Fischer. Its capital stock is \$75,000. It will do a general saw manufacturing business.

Spartanburg, S. C.—The buildings for the new plant of the Russell-Compton Company, which was recently incorporated with a capital stock of \$25,000, are rapidly being completed. The plant will be located on the railroad and will consist of a foundry, 40 by 100 feet, and machine shops, 55 by 100 feet, two stories, both of brick construction. The company will equip the plant for a general machine and foundry business. W. H. Russell is president and treasurer, and R. W. Compton, vice-president and general manager.

Waterbury, Conn.—The Enterprise Machine & Manufacturing Company have filed a certificate of incorporation. The company has an authorized capital of \$60,000. It will buy and sell Hardware of various kinds, including wire goods, machinery and mechanical novelties. The incorporators are William E. Johnson of Hartford, C. B. Schoenmehl and C. L. Schoenmehl of Waterbury.

Changes and Improvements.

Alliance, Ohio.—The Alliance Machine Co. has broken ground for a large addition to its plant. The structure will be brick and steel 100 by 120 feet. A battery of new boilers will be installed in the power plant and considerable new machinery will be added.

Athol, Mass.—The contract for a four-story brick addition to the plant of the L. S. Starrett Tool Co., on Crescent Street, has been awarded. The building is to be 275 feet long and will vary in width from 35 to 65 feet. A part of the building will be used in the manufacture of hack saws and another on the east end will be used as a storehouse. The other departments are designed for general use and will be built in sections of one, two and four stories.

Brooklyn, N. Y.—The Hayes Machine Co. intends to move its plant to Kingston, N. Y., where new buildings will be erected to accommodate the present equipment.

Canal Dover, Ohio.—The Ohio Shovel & Stamping Co. has commenced operations with a force of 50 men. The company reports a large number of orders on hand. Foundations have been put in for a building 100 by 100 feet for the manufacture of handles.

Chicago, Ill.—The Republic Metalware Co. is having plans prepared for a warehouse to be built at 1532-1536 Wabash Avenue, on ground 66 by 172 feet.

Cincinnati, Ohio.—The Bickford Tool & Drill Company have increased their capital stock from \$100,000 to \$200,000.

Columbus, Ohio.—The Ohio Mfg. Co., which is now located at Upper Sandusky, has purchased five acres of land in Dublin Avenue, west of the plant of the United States Hoe and Tool Company and will erect shops on this tract.

Detroit, Mich.—The National Cutlery Co., which was organized in 1904, and has been occupying a plant at Bates and Atwater Streets, will soon move into its larger factory at Lawton Avenue and the Michigan Central, and the force of men will be increased from 100 to 150.

Havana, Ill.—The Crescent Forge & Shovel Co. has increased its capital stock from \$45,000 to \$75,000, and is adding new buildings and installing new machinery.

Lansing, Mich.—The Lansing Wheelbarrow Company has the plans nearly completed for important additions to its plant. A two-story brick addition to the office is to be erected and the machine shop building is to be enlarged by the addition of another story.

Middletown, Conn.—The business of the Briggs Manufacturing Co., manufacturers of machine tools, dies and metal small wares, has been taken over by the Briggs Co., a Connecticut corporation, with paid in capital of \$9,700.

Philadelphia, Pa.—Stearns & Castor, architects and engineers, have prepared plans for a factory building to be erected at Frankford for the American Fork and Hoe Company. The building will be of brick and stone, two stories high, 144.6 by 60 feet.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ambridge, Pa.—The Dickson-Patton Hardware Co., of Ambridge, Pa., have incorporated with a capital stock of \$10,000. They will handle sporting and athletic goods at wholesale and retail.

Anderson, Ind.—The Nicol Hardware Co., succeeding Nicol, Makepeace & Co., have incorporated with a capital stock of \$20,000. They will do a large retail sporting goods business.

Berryville, Ark.—The Walker Hardware Co., succeeding G. W. Walker & Son, have incorporated with a capital stock of \$20,000. Sporting and athletic goods are included in their business.

Bloomsburg, Pa.—George W. Harder, of Williamsport, has leased a vacant store in which he will conduct a sporting goods store. The room is now being fitted up for that purpose.

New York, N. Y.—The Metropolitan Motorcycle Co. is the title of a new firm that has recently been established at 2628 Broadway. It is under the management of George Andes. Bicycles will also be sold and repaired.

Pittsburgh, Pa.—A. G. Spalding & Bros. have added Pittsburgh to the long list of cities where retail branches are established. A sporting goods store has been opened by them at 439 Wood Street, with A. G. Pratt as manager. A complete line of sporting and athletic goods will be carried there.

Portland, Ore.—The F. P. Keenan Co., sporting goods and bicycle dealers, have taken out papers of incorporation with a capital of \$10,000. F. P. Keenan, A. T. Lewis and T. H. Gardner are named as incorporators.

Saugerties, N. Y.—Charles H. Vedder has opened a store at 224 Main Street, and has put in a stock of fishing tackle.

Savannah, Mo.—The Whiteford-Townsend Hardware Co. have incorporated with a capital of \$10,000 to conduct a retail business. They will handle sporting goods.

Soldier, Idaho.—W. Y. Perkins has opened a new store and will carry a stock of sporting and athletic goods.

Walter, Okla.—The Block-Way Hardware Co. have been incorporated with a capital stock of \$10,000. They will conduct a large department devoted to athletic and sporting goods.

Changes and Improvements.

Ackley, Iowa.—Carstens Bros. have succeeded to the business of J. F. Carstens & Son. They will handle a stock of sporting goods.

Albany, Ore.—Oscar Leeper has purchased and taken charge of the gun store and repair shop of Froman Bros. Frank Froman, who had charge of the repair department in the store, will remain in that position for the remainder of the year.

Alpena, Mich.—A. Longshore, late of San Francisco, has bought out the sporting goods business of H. L. Broad, on River Street. Mr. Broad will continue in the bicycle and repair business.

Afton, I. T.—W. J. Melton has bought the retail sporting goods business of William Rollman.

Bloomington, Ill.—C. A. Fenn, of 208 East Front Street, having been in the bicycle business for a number of years, has now added a line of sporting goods to his stock.

Bristol, Conn.—Plans are being drawn for a new factory which is to be erected on North Main Street, by the Horton Mfg. Co., manufacturers of the "Bristol" steel rods. It will be of brick, and three stories high.

Bristol, Conn.—The New Departure Mfg. Co., maker of balls, bicycle holders and supplies, have decided to enlarge their German branch at Berlin. Plans for more than doubling their capacity of the Berlin works have been prepared.

Chicago, Ill.—Bullard & Gormley, 78-80 Randolph Street, have added golf and tennis specialties to their stock of sporting goods and from now on will carry as complete an assortment in both of these lines as can be found in the city. They have also made arrangements for the restringing of all tennis rackets entrusted to their care for this operation.

Chicago, Ill.—The Fischer & Tesch Mfg. Co. of 50 Canal Street, makers of the New Century telescoping steel casting rod, will be known henceforth as the Fischer Rod Mfg. Co. They have increased their capital stock from \$15,000 to \$30,000.

Clarence, I. T.—Moore-Ryan Furniture & Undertaking Co., have bought the retail sporting goods business of Herbert J. Moore.

Clarksville, Mo.—The business of Thornton Bros. will henceforth be conducted by Thornton & Groom.

Cotesfield, Neb.—E. S. Sears has purchased the sporting goods and Hardware store of W. R. Holmes. He will conduct the business on broader lines in the future.

Garfield, Wash.—R. C. Wilson is succeeded by Crumbaker & Wilson. They will carry on a retail business in sporting goods and Hardware.

Grainfield, Kan.—L. Conrad Hardware Co. have purchased a portion of the business of E. B. Atkinson & Co. Their stock includes sporting, athletic and leather goods.

Lincoln, Neb.—The sporting goods and bicycle business of the H. E. Sidles Cycle Co., has been purchased by J. A. Anderson & Co.

Meriden, Conn.—The Meriden Firearms Co. are planning further additions to their plant. One factory building has just been completed, and work on another structure to be 400 feet long will soon be begun.

Milton, Wis.—The bicycle business of E. S. Babcock & Son has been bought by Carl Gray. It will be conducted along the same lines as in the past.

Neosho, Mo.—W. T. Matters intends to add a stock of sporting and athletic goods to his harness business.

Peoria, Ill.—At a recent meeting in Cincinnati of the stockholders of the Buckeye Powder Co., it was voted to increase the capital stock to \$200,000, or just double the old capitalization.

Reinbeck, Iowa.—Robinson & Terrall have succeeded Robinson Bros. in the

Hardware business. Hereafter they will carry a line of sporting goods.

Salem, Neb.—E. S. Davis has bought the Hardware store of V. H. Shier. His stock includes sporting and athletic goods.

St. Louis, Mo.—Installed in their new and spacious quarters at 1318 Pine Street, the Brauer Bros. Mfg. Co., manufacturers of all sorts of leather sporting goods, are enjoying a business that is unusually brisk for this period of the year. The firm are situated only one-half a block from their old site, but the facilities are vastly superior. Besides having 3,000 square feet more floor space and greatly improved power service, they now have elevator service in the building, and the office and show rooms are large and well lighted.

St. Paul, Neb.—The sporting goods business of A. J. Bollinger has been bought by Ward & Peterson.

Torrington, Conn.—The Union Hardware Co., manufacturers of skates and Hardware, have drawn plans for an additional factory building. The structure will be of brick, 100 feet square and will cost about \$8,000.

Vera, I. T.—Hadley Bros. have succeeded to the business of German & Hadley, and will carry a stock of sporting and athletic goods.

Fires.

Tonawanda, N. Y.—The Echo Bicycle & Motor Boat Co.'s plant on Young Street has been destroyed by fire, entailing a loss of fully \$3,000.

Miscellaneous.

New York, N. Y.—At the annual meeting of the American Fishing Line Manufacturers' Association held in New York City the following officers were elected for the ensuing year: President, W. H. Draper, of W. H. Draper & Sons, Troy, N. Y.; vice-president, Ralph R. Brown, of B. F. Gladding & Co., South Otselic, N. Y.; treasurer, A. J. Crandall, of Ashaway Line & Twine Co., Ashaway, R. I.; secretary, C. F. Randolph, also of the Ashaway Company.

MANUFACTURERS RECORD

(Concluded).

St. Johnsbury, Vt.—The increased business at the Fairbanks Scale Works taxes all the present facilities of the plant and a new building is now being erected and plans are matured for extensive improvements at the iron foundry, though the latter building will not be erected until next year. The new building is built primarily for the manufacture of the automatic scales which have been developed so successfully the past year. It will be a three-story, solid brick structure with a basement, with the ground dimensions about 90 by 50 feet.

Wallingford, Conn.—The W. A. Ives Manufacturing Co., formerly the Hamden Manufacturing Co., manufacturers of boring implements, which has largely increased its facilities during the past year, is building another addition to the plant.

Ypsilanti, Mich.—The Michigan Ladder Co., manufacturers of extension and step ladders, expect shortly to acquire additional property for the expansion of its plant.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

The Gem Mop Head.

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

PRICES CURRENT

The prices in this Prices Current are intended for the hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

When Henry Disston was asked the
question:

"What do you put in your saws?"

He replied:

"Good steel and honest work."

UPON THIS FOUNDATION IS BUILT

DISSTON QUALITY

"If you want a saw it is best to get one with
a name on it that has a reputation. A man who
has made a reputation for his goods knows its
value as well as its cost and will maintain it."

HENRY DISSTON & SONS, Inc.

Established
1840.

PHILADELPHIA, PA.

The Anguish of Angling

WARNING!

TO WHOM IT MAY CONCERN:

We have been advised that the Automatic door closing device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 1900. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO., Inc., Des Moines, Iowa.

WATROUS AUTOMATIC DOOR CATCH

OPEN

Japanned Steel Door Buttons.

Patent Applied For.

CLOSED

Half the weight of the cast, much stronger, and will not break. No higher in price and twice as good. Made in all sizes from 1 1/4 to 2 1/2 inches.

Insist on having them. Carried by all leading jobbers. Write us for samples and name of nearest jobber.

THE E. L. WATROUS MFG. CO., - - - Des Moines, Iowa.

The Shear of The Year

Not How Cheap--But Quality and Durability.

You don't want the Cheapest, but The Best. We claim in our Patent Adjustment Shear to give you a Shear that has the advantage over other makes of Quicker Adjustment and Longer Service, combined with Quality and Workmanship. Requires grinding 1 to 10, that is, other Shears require grinding ten times where ours are ground once. It is not the cutting, but the bearing which dulls the shears.

The Perfect Feature of construction of our Shear is the method of drawing the Shear blades together Without the use of a Screwdriver. A turn of the milled nut tightens or loosens the blades by forcing the Forked Head under the head of the pin which passes through both blades. By a few turns of the milled nut the blades can be taken apart, which eliminates All Use of the Screwdriver for taking apart, or taking up lost motion.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

The Gem Mop Head.

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

Mrs. Frances A. W. McIntosh, formerly advertising manager of the Standard Tool Company, Cleveland, Ohio, and more recently connected with the advertising department of *Power*, New York, now has charge of the publicity department of the Norton Company, Worcester, Mass., the appointment taking effect August 1st.

The blind do lead the blind. A professor of one of our leading colleges who in a recent speech said the Monroe doctrine "is the embodiment of national greed and selfishness" has charge of the history department.

The Pittsburgh Shovel Co., Pittsburgh, Pa., and having their factory at Leechburgh, Pa., are represented in New York at 103 Reade Street by D. B. McIlwaine, who has been well known to the trade in this city for a number of years. He will be provided with stock in their several lines for the convenience of customers. The company manufactures Special High Grade Crucible Steel Contractors' and Railroad Shovels, Coal and Grain Scoops, Telegraph Scoops and Ditching and Draining Tools; also Hickory Clay, Pick and Sledge Handles, etc.

The sharks are not the only fish which swim out of the financial sea with other people's money. Recently the Salmon bank failed, down in Missouri, and now a Mr. Hering seems to be blamed for a Chicago bank failure.

G. & H. BARNETT CO.

It's getting to be quite the thing now to supply your customers with an ornamental sign to hang up in the store to let the people know that he handles the goods of the advertiser. The latest decoration of this kind exploits the G. & H. Barnett Co.'s "Black Diamond" Files and Rasps, Philadelphia, Pa. It is a neat and pretty metal sign lettered on both sides with a vermilion background on which the well-known "Black Diamond" is in evidence, and calculated to do justice to the thought in which superior files are suggested. It deserves a conspicuous position. The company will be pleased to forward one of these signs to any of our readers who may request it.

"NEWSPAPERS WORTH COUNTING."

"Newspapers Worth Counting" is the name of a unique book to be issued by the Printers' Ink Publishing Company of New York. The forthcoming publication is edited by George P. Rowell who, thirty-eight years ago, established the American Newspaper Directory, and under whose auspices and control it has ever since made its annual appearance. It is the national authority on newspaper statistics and a study of its pages reveals the interesting facts that only one newspaper in three succeeds in gaining a sale of so many as a thousand copies; and of those that do, only one in five will allow the advertising public to know how many copies they issue. It is a circumstance that affords some satisfaction to this paper that "Newspapers Worth Counting" will record it not only among the one of three but also among the one of five as well. The forthcoming book (500 pages Octavo) is one that will greatly interest every man who has to do with advertising. It will be sold for \$1.00 a copy. Subscriptions will be received at this office.

"COMMUNITY SILVER."

As pretty a piece of printing and publishing as one could wish to see meets our approbation in the receipt of a booklet from the Oneida Community, Ltd., Oneida, N. Y. It is entitled "Some Business Ideals of the Oneida Community," and while it could refer to anything they manufacture, confines itself to tracing the development of the present organization and its products from the foundation of the Community many years ago. The artistic manner of its presentation is simply unique. The cream-tinted cover has a depression on it, on which is enshrined a rich design hanging by its top ornamentation, with the words "Community Silver," giving the booklet its title. Beautiful little vignettes adorn the text in tint, showing the spacious edifice known as the Community Home, a beautiful bit of landscape embracing a view of the historic Oneida Creek, finishing with an artistic example of the widely advertised Fleur de Luce design of Community Silver. Nothing in the nature of advertising is to be found in the booklet, the interesting character of which impresses one by its text, which so graphically tells its own story.

ENTERTAINED BY F. E. MYERS & BRO.

It is the annual custom of F. E. Myers & Bro., Ashland, Ohio, the famous manufacturers of pumps, hay tools, etc., to entertain their entire traveling force, which they did this year on July 30 to August 2, sitting down to a sumptuous banquet at 6 o'clock on August 1 at the magnificent residence of F. E. Myers, whose guests they were. The entire traveling force was present, with the exception of those in remote territories and in foreign countries, as well as their office men and shop foremen, aggregating nearly 100 in all. During the time that they were entertained at Mr. Myers' residence they spent several days at the works, during which time there was a close shop and product inspection, exchange of experiences and views, a regular and thorough drill covering new goods, and the superior points of merit noticeable in the Myers line of pumps, hay tools, etc. Photographs were taken of the entire force, which was suggested by the travelers, who were enthusiastic on the subject, and without flattery they were as fine a body of representatives as any house might well be proud of. They formed one photograph, which was taken on the front steps of Mr. Myers' residence, while the other commemorated the salesmen, office force and foremen of the works. The past year has been the largest in the history of the works, and has been generally satisfactory. They have practically recovered from the loss by fire, having rebuilt, installed new machinery and increased the capacity generally.

WONDERFUL FEATS BY AMERICAN SEWING MACHINES.

Over 10,000 patents have been taken out on sewing machines. American sewing machines are now sold in every country in the world. They are used for all manner of purposes, for making boots and shoes, awnings, tents and sails, and some of them have an 18 foot bed. Some machines are made for sewing carpet and can sew as much carpet as 100 hand sewers. They are also used to make bags, corsets, hats, caps, gloves, mittens, pocketbooks, saddlery and harness.

THE RIGHT USE OF ADVERTISING MATTER.

Many a dealer who is sure he ought to advertise his store more and better, but who is concerned over the question of expense, should realize that aggressive manufacturers of widely-advertised specialties offer him excellent advertising in return for the slight effort of distributing it.

Some dealers who are not buying automobiles, and who wonder how their competitors can buy them, have under the counter or down cellar, packages of expensive printed matter that would increase their sales if it reached the hands of the right people.

It is advertising matter of a good quality, much of it, full of force and selling arguments and well illustrated. If handled properly it would not only sell the article that it talks about, but would bring people to the store who would not otherwise come.

A case in point is the experience of dealers with a clever new booklet furnished by the Enterprise Manufacturing Company of Pennsylvania, to promote sales of their line of household Food Chopper, under the title of "The Cook, Her Critic, and—"it gives valuable advice to young housekeepers and suggestive hints to older ones. Dealers are supplied free, and those who have made careful use of the booklet, putting copies into the right hands, have reaped a quick harvest of good sales.

The same Company furnishes free copies for distribution of their much-sought-for "Enterprising Housekeeper," which is held in high esteem because its recipes are economical and practical, unlike so many of the modern cook books.

If you are not getting the full benefit of these advertising aids write to the Company and get them at work for your store.

IDEAS AND PROJECTS IN GOD'S OUTDOORS.

Most men, says *The Business World*, are afraid to have an original thought. People laugh at them. It's not customary. They leave the great outdoors to poets and such folk. It's for them to translate nature to man. Just as if someone else's soul could be a substitute for yours. Nature doesn't talk for phonographs. You must find your own story and song in the great outdoors. You must work out your own salvation there. More ideas and projects are awaiting you in the land of God's outdoors than you can imagine as you sit now bounded by a pigeon-holed wall and a squeaky chairback.

AUGUST 25, 1906

Editorial Trade Review

From all indications our remarkable crops, which are record crops, surpassing all that have preceded them, insure the prosperous condition of the country for another year of steady business and remunerative employment for all that are satisfied to work, and although there has been apprehension that something would happen that would unfavorably affect our agricultural resources through a failure in our production of cereal wealth, we have all fears put to rest with crops larger than the largest, and the farmer the king of the situation. With the largest wheat and corn crops on record to bank on for a year to come at least, we are fortunately blest in every respect.

The increasing volume of business is everywhere apparent in every market from which Hardware draws its supplies. In every quarter dealers are buying liberally for the season's trade without fear of the result. The beneficial effects of two years of agricultural prosperity such as we have known create an average amount of wealth which it is difficult to conceive let alone to realize. The improvements which a single year's prosperity felt the necessity for adding to our landed wealth is now made certain by the addition to resources and an increased acreage under cultivation will prove the benefit, insuring results that will continue conditions so flattering to our successful efforts. Most of the jobbers have already acted on the commercial impulses that inspire the healthful conditions of our future, and have ordered large stocks of goods on which they have grounded the hopes of the season's requirements, which, considering the large number of unfilled orders yet untouched, it is the part of wisdom to secure this advantage of early orders for Fall business and see that they are booked in season.

The advances in prices are not extravagant, although the firm and unyielding tone which any advances give the market cause an indefinable strength which characterizes quotations generally. Prices on the average range about as last year, with but little of change to report. Profits will be lighter on some goods, on account of advancing conditions in raw material, but as changes in quotations are deprecated some manufactures take chances. The mills on wire products have been operating to their capacity, but without the accumulation of surplus stocks. They are

doing their very best to deliver everything possible to avoid the possibility of a shortage in September.

The vacations may be said to have been finished, except possibly some of the bosses and the higher grade of rest-taking individuals; the attention paid to orders, mostly from travelers in their pick-up requisitions for immediate wants, is of the most industrious kind. The heavier stock orders of winter goods, while they are being corralled with avidity as usual, a little later date of delivery may be selected. All the orders are hurried to factory for all that can be shipped direct at specified dates in the future; for the dealers are demanding this disposition of their early stock orders to avoid the anticipated congestion of orders after September 1. There doesn't seem to be any danger of having overstocks of any kinds of goods this Fall at least. The trade generally while they order full quantities needed are by no means making them consist of speculative quantities.

LEADING ARTICLES OF EXPORTATION FROM THE UNITED STATES, FISCAL YEAR 1906.

The fact that the exports of domestic merchandise from the United States have doubled in the last ten years, coupled with the constant demand for information as to the articles in which that growth occurred, has led the Bureau of Statistics of the Department of Commerce and Labor to prepare a special table showing, in the order of magnitude, the principal factors in the export trade of the fiscal year ending June 30, 1906, to which is added, for comparative purposes, a column showing the exportations of the same articles in 1896.

The following table shows the value of the 32 leading classes of articles exported in 1896 and 1906, and includes 90 per cent. of the exports of last year, thus affording a ready means of tracing the elements of growth in our exports since 1896:

Exports of the United States, 1896 and 1906, in the order of magnitude in the latter year.

| Articles. | 1896 Dollars. | 1906 Dollars. |

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

INTEREST WAIVED BY ACCEPTING PRINCIPAL.

QUESTION.—I borrowed one hundred dollars without agreeing to pay any interest. After two years I paid back the principal which was accepted. Now the man who loaned me the money says he is entitled to interest on it and threatens to sue me for the interest. Must I pay it?

REPLY: If there is no agreement to pay interest, it is the rule in most of the States that by accepting the principal sum without demanding or claiming interest the creditor waives his right to claim interest on the debt. It follows that if your creditor accepted the one hundred dollars without reserving his right to claim interest, he lost any right which he may otherwise have had.

GUARANTOR RELEASED BY EXTENDING TIME OF PAYMENT.

QUESTION.—I guaranteed the payment of an account due June 1st. On that day the creditor without my knowledge or consent, in consideration of the debtor ordering and paying cash for a new bill of goods, extended payment on the account three months. Am I still liable if the debtor does not pay?

REPLY: We think not. The contract of a guarantor is a peculiar one. He is not ordinarily held liable beyond the precise terms of the obligation he has assumed. Any material change or alteration in the principal contract made without his consent, discharges him from liability altogether. This is true, even though the change cannot be shown to have been detrimental to his interests in any way. It follows that an agreement to extend the time of payment upon a debt, made upon a valid consideration and not consented to by the guarantor, releases him altogether from liability on his contract of guaranty.

BROKER—RIGHT TO COMMISSIONS.

QUESTION.—A broker is employed to sell a house and lot. After two months his authority is revoked. A month later the house and lot are sold to a person whom the broker interested in the property and with whom he was negotiating at the time he was dismissed. Can he claim commissions on the sale?

REPLY:—We think not; unless, perhaps, the broker's authority was terminated in bad faith and for the purpose of depriving him of his commissions. The law as settled by many recent decisions is, that to entitle a broker to commissions, he must procure a purchaser during the term of his employment; and that after a reasonable time, the principal may terminate his agency and right to commissions, unless this is done in bad faith for the purpose of depriving the agent of the fruits of his labor at the time that his labor is about to prove effectual. In other words, the broker must do what he is employed to do before his authority is terminated, and the only restriction upon the right of the principal to dismiss him, after allowing him a reasonable time to effect the sale, is that the principal must act in good faith and not merely for the purpose of defrauding the broker of his commissions.

WHEN OWNER OF LEASED PREMISES IS RESPONSIBLE FOR CONDITION OF STAIRWAYS.

QUESTION.—"A" leased a house to "B"; by the terms of the lease "B" agreed to keep it in repair. He did not, but allowed the front steps to get in such a rickety condition that they broke, so that a visitor fell through and was considerably injured. Is "A", the owner of the premises, responsible for the damage to the person who is injured?

REPLY: Prima facie it is the occupier of land, not the owner, who is responsible for nuisances thereon. Here the premises were being occupied by "B," the tenant, and he is the person prima facie responsible for their condition. The owner "A" would be responsible if, occupying the premises, he had allowed the steps to get in a dangerous condition; if he had leased the place with the nuisance thereon, although out of occupation; if he had leased the premises and agreed to keep them in repair, and omitted to repair, and thus they became a nuisance; or if he had leased apartments or rooms in the house, retaining control over

the stairways and exits. In all such cases, there is no dispute that the owner would be liable. But an owner who has leased premises for a term of years during which they become ruinous and thus a nuisance, is not responsible for the nuisance, unless he has covenanted to repair. Here the duty to make repairs was cast upon the tenant, and the person injured must look to him for legal redress.

THE NEW POSTAGE RATES.

The Department of Commerce and Labor performs a distinguished service by going somewhat out of its regular channels of activity to call attention, through the consular reports, to a misunderstanding which apparently exists in business circles in regard to the new rates of foreign postage, which were agreed upon by the Universal Postal Congress at its recent session in Rome.

In the first place, attention needs to be called to the fact that this new arrangement will not go into effect until October 1, 1907. As to new rates, it should be pointed out that the new international prepaid letter rate is to be five cents for the first 20 grams, and three cents for each additional 20 grams. In countries where the metric system is not used, one ounce avoirdupois is to be regarded as equal to 20 grams, so that it will be possible under the new arrangement to mail a letter weighing one ounce from this country to any other country for five cents, constituting a reduction of exactly one-half from the present rate. The charge for a letter weighing two ounces will be only eight cents. The change applies only to first-class mail.

Although the new schedule will save much money for thousands of concerns when it is finished in effect, it is a trifle early for exporters and others to begin to take notice of this saving in their expense accounts, a point which, according to the post-office authorities, has been overlooked by not a few concerns. —N. Y. Commercial.

WYETH HARDWARE & MFG. CO.'S CATALOGUE

Wyeth Hardware & Mfg. Co., St. Joseph, Mo., have recently distributed to their customers a full and complete catalogue of general Hardware, which contains 1,500 pages 11 $\frac{3}{4}$ x 12 inches in size, and in addition 37 pages of approximate prices which apply to every item exhibited in this large catalogue. The book is unusually well printed on an excellent quality of paper for the purpose, and is arranged in a concise and convenient manner, having heavy and substantial covers of the loose-leaf style, by the aid of which any additional pages can be subsequently added with the usual convenience, and is thoroughly indexed, the Index covering 34 pages. The edition consists of 5,000 copies, and the catalogue shows an abundance of care in its compilation and completeness which is a credit to the catalogue compiler and his assistants, who had the work in hand, and who did full justice to their opportunities. The contents are arranged under several heads or departments, as follows:

- No. 1.—Mechanics' Tools, Pages 1 to 170.
- No. 2.—Farming and Lawn Tools, Pages 171 to 246.
- No. 3.—Builders' Hardware, Pages 247 to 552.
- No. 4.—Miscellaneous Hardware, Pages 553 to 712.
- No. 5.—Paints, Brushes and Household Goods, Pages 713 to 924.
- No. 6.—Enameled, Nickel Plated Copper, Japanned, Galvanized, Pieced and Stamped Wares, Pages 925 to 996.
- No. 7.—Tinnerns' Trimmings and Supplies, Pages 997 to 1022.
- No. 8.—Cutlery, Pages 1023 to 1286.
- No. 9.—Sporting Goods, Bicycles and Fishing Tackle, Pages 1287 to 1501.

The feature of giving approximate prices is intended to assist the dealer in selling any goods mentioned, and which he may not carry in stock, and which informs him as to competing prices, so that he need not go widely astray. This will be availed of generally by the customer who receives it, and be the means of selling a lot of unfamiliar goods and extend knowledge and give confidence in making sales. This company has been established nearly fifty years, and do a large and extensive business, the main store and offices of which are now located at 609-625 N. 2nd Street; the harness factory at 302-314 N. 2nd Street; the collar factory at 221-223 N. 2nd Street and the warehouse at 709-715 N. 3rd Street.

CHICAGO SPECIAL TRAIN TO ATLANTIC CITY.

A special train will be run from Chicago to Atlantic City in connection with the annual conventions of the American Hardware Manufacturers' Association and National Hardware Association, October 17, 18 and 19, at the Malborough-Blenheim. The special will leave the Union Station, Chicago, on Monday, October 15, at 3 p. m., and is due to arrive at Atlantic City at about 4.30 p. m. on the following day. The arrangements for the train are under the efficient charge of W. H. Bennett, room 403, 40 Dearborn Street, Chicago, who will be pleased to hear promptly from those who desire reservation made for them.

CALORIG-FIRELESS COOKSTOVE.

The Caloric Fireless Cookstove Co., Grand Rapids, Mich., are manufacturing the Caloric Fireless Cookstove, which is based on the scientific fact that save in hermetically sealed vessels it is impossible to raise the temperature of boiling foods above 212 degrees Fahrenheit, no matter how much gas or fuel is consumed under the vessel. The principle of the Caloric Air Tight Cook Stove is to retain the heat generated in an ordinary wood, coal, gas or oil stove in the scientifically insulated cabinet, or "cooking stove," as the manufacturers call it. The food desired to be cooked is first prepared in the ordinary manner, and placed in the vessels with which the cabinet is equipped. It is then brought to a boil for a few moments on an ordinary stove, the cover of the vessel—a patented revolving bar-lock affair—is clamped down and the vessel is quickly placed in the cooking cabinet and closed. The vessels fit closely in holes or pockets in the cabinet, and are tightly surrounded to a width of two inches on all sides, top and bottom, by the best known non-conductor of heat, a thoroughly hygienic and scientific preparation. The surrounding atmosphere being unable to reach the interior of the vessels, the temperature is not lowered, and the food continues to cook until it is thoroughly and evenly done through and through, requiring about twice the time that would be required on an ordinary flame stove. But inasmuch as there is absolutely no consumption of fuel or gas and the cooking cabinet requires no further attention, the added time is far from a drawback. Furthermore, the food is not affected by a much longer stay in the cabinet, contrary to cooking on the open flames, inasmuch as there is no loss through

CALORIC FIRELESS COOKSTOVE.

evaporation. The Caloric Fireless Cookstove is furnished complete, each one with three vessels of the finest German make of enameled ware, of extra heavy gauge, each one equipped with a patent revolving bar-lock cover, which practically hermetically seals the vessels, a very necessary feature, which can be obtained only by the use of the Caloric vessels. The revolving bar-lock cover also furnishes a convenient handle for lifting the vessels in and out of the stove. Failure in cooking any article of food in the Caloric Cookstove is absolutely impossible if the directions are followed. There can be no over-cooking or under-cooking, no burned or scorched foods, no dry and tasteless dishes. The heavy cooking of the day, it is claimed, may be done in the morning, and the food be ready for serving, hot, without further attention of any kind. The breakfast may be prepared the night before, and found deliciously cooked and hot, ready for serving the next morning. The coffee does not lose its taste or finest aroma, even when kept hot for a period of twelve hours. In size it is 36 inches long, 15 inches wide and 17 inches high. It is made of quarter-sawn oak, weathered or golden finish, is cast-iron and forms an attractive addition to any kitchen. The oak is thoroughly and specially seasoned, and the insulating material is the best-known non-conductor of heat, thoroughly sanitary and durable. Everything cooked in the Caloric is better and more thoroughly cooked by this slow and fireless method than can be produced in any other way, without any shrinkage of meats, with the full flavor and all juices retained, and in the case of fruits and vegetables without any scorching, and all these articles come out of the Caloric in perfect form.

Chicago sends out a story about a Chicago dog license tag being found in a can of pressed meat. We have become accustomed to hearing about dogs disappearing around butcher shops, in a mysterious manner, and have even heard hints about their getting into the sausage, but we always supposed they were skinned and the collar taken off first.

OTHERS ATE HIS PIE.

BY FRED A. GANNON.

In Pushtown, Pokalong kept a Hardware store. He didn't advertise, "because," said he, "people know I've Hardware to sell, and if they want it they'll come to me after it." He didn't read his trade papers for new ideas, and he put in no new lines to catch trade, "because," said he, "if people want any new things they'll ask for them." So he sat on his doorstep in Summer, and by his salamander stove in Winter, waiting for people to come in and ask for things. Needless to say, he wore out no pens figuring up his bank account.

Now in Pushtown there are many enterprising men and firms, and this is what they did to Pokalong.

First, Graball & Co., who run the department store, said one day: "Nobody is pushing tools and nails in this town; let's try a line." Forthwith, they bought a job lot of tools, and a few kegs of nails, and put a screamer of an "ad." in the daily paper about their new "Hardware department," with bargains as inviting to pickers as oranges in a California grove.

"Humph, they'll get sick of selling goods at those prices before long," grunted Pokalong. But a score of his customers went over and picked up bargains at Graball's store.

Next, The Renovator Co., "Artistic House Painters, Decorators and Paper Hangers," had a private conference in their back shop and said: "Business is getting slack in our line, because people are doing their own painting and paper hanging; but let's get a share of their trade. We can sell them paints, pastes and brushes." At once they laid in a stock of new and well advertised paints, and inserted a card in the daily paper announcing their new enterprise.

"Humph," said Pokalong, "They'll find in about a week that they had better have stuck to their trade. There ain't much call for paints and brushes in this town." But people went to the Renovator Co. and bought them.

Pills & Pelletts ran a drug store. Said Pills to Pelletts one day: "This town is too healthy for our business." Said Pelletts: "Let's help it boom. We'll put in a line of advertised safety razors, so that every man can shave in a jiffy and save time for his business." Forthwith, they put in a line of Safeties, and advertised the fact. Then people who had bought old-fashioned blades at Pokalong's cursed him roundly, and hurried to Pills & Pelletts for the new lightning shavers. And Pills & Pelletts concluded that if they could sell razors, they could likewise sell pocket knives, nail clippers and other little devices of which a man is often in need.

Hay & Grain decided to make a stronger bid than ever for the farm trade, so they put in a line of new seeds one Spring, and advertised them. And the farmers who used to go to Pokalong began to hitch their horses in front of Hay & Grain's establishment.

Then Young Hustle laid on the last straw that broke the camel's back, and sunk Pokalong's elysium. Said Hustle: "Everybody is biting a piece out of the pie while Pokalong slumbers. I'm going to make a pie for myself, and I'll take care to get the biggest share of it myself, too." So he resigned his place as head clerk and bookkeeper for Pokalong, and started a store of his own, full of live goods. It didn't take him many days, nor much advertising space in the newspapers, to get the people of Pushtown talking about his store, for he told them in a few simple words of the goods in his store that they might want; standard tools, new ideas in tools, the latest style fittings for doors and windows, new patterns in table cutlery, new washing machines, new mop wringers, and a host of other things.

Said he: "People of Pushtown didn't know that a Hardware store keeps a hundred and one articles that saves time and money in the shop, store and home, and makes life happier, and I've got to educate them up to it. I teach by advertising. An army of men wouldn't have known about safety razors, and a host of women wouldn't have known about washing machines, if it hadn't been for advertising. So I'm an advertiser, and I read trade papers to get new ideas and new goods to talk about."

For a while, Pokalong continued to insist that if people wanted Hardware they would come to his store to get it, but one day, his creditors had to close him up. When he saw his stock disappear in about twenty-four hours at a well advertised sheriff's sale, he woke up to the possibilities of advertising, and he reformed. He started in business again, kept pushing new ideas, especially by advertising them, and he prospered.

Money is made as it is moved along, and advertising is the power that keeps it circulating.

General, abstract truth is the most precious of all blessings; without it man is blind; it is the eye of reason.—ROSSEAU.

MICHIGAN RETAIL HARDWARE ASSOCIATION

The twelfth annual convention of the Michigan Retail Hardware Association was held at the Hotel Cadillac, Detroit, August 8, 9 and 10, the increased membership now amounting to 684, 163 new members having added their names to the roll previous to and during this convention.

The display of goods of the manufacturers and jobbers was on a larger and more profuse scale than ever before, only circumscribed by the accommodations afforded by the Hotel Cadillac where they were all exhibited.

The assembled delegates were so warmly welcomed to Detroit on this occasion that they decided to accept the invitation to meet there again next year. The convention devoted two days to business and one day to sight-seeing, when an opportunity was given them to visit local jobbing and manufacturing establishments, and in the afternoon and evening they were taken for a river and lake ride to Bois Blank Park, where they were served with supper.

Over 300 members, many accompanied by their families and clerks, were present, and honorary memberships were granted to 200 salesmen and manufacturers.

CONVENTION COMMITTEES.

Following the morning meeting of the Executive Committee the opening session was held in the large assembly hall of the Cadillac on Wednesday afternoon. Hon. George P. Codd, mayor of the city, welcomed the members with an eloquent address and response was made by J. H. Whitney, president of the Association. The president then announced the appointment of the following committees and convention officers:

CREDENTIALS: S. S. Boyce, Port Huron; Walter W. Caple, Alma; J. J. Vander Meer, Grand Rapids.

CONSTITUTION AND BY-LAWS: Paul E. Dunham, Lansing; A. G. Schoeneburg, Saginaw; O. H. Gale, Albion.

RESOLUTIONS: M. W. Callaghan, Reed City; A. Harshaw, Delray; I. Lee Traux, Bennington.

QUESTION BOX: P. A. Wright, Holly; D. L. Whitenock, Tecumseh; R. G. Ferguson, Sault Ste. Marie.

PRESS: C. E. De Clements, Detroit; F. C. Goddegree, Bay City; Fred Ireland, Belding.

AUDITING: George P. Griffin, Albion; S. W. Winchester, Jackson; John Popp, Saginaw.

NOMINATIONS: J. G. Sperry, Port Huron; C. M. Alden, Grand Rapids; Frank Brockett, Battle Creek; R. M. Porter, Williamston; Chas. Rounds, Yale.

LEGISLATION: C. L. Glasgow, Nashville; A. Harshaw, Delray; W. E. Bosley, Marshall.

H. G. Mulholland, Potterville, was appointed sergeant-at-arms.

PRESIDENT WHITNEY'S ADDRESS.

After the reading of the minutes of the last meeting by Secretary A. J. Scott, Marine City, President J. H. Whitney, Merrill, delivered an able address, which comprehensively reviewed the work of the year, in part, as follows:

When we take a retrospective view of the many changes that have taken place in the commercial world since our organization, we are filled with wonder and surprise and marvel as to what the future has in store for us. The epoch through which we have just passed will long be remembered for the rapid strides that have been made in the commercial world. It is a condition that confronts us, as to what the results of this remarkable growth will be. The success of a nation depends upon the prosperity and intelligence of its people. No nation enjoys such universal peace and prosperity as does ours at the present time. Yet we cannot look into the future without serious apprehension. The combination of capital, the formation of trusts and the tendency of doing things on a gigantic scale, all of which is the result of our continued prosperity, makes it imperative upon us to adjust ourselves to the conditions that confront us, that we may be able to keep pace in the march of progress and not fall by the wayside.

The past year has been the most notable one, in many respects in our history. Greater efforts have been made to influence legislation than ever before, and but for the powerful influence of the great trade associations, the chief of which is the National Retail Hardware Association, we would to-day be confronted with parcels post and post check and the consolidation of third and fourth class mail matter, the adoption of which would have been a serious blow to the retail interests of the country.

But our labors are by no means ended. I believe them to be but just begun. I will give you an extract from a letter that I received from a member of the Committee on Post Offices and Post Roads in the House which, I think, is very pertinent and,

in my judgment, merits the careful consideration of every person to whose attention it is called:

I do not think any of these bills will be passed at the present session of Congress. I give you warning, however, that strong influences are behind these bills and are pushing, not only the Post Check bill and the consolidation of third and fourth class mail matter, but also a radical Parcels Post bill.

The farmers everywhere are lining up in favor of all these propositions. Unless the retail merchants, the jobbers and other kindred interests, by an organized effort, through the country press and otherwise, present satisfactory reasons why these measures would not be in the interest of the farmers, Congress will in time be compelled to pass them.

The farmers through the Grange and agricultural publications are being lined up strongly in favor of these measures. Unless you reach these people through the press with logical and convincing arguments your cause will be lost, in my judgment, in the near future.

The sentiments expressed in this letter, to my mind, demonstrate the true situation of the conditions as existing at the present time. It is necessary, then, for us to renew our efforts and continue the fight if we would not have our business taken from us and scattered to the four winds.

Our success as merchants depends solely upon our individual efforts in the community in which we live. If we would be successful we must be alive to the needs of the hour and keep in touch with improved and modern methods. It is necessary that we retain our membership in the Association, and to promote its growth and endeavor to induce every legitimate Hardware dealer in the State to become a member. During this age of combinations of capital and merging of interests it is necessary for us to do this, that we may be better enabled to combat the evils that arise, as this can be done only by earnest, united effort. The experiences of the past year prove to us conclusively the wisdom of successful organization and co-operation.

While our membership has not increased in numbers during the past year as much as it has in some of the years gone by, yet we have had a very substantial growth and at the present time are stronger than ever. We have a membership that is loyal, and one which has a strong fraternal spirit, thus insuring to us beneficial results that will be permanent and everlasting. Let us devote our best energies and thought to the business we have in hand, and when the work of the convention is completed let us feel that the time has been profitably spent and that we will go to our several homes feeling well repaid, realizing that we will be better enabled to perform the work which is before us during the coming year.

REPORT OF TREASURER.

The report of Henry C. Weber, treasurer, showed the Association to be in a strong condition financially, the receipts for the year amounting to \$5,139.28 and expenditures \$3,507.99, leaving a balance of \$1,631.29.

REPORT OF SECRETARY.

Secretary A. J. Scott then reviewed the year's work of his office, his report being in part as follows:

We have had to depend entirely this year upon our members, both active and honorary, to get in those who did not belong to the Association, and the following in figures will show you that by putting our shoulders to the wheel we have made a most creditable record. The traveling men who have gone out of their way to put in a word for the Association and have brought in a large number of the applications received are entitled to particular credit for their assistance, and I hope that we may have their continued support in this work. In my report a year ago it was shown that we had 546 members. Of these 18 are either dead or have gone out of business and 7 have resigned, leaving 521 of our old members still on our list.

We took in 23 new members at Saginaw, have received 33 applications by mail, 4 through the influence of the Minnesota Insurance Company, and have secured 56 applications through the work of our friends, the traveling men, while C. F. Lewis of Pentwater brought in two of his neighboring Hardware dealers, making a total of 118 new members and a present membership of 639. [As a result of many accessions during the convention the membership is now 684, as noted elsewhere.]

Coincident with the above growth in our own Association we have found similar conditions existing in all other State Associations affiliated with our National Association, and there are unfortunately a few interests which are becoming unnecessarily alarmed at this great increase in the strength of the organization movement. They are even now trying to cast odium upon the officers of our National Association in an effort to discredit in the minds of the Hardware dealers the good work which these estimable men have been doing in our interests during the past

few years. False and misleading statements have been made and circulated, to the effect that the members of the different State Associations are resigning because they fear the effects of a couple of lawsuits entered against the National officers by those who are trying to disrupt the organization. In view of the figures which you have just heard read, showing a steady growth in members, our traducers seem to have used very poor judgment in selecting a point of attack.

* * * * *

I believe it would surprise even those who have the fullest faith in the ability of the organization to correct trade evils to learn of the widespread desire upon the part of manufacturers and jobbers to help us keep trade in its proper channels. If we had shown any disposition to ask for anything unreasonable I believe that we would have been unable to accomplish what has been done, but requests have always been made with due respect to the interests of the manufacturer and the wholesaler, and our members have shown a keen sense of justice in the complaints which they have brought in. In most cases we have been able to effect satisfactory settlements without resorting to any but the most peaceful methods, and in very few cases has there been any unpleasantness in our work of adjusting these matters.

"FIXED RETAIL PRICES ON STANDARD GOODS AND THEIR EFFECT"

was the subject of an able paper read by O. J. Darling, secretary of the Detroit Retail Hardware Merchants' Association. The topic was discussed at length, and the consensus of opinion was favorable to the maintenance of fixed prices on the so-called standard lines. Henry C. Weber stated that whatever measure of success he may have achieved in business was not so much due to holding to fixed prices on standard lines as to making all his goods standard by standing back of their quality.

It was suggested by E. M. Bush, president of the National Retail Hardware Association, that the price established by well-known manufacturers was usually the minimum at which they should be sold, but he added that the merchant could not be prevented from securing a higher price if he could do so, especially on goods realizing only a small profit.

C. A. PECK'S ADDRESS.

C. A. Peck, Berlin, Wis., secretary of the Wisconsin Retail Hardware Association and also of the Hardware Mutual Insurance Co., conducted under the auspices of the Association, made an interesting and forceful address, in which he touched on the economy of mutual insurance as offered by the Wisconsin company, and those of other States. Mr. Peck also referred to the benefits resulting from the formation of strong State Hardware Associations.

H. L. McNamara, Janesville, Wis., a member of the Executive Committee of the National Retail Hardware Association, spoke briefly, and the Wednesday afternoon session closed with the presentation of a paper, entitled

"OUR FRIENDS THE JOBBERS AND THEIR SALESMEN,"
by C. J. Kastenbergh of Greenville, in part as follows:

* * * * *

The success of the jobber depends upon the success of the retailer just as much as our success depends upon the success of our customer, and you all know to what extremes we will go to help a customer and what interest we take in his success.

The same is true of the jobber; he is ever watchful of the retailer's interests and ever ready to lend him a helping hand when the need of it is shown. Let us never forget this when we are tempted to criticize the jobber for apparent neglect in filling our orders, and let us throw over some of his shortcomings the mantle of charity. It often occurs that we are a party to the offense.

If we made our orders plainer we would have less cause to complain because the jobber did not fill them exactly as intended. Many orders sent to the jobber leave much to be guessed at, and it is surprising they make as few mistakes as they do.

During the busy seasons some jobbers' orders from salesmen and the mails can be numbered, not by the dozen, but by the hundreds in a single day, and to interpret and fill all of these correctly means much effort and does not leave much time for guessing. It behooves us therefore to make our orders so plain that guesswork will not be necessary. If you are tempted to specify on your order an item, "same as last," don't do it, as there may be 99 others doing the same thing that day, and if yours is properly specified you are guaranteed prompt shipment.

* * * * *

It is to our interest to treat the traveling salesman courteously at all times, because he is in a position where we can learn much from him. With his varied experience he can often place us in position to overcome obstacles that present themselves, and if we will stand by him he may do us a good turn when we least expect it. It is he who is the go-between between the jobber and the retailer. It is he who takes our part in a controversy with his house and rights our wrongs through his influence.

The traveling salesman's capital is the trade he controls, and that he controls a good portion of the trade he calls on none of

us will deny. By being ever watchful of his customer's interests he makes himself more secure of his position. He is entitled to our respect and consideration, and we must not consider him impertinent if he demands it. His employer sends him out as his representative and he is entitled to the same respect that would be shown the head of the house. His time is valuable and may be limited, but he is always willing to give us any assistance he can. Give the salesman credit for understanding his business. If you have confidence in him do not argue and try to beat him down on every price he makes. Trust him as you wish your customer to trust you. If you have no confidence in him don't buy of him.

A talk on

"HOW TO SELL STOVES"

by W. T. Leckie, representative of the Estate of P. D. Beckwith, Dowagiac, Mich., opened the Thursday morning session. His remarks were cogent and thoughtful and full of experience in the various details of business.

NATIONAL PRESIDENT'S ADDRESS.

E. M. Bush, Evansville, Ind., president of the National Association, outlined the work that is being carried on by that body, and referred to the increasing membership in nearly all States as indicative of the widening influence of the organization movement in the retail Hardware trade of the country. He reported that the Illinois Association has had a remarkable growth this year, more than 1,000 members being enrolled according to the latest advices he received.

ADDRESS OF W. P. BOGARDUS.

The address of W. P. Bogardus, Mount Vernon, Ohio, former president of the National Association, was frequently interrupted with applause. He spoke in part as follows:

It has seemed to me to be wise to discuss for a short time the relation that we as retail business men bear to the communities in which we live and to the public generally. I think it will be readily conceded that business men are in somewhat closer touch with the consuming public than any other class. The mere fact that we are constantly catering to their wants and studying their needs naturally brings us into a relation with the consumer that should need confidence on both sides. With this close relation comes of necessity a responsibility that cannot be ignored or avoided—the obligation to deal fairly and justly with all who come to patronize us. A business to be successful must inspire confidence. Your patrons must feel that what you say is true and what you do is fair. Now if that rule applies to the retail trade why should it not apply to all other branches of business?

* * * * *

The American people are true at heart, and they are ready to stand by those who demand fair play and equal justice to all. It has been by favoritism that these great corporations have been built up. It will be by fair play and equal justice that their power for evil will be taken from them. When railroads have no favored shippers, when manufacturers have no favored customers, when one man's money will buy as much as another man's, then we can hope for better times.

The work of the Associations since their inception has simply been a plea for fair play. That something has been accomplished is very evident to all. That our plea will finally receive due consideration I have no doubt.

* * * * *

In the modern idea of consolidation the basic fact is that organization is for the purpose of breaking down competition. Not so much to reduce the price to the consumer, although they always say that in their prospectus, as to enable the consolidation to raise the price so as to make a larger showing of profit with the avowed purpose of issuing more stock.

An organization that looks to the elimination of competition with the hope that in so doing the profits can be made greater is not for the good of the community. They are a menace to business of every kind. They do not benefit the consumer by lowering prices. They do not help the laborer by increasing his wages. They only help a few who manipulate the stock for their own private gain regardless of all others.

* * * * *

Good healthy competition is good for any business. A monopoly tends to greed. To have a cut and slash price competition means simply that those who cut prices do it with the hope of buying up trade, and it generally ends up in failure of those who do it or in the substitution of inferior goods and a misrepresentation of the goods offered for sale.

The most serious problem the retail trade of the country has to solve is the catalogue house question. The man who says that it is of minor importance, and is not hurting him, that he can meet all the prices, and that he is not losing any trade, is simply asleep. Let him go to his railroad depot with his eyes open, or visit the express offices, or make a little quiet investigation at the post office and he will awake to some very unpleasant information.

* * * * *

We hear a good deal about fair play and an equal chance for all. But it is not fair play nor an equal chance when any class is favored to the exclusion of any other class.

"THE NATIONAL HARDWARE ASSOCIATION OF THE UNITED STATES; HOW CAN IT BEST CO-OPERATE WITH THE RETAIL MERCHANTS OF THE COUNTRY,"

was the topic of an address delivered by T. James Fernley, Philadelphia, secretary of the National Hardware Association, in part as follows:

In many instances manufacturers state that the catalogue houses sell some of their most profitable goods, goods indeed which the retail merchant does not carry in stock. We fear that possibly there may be some truth in this statement. If so, is it not wise for the retail merchants of the country to take the position that no goods can be made too fine for them to carry in stock?

Surely if the catalogue houses through a very poorly executed illustration can induce a consumer to purchase a high priced article the retail merchant should have no difficulty in selling the same article when showing it personally to his customer.

It is generally conceded that the co-operation of the jobbers of the country is essential; this being the case is it not fair to suggest that the retail merchant of the country should to a greater extent support the jobbers from whom he purchases? We know of so many instances where the retailer has been induced to buy from the manufacturer direct, generally purchasing an abnormally large quantity of a given line of goods and frequently paying the manufacturer as high if not a higher price than would have been charged by the jobber.

We are in a business which requires no small amount of ability. We believe that the average Hardwareman is a little bit more intelligent than his fellow merchant in other lines of business.

He is compelled to have his store open to meet the mechanic and supply his demands for tools before the hour of labor in the morning. He must be prepared to meet the housewife who finds during the day that she needs some household or cooking utensils. And in the evening he must be prepared to again meet the mechanic, who has ascertained that some of the tools with which he started to work in the morning need renewal. Indeed the Hardwareman above all others must be diligent in his business. We think that he who said, "Seest thou a man diligent in business, he shall stand before kings," must have had in mind the Hardware merchant. He it is indeed who should stand before kings and he has little time for anything else, while those who are engaged in other lines may have time to sit behind kings, queens and jacks.

I want again to assure you of the great pleasure it has given me to meet you and to state that it will always be the pleasure of the National Hardware Association of the United States to co-operate with the retail merchants of the country, who are their friends and customers and upon whom they must rely for support.

I sincerely hope that the time will never come when there shall be any divergence of our paths, but as each organization grows in strength may we find our paths coming closer and closer together.

M. W. Callaghan, Reed City, spoke extempore on

"WHAT IT ALL MEANS."

Mr. Callaghan pointed out that if the Hardware merchant is faithful to the loyal manufacturer, the legitimate jobber and the country newspaper he will do more for himself than by following any other line of policy.

GREETINGS FROM MANUFACTURERS' ASSOCIATION.

W. H. Bennett, Chicago, representing the American Hardware Manufacturers' Association, conveyed fraternal greetings from that organization, and spoke in part as follows:

The manufacturer is willing at all times to help the retailer, and the American Hardware Manufacturers' Association is ready to do everything in its power to create and bring about pleasant relations between the manufacturer and retailer. The manufacturer of standard brands of goods expends money and devotes his time to demonstrating his wares and creating a demand for them, and the jobber and retailer should be awake to do their part to distribute these wares and thereby make a profit—they should be loyal to the manufacturer of goods who has been loyal to them.

By an interchange of views and concert of action you have done much to correct evils and to minimize competition, as well as to improve conditions generally, and not only for your own individual members, but for the trade at large. Furthermore, you have doubtless learned that an enlarged acquaintanceship among others in your line of work, and a free interchange of views on questions pertaining to the competition, bring both pleasure and profit.

Competitors in business generally misunderstand each other, and nearly always each is ready to attribute unholy motives to the other fellow without thoughtful consideration or investigation of any kind.

Honest, fair competition really is not competition at all—but

legitimate business. The great trouble is that we have come to misunderstand the word competition, and confuse it with throat cutting. Competition has become throat cutting, and that is not the life but death of trade. Price agreements—if not carried to criminal ends—are legitimate and fair to all.

An invitation to be present during the deliberations of the Illinois Retail Hardware Association in Chicago next February, a prominent feature of which will be a Hardware Show in the Coliseum, was extended by G. R. Lott of that city.

Deliberations closed with an executive session on Thursday afternoon, which was devoted to the consideration of committee reports and the discussion of problems propounded in the "Question Box."

A paper entitled

"EVERY-DAY PAINT,"

written by C. B. Heckel, secretary of the Paint Grinders' Association of America, was read by F. R. Dougall of the Acme White Lead and Color Works, Detroit, at the opening of the afternoon meeting.

RESOLUTIONS.

The report of the Committee on Resolutions was unanimously adopted.

ELECTION OF OFFICERS.

The following officers were elected for the ensuing year:

President, E. B. Standart, Holland.
Vice-President, Charles M. Alden, Grand Rapids.
Secretary, A. J. Scott, Marine City.
Treasurer, Henry C. Weber, Detroit.

Members of the Executive Committee to serve two years: J. H. Whitney, Merrill; J. G. Patterson, Detroit; F. M. Brockett, Battle Creek; E. S. Roe, Buchanan. To fill vacancies on this committee to serve one year: P. A. Wright, Holly; M. A. Benson, Saranac.

The president and secretary, together with four delegates that the former has been empowered to appoint, will represent the association at the convention of the National organization to be held in Boston in March, 1907.

The admission of salesmen and manufacturers affiliated with the Hardware trade to honorary membership upon the payment of a nominal fee of \$1 is a feature that has been adopted by the Michigan Association. This enrollment during the meeting numbered over 200.

The entertainment features were on an elaborate scale, and included a visit to Electric Park on Thursday night, as guests of the Association and a boat ride and supper at Bois Blank Park Friday afternoon and evening. The steamer Pleasure, with nearly 1,000 on board, cast off her lines from the foot of Woodward Avenue at 2 o'clock, and the trip up the Detroit River gave the visitors an opportunity of viewing the many plants of the diversified manufacturing interests which dot the American shore. A vaudeville performance was given en route in the main saloon. An excellent supper was served at the Bois Blank cafe, located on the Island of that name.

The Reception Committee of Detroit Hardware manufacturers, jobbers and retailers on the trip was made up as follows: J. M. Anderson, J. Frank Boydell, James Brown, W. J. Burton, F. H. Conant, W. T. Collard, D. T. Crowley, H. J. Dobson, Edgar Elliott, Edward Frohlich, J. H. Hatt, W. F. Heming, Albert Kern, Fred. Mason, George H. Hill, W. L. Hill, C. A. Kaichen, J. F. Monaghan, M. J. Reilly, R. E. Rogers, J. M. Thurber, P. S. Weeks, J. A. Whiting, W. B. Wood and L. B. Young.

Representation from the National Association and other affiliated trade organizations was unusually heavy, and included W. H. Bennett, Chicago, representing the American Hardware Manufacturers' Association; T. James Fernley, Philadelphia, secretary of the National Hardware Association; W. P. Bogardus, Mount Vernon, Ohio, and E. M. Bush, Evansville, Ind., the former chief executive and the present incumbent of that office of the National Retail Hardware Association; H. L. McNamara, Janesville, Wis., and G. R. Lott, Chicago, members of the Executive Committee of the National Retail Hardware Association, and C. A. Peck, Berlin, Wis., secretary of the Wisconsin Retail Hardware Association.

WHAT LABOR DOES; WHAT LUCK DOES NOT.

Luck, wrote Cobden, is ever waiting for something to turn up; labor, with keen eyes and strong will, will turn up something. Luck lies in bed, and wishes the postman would bring him the news of a legacy; labor turns out at six o'clock, and with busy pen or ringing hammer lays the foundation of a competence. Luck whines, labor whistles. Luck relies on chance, labor, on character.

CATALOGUE OF WM. ELLIOT & CO.'S RAZORS.

We understand from Adolph Strauss & Co., sole agents for "Elliot" razors, for the Western Hemisphere, that the enormous demand for "Elliot" razors necessitated their issuing a complete catalogue of the goods. It is the largest exclusive razor catalogue ever compiled. "Elliot" razors are an old well known make, having been on the market a great number of years. They are made of the finest English steel, highly and correctly tempered, hollow ground and concaved, and finished by the most efficient German cutlers. With proper care and use, the razors

with the usual working of the window, screen or curtain; can be adapted to old buildings as well as new; prevents dangerous draughts, the fresh air being carried to the top of the room; has a greater capacity than any other window ventilator; is capable of the greatest possible variation from the minimum to the maximum, and can be easily regulated to meet all atmospheric conditions. The Ideal Ventilator is especially adapted to business offices, where, if the desk be near the window, as is usual, the latter cannot be opened without fear of annoying and injurious draughts of air or of disturbance of papers, which are liable to

WILLIAM ELLIOTT & CO.'S RAZOR NO. 225.

will last a life time. In addition to the finest grade of English steel used in the construction of the razors, the handles are superbly and artistically designed. They come in rubber, celluloid, bone and ivory, with handpainted, pearl inlaid and silver inlaid ornamentations. The beautiful etchings on the blade of the various numbers of the line are quite a valuable and attractive feature. Wm. Elliott & Co. Razors have received the strongest kind of endorsement from men in every walk of life. The agents say, to their knowledge, there has never been a dissatisfied purchaser. The razors are sold under a strict guarantee to be exactly as represented and no one takes any risk in buying or selling them. The "Elliot" catalogue will be cheerfully sent to anybody desiring a copy. Address Adolph Strauss & Co., sole agents, 412 Broadway, New York City.

THE IDEAL VENTILATOR.

The Ideal Ventilator Co., 338 Weybosset Street, Providence, R. I., are the makers of the Ideal Ventilator which we illustrate herewith. It consists of a patented device for producing fresh air in a room without experiencing any ill effects from its operation. Ideal Ventilators are made of glass enclosed in wood or metal frame, and fit any ordinary window, placed in brackets adjustable to 20 degrees deflection; or can be placed parallel

THE IDEAL VENTILATOR.

with the window, and can be attached or removed without causing any defacement of the window sash or frame. Being placed at the above angle causes the fresh incoming air to be deflected toward the center of the ceiling, where it meets the warmer air, with which it becomes thoroughly mixed. In this way a good circulation is produced without subjecting persons in the room to draughts. Among the numerous advantages claimed by the use of this Ventilator, may be mentioned the following: It does not cut off light from the room; is easily attached or removed without defacement of casings; in no way interferes

be blown about. This Ventilator is an invaluable addition to the furnishings of the draughting-room of the architect, civil engineer and the designer of machinery. A perfectly free movement of the air may be enjoyed in summer days without fear of disturbance of papers on the draughting tables, and with no loss of light occasioned by the device. It also protects the jeweler, who has constant use for the blow pipe. The change of air in the shop may be continuous, while the blow pipe is entirely protected from a current of air driving the heat from the object to be fused. Sleeping rooms furnished with the Ideal Ventilator may have a constant supply of fresh air, while the sleeper is absolutely free from uncomfortable draughts. Clothing placed near an open window furnished with this Ventilator is safe from rain or sleet; and no fear of injury to draperies or furniture need be entertained should unexpected showers appear.

THE DUBY & SHINN MFG. CO.

We are greatly pleased to note and make comment upon the rapid growth of the Duby and Shinn Mfg. Co., Inc., of New York. This company is now branching out as manufacturers of a general line of mechanics' fine tools, with "The New Universal Square" as its leader. This tool comprises the Try square, Bevel square, Pitch-cut square, Hip and Valley square. It is also a correct Rule, lumber gauge, straight edge, plumb and level, depth gauge, draws circles, lays out mortise and tenons, octagonal cuts, etc., etc. It requires no adjustment for all these uses, and is guaranteed in every particular, consequently the mechanics are ready customers, and the leading jobbers of Hardware and tools are enabled to make large sales of the article. This Company has purchased a large parcel of land with a two story building at Branchport Station, Long Branch, N. J., and have been for eight weeks getting under operations in their country quarters. The President announces the completion of preparations, and that the plant is now running with a full force, and hopes that the trade will not feel put out with them for their recent delay in making shipments. The Company also announces that they would like to have submitted to them any small mechanical tool that is not on the market, or improvement on present tools, and they will properly consider the manufacture of the same, after due examination by their tool experts.

HOW BOTTLE WORKERS WORSTED THEMSELVES.

Fourteen years ago a bottle manufacturer, Claud Boucher, in Cognac, France, was forced to close his factory by the continuous strikes and exactions of his employees. He set to work to invent a machine for the manufacture of bottles. This machine is now in use in various parts of the country; 250,000 bottles are turned out by it daily. A single machine produces 35,000 bottles in twenty-four hours; and any one can learn to run it in a week. The bottles are stronger and look better than those made by the blowers.

RECENT TRADE PUBLICATIONS.

HAMDEN MFG. Co., late W. A. Ives & Co., Hamden, Conn. Catalogue and Price List No. 15 of Boring Implements and Bit Braces. Illustrations and descriptions are given of "Old Style" Nut Augers, Long Bright Rafting Augers, Ring Augers, Cuban Ring Augers, Car Bits, Auger Bits, Boring Machine Augers, Jennings Pattern Auger and Dowel Bits, Sap or Sugar Bits, Connecticut Mfg. Co. Auger Bits, Clark's Pattern Expansive

Bits, Auger Handles, Hollow Augers, Spoke Trimmers, Expansion Bit Holders, Boring Machines, Tap Borers, Spofford Braces, New Haven Novelty and Ratchet Braces; Barber, Farmer and Centennial Braces.

MARSHALLTOWN TROWEL Co., Marshalltown, Ia. Catalogue of Plastering Trowels, Including Finishing Trowels, Browning Trowels, Aluminum Hawks, Aluminum Darbies, Canvas Tool Bags, Plasterers' Cork Floats, Brick Sets or Chisels, Carpenters' or Crooked Bars, Housemovers' Bars, Brick Hammers, Bricklayers' Scutch, Beading Tools, Aluminum Sidewalk Edgers, Stamps for marking Cement Sidewalks, Sidewalk Groovers, etc.

HANDY THINGS Co., Ludington, Mich., manufacturers of Specialties in Hardware, Woodenware and Sportsmen's Goods, and Woodturners and Enamellers, have distributed their 1906 catalogue to the trade, showing their line of Handy Gun Cleaning Rods and Implements, Skates, Hardwood Spinning Tops, Window Cleaners, Can Openers, Tack Pullers, Potatoe Mashers, Cake Turners, Paring and Slicing Knives, Floor Squeegees, Fruit and Vegetable Slicers, French Fry Slicers, Bread and Bacon Slicers, Clothes Racks, Towel Racks, Glove and Stocking Darners, etc. This is a catalogue of a very useful line of goods and should be sent for by the dealer.

DIAMOND SHEAR Co., Wilmington, Del.; New York agents, Smith & Hemenway Co., 296 Broadway. Booklet giving illustrations and descriptions of their line of Sheep Shears, Mule Shears, Horse Shears, Grass Shears, Garden Shears, Household Hatchets, Family Cleavers, etc., etc.

GOSHEN CHURN & LADDER Co., Goshen, Ind. Advance catalogue of Ladders, Lawn Swings, Wheelbarrows, etc. Illustrations and descriptions are given of their "20th Century", "Security", "Famous", "Electric", "Number One", "Original Hill", "Clipper" and Fruit Step Ladders. They are also manufacturers of a Windlass Extension Ladder, Rope and Pulley Extension Ladder, Common Extension Ladder, Single, Pointed Fruit and Roof Ladders; Combination Extension Ladder and Trestle; Painters Trestle, Stage Ladders, with platform; Improved Oval Churn, Lawn Swing Awnings, Sun Shades, "Imperial", "Bonanza" and "Zypher" Lawn Swings; "Goshen" Swinging Settees, Folding Lawn Settees, Porch Chairs; Garden and Dump Barrows.

COVERT'S SADDLERY WORKS, Interlaken, N. Y. Illustrated catalogue and price list showing their "Crown" Bolt Snaps, Swivel Snaps, Spring Snaps, Bit Snaps, Rope Snaps, Bell-Cord Snaps; Self-Locking Gate and Door Hooks; Girth Snaps, Breast Loops, Blanket Trimmings, Girth Fasteners, Rope Thimbles, Rope Tie-Makers, Cattle and Horse Hies, Halter Leads, Hitching Cords, Rope and Web Halters; Leather Halters, Halter Buckles and Squares; Malleable Rings, Spur Buckles, Halter and Rein Chains, Breast Chains, Neck-Yoke Centers, Neck Yokes, Safety Pole Tips, Victor and Daisy Wagon Jacks, "Quick-Lift" Auto Jacks, Knob Patches, Curtain Straps, Hame-Straps and Attachments, Hammock Ropes, Hitching Weights, Mane and Tail Combs, Fly-Net Fasteners, Package Carriers, etc.

SILVER MFG. Co., 304-314 Hewes Street and 432 Broadway, Brooklyn, N. Y. Catalogue No. 14 of Artistic Bath Fittings. Included in the contents will be found Flat Paper Holders, Roll Paper Holders, Towel Bars, both nickel-plated and glass; Glass Towel Shelves, Nickel Rod Shelves, Double Towel Bars, Soap Holders, Comb and Brush Holders, Combined Soap and Sponge Holders, Tumbler Holders, Tooth Brush Holders, Shaving Mug Holders, Combined Fixtures, China Mugs, Vases and Soap Cups, Match Holders, Cigar Holders and Match Scratches, Ash Trays, Broom Holders, Coat, Hat and Wardrobe Hooks; Thermometers, Bath Tub Seats, Mirrors, Bath Rings and Sprays, Medicine

Closets, Mats, Stools, Bath Showers, Scales, Soiled Linen and Towel Baskets, Night Lamps, etc. This is a very artistic line of goods and those dealers carrying a stock of house-furnishing goods will do well to write for the catalogue.

PHOENIX HARDWARE MFG. Co., Homer, N. Y. Catalogue of Hardware Specialties, including Bench Vises, Anvil Vises, Jewelers' Vises, Clamp Vises, Farmers' Vises, Saw Vises, Sash Chain and Fixtures, Plumbers' Safety Chains, Brass S Hooks, Steel Hardware Chain, Hose Bands, Dog Leaders, Key Chains, Lathe Dogs, Malleable Iron Screw Clamps, Quilt Frame Clamps, Cabinet Clamps, Mechanics', Fitters', and Machinists' Clamps; Door Springs, Door Stops and Holders; Door Checks, Barrel Trucks, File Cleaners, Christmas Tree Holders, Bench Anvils, Cork Pressers, Mail Boxes, Window Cleaners, Floor Scrubbers, Carpet Stretchers, Fish Scales, Store Shelf Brackets, Cottage Brackets, Plumbers' Brackets, Scratch Awns, Tack Hammers, Ladies' Hammers, Hatchets, Draw Pulls, Plumb Bobs, Branch Hooks, Ice Awns, Mane and Curry Combs, Screw Drivers, etc., etc.

FAULTLESS CASTER Co., Nebraska City, Neb., have presented us with a pamphlet entitled "Important Facts Regarding Our Pivot Bearing Leather Wheel Casters." They speak of their Casters as "The caster that never refuses to turn," stating "That such an important feature should be so poorly understood or appreciated by even the discriminating purchaser, is a cause of wonder and the incentive for the distribution of this pamphlet. We feel warranted in saying that the caster is to furniture what the axle, hub and wheel are to a vehicle. The lifetime of the vehicle, the ease of movement, the pleasure in its use, all depend on the fitting, the character and the movement of the axle in the hub. The lifetime of furniture, the ease of movement, its effect on floors, the pleasure in its use all depend on the caster." Of their Leather Wheels they say: "Great care is used in the construction of their Leather Wheels, we having introduced a seamless brass tubing through which the rivet is placed, enabling the wheel to revolve around the axle with the least possible friction and absolutely no wear." These casters are made Short and Long Stem, for Wood and Iron Beds, Office Chairs, Tables, Davenports, Dining Tables, Morris Chairs, Dressers, etc. This company also manufacture a Combination Caster suitable for Cosy Corner Boxes, Small Roll Top Desks, Shirt Waist Boxes and Hassocks.

ANDERSON & SONS Co., 21-31 St. Aubin Avenue, Detroit, Mich. Contractors' Price List of Tools used in laying Artificial Stone or Cement Sidewalks. In a prefatory note the manufacturers say: "All of our tools are made of our special brass mixture, which gives great toughness and wearing qualities, the only finishing tools which we now make in iron being the number 1½ and 2½ Edgers and the number 40½ Roller. We make these three in iron, which is slightly cheaper than the same tool made in brass, to accommodate contractors who do not give the tools hard service and for doing a limited amount of work. Unless the iron tools are given the best of care, the action of cement upon them will in a short time destroy their usefulness, whereas with the brass tools made from our special mixture this trouble is entirely eliminated." The contents include a line of Sidewalk Edgers, Brass Jointers Center Knives, Driveway Groovers, Smoothing Trowels, Rotary Jointers, Fluted Rollers, Impression Stamps, Sidewalk and Driveway Rollers, Broad Hatchets, Handled Axes, Concrete Picks, Galvanized Iron Pails, Hand Riddles, Levels, Shovels, Sand Screens, Concrete Mixing Hoes, Lanterns, Steel Squares, Rubber Hose, Wheelbarrows, Burning Brands, Lamps, Grout Cutters, Dirt Rammers, Portable Concrete Mixers, Mortar Barrows, etc.

A. J. REACH Co., Philadelphia, Pa. Catalogue of Fall and Winter Sports. Included in the contents will be found a large line of Foot Balls, Foot Ball Bladders, Shin Guards, Nose Masks, Head Harness, Supporters, Basket Balls, Striking Bag Platforms, Striking Bags, Bag Gloves and Sundries, Head and Face Protectors for Boxing, Boxing Gloves, Fencing Gloves, Hand Balls, Indoor Base Balls, Medicine Balls, etc. The various articles are illustrated accompanied by trade prices.

NEW GOODS AND SPECIALTIES

ARCHAMBAULT KEROSENE FURNACE.

The Barnes Tool Co., New Haven, Conn., are the manufacturers of the Archambault Kerosene Furnace, which is represented in the accompanying illustration, and is claimed to be the only kerosene furnace that does not carbonize, as the carbon

ARCHAMBAULT KEROSENE FURNACE.

burns out the vapor. This furnace can be used in and about buildings which will of great advantage to those using it, as by using kerosene in place of gasoline you in no way violate any of the insurance laws. This burner is constructed with a check valve, which has a small opening or by-pass to allow draining the oil from the burner; also to prevent any possibility of puffing so common with many other furnaces. It is unequalled for its simplicity, and the cost of operating this furnace is claimed to be much less than the gasoline furnace, owing to the lower cost of kerosene. The manufacturers claim superiority over all other makes of furnaces due to the construction of the burner, which gives a greater heating capacity, thereby melting the solder in one-third less time than can be done by any other make of furnace. It is claimed to melt a full pot of solder in a gale of wind in less than five minutes.

BLACK HAWK GRIST MILL.

A. H. Patch, Clarksville, Tenn., is the manufacturer of the Black Hawk Grist Mill, which is represented in the accompanying cut. In place of the hand wheel which is usually found on hand

BLACK HAWK GRIST MILL.

mills, he has substituted a long malleable iron crank, making the mill easier to turn, and saving the cost of the heavy wheel. The grinding burrs of the Black Hawk Grist Mill are made of the hardest and strongest metals, all the bearings being chilled, and the long crank being of malleable iron. The plates are ground

true, and each pair given a thorough test before leaving the factory. It is not necessary to have more than one set of burrs to grind the finest or the coarsest meal. You determine the fineness or the coarseness by simply tightening or loosening two thumb screws. All parts are interchangeable, and should an accident occur to any part of the mill, it can be ordered by number, and the manufacturer will guarantee perfect adjustment. Each piece has a number cast on it, so there need be no mistake in ordering. It is very simple to take apart, clean and put together again. It is light enough to be carried from place to place, wherever it is most convenient to do the grinding. The Black Hawk Mill is provided with both holes and slots for fastening it to a table for support. By using the slots all that has to be done is to loosen two thumb nuts, and the mill can be slipped off, leaving the bolts in place for the next time the mill is to be used. This handy little feature will be appreciated by all users of the mill. It is claimed that the long crank and the chilled bearings give such an easy running gear to the machine that one may grind a large quantity of grain without fatigue.

ADJUSTABLE HOOK HUSKER.

The Blair Husking Glove Co., Bucyrus, Ohio, are the makers of the Adjustable Hook Husker which we illustrate herewith. This is their Style No. 9, and gives evidence of being well adapted for the employment for which it was designed. It is provided with a polished steel hook and shield, (see Fig. 1) and

• ADJUSTABLE HOOK HUSKER, STYLE NO. 9.

with the best calf leather straps. It fits the hand perfectly, and supports the wrist. This is a favorite among all classes of farmers for its strength and durability. Fig 2 shows one of the

CLOSED FINGER HUSKING GLOVE.

Blair patterns of closed finger Husking Gloves, of which they show in their catalogue several varieties made with double thumb and steel claw. They are packed half dozen in box.

HEALTH MERRY-GO-ROUND.

The Health Merry-Go-Round Co., Quincy, Ill., have recently patented in the United States and Canada, and are now placing on the market the article shown in the two illustrations which accompany this. The name describes the article as well as a name

**HEALTH MERRY-GO-ROUND.**

could, for the child receives healthful exercise in the most alluring manner. It is operated by children seated as shown, who by means of a hand and foot lever propel the Merry-Go-Round by nearly the same movement as used in rowing a boat, which brings into play all the muscles of legs, arms, back and body. The exercise is mild, and the arrangement so attractive

**SHOWING IT IN USE.**

that the child doesn't realize he is taking it. A detachable organ with pulleys and belt plays while the machine is in motion, which gives the effect of a large Merry-Go-Round. Each seat is five feet to the center, which makes the machine ten feet across. It is strongly built, and with ordinary care will last for years. The price, the manufacturers advise, is easily within the reach of almost every one. Hardware dealers especially who desire the agency are requested to write for terms, etc.

NO. 0 CIGAR KNIFE.

Kraut & Dohnal, 168 South Clark Street, Chicago, Ill., in connection with their other specialties in cutlery are manufacturing an extensive line of cigar makers' cutting tools, of which we give an illustration of their No. 0 Cigar Knife. The various styles and shapes shown in their comprehensive catalogue they state were taken from a majority of special orders received by

**NO. 0 CIGAR KNIFE.**

them for some time past. The manufacturers state that this method of selecting patterns enables them to solve the most difficult problem of getting a blade of good quality combined with practical shape which is so essential to the work done. If any special knife or blade desired is not shown in the catalogue they state it will be made to order. The entire product of the concern, they wish it understood, is made by union labor and bears the union stamp.

"BONANZA" SNOW SHOVEL NO. 35.

Owosso Mfg. Co., Owosso, Mich., are the manufacturers of the "Bonanza" Snow Shovel, which is one of the latest additions to the line of snow shovels made by this company, which now embraces nearly every style demanded by the trade. The "Bonanza," as will be noticed by the illustration, is a hand snow shovel and scraper combined, with a blade 18 by 24 inches, and weighing less than five pounds. The handles are of rock elm or oak, steamed and bent to shape, and being under the blade near the

**BONANZA SNOW SHOVEL.**

edge give it great strength. The lifting braces are bolted securely to the handle, and very strong. The lower brace is used only for throwing out heavy snow. There is great purchase in lifting, and the lift being straight and no tipping, is much easier than the ordinary shovel. The blade is composed of three thicknesses of birch, one thickness lengthwise and the other two crosswise of the grain, put together with waterproof glue and sandpapered smooth, making the blade very light and strong. The point is of 20 gauge galvanized steel, having a narrow strip running two inches up the handle on the back, forming a shoe. In all light snows it is used mostly as a scraper and without lifting, as it can be easily unloaded by tipping sidewise, one corner resting on the walk. The shovel is varnished, which gives it good protection and hardens the surface when dry.

"HUNTER" FREE SPOOL E-Z-APART REEL.

The Chamberlain Cartridge and Target Co., Cleveland, Ohio, are placing on the market the "Hunter" Free Spool E-Z-Apart

**"HUNTER" FREE SPOOL E-Z-APART REEL.**

Reel, which we illustrate herewith. It has a quadruple gear and German silver finish. The large barrel rubber spool runs in phosphor bronze bearings, which are rivited to side plates and

have no caps to become lost. Frame studs run through both heads of Reel and are rigidly locked in place with locking ring, doing away with all screws. There are only three parts. The take-apart mechanism used in both the free and tight spool reels is very simple, and gives a durability to the reel by reason of the ease of cleaning and oiling. In the Free Spool Reel all the wear on the gears and bearings is eliminated, and in bait castings the spool is freed and runs on ball bearings of hardened steel.

A SECTIONAL VIEW.

The momentum of the handle and the heavy spool being removed, there is little or no liability of a "back lash" and the line does not get badly tangled. Only the very lightest thumbing of the line is necessary, and the accuracy and distance of the cast is greatly increased. The user does not have to be an expert to do first-class casting with this reel, for which it is especially adapted. The gears are always in mesh and never strip. By sliding the locking ring that engages in the notches in the studs the reel can be readily taken apart and all parts easily cleaned and properly oiled. A simple push with the finger and the reel can be taken apart or when put together, locked in place. The manufacturers fully guarantee this nickel-plated reel to be satisfactory in every respect. Reference to the sectional view will show the mechanism.

PORTABLE DRILLING AND BUFFING OUTFITS FOR GARAGES.

The Coates Clipper Mfg. Co., Worcester, Mass., whose universal joint and flexible shafting of the unit link type have been previously described in these columns, are putting on the market this season motor driven flexible shafts for garage use. They make this unit link flexible shaft in sizes that will transmit from 1-10 horse power, which is the speedometer size, up to one that will transmit 150 horse power for transmission work. Each link of this shaft is made of high carbon steel and the driving pins are made of nickel steel.

THE COATES FLEXIBLE SHAFT.

The universal mechanism is housed by a ball canopy which does not allow the moving parts to come in contact with the outside cover. From the construction of this shaft it is impossible to kink or crystalize it.

The specialty they are putting on the market is a combination motor-driven buffing and drilling outfit. At the end of their flexible shaft is placed a four or five-inch

BURNISHING LAMPS, ETC., WITH THE COATES PORTABLE OUTFIT.

cloth buff; using this at a high speed on brass work, buffs it up instantly. This not only does it many times faster than can be done by hand, but does it much better. In fact, it makes mirrors of all brass work. By removing the buff spindle, a breast drill

may be inserted. This has a reduction ratio so that even at a high speed of the flexible shaft the drill can be made not to run over three or four hundred R. P. M. It is also furnished with a stopping device whereby

THE COATES PORTABLE OUTFIT, WITH BREAST DRILL ATTACHED.

the buffing spindle or drill may be stopped instantly without stopping the motor.

The breast drill is a very light device and can be taken to any part of the chassis, so that holes can be drilled with this equipment while preparations are being made for the old style equipment. Where large holes are to be drilled they furnish an old man and hand feed that the breast drill fits into and large holes can be drilled with great efficiency. Where there are cutters reamers or spindles to be ground in the garage, replace the cloth spindle with an emery wheel, clamp the spindle to the tool post of a lathe, and it gives the operator a grinding device.

DRILLING A CHASSIS FRAME WITH THE COATES PORTABLE OUTFIT.

The enormous demand for these outfits shows that the company has found a positive want.

THE BAY STATE LIGHTNING CLAMP.

The Bay State Tool Co., 98 to 100 Beacon Street, Worcester, Mass., are placing upon the market an improved clamp which by means of an eccentric nut through which the screw passes a quick adjustment is obtained. When the eccentric is brought around to act on the screw the clamp acts like any similar

THE BAY STATE LIGHTNING CLAMP.

clamping device. But the screw is so loose when the nut releases it that it slides by gravity. The screw is of a little less diameter than the nut, so that when the nut is turned by means of the butterfly handle the screw slides easily. The body of the clamp is so constructed by being double ribbed throughout it cannot fail in the proper alignment. It is made in two sizes: 3 and 5 inches. Large sizes are interchangeable, as the clamp is intended for hard usage.

SCORE BY U. S., 30,000,000 BARRELS OF CEMENT.

The tremendous development of the cement industry in the United States is revealed by the fact that in ten years, beginning in 1893, the production of Portland cement increased from 798,757 barrels annually to 26,505,881 barrels. It is estimated that the output of Portland cement during 1906 will aggregate 30,000,000 barrels. Notwithstanding the rapid development of the concrete industry in the United States there is plenty of cement for home needs and enough in addition to supply a growing foreign demand. Consul Harris reports from Mannheim that Germany's sales of cement to the United States, which for upwards of a decade amounted to more than a million dollars annually, the amount in 1900 having aggregated two million dollars, have dwindled to half a million dollars.

OUR BRITISH LETTER.

(From our Special Correspondent.)

LONDON, August 11th, 1906.

HARDWARE EXHIBITIONS STILL POPULAR.

The popularity of Hardware exhibitions which have been held in regular succession for some years in the Metropolis has now extended to the Provinces, and ironmongers in the manufacturing districts and large centres of population are learning to appreciate the advantages of being able under one roof to inspect the latest and best Hardware goods manufactured, not only in this country, but in the United States of America, and on the Continent of Europe. Arrangements have been made to hold at least two important exhibitions during the past few weeks. The second annual exhibition held in Manchester will take place in September. I understand that it has been taken up with considerable spirit and enterprise by British manufacturers, and that several well-known factors of American goods will have stands; doubtless their exhibits will be inspected by visitors, and their contents appreciated. The exhibition will be under the patronage of The Lancashire County Ironmongers' Federation, which body is now becoming an important factor in the success of the Association movement in this country. It is often said that "Lancashire leads the van," and certainly several of the members of individual associations in the County of Lancashire have shown their enthusiasm for association progress in a marked degree. The Secretary of the Liverpool Ironmongers' Association is a man who has a large amount of zeal and enterprise, and he is constantly scheming how best to bring his association to the front. Liverpool and Manchester are the principal centres of commerce in the country of Lancashire; the former is noted for the splendid organization of the Assistants' Association which was formed there some time ago, and which is now the most flourishing assistants' association in Great Britain. In October, Glasgow is to be the location of another important ironmongers' exhibition, and if previous exhibitions in the far north may be taken as a guide, it will doubtless be visited by a large number of border Hardwaremen and canny Scots. The Hardware merchants of the northern portion of Britain are noted for their business enterprise, the keenness with which they buy, and for the careful manner in which they examine the merits of new goods submitted to them, before they take kindly to them, and admit them into their stocks. Nevertheless, when shown the advantages of a new invention, Scottish Hardware merchants are not slow to avail themselves of modern enterprise and of new ideas. Doubtless many American labor-saving machines and domestic appliances of the latest types will be on view at the Glasgow Hardware Exhibition, a short report of which I will send you in due course. It is perhaps worth while pointing out, that all the Ironmongers' Exhibitions hitherto held in this country, are confined to ironmongers and Hardware dealers in the trade only, the public being rigorously excluded. These exhibitions should, however, not be confused with the so-called trade exhibitions, which have been held with greater frequency during the last few years. Such exhibitions are little more than trading concerns open to the public, and often seriously injure the local tradesmen.

THE SPORTING SEASON.

British ironmongers are now very busy with the sale of guns and ammunition. Grouse shooting commences on the 13th. of the present month, and partridge shooting begins on the 1st. of September. Many ironmongers, specially in country districts, include a gunsmithing business, and carry on an important trade in the sale of sporting guns and ammunition. There is also a demand springing up for rifles. Miniature rifle clubs and shooting ranges are being encouraged by the military authorities, and many such clubs have been formed during the past few years. I recently had an opportunity of inspecting the stocks of several well-known wholesale factors, and was pleased to find so great an improvement in the construction and finish of rifles for the coming season. Many of these, bearing names familiar to all your readers, are now sold in Great Britain, not only by factors, but also by direct agents holding guns manufactured in the States.

IRONMONGERS AND THE GAS STOVE INDUSTRY.

In former letters I have referred to the trade in gas-cookers, gas lighting and heating appliances now being taken part in by British ironmongers. During the last few weeks, several im-

portant developments in this branch have taken place. Already several gas companies are working harmoniously with ironmongers, through their aid, increasing the consumption of gas by the more extended use of gas-cookers and heaters. The Gas Light & Cook Co., the largest and most important gas company in the Metropolis, has recently made an important offer to a certain number of London ironmongers, by which they will be enabled to take up special commissions on all introductions leading to the sale or hire of cookers, heating stoves, and other appliances. The arrangement is likely to work well, as it will not only yield a handsome profit to those ironmongers who are sufficiently enterprising to make this branch one of their prominent departments, but it will benefit their working departments, finding employment for an additional number of gasfitters, using up a considerable amount of material in carrying out the work which is sure to be required in connection with the additional stoves and heating appliances fixed. The developments which have been going on in connection with gas-light fittings during the last few years, have brought ironmongers in touch with consumers. The now general use of inverted gas-fittings, by which the light from coal gas has been so materially improved and cheapened, has done much to popularize gas, and although there is no question of placing gas in competition with electricity, the improvements of recent years have brought the light which may be procured from coal gas side by side with electric lighting, and the adoption of fittings giving gas-light the appearance similar to electric light, has made consumers of gas less ready to change from the older method of lighting, to the newer one. To some extent it has given a check to the spread of electric lighting, which a short time ago, threatened to supersede gas for household and business premises. The winter season is now approaching when ironmongers will throw all their energy into the sale of lighting appliances, which will also include petroleum lamps. Many efforts have been made during the last two or three years to improve petroleum burners, and incandescent lighting has been applied with some success to petroleum lamps, giving the best of them greater illuminating power than was formerly possible with the older types of burners. Many improvements have been introduced by the makers of lamps during the past summer, and designs which have been prepared for the winter season are altogether more ornate, and many of the new patterns are well-modelled and finished—their appearance being improved by the beauty of the glass and shades used in connection with them.

THE MEETING OF THE IRON AND STEEL INSTITUTE AND THE AMERICAN INSTITUTE OF MINING ENGINEERS.

One of the most important gatherings which have been held for some years past, was that of the joint meetings of the Iron and Steel Institute and the American Institute of Mining Engineers, held in the latter part of July in London. This important gathering was held under the presidency of R. A. Hadfield (of Sheffield) who, on behalf of the Iron and Steel Institute, welcomed the American delegates. He referred to the meeting of the Iron and Steel Institute in America, and to the good will which had existed since that date between British and American engineers. The output of pig iron in America has now reached about 23,000,000 tons per annum. The production of iron and steel in Great Britain has also increased in a corresponding degree. The world's production of pig iron has doubled in the short space of fifteen years. Sir James Kitson also referred to the pleasure he had derived from the visit to America, and to the prosperity at the present moment attending the iron and steel industry in all parts of the world. R. W. Hunt spoke on behalf of the American Institute of Mining Engineers, and testified to the good feeling existing between the two countries, and to the interest felt in the United States in the Iron and Steel Institute. The invitation which he conveyed to the Institute to visit America once again, was received with applause and many members present expressed themselves hopeful that they would be able to take part in the prospective visit. The papers read before the joint meetings were instructive, and dealt with several important matters, which are now receiving attention from engineers in both countries. "The Application of Large Gas Engines in the German Iron and Steel Industries," and "Notes on Large Gas Engines Built in Great Britain and upon Gas Cleaning" were interesting papers. The British engineers had mapped out an extensive round of entertainments and visits to import-

ant works for the American visitors, forming a pleasant variety to the business meetings of both Institutes. Several well-known works in the district were visited, including that of John I. Thornycroft & Co. Ltd., of Shiswick, near London, Thornycroft's inventions including screw turbines, and water tube boilers which have won world-wide repute. Their steam wagons, too, which are very popular, are in general use in all parts of the country. The works of J. & E. Hall, Ltd., of Dartford, where refrigerating machinery is manufactured, were visited, and their up-to-date machinery, all electrically driven, was much appreciated by the visitors. The works of Fraser & Chalmers Ltd., at Erith, are noted for the modern tools of the best types, and visitors were interested in examining the large number of machines manufactured in the United States which are in use.

SUMMER HOLIDAYS.

August is the most popular month for Summer holidays, and many ironmongers are now away at seaside places of health resort, enjoying themselves with their wives and families. Many of the larger establishments are at the moment under-manned owing to the number of employees also away. Quite recently one of the largest Hardware establishments in London intimated that during August their staff would be reduced to one half, finding it pays them better to get over the whole of their holidays during the present month, as it is undoubtedly the quietest month for retail business in the larger towns and cities. On the other hand, some of the seaside ironmongers, especially those who have fancy goods departments, carry on a brisk trade in the sale of novelties and sundries suitable for presents. Outdoor sports, too, create a sale for electro-plated fancy goods for prizes, the sale of which is often a profitable business, and largely enjoyed by ironmongers as well as silversmiths. Few ironmongers' associations are holding meetings this month; indeed any gatherings they have, appear to be more of a social character—summer outings, river picnics, and such like pleasurable engagements taking the place of business meetings. Next month, however, ironmongers' associations will settle down to more serious work, and there are already indications that several important matters will be brought forward for the consideration of associations in the near future.

WONDERFUL ARGENTINA AND HER RESOURCES.

Argentina has an area of 1,120,000 square miles, nearly one-third the area of the United States and Alaska. This area, except a very small portion, is located in the south temperate zone, and in it are 245,000,000 acres of arable and 235,000,000 acres of pastoral land, and yet only 21,000,000 acres are under cultivation, although the soil is equal to that of Illinois and Nebraska and the general conformation of the land not unlike our Central West. Hundreds of individual men in every state or province own from 75 to 300 square miles of land. It is strictly suited to white labor. In this vast extent, however, there are as yet only 5,000,000 inhabitants, while it can easily support 75,000,000 people, 100,000,000 cattle and 300,000,000 sheep. Buenos Ayres, the capital, is one of the most prosperous and beautiful cities in the world, and has a population of nearly 1,000,000. Neither in this city nor in the interior is there any considerable Indian or negro element, such as found in other South American countries. The population is 99 per cent extraction.

TO BENEFIT THE PUBLIC.

The German postal department has recently introduced a card of identification for the benefit of the traveling public which will prove of great utility to travelers. Upon the card or folder is printed its number, the date of its expiration at the end of the year, the name, profession and residence of its owner, the date of its issue and the seal of the postoffice issuing it. Within the folder is pasted a small unmounted photograph of the owner. A small cancellation stamp is pasted partly upon the photograph and partly upon the page.

Opposite is a description of the applicant, his general appearance, color of hair and eyes. His birthplace and age are also given, and he is required to sign the card. The last page of the little folder describes the uses to which the card is to be put and the means of obtaining it. The fee is 50 pfennigs (12 cents). The card is used in obtaining mail where the owner is not known, and in case he changes his appearance so that he no longer conforms to the description a new card must be issued after proper identification of the applicant.—N. Y. Commercial

REVIEW OF THE MARKETS.

WIRE NAILS: The prospect of a heavy Fall trade is becoming more and more apparent. The large demand that obtains in the Nail market with the light surplus stock the mills are able to turn out make comparisons with last year's conditions indicate a demand worthy of notice. The scarcity of steel has exerted an influence in restricting the output. Rumor of an advance in prices has been denied, but has strengthened the quotations, by avoiding the concessions previously allowed on some large orders. The new tonnage is reported as exceeding all records. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|---------------------------------------|--------|
| Carloads to jobbers | \$1.85 |
| Carload lots to retail merchants..... | 1.90 |

New York.—The local demand is only a moderate one, but is sufficiently steady to satisfy the trade. Quotations for small lots from store are on the basis of \$2.10 per keg.

CUT NAILS: There has been no meeting of the Cut Nail Association during August. The next meeting will be held the latter part of September. Some mills not being in operation makes the nails in somewhat scant supply, so that official prices are obtainable by the mills, although on contract orders concessions of 5 cents a keg have been obtainable. Official quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—The demand for Cut Nails is only nominal. Quotations for small lots from store are on the basis of \$2 per keg.

BARB WIRE: There is a heavy demand from the trade for Barb Wire with dates of delivery made quite early, under the belief that a scant supply may be caused by the scarcity of steel, which already interferes with delivery. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | | |
|--|--------|--------|
| Jobbers, carload lots | \$2.00 | \$2.30 |
| Retailers, carload lots | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: The orders booked by the mills have already reached an amount that has surpassed expectations, for the business of a year ahead. Specifications being in excess of the capacity of the mills, the doubt is expressed of getting deliveries on specified dates with promptness. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

EAGLE CARRIAGE BOLTS: At a meeting of the Eagle Carriage Bolt Association, held in New York, 14th inst., the prices and terms on Eagle Carriage Bolts were reaffirmed, the general discount remaining as heretofore—80 per cent. W. R. Walkley was elected president of the association and E. E. Jackson, Jr., supervisor.

PICKS AND MATTOCKS: The market for Picks and Mattocks is characterized by a steady and strong tone and prices are about 5 per cent. higher than a short time ago.

ROPE: The following prices may be said to represent the market:

| | Cents Per Pound. |
|------------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12½ |
| B Quality Manila | 11½ |
| Pure Sisal, 7-16 and larger | 9 |
| No. 2 Sisal, 7-16 and larger | 7¾ |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

| | |
|-------------------------------------|----------------------|
| In lots of less than 5 barrels..... | 39 cents per gallon. |
| In lots of 5 barrels or more..... | 38 cents per gallon. |

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

| | |
|--|----------------------|
| Double Boiled Linseed Oil, 2 cents per gallon higher than raw. | |
| Regular Boiled Linseed Oil, 1 cent per gallon higher than raw. | |
| Calcutta Oil | 68 cents per gallon. |

THE PHILADELPHIA TRADE.

One of the greatest systematizers of the day made a remark recently, in the course of a conversation, that the policy of every sound business house should be based at all times on the possibility of a "slump," and while the logic is no doubt good, we must confess that the word "slump" sounded very strangely to our ears, as from our experience, as well as that of others, we thought the word must be obsolete—it was so long since we had heard it, and we feel that unless something unusual happens, it will be some time before such a thing occurs. Our Fall trade is opening up with good prospects, and as our vacation list is about closed, we are naturally experiencing less difficulty in handling the increased business, although it is not likely, from present indications, that any will have idle moments for some time to come. Building operations, both large and small, in Philadelphia seem to continue without any sign of let up. Thousands of dwelling houses are in process of construction in the outskirts of the city which means demand for Hardware and building material of all kinds and plenty of work for those who wish it.

BIDDLE HARDWARE CO.

THE PITTSBURGH TRADE.

While travelers' vacations are over, and they are on the road and sending in plenty of orders, office men are later in taking their outing, so that the wheels do not yet move with their accustomed regularity.

A new location for our Post Office is exciting some interest. Although the present one is only about ten years old, it has been entirely outgrown, and Uncle Sam set aside one million dollars to purchase a new site. To find a place large enough in our crowded business district for this price is puzzling our real estate dealers.

Another building to cost \$1,250,000 is the Memorial Hall in memory of soldiers of Allegheny County. A site has just been chosen near the Carnegie Institute, which district is rapidly becoming one for public buildings. This building will be erected immediately.

Business is good. Mills and mines all at work, and retailers prospering.

LOGAN-GREGG HARDWARE CO.

THE DAVENPORT TRADE.

Vacation season is off and business is again on. We have something to do every day. The current fads are passing and there is evidence of returning to the old time ways of distributing Hardware. If the Hardware dealers would profit by the expense of others and keep a regular bargain counter of worthless stuff on hand, and for each sale amounting to a dollar, they would give a prize of an imitation silk handkerchief worth three cents, they could soon fill up their stores with women who would there have an opportunity of seeing the new and useful kitchen utensils and other valuable articles that they now know not of; and when they returned to their homes, have something to show for their money. Spending money is largely a cultivated habit, which is difficult to break, and this should be recognized by legitimate dealers in good goods. Let women have a dollar's worth of trash to satisfy their craving for bargains and desire to spend money, just for the sake of spending it, and it will not be long before their reason will assert itself. Bargain hunting, which has been so disappointing and unsatisfactory, will be a thing of the past and a desire for acquiring the most useful and the greatest labor-saving articles of highest quality will take its place. Then there will be fewer bills of divorce, less graft and stealing, more room in the penitentiaries, insane hospitals and poor houses, better cooking, better health, more happiness and an improved condition in the legitimate Hardware trade.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

From all sections of the West the universal report is a good crop and this, of course, means a good fall and winter business. When looking over the situation, we can come but to the one conclusion and that is, that it's a blessing to live in such favored country. Manufacturers are slow in filling orders, and all must look ahead and provide for their future needs. With such a large demand, we are often surprised that prices are not soaring upward. Though some prices are higher, still the average, on an assorted stock, does not show much increase, but as demand should regulate the supply, we anticipate a strong and higher market for some months to come.

NICHOLSON FILE CO.

Providence, R. I.

THE MINNEAPOLIS TRADE.

Harvest of small grains is practically complete in Minnesota, and South Dakota, and well under way in North Dakota. Reports say that there will be about 210,000,000 bushels of wheat raised in the three States, North Dakota being in the lead. Therefore Minnesota has been the largest producer of wheat of any State in the Union. The reports as a whole are most encouraging. The weather has been excellent, only serious trouble being shortage of men. Price of wheat is off a little, but increased yield in all directions will more than offset without doubt. The crops as a whole will bring more than the average. This insures favorable business conditions for the Northwest for another year. Jobbers in every line are working their fullest capacity. Local conditions the same as at our last writing, no improvement and no prospect of any.

W. K. MORISON & Co.

THE SAN FRANCISCO TRADE.

The homes of many San Francisco Hardware dealers are in Oakland and other east side of the bay communities. And quite a group of the wives of these men are active members of the Outdoor Art League of Oakland, an Association of many hundreds of East Side ladies that is credited for much beautiful work already accomplished and that has made Oakland famous for its cleanliness and attractiveness. And now this philanthropic band of women are looking beyond their bailiwick for other unsightly sites to conquer, and their vision is focused on the eyesore ruins of San Francisco. At this writing it is the eighteenth of August, just four months since the earth shook and much of this city tumbled down, leaving a four-mile surface mass of debris of brick, crushed marble columns and twisted iron and steel, and ninety-nine one hundredths of this untidy ensemble remain to-day as the quake and fire left it. It was the mightiest shock since time immemorial, but what shocks the Oakland ladies' Outdoor Art League is the "slow and poky way" San Francisco's administration has buckled to in cleaning away its debris, and these ladies are about to petition this city's authorities for permission to do the work themselves.

Somebody, of course, is to blame for the slow procedure preparatory to the rehabilitation of San Francisco, and ostensibly it would seem that the city authorities are to blame. But this is not entirely true, and the Outdoor League ladies are in error for thinking so. There is strong reason for the city's backwardness in refraining from hasty action in this debris-removing matter, and there is no doubting the fact that the insurance companies interested are mainly to blame. They claim they are looking for salvage, but the common opinion of policy-holders is that the companies are working slow to tire out the policy-holders and compromise their losses. To block this procedure and hurry along the debris-removing work preparatory to the greater

San Francisco is why, as previously stated, such Hardwaremen as Messrs. Carrigan and Holbrook and nine other prominent business men have been selected as trustees of an organization to guard the interests of policy-holders.

At the luncheon hour one day last week in a wholesale Hardware house in Cincinnati earthquakes was the subject of discussion. A house salesman in the discussion, a gentleman who formerly traveled for the trade in the Pacific Coast territory, an acquaintance of the writer, has written me a question. He said: "We have a dispute as to the number of blocks destroyed in your big fire. 'Spose you state the number in your HARDWARE correspondence." The city engineer has just prepared the first authentic report of the portion of the city burned over in blocks, portions of blocks, square miles and acres. These figures he has carefully estimated at the request of the bureau of history. The total number of square miles burned over is 4.05 "Taking an estimate in blocks," said the engineer, "is unsatisfactory, as the 100-vara blocks are four times as large as the 50-vara, and then there are the irregular pieces of land at the various crossings on Market Street, the principal thoroughfare which runs oblique across the town." The report contains the following figures on the area burned: North of Market Street, 50 vara, 1.088 acres, 1.70 square miles, 299 whole and 13 part blocks; south of Market Street, 105 vara, 762 acres, 1.19 square miles, 69 whole and 5 part blocks; Mission District, 442 acres, .69 square miles, 46 entire and 9 part blocks; Western addition, 301 acres, .47 square miles, 76 whole and 5 part blocks. Total, 2,593 acres, 4.05 square miles, 490 entire, and 32 part blocks.

The California Promotion Committee is in receipt of advance sheets of the census of manufacture, as it relates to California, from the Bureau of Commerce and Labor, at Washington. This census was taken in 1905, and indicates that there has been a substantial increase in the manufacturing industry in California. The statistics pertaining to San Francisco indicate that this city, prior to the recent disaster, was making rapid progress in the development of its manufacturing industries, the annual product of these industries, as conducted within the city limits, equaling \$138,000,000—an increase of 29 per cent. since 1900.

The total number of manufacturing establishments in the State in 1905 was 6,839, with a capital of \$282,647,201 invested, employing 112,626 persons. The value of the products of these manufacturing factories was \$367,218,494. INDUSTRIAL PRESS ASSOCIATION.

Clarksburg, W. Va., is evidently preparing for an old time boom. The announcement that the breweries are buying each other, and the city is to have free beer for five years, is about the best boom talk ever brought out. It would make a Western boomer ashamed of himself. Everything would indicate an ideal summer resort, for the five years, at least.

MONTANA TRADE.

Never in the history of the country has the actual mining output of copper been as great as at the present time here in Montana. The high price of copper, silver and lead has brought a large number of old mines into the field as active producers, and opened up a number of new properties. The production is at the present time at a maximum, and this activity in mining has, of course, influenced all lines of business. Probably the Hardware dealers are feeling the direct benefit more than any one class of merchants, for all the large Hardware concerns here carry an extensive line of mining tools and machinery, and the general business prosperity has made the building trade good, producing a good demand for all building materials.

One of the largest Hardware concerns in Montana is The A. M. Holter Hardware Co., of Helena. In addition to a strong line of general Hardware, they carry an extensive line of mining supplies, gasoline engines and farm tools, and do a jobbing trade throughout the State, constantly adding new lines of goods. They now carry about everything for which the retail Hardwareman in Montana may have a sale. A very complete 1600-page catalogue has just been issued by them. A strong line of fishing tackle and sporting goods is now being sold by this concern, and has been found profitable. In speaking of trade conditions B. G. Schrader, the genial general manager, said: "Business now is very good; in fact, has been for some years. The farm products of the State are increasing each year and the mining interests are in a most healthy condition. The crop outlook is good, and everything points to a good Fall business." F. C. Ashall who attends to the buying always has a pleasant word, and is one of the most popular Hardware buyers in the West.

Another jobbing house doing an extensive business is the Helena Hardware Co., the salesmen of this concern covering the central part of the State closely.

BUSINESS BOOMING IN BUTTE.

With all the mines being operated on full time, and all labor being well employed and earning good wages, Butte is a busy place. An air of business activity about the big Hardware store of the Montana Hardware Co. was perhaps the best evidence of this concern's growing business. This is one of the largest Hardware stores in the State, and is exceedingly well stocked and well arranged. An attractive feature of the Montana Hardware Co.'s store is not only the well-arranged stock, but the light, bright appearance which it presents. A large stock of china and glassware is carried by this house, and a big business is done in all high-class goods. A special feature of the Montana Hardware Co.'s trade is the mining supply business. Marvin Jenkins of the concern, who is one of the best posted Hardwaremen in the Northwest, said that the demand for a better class of goods was constantly increasing, and that their trade never had been better.

Another attractive Hardware store is that of the Anaconda Copper Mining Co. A very large stock is carried and quite an extensive wholesale business is carried on. S. H. Greenwood is manager of the Hardware store and is ably assisted by H. V. Doering. A very complete stock of fishing tackle is carried and a good jobbing business has been built up in this line. In fact, each year one finds more of the sporting goods trade coming into the Hardware stores, plainly proving that in time the sporting goods business will be controlled by the Hardware trade.

J. E. Davis has succeeded to the business of Davis-Weimes-cary Co., and has one of the most up-to-date exclusively retail Hardware stores in Butte. A special feature is made of window displays by J. E. Davis and being centrally located at 20 North Main Street, is an exceedingly good way of advertising.

One of the younger but no less progressive Hardware houses of Butte is Henderson Bros. & Co. Mr. Parmalee of this firm said that general business was good, especially in the house furnishing line, which goods are very well displayed in their store.

ANACONDA DEALERS ENLARGING.

H. G. Coy, who has succeeded Lick & Coy, is at the present time making some very decided improvements in his store, having leased the adjoining store which will give him twice the floor space now occupied. In the new addition will be carried the big line of harness and horse goods, and samples of buggies. Also a complete harness shop is being fitted up where all classes of work can be done. H. G. Coy's business is growing rapidly and after you have met and known Mr. Coy you can understand why his has become the leading Hardware store of Anaconda. In speaking of business, past and future, Mr. Coy said: "During the past few years I have found it absolutely necessary to be constantly increasing my stock. We are far from the markets and if we don't have the goods we don't get the business. Now, with this increased stock has come the problem of how to show it to best advantage. I find that when goods are well displayed I make quicker and larger sales. We have a large

population of foreigners here in Anaconda—often one will come into the store and simply look around—he wants something but don't know how to ask for it in English. If he don't see it, he is very apt to leave the store without making his wants known. Now to best take advantage of these conditions I'm going to get everything, just as far as possible, in sight. All tools and shelf goods will be sampled; everything will be put in sight." Continuing, Mr. Coy said: "The business is here, and we are going to get it." From the active appearance of things about the store it would seem that H. G. Coy had now gotten most the business of Anaconda. Fishing tackle was added a few years ago and has been found to be a good side line. Mr. Johnson, the head clerk, is one of the best trout fishermen in the country and when the boys want tackle he is the man who can tell them what flies are getting fish.

The same good reports of business come from Bozeman, as in other parts of the State. The big Hardware store of Benepe-Owenhouse Co. seemed to be doing all the business they could handle and are showing a fine line of buggies and wagons. Those Hardware dealers who have come to display this line and horse goods are certainly making a success of it.

Missoula is growing rapidly and is the center of a beautiful agricultural country. The Missoula Mercantile Co. do an extensive jobbing business, and carry a big stock of shelf and general Hardware. N. S. Little, who is manager of the Hardware department, said that the wholesale business was constantly increasing and that trade had never been better. A special feature of the Missoula Mercantile Co.'s business is its advertising and an excellent attractive 500-page catalogue is issued by this company.

Montana, once the great cattle country, is rapidly being more closely settled. Big ranches are being cut up into farms, cattle raising is gradually being pushed farther north by the advance of civilization, and then in the building up of the country the demands for building materials, for all kinds of Hardware, is continually growing greater.

HAMMERNAIL.

HUMOROUS LOGIC.

The fond parents of a Missouri boy, who had a horror for nicknames gave him the name of Monday. He is now called "Washday" by the neighborhood boys.

We see Nelson Morris, the packer, says that only one man read the "Jungle." Will that man please stand up and be counted?

Hobart, Oklahoma, comes to the front with a new style of church conversion. A man bought the Presbyterian church and has converted it into a livery stable.

Prof. Wheeler, of Yale, who recently made an attack on the Monroe doctrine, gives out the impression that the doctrine is about as well known to him as he is to the balance of the world.

There is said to be an active demand in many parts of the country for dimes. The man with the bill against you is seldom satisfied with anything less than a dollar, however.

Great improvements are soon to be expected in Medicine Lodge, Kas., as two new Painters have just arrived there. They are the twins born to the household of Editor Painter of the local paper.

That Salvation Army captain, of Logansport, Ind., who left a wife and four children and eloped with a young lady, evidently enlisted in the wrong branch of the service. It was the Mormon brigade in which he should have sought a commission.

"Ran Away With a Rake" was the spicy heading in a Missouri rural paper. The disappointment of the readers can be imagined when it was found to be only an account of a team of horses running away with a hay rake.

There don't seem to be much money in these little trusts. In the ice trust inquisition in Kansas City the other day it developed that one man borrowed money to go into the ice business six years ago, and he is now only worth half a million dollars.

It must be a great luxury to travel on the railroads of Honduras. One who has recently had the experience writes back that even the telegraph poles are of rosewood and the ties solid mahogany. Also that the train traveled thirty-seven miles in eighteen hours. If that isn't a luxurious speed, what kind of a speed is it?

If an automobile runs over you, do not class it as an accident. It is merely an attempt to set right any physical defects you may have. Since they ran over the deaf mute up in Sisseton, S. D., the other day and caused her to gain her hearing, it is to be expected attempts will be made in other quarters to beat the record.

F. A. PARKER.

Gillette Safety Razor

NO STROPPING NO HONING

It Pleases
Every User.

The Most
Wonderful Selling
Razor
in the World

It pleases every customer, who in turn brings a new customer.
"The Gillette" sales are permanent, no shelf worn stock. It turns orders to money and profits.

"The Gillette" Blade is of Fine, Flexible, Wafer Steel that Shaves.

12 BLADES, 24 SHARP EDGES,
Every blade will give from 20 to 40 close, smooth,
comfortable shaves.

Triple silver-plated set with 12 blades \$5.00.
Quadruple gold-plated set with 12 blades \$10.00.
Quadruple gold-plated set with 12 blades and monogram \$12.00.
Standard combination set with shaving brush and soap in triple
silver-plated holders \$7.50.
Other combination sets in silver and gold, up to \$50.00.

Standard packages of 10
blades with 20 sharp
edges, for sale by all
dealers, at the uniform
price of 50 cents.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED AUGUST 6, 1906.

- 408,355. COMBINATION LOCK. A. R. Peck, Cortland, N. Y.
 408,479. PIPE WRENCH. J. A. Giles, Oswego, N. Y.
 408,527. WASHING MACHINE. P. W. Rodecker, Sidney, Ohio.
 408,550. ROD HANDLE FOR LOCKS. W. H. Taylor, Stamford, Conn.
 408,552. ROD HANDLE FOR LOCKS. H. R. Towne, Stamford, Conn.

PATENTS ISSUED AUGUST 7, 1906.

- 827,711. UNIVERSAL SCREW-WRENCH. James T. F. Conti, Paris.
 827,718. SHAVING DEVICE. Benno vom Eigen, Newark, N. J.
 827,736. FISHING-ROD CASE OR HOLDER. Edward A. Lampshire, Kalamazoo, Mich.
 827,756. STOPPER-EXTRACTOR. Albert Seitz, McMinnville, Tenn.
 827,757. FISH HOOK. William Shakespeare, Jr., Kalamazoo, Mich.
 827,806. SLIDING SHOE FOR FURNITURE. Orton C. Little, Menasha, Wis.
 827,855. FISH STRINGER AND CARRIER. Willard J. Farmer, Milwaukee, Wis.

PATENTS EXPIRED AUGUST 13, 1906.

- 408,690. WASHING MACHINE. C. C. Burton and D. H. Benjamin, Utica, N. Y.
 408,766. WASH BOILER. A. P. Thissell and G. S. Bradstreet, Beverly, Mass.
 408,772. SOLDERING IRON. C. L. Wagandt, Baltimore, Md.
 408,795. COMBINATION LOCK. J. D. Craig, Rogers Park, Ill.
 408,974. DOOR LATCH HANDLE. H. Hoffmann, Jr., South Norwalk, Conn.
 409,010. DOOR KNOB. C. O. Case, New Britain, Conn.

PATENTS ISSUED AUGUST 14, 1906.

- 828,406. RAZOR. W. W. Jamison, Hamilton, Ohio.
 828,440. WRENCH. J. F. Sullivan, Seattle, Wash.
 828,505. FISH HOOK. W. T. Rice, Berlin, Okla.
 828,557. FISHING ROD. C. G. Levison, New York, N. Y.
 828,586. CURTAIN ROD. E. W. Vaughan, Worcester, Mass.
 828,625. TONGS. J. P. Ogg, Rillton, Pa.
 828,780. LATCH. A. Shepard, Plantsville, Conn.
 828,787. HAND VISE. F. Van Cauwenberger, Rockford, Ill.
 828,859. COMBINED WRENCH AND THREAD RETRACING TOOL. J. Merckens, Chicago, Ill.

HOW BINDER TWINE HAPPENED.

The first reaping machines brought out by McCormick bound the sheaves with fine wire, a method both neat and economical, but one that was followed by disastrous results. Flour mill after flour mill was destroyed by fire and investigation showed that bits of broken wire getting into the millstones with the wheat was the cause. This difficulty was overcome by a Yankee who proposed drawing the wire from the wheat by means of a magnet. A little later horses and cattle all over the country died from a strange disease, which post-mortem examinations revealed was caused by swallowing wire with their fodder. The magnet would not work in this case and so John Good, the rope worker, produced a loosely-spun yarn made of coarser fibre as a substitute for the wire binding. \$12,000,000 worth of binder twine is made and sold in this country in a single year.—*Hardware and Metal.*

INCREASING THE TELEPHONE TRADE.

By B. A. C.

Nowadays a great many of our customers and other people living near us have telephones. It is a fact, however, that they take very little advantage of them in doing their shopping, often spending a lot of time and some carfare in going after a thing

that could be ordered in a minute over the telephone, at no more, and usually less cost.

This lack of appreciation of the telephone's usefulness is largely the merchant's fault. He should be first and early in taking advantage of its possibilities for increasing his own trade. In other words, he should teach his public to order from him by telephone, and in so doing he will often reach people from whom he has never before had any patronage. In increasing his trade in this way, he is also bringing up its average, for as a rule the people who can and do afford telephones are desirable customers.

The best way to teach "shopping by 'phone" is to send postals, at regular intervals, to all in your territory who are listed in the telephone book. This costs less in proportion to its effect than any other means of advertising, for the certainty of your mailing list provides that no one will get a postal who cannot take advantage of its invitation.

Herewith are printed six sample postals, which the reader can easily adapt or improve for use in his own business. It is well to send the cards out at intervals of no more than four or five days.

Step to the 'Phone

Call EAST 71 and tell us what you want us to send.

We have a delivery service for your accommodation, and very shortly after your order is received we will send a messenger with the goods. When you think of anything you want—think of EAST 71.

Ring—us—up,—do!
We—will—surely—hurry.

JAMES R. BROWN,
Hardware, 32 Jones St.

Prompt Buying by 'Phone

BROWN'S 'PHONE
is EAST 71

Ring Up:

Simply telephone us your wish. If necessary, a messenger will call for your order. At any hour of the day—'phone us. All orders will be promptly attended to, and—

We guarantee our prices to be as low or lower than elsewhere.

JAMES R. BROWN,
Hardware, 32 Jones St.

Our 'Phone is Quick

BROWN'S 'PHONE
is EAST 71

Use it.

Perhaps you're in a hurry and haven't the time to visit our store?

Perhaps it's raining and you don't care to venture out?

Perhaps it's too much work to get dressed?

Yet you want something?

What to do?

Simply call us up.

JAMES R. BROWN,
Hardware, 32 Jones St.

Handy Shopping by 'Phone

BROWN'S 'PHONE
is EAST 71

Use it.

You can shop just as promptly and satisfactorily over our 'phone as though you personally visited the store. We maintain a FREE MESSENGER SERVICE.

This should be appreciated. It is particularly convenient in disagreeable weather, or when you are in a hurry.

JAMES R. BROWN,
Hardware, 32 Jones St.

Shopping Over Our 'Phone

It is an appreciated convenience. Scores of families ring us up every day.

We operate a FREE MESSENGER SERVICE in connection with a TELEPHONE SHOPPING SYSTEM.

Phone us.

It is a well-known fact that our prices weaken the prices of our competitors. If you trade here you will find it true.

JAMES R. BROWN,
Hardware, 32 Jones St.

Our 'Phone is Handy.

Use our phone when you want anything.

Both ways free.

We'll take your order, and we'll deliver it, too.

It's so handy you'll appreciate it when you get in the way of using it.

Chance as well as

Regular

Customers—

Call us—

East 71.

We'll do the rest.

Now, isn't that handy

JAMES R. BROWN,
Hardware, 32 Jones St.

COMMERCIAL EDUCATION.

UNITED STATES BEHIND EUROPEAN COUNTRIES IN THAT RESPECT.

Frank V. Thompson, who is to be the principal of Boston's new Commercial High School, has been spending several months in Europe in making a thorough examination of the commercial schools in Germany, Italy, Switzerland, and other countries. The *Boston Transcript* prints a very interesting statement from Mr. Thompson of results of his investigations in Europe.

Mr. Thompson says that the commercial schools in Italy, Switzerland, Austria, Germany, Belgium and France have all passed the experimental stage and are component parts of the educational scheme of those countries and are considered especially valuable. In Italy the Government usually encourages the extension of such instruction by granting large subsidies. The same is true of Switzerland, but to a greater extent. In that country there is scarcely a city of even a moderate size which has not a flourishing school of commerce. The town of Neuchatel, which has less than 18,000 inhabitants, has a commercial school of 700 boys and young men. The fine building, with its splendid equipment of laboratories, is superior, Mr. Thompson says, to any school structure in Boston, and he was surprised to find about two dozen American boys in that school receiving their education for business careers in the United States. Austria has a very complete system, Vienna alone having fifteen lower commercial schools and four higher schools of commerce. There were 1,200 young men in one of these schools visited by Mr. Thompson.

GERMANY TAKES THE LEAD.

He says that Germany usually takes the lead in the matter of commercial education. There are four kinds of commercial schools in that country, all under control of the State. One kind gives an elementary training for business to boys up to the age of 16 or 17. Then there is a higher kind of commercial training, and then, again, commercial universities of the same grade as the usual German universities. The fourth kind of commercial education is the apprentice institution. Boys are not turned adrift educationally at the age of 14, as is the case in this country. The German Government demands that all the apprentices of whatever occupation shall attend class instruction for ten to twelve hours a week for three years. This is not done by haphazard evening instruction, but in regular schools during the daytime.

SCHOOLS IN FRANCE AND ENGLAND.

France also has a fine system of commercial schools. In the corridor of the High School of Commerce in Paris can be seen the purpose of the school stated in these words: "The High School of Commerce is intended to complete by means of higher studies the instruction given in special educational establishments, and to impart to young men leaving grammar schools and other institutions, the technical knowledge necessary in managing business, whether trade, manufacturing, or banking. The High School of Commerce also trains candidates for the consular service, capable of worthily representing France in international relations."

England has no schools of commerce in the strict sense. The realization of the need, however, is growing. The invasion of German young men, well trained and capable, into the business houses of England, is forcing a recognition of the desirability of a proper business education. Germany has put her millions into technical schools, and has no problem. Mr. Thompson says, of the unemployed. Instead, there is a scarcity of labor. He says the United States is not making "our weight count commercially as we should."

The new High School of Commerce in Boston is a necessary outgrowth of the demands of the times. Whatever is good and worthy in the foreign systems is to be incorporated in this school.

REAL ELECTRICAL FARMING IN GERMANY.

With the advent of the telephone as a factor in modern farming some of the old traditions necessarily vanish. The horn is, for instance, no longer needed to summon the workers at noon-tide. Now Ouedman, in Germany, a farm of 450 acres, besides a full telephone equipment, has an electrical churn, the barn containing electrically operated feed and carrot cutting machines, even the grindstone being turned by a small belt connected with the barn motor. A threshing and grist mill, a saw mill and various agricultural machines (including a plow) are driven by batteries charged from sub-stations in the fields. Two dynamos moved by a 50 horse power stationary engine furnish the necessary power for the entire farm work.

NOT THE GOODS DESIRED.

High—Where did you get your cold?
Jinks—If I knew I'd take it back.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

5. CONTRACTS BY MAIL, TELEGRAPH, TELEPHONE.

The question has arisen as to whether or not contracts are complete where the acceptor withdraws his letter from the postoffice after once mailing it, and it has been held with the mailing constituted acceptance and the withdrawal of the letter afterwards from the postoffice was not a retraction of the acceptance sufficient to relieve him from the consequences.

Where a letter containing an acceptance or a proposal is properly mailed the contract is completed at the time of the mailing of the acceptance, even although the letter miscarry and never reach the one making the offer.

Example: A in Detroit writes a letter to B in New York offering to sell him five hundred dozen eggs at eight cents a dozen. B deposits a letter accepting the offer, within a few hours after his receipt of the proposal, in a box provided by the postoffice authorities for the receipt of letters. A mail clerk instead of depositing the letter in the receptacle for west-bound mail puts it in the receptacle for New England mail and it goes to Massachusetts instead of to Michigan, and does not reach A in Detroit for a week after it was mailed. In the meantime A sells his eggs to another customer. What is the result?

The contract was complete at the time when B mailed his letter of acceptance and A is held in damages for refusal or failure to carry out his contract to deliver the goods.

One may, of course, withdraw an offer before it is communicated to the person to whom it is sent.

Example: A in Detroit mails a letter to B in New York offering to sell five hundred dozen eggs at eight cents a dozen. Two hours later he is enabled to sell the eggs in Detroit. He thereupon wires B to disregard offer previously made. B cannot, on receiving A's offer, accept it and thereby bind A.

If by the terms of an offer a certain time be prescribed within which it may be accepted by the other party it must be accepted within that time; and an acceptance after that time will not constitute a contract that will bind the party making the proposal.

Example: A in Detroit offers by mail to sell B in New York five hundred dozen eggs at eight cents a dozen, if accepted within twenty-four hours after the receipt of the proposal. Twenty hours after the receipt of the proposal B mails his letter of acceptance. A valid contract was thereby made, even though the letter of acceptance did not reach A until forty-eight hours thereafter. Should B wait twenty-five hours after receiving the letter of proposal his acceptance would be of no avail.

An offer may be withdrawn even although the offerer has agreed to leave the offer open for acceptance for a stated time. It cannot be withdrawn, however, within a time stated where there was any consideration given for the option or time limit. Where there is no money consideration and no corresponding promise by the person to whom it is made, the promise not to withdraw the offer has no binding force. If a consideration for the undertaking to leave the offer open is given and accepted this constitutes of itself a contract and the offer cannot be withdrawn within the time.

An offer is to be considered as open for a reasonable length of time; after a reasonable time has elapsed an acceptance will be too late. What is reasonable time will depend on the particular case and its circumstances.

Where the offerer is at liberty to retract, the retraction must be communicated to the offeree before he has accepted the offer. If the offerer dies before the acceptance the offer is necessarily revoked by his death. An acceptance mailed before but not received until after the death of the offerer makes a binding contract.

Notice of dissolution of partnership revokes an offer by the partnership, but an acceptance mailed before the notice of dissolution is received, makes a binding contract.

When the letter or telegram of acceptance has been deposited the acceptor cannot disaffirm his acceptance or prevent its effect by a subsequent retraction of the acceptance.

Example: A in Detroit mails to B in New York an offer of five hundred dozen eggs at eight cents a dozen. B posts his letter of acceptance in the postoffice letter box, on the following day. Two hours later he concludes to withdraw the acceptance and telegraphs A that he withdraws acceptance previously mailed. A receives the telegram before he receives the letter of acceptance. The contract is nevertheless binding and A may disregard the telegram.

(To be continued.)

MUSINGS OF AN OLD MAN.

The fact that some men so well equipped to win in business life fail, and some so poorly adapted to it succeed, set the corn meal batter in my head to fermenting the other day and out of the mixing came the question: What are the necessary attributes for a successful operator?

HUSTLER. First, last and all the time the man who wins must be a hustler, for education, location and everything else that tends to success will be of no avail to the man who sits down and waits for his business to shove him. You have got to shove it! By hustling is not meant to fuss and fume and bustle around behind the counter issuing orders to every one of your people who come within the sound of your voice. This only flusters them and does no good. The man who quietly take every chance, (and when there are no chances makes some) to root for his own business and yet does it in such a way as to not attract attention, is the man who is hustling in the right sort of way. The proper hustler is the man whose store is clean, whose window is clean, whose clerks are clean in all that the word clean embraces, who is always smiling and who never has to be sent for at the nearby barber shop or billiard parlor. This is, in my mind, the first requisite to success. To be eternally present and eternally hustling.

OPPORTUNITY is the second greatest factor in business. To know when the time is ripe to go into business or to change your location. To be able to grasp the right moment when it comes, is a gift that makes the difference between a life of opulent ease and one of poverty. The man who takes advantage of the opportunities that come to him will drive a coach and four down the pike of Prosperity while the man who fails will plow a tow headed mule on the flinty hill side of Poverty all the days of his life. Opportunities come to every man alike. The difference lies in being able to recognize them when they do come. A young fellow many years ago wanted me to put to \$250 with three other men to bore a hole in his father's farm in West Virginia, because he thought there was oil there. I refused. Had I not done so I would have been having funny pictures made of me on the back page of the *Journal* every day by this time, because the three men who did go in with him can now count their money in six figures. They all have corns on the right thumb from cutting coupons off the government bonds. I had the money and this was my opportunity but I let it slip. There was one other thing that I needed.

NERVE.—You can have a big fund of energy and opportunities galore but if you haven't got the nerve to take the chances when they come to you your hope of success is poor. Business life is a gamble and the man who buys a dozen gold frames because he thinks from past experience he will be able to sell them at a profit is not doing anything so radically different from the fellow who bets twenty dollars on an ace high flush because past experience has taught him that ace high flushes generally win. Fortune favors the brave and you must have nerve enough to follow your judgment. Nerve enough when you think a certain line of conduct in your business is the proper one to stick to it.

ENTHUSIASM is another requisite to success. You have got to be enthusiastic in your business to such an extent that you convince every man in your place that it and you are sure winners. You have to have the sort of enthusiasm that is catching and so catching that not only your clerks will get a bad case but that your patrons will also become infected. Be an optimist. Believe in your town, believe in the prosperity of your neighborhood, believe in the successful outcome of every case you fit. Believe yourself and other people will believe you. The smiling phiz gets the mazuma. Be cheerful. Be glad. If you haven't anything else to be glad about, be glad it's no worse. Cheerfulness is more contagious than measles.

SOBRIETY follows next in line. The man who come to his place of business with the smell of liquor on his breath has fozzled at the first tee. He is like a dog with three legs after a rabbit with four. I don't care if a man is the star boozier in seven States; he doesn't want his eyes fooled with by a man under the influence of talk-water. Even an innocent glass of beer with your lunch will cost you the trade of your best people. As to actual intoxication or to regular drinking it's so self-evidently bad as to be unworthy of mention. A man who takes whiskey during business hours should take the Cy Tomkins' Licker Cure. You take off your right shoe and sock and hook your first and second toes in the triggers of a loaded double barreled shot gun and then put the muzzle in your mouth and push hard with your right foot. Money refunded if does not cure the worst case.

TECHNICAL SKILL You will notice that I put this rather low down in the scale, but it is a necessity just the same. You have got to produce the goods in the optical business just the same as you have in every other walk of life. You can have the prettiest store in town and can advertise it perfectly and wait on your trade with the utmost courtesy, but if the glasses are not properly adapted to the refractive needs of the individual you will not be able to hold him. Again, you may be a most clever refractionist and not a good frame fitter and you will again lose your patrons, for some other fellow down the street may be able to make a pair of glasses stay on and then your good work is all for naught. Yes, you have got to know your business.

YOUTH is also a necessity. I would not have a man over thirty-five come into my store to learn the business. There are several reasons. First, the man who at thirty-five has not found his vocation in life is very likely to be of a weak, vacillating nature that will be no more of a success in our business than he has been in the businesses that he tried before this. Again, the human mind is not in a receptive condition after a man has gotten along that far in life. He has gotten out of the habits of study and his habits are so formed and so fixed that it is with difficulty that he can take in and assimilate new things. Then there is the hopeful and optimistic view of life that all young men take that makes them a thing of beauty and a joy forever. Youth is the spring of life and spring is the budding time for both sassafras and genius.

There we have the seven requisites to success and while no living man can hope to have them all, they are the seven things that my lifelong work in this line has taught me are the most desirable. Let me see—seems to me we have left out something. A man must be a Hustler and have Opportunities and the Nerve to take them when they come. His Enthusiasm must be never failing, his Sobriety unquestioned, Technical Skill of the best and he must have Youth. Let us set them down in a row.

Hustler, Opportunity, Nerve, Enthusiasm, Sobriety, Technical Skill, Youth.

The one greatest thing of all we have left out! A single glance at the row above shows it. Without it the whole character I have built is as worthless as a house built on sand. Let your eye run down that row and see what the first letter of those seven words spell! H-O-N-E-S-T-Y! Honesty! and though you have the mercantile ability of a Wanamaker or a Field—though you have the technical knowledge of Donders or Lockwood—though you have all the ability of every example of probity, genius and personal magnetism, if you are shy on honesty you are doomed to failure. When I say honesty I do not mean the best policy brand of honesty, but the sort of honesty that is inside of a man that makes him be honest because God built him that way. Because he knows it is right. Honest where people cannot see as well as where people can see. That sells honest goods and at honest prices, who will not take advantage of ignorance, who will not do a thing that would not stand publication on the front page of the leading daily paper of his own town. If you take those seven first letters away from the words we have just lined up you leave a meaningless jumble of letters and so with the word Honesty. If you take it away you can have every other attribute that I have set down there and it is only a matter of time until failure will overtake you. "Be sure your sins will find you out" was spoken many, many ears ago, but it is as true in Keokuk, Iowa, as it was in Palestine and applies to 1906 just the same as it did in the year 6.

Act on the square!—*The Optical Journal*.

CATALOGUE OF WESTERN CLOCK CO.

WESTERN CLOCK MFG. Co., La Salle, Ill., with Chicago offices at 131-133 Wabash Avenue, and New York offices at 51-53 Maiden Lane, have favored us with their general catalogue for 1906-1907, which is a superb publication, printed on calendered paper, and with half-tones of the finest quality. A large assortment of Alarm Clocks is illustrated, with dimensions and prices; also "The American" Stem-Wind and Stem-Set Watch; their Trump Series of Clocks, under the names Superb, Majestic, Imperial, Premier, Peerless and Royal; their Art Series, as well as Traveling Clocks and Calendars; Elk, Harvester, Gleaner, Dutch, Windsor, Owl, Oxford, Balmoral, Potsdam, Tosca, Clare, Ormond, Vine, Gladys, Iole, Nymph, Cremona, Stelvis, Dore, Valois, Remo, Sienna, Pavia, Parma, Como, Reggio, Nice, Clermont, Calais, Colonial, Idylis, Pansy, Bourbon, Savoy, Louvre, Sylph, Venice and Vendome patterns of Clocks. A line of Porcelain Clocks is also shown. These goods are exceedingly artistic in design, and the catalogue will be found an interesting one.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Aberdeen, S. D.—H. E. Hoilien has leased the Lamont store building on Third Avenue West, lately vacated by Scott Fuller, and will begin business there with a complete stock of Hardware.

Alexandria, Va.—The State Corporation Commission has granted a charter to the Carlin-Hulfish Company, Incorporated, with the following officers: Worth Hulfish, president and treasurer; George B. Carlin, first vice-president; James F. Carlin, second vice-president; George W. Hulfish, secretary, and David N. Hulfish, assistant secretary. The capital stock of the company is \$100,000. The object is to do a general wholesale and retail Hardware business.

Bridgeport, Conn.—A certificate of incorporation of the Hardware and Supply Company has been filed. The amount of the authorized capital stock is \$10,000. The incorporators were Robert W. Curtis, Edward F. Leeds and Beatrice W. Leeds.

Columbus, Ohio.—E. M. Treat, Fred W. Crawford, J. M. Garrard, Carl Ludwig and Frank P. Hall have incorporated the Frank P. Hall Company, with a capital stock of \$15,000. The company will take over the Hardware business in High Street formerly owned by Leslie C. Mithoff. The majority of the incorporators are connected with the Ohio Fuel Supply Company, and Mr. Hall, who will be manager, has had long experience in the Hardware business.

Elba, Ala.—Edwards Hardware Co. has been incorporated. The company is capitalized at \$7,000, with the following incorporators: Mizell Mercantile Company, J. C. Parker, Morrow and Clark, John M. Garrett, E. G. Lindsey, O. A. Ellis, P. J. Ham, W. W. Ham, Jr., S. N. Rowe and Edwards and Edwards.

Fernie, B. C.—Keith Whimster has opened a new Hardware store.

Hammond, La.—The Hammond Hardware & Supply Co. has been chartered with a capital of \$25,000 by Dr. E. L. McGehee, B. L. Brooks and R. R. Brooks.

Knoxville, Tenn.—A six-story brick building is to be built on Asylum Avenue to be occupied by a new Hardware firm, styled House & Hasson, that is expected to start operations about the first of January. Walter M. Bonham, Charles Hasson and Sam House, all experienced Hardwaremen, will be members of the firm, which will be incorporated.

Little Falls, Wash.—G. O. Wade is opening a new stock of Hardware.

Monroe, Wash.—Thedinga Hardware Company has been incorporated with a capital of \$7,500, by Fred W. Thedinga, Edith I. Raven and Louise M. Thedinga.

New Bern, N. C.—The Cutler-Blades Hardware Company has been incorporated with \$50,000 total authorized capital stock. The incorporators are: W. B. Blades, L. H. Cutler, L. H. Cutler, Jr., and W. T. Jones, all of New Bern.

Omaha, Neb.—The new Paddock-Hawley Company, with a capital stock of \$700,-

000, has filed articles of incorporation. The company is authorized to do a general business in Hardware, iron and other merchandise, with the principal office in Omaha, and the privilege of establishing another in St. Louis. James E. Baum, D. A. Baum and F. Hawley are the incorporators.

Orange, N. J.—John N. Lindsley, No. 244 Main Street, has incorporated to deal in heavy and shelf Hardware, mill supplies, foundries, machine shops; capital, \$100,000. Incorporators: John N. Lindsley, Mary S. Lindsley, Isabel Lindsley, Cleveland Street; William F. Rockwell, Essex Avenue.

Pincher Station, B. C.—C. Kribs has erected a new store building and will open a Hardware store.

Providence, R. I.—Charles W. Aspinwall, Fred Kempt and Harry C. Brownell, have filed articles, incorporating the Aspinwall Hardware Company to do a general Hardware business, with capitalization of \$100,000.

Teton, Idaho.—The Marler Bros. Co. has been incorporated with a capital stock of \$25,000, to do a Hardware business.

Virgilina, Va.—Farmers' Hardware Company has been incorporated. R. S. Barbour, president, South Boston, Va.; W. T. Chandler, vice-president; J. B. Wilborn, secretary and treasurer, Virgilina, Va.; R. A. Lloyd, Virgilina, Va.; G. B. Royster, Virgilina, Va.

Wynnewood, I. T.—H. D. Knight and C. E. Kennedy have formed a partnership and will enter the Hardware business under the name of C. E. Kennedy & Co., and will open doors in the big three-story Fraternity Building in this place September 1.

Changes and Improvements.

Auburn, N. Y.—Post & Duncan, Hardware dealers, have dissolved partnership. The business will be conducted by John H. Post.

Bay City, Mich.—The Jennison Hardware Co. has leased the two stores adjoining its present location, which, together with the basement and four stories, will give them a total floor space of 20,000 square feet, rendering the establishment one of the largest in the State.

Beemer, Neb.—T. E. Rochford has purchased the Hardware store of E. H. Trucks.

Bellingham, Wash.—Hinsdale Hardware Company have amended articles to decrease their capital stock to \$15,000.

Blanket, Tex.—Bowden & Self have succeeded to the Hardware business of W. J. Bowden.

Bowling Green, Ky.—The Miller-Rogers Hardware Co. has succeeded Miller & Harris in the Hardware business at this place.

Cairo, Iowa.—The stock of Hardware formerly owned by the Sapp Hardware Co., has been purchased by the Rodenberry Hardware Co., and will be moved to their new building as soon as it is completed.

Cumberland, Md.—The well known wholesale Hardware firm of Wilson & Pugh will shortly commence the construction of a four-story building on George Street which will be in addition to the building on Union Street.

Dill, Okla.—Hatchett & Darnell have been succeeded in the Hardware and implement business by Davis & Darnell.

Fort Wayne, Ind.—Contractor Bernard Borkenstein has taken out a building permit for the erection of a new building on Pearl Street for Mossman, Yarnelle & Co. The price fixed in the permit is \$50,000. The building will be of brick with a frontage of 120 feet on Pearl Street and a depth of 150 feet. It will be four stories high and will be used as a place of business for the wholesale heavy Hardware firm.

Fremont, Ohio.—A change has been made in the Hardware firm of Shoupe & Tindall. James T. Weaver has bought out Mr. Shoupe.

Grand Rapids, Mich.—D. E. Lozier, the Hardware dealer at 683 Madison Avenue, has sold his business to Heth Brothers, operating a store at 931 South Division Street. B. M. Heth will be in active charge, while W. B. Heth will remain at the other store.

Greenwood, Neb.—Ed. Metcalf has succeeded to the Hardware business of Clegg & Metcalf.

Hillsboro, Kan.—Sall Bros. have purchased the Hardware business of Hilbert & Schraidt.

Holly, Colo.—T. H. Herman has sold his Hardware business to C. A. Pinkham.

Kamloops, B. C.—N. T. Dalgleish has purchased the Hardware store of T. H. Leeming.

Lancaster, Pa.—The partnership existing between C. R. Herr and B. H. Snively, trading under the firm name of Herr & Snively, dealers in Hardware, No. 7 East King Street, has been dissolved by the withdrawal of Mr. Snively. Mr. Herr will continue the business at the old stand.

Lincolnton, Kan.—Kieferle & Williams have purchased the Hardware store of William Dissmeyer.

Lisbon, Iowa.—A. & G. Runkle have sold their Hardware business to Louis Hoelje.

Los Angeles, Cal.—Ida Lebovich & Co. have sold their Hardware business to A. Zimbelman.

Newton, Kan.—Evans Bros. & Kinney have purchased the Hardware store of G. R. Follett & Co.

Ocilla, Ga.—The Ocilla Hardware Company has recently sold its stock to the Watt & Holmes Hardware Co. of that place.

Olpe, Kan.—Arnoldy & Diebolt have succeeded to the Hardware business of John Diebolt.

Pekin, Ill.—Hancock & Koerner, the Hardware and implement dealers on lower Court Street, find their business assuming such proportions that they are compelled to move from their present quarters to more commodious ones. With this end in view they have closed a lease on the Flynn building in the New Boston block and will move to their new rooms as soon as they have been thoroughly remodelled for their occupancy.

Plattsburgh, Neb.—Asemissen & Son have succeeded to the Hardware business of Asemissen & Loucks.

Rawlins, Wyo.—W. H. Wickham & Co. have sold their Hardware store to the Wyoming Supply Co.

Stanton, Neb.—G. Krenzin has purchased the Hardware business of Wagner Bros.

"ATLANTIC"

High-Grade Wash Boilers

TIN, COPPER and GALVANIZED IRON

Strongest and Best Made Boiler on the Market

Full Weights --- Full Sizes.

We are now making a flyer of our Special Copper Boiler---write for our special prices on it. Our new Seamless Cover is a marvel of lightness and strength.

"Atlantic" Galvanized Striped Ware

is among the highest grade goods offered to the trade. Made from smooth Galvanized sheets. Heavy wiring and wide seams make it strong and durable. Add it to your line, it is a great seller. New catalogue now on the press. Write for it.

Atlantic Stamping Co., Rochester, N. Y.
185 Ames Street.

Hight's Union Combination Square

All the Combinations available all the time.

Five Tools in one: 8-inch Try Square, Bovel, Butt Gauge, Marking Gauge and Mitre

If you want to keep your stock-up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.

If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices and full description sent on application.

The best tool of its kind on the market.

A. W. HIGHT, Box 39, Station B, Toledo, O.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Akron, Ohio.—Arrangements are being made for the organization of a company in this city for the manufacture of a patent wrench invented by J. R. Long of this city. The new company will likely be known as the Akron Wrench Company.

Brooklyn, N. Y.—James H. O'Brien Scale & Supply Co. has been incorporated for the purpose of manufacturing machinery, scales and weighing apparatus; capital, \$25,000. Incorporators, J. H. O'Brien, J. E. O'Donohue, J. D. Carroll, L. L. Hopp, J. F. Reilly, Brooklyn.

Campbell, Mo.—Campbell Handle Company has been incorporated; capital stock, \$3,000. Incorporators: W. B. Grant, L. Williams and L. D. Pollock.

Chappaqua, N. Y.—Acme Ball Bearing Scales Co. has been incorporated to manufacture and deal in Hardware and machinery; capital, \$10,000. Incorporators: George B. Mackay, No. 16 Nassau Street, New York; Ezra Rust, Saginaw, Mich.; Charles C. Sturtz, No. 327 Central Park West, New York.

Columbus, Ohio.—The John R. Long Wrench Co. has been incorporated. Capital is \$30,000. The incorporators are John R. Long, Walter R. Talbot, William A. Byrider, Oliver A. Sorrick and William W. Webb. All kinds of wrenches will be made.

Decatur, Ala.—Arantz Bros. are building a factory here for the manufacture of plow handles and for light saw works. They will also make brackets, etc. This company formerly owned and operated here one of the largest saw mills in this portion of the country.

Glen Falls, N. Y.—Glen Falls Mfg. Co. has been incorporated to manufacture snow shovels and mail boxes, etc.; capital, \$50,000. Incorporators: W. Irving Greffing, Glens Falls; Alfred C. Hodgman, Fort Edwary, N. Y.; Emmet T. Johnson, Glens Falls.

Greene, N. Y.—Ireland Machine & Foundry Co. has been incorporated to manufacture machines, tools, implements, etc.; capital, \$25,000. Incorporators: A. Burtzell Ireland, Frank L. Ireland, Herbert A. Ireland, Greene, N. Y., and others.

Honesdale, Pa.—White Ax Company has been incorporated. Capital stock, \$20,000.

New York, N. Y.—Brass Specialties Co. has been incorporated to manufacture lamps, candle holders, shades, etc.; capital, \$50,000. Incorporators: William H. Wadhams, No. 32 Liberty Street; Albert W. Putnam, No. 16 West 77th Street; Robert W. White, No. 18 Murray Street; Harry N. Wessel, No. 201 West 117th Street; M. L. Bishop, No. 32 Liberty Street.

New York, N. Y.—Buchanan Plow & Implement Co. has been incorporated to manufacture farming implements, machinery, etc.; capital, \$100,000. Incorporators: Edward F. Buchanan, Albert O. Brown, Lewis G. Young, No. 30 Broad Street, New York.

New York, N. Y.—Neptune Hardware

Mfg. Co. has been incorporated; capital, \$30,000. Directors—J. W. Bancroft, Julie C. Bancroft, West Brighton; J. G. Baumbach, New York.

New York, N. Y.—The Patent Ownership Co. has been incorporated for the purpose of manufacturing machinery, tools, devices used in manufacturing trades; capital, \$5,000. Incorporators: A. Mackay, Bath Beach; R. G. Mackay, Brooklyn; W. N. Thompson, New York City.

Norwalk, Conn.—The Dikeman Mfg. Co. has established a factory for the manufacture of mechanics' tools, screw machine products and specialties in sheet metal, either steel, brass or copper.

Pittsburgh, Pa.—A new corporation, known as the Pittsburgh Pneumatic Company, with a capital of \$250,000, has been formed with Pittsburgh men behind it and will shortly build and operate a large plant for the manufacture of pneumatic tools.

Pottsville, Pa.—The charter of the Pottsville Foundry and Stove Co. has been recorded. The new company will operate the old Derr Stove Foundry at East Norwegian and George Streets, and they have already taken hold of the concern and are improving it and putting it in shape for steady operation. The capital stock of the new company is \$25,000.

Providence, R. I.—John Hope, Jr., of Cranston, Henry S. Burlingame of Cranston, and Homer D. Packard, of Springfield, Mass., have applied for a charter for a company to be known as the Hope Lock Company. The company will engage in the manufacture and sale of locks, tools and other Hardware. The plant will be located in Providence. The company is capitalized for \$200,000.

West Seneca, N. Y.—The Shenandoah Steel Wire Company has been incorporated with a capital of \$1,500,000. The directors are: Arthur S. Kittle, John F. Carlton, New York; Wilbur F. Holt, Palisade, N. J.; William MacBain, Closter, N. J.; Robert N. Tomlins, Brooklyn.

Wheeling, W. Va.—Wheeling Nail Co. has been incorporated; capital, \$25,000. Incorporators: Edward W. Keating, W. W. Philbrook, G. R. Philbrook, Jones Coates, G. W. Hannah.

Changes and Improvements.

Ansonia, Conn.—The Ansonia Mfg. Co., makers of brass goods, is building an extensive addition to its plant. The structure will be two stories high, of steel and concrete construction, and its dimensions will be 50 by 200 feet.

Middletown, Conn.—The Wilcox, Crittenden Company, manufacturers of marine Hardware, have awarded to the H. Wales Lines Company of Meriden the contract for the erection of an additional factory. The structure will be of brick, four stories high, and its dimensions will be 60 by 100 feet. The building will be used as a machine shop, a grinding room and for storage purposes.

New Haven, Conn.—The Economy Mfg. Co. has begun the erection of a manufacturing building to be 100 by 200 feet and one story. It will be used for the manufacture of laundry tubs and concrete stone for the United States Military Academy at West Point.

Northville, Mich.—Northville has se-

cured a new industry in the Stimpson Scale & Mfg. Co. The factory comes here from Milan and will employ over 60 men at the outset. Mayor F. S. Harmon, president of the American Bell & Foundry Co., is president of the newly-organized concern. Attorney C. C. Yerkes is secretary and L. L. Brooks, vice-president. The company is capitalized at \$100,000.

Oneida, N. Y.—Mrs. Theodore Coles has disposed of her interest in Coles' Tool & Machine Company to James Backer and Willard Merrill. The business was established some years ago by the late Theodore Coles and conducted by him and Messrs. Backer and Merrill until his death. Since then it has been looked after by Mrs. Coles and the new proprietors, who are now sole owners of the growing business.

Pittsburgh, Pa.—The Shoenberger plant of the American Steel & Wire Company, at Penn Avenue and Fifteenth Street, will be moved to Neville Island. The Pennsylvania railroad has secured the property, and the lease expires next April. The company already owns about 100 acres on Neville Island, but is acquiring more for future use.

Southington, Conn.—The Atwater Mfg. Co., manufacturers of carriage makers' Hardware, wrought ox shoes and other specialties, is making extensive changes in its factory. The machine room will be moved from the first floor to the second and vacated space will be taken over for a finishing room.

Southington, Conn.—The Elmore Mfg. Co., manufacturers of small tools, has purchased the stock, tools and good will of the Schatz Hardware Mfg. Co., manufacturers of screw drivers, of Chappaqua, N. Y., and will manufacture the latter line at its factory in Southington.

Uniontown, Pa.—The enamel ware plant of the McCrum-Howell Company will be in operation by the middle of August, and will employ 400 men. It was built to replace the plant at Blairsville, which was destroyed by fire.

Waterbury, Conn.—The Noera Mfg. Co., manufacturers of Hardware specialties and bicycles and automobile sundries, has acquired the plant of the Rogers & Hamilton Co. This is now being overhauled and the Noera Co. expects to take possession in about a month. The new quarters will materially enlarge the company's manufacturing facilities.

Westport, Conn.—Willard S. Adams and William G. Staples have purchased the interests of the firm of G. W. Bradley's Sons, manufacturers of axes and edge tools. The old name will be retained by the new owners, who will continue the business on the old lines and as a partnership.

Worcester, Mass.—The Morgan Spring Co. has just completed the building and equipment of a new Japan department, which will increase the capacity of this branch of manufacturing about 300 per cent.

Wrightsville, Pa.—All the machinery and patterns of the Logan & Strobridge Iron Co., of New Brighton, which is a branch of the National Novelty Co., of New York, have been moved to this place and consolidated with the Wrightsville Hardware Co., which is also a branch of the National Novelty Corporation.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Baltimore, Md.—The Maryland Motor Association has been incorporated with \$1,000 capital for the purpose of holding motor-cycle and automobile race meets. Howard A. French, Howard W. Gill and Robert H. Carr are named in the papers.

Elizabeth, N. J.—The Elizabeth Motor and Cycle Co., with headquarters at 18 Julian Place, has been incorporated under New Jersey laws with a capital stock of \$2,000. As stated in the papers its object is to deal in and repair bicycles, motor-cycles, automobiles, and deal in supplies. Mortimer S. Ross, James S. Henderson and Ada H. Foote, all of Elizabeth, are named as incorporators. The corporation really takes over the business conducted for a number of years by Mr. Henderson himself and is in the nature of an enlargement.

New York, N. Y.—De Voll Tire Co. has been incorporated to manufacture tires for automobiles, bicycles, etc. Capital stock \$250,000. Incorporators: C. H. De Voll, New York City; H. S. Howland, Montclair; J. J. Halleran, Flushing.

Changes and Improvements.

Aurora, Ill.—A. B. Crosby has acquired the business of Frank Anderson and opened a new store at 12 River Street.

Easthampton, Mass.—J. M. Thompson, Cottage Street, has closed out.

Lincoln, Neb.—H. E. Sidles Cycles Co. have sold their bicycle department to J. A. Anderson & Co.

Milton, Wis.—E. S. Babcock & Son have sold their bicycle department to Carl Gray.

Rockford, Ill.—H. D. Ticknor has sold out to Lewis T. Theiss.

San Francisco, Cal.—A. G. Spaulding & Brother will rebuild their store for sporting goods at 134-36 Geary Street. They have filed an application for a \$17,500 building at that point.

San Francisco, Cal.—Ed Ladd is now located at Geary and Fillmore Streets and carries a large stock of sporting goods.

San Francisco, Cal.—The firm name of Clabrough, Golcher Co., has been changed

to Golcher Bros., and they are located at 513 Market Street. They are now very comfortably situated and should enjoy a very large business, as it is their intention to carry a large and up-to-date stock of sporting goods.

San Francisco, Cal.—The J. J. Pfister Knitting Co., whose business establishment and manufacturing plant were totally destroyed in the recent great fire of San Francisco, bought land in West Berkeley and have started to build a larger and more modern knitting plant. By October 1 they expect to be in a position to turn out their usual quality of all kinds of athletic goods, such as sweaters, jerseys, gymnasium suits and the celebrated Pfister supporter. Their present address is 398 McAllister Street, corner Polk.

San Francisco, Cal.—The Osborne Hardware & Tool Co. are now located at 517 Market Street and report that they are doing an extensive Hardware business. Up to the present time they claim they have not room to put in as complete a line of sporting goods and cutlery as they contemplate later on. In the very near future they hope to arrange a portion of the establishment into a fine, well equipped sporting goods department.

San Francisco, Cal.—The Shreve & Barber Co. are temporarily installed at 352 Fourth Avenue. Their line of guns, ammunition, fishing tackle and general sporting goods is being rapidly replenished and business being done is most satisfactory. This company are erecting a good-sized building on their former Market Street site which they expect to occupy within a short time.

Tonawanda, N. Y.—The Echo Bicycle and Motor Boat Co., whose plant was destroyed by fire some time ago, are making preparations to rebuild.

Burglaries.

Dayton, Ohio.—Burglars broke into H. F. Meyer's bicycle store on South Jefferson street recently and secured a dozen tires, a hammerless revolver and a large pair of field glasses, the loss being estimated at \$50.

Fires.

San Pedro, Cal.—Anderson cycle store; stock destroyed by fire; loss, \$500, no insurance.

Miscellaneous.

SOUTH AFRICA INCREASES TARIFF.

British South Africa, comprising the colonies of the Transvaal, Orange River, Cape Colony, Natal and southern Rhodesia, has passed a new tariff schedule, which already has gone into effect. The duty on bicycles has been increased from 12½ per cent. ad valorem to 15 per cent., and on motorcycles from 5 to 15 per cent.

INDIA AS A CYCLE MARKET.

The bicycle business is evidently a pretty safe investment in India. It is related by a member of the Lahore firm that starting ten years ago with four bicycles and twelve sewing machines, that his concern now maintains branch stores in eleven other cities in the Empire, has about 100 employees, issues a large catalogue and carries in stock upwards of 500 bicycles to say nothing of a volume of accessories.

In New York, as in other large cities where the man in the street no longer finds it necessary to dodge a procession of bicycles at each crossing and accordingly prattles about cycling being "dead," within the last month one of the big department stores disposed of 220 bicycles in two days. Of course, they were not high priced goods and also, as a matter of course, they were sold by a bold and magnetically worded advertisement, but, however disposed of, that such a large number of bicycles should be sold by one house in such a short time is sufficient to take the breath from not a few croakers who fancy that there is no demand for them.

HARDWARE DEALERS RECORD

(Continued.)

Sargent, Neb.—Strahle & Smith have been succeeded in the Hardware business by C. A. Strahle.

Seattle, Wash.—Theodore Wilts & Co. have succeeded to the Hardware business of Going, Northrop & Co.

Sodus, N. Y.—Adam F. Brier, who purchased the Hardware stock of G. H. Rogers, bankrupt, has opened the store for business.

Springfield, Mo.—J. B. Weaver and W. F. Hagenbush have purchased the business of the Weaver Hardware Co.

Springfield, Ore.—C. H. Pickett is removing his Hardware stock from Eugene.

HARDWARE DEALERS RECORD

(Continued.)

Burglaries.

Gervais, Ore.—Thieves entered the Hardware store of B. A. Nathman recently and stole an assortment of knives and razors valued at over \$30.

Racine, Wis.—The Hardware store of Krehl & Son, corner East Washington Avenue and Webster Street, has been robbed of pocket knives to the value of between \$50 and \$75.

Wilmington, Del.—The large store and warehouse of the Delaware Hardware Co., at the northwest corner of Second and Shipley Streets, was visited by burglars recently and robbed of money, stamps, cut-

lery, revolvers, etc., valued at between \$200 and \$300.

Swink, I. T.—Stark & Quick have been succeeded in the Hardware business by J. S. Quick.

Syracuse, N. Y.—The Hardware store of J. B. Foley & Co. is closed for inventory. It will be bought by the Burnhans & Black Company and may be run as a branch of the main store. J. W. Black said that his company would purchase the stock, but said there was no definite action as to the future of the Foley store.

Tacoma, Wash.—G. H. Smith has purchased the Hardware store of S. F. Kennedy.

Thornburg, Iowa.—Nutting & Francis have purchased the Hardware store of J.

H. Minor.

Vancouver, Wash.—Hayes & Henrichsen have consolidated their stores and will put in Hardware.

Villisca, Iowa.—Means & Wilson have sold their Hardware business to Means & Burnham.

Webb City, Mo.—The Franz Hardware Co. has succeeded to the business of the Franz-McCain Hardware Co.

Fires.

Bowie, Tex.—Warehouse of R. W. McDaniel, Hardware, has been destroyed. Loss covered by insurance.

Kalona, Iowa.—In a recent fire the Hardware store of Miller & Durst was destroyed.

STOWELL MFG. CO.
JERSEY CITY, N.J.

**WOULD YOU
BELIEVE A
MAN WHO TELLS
YOU THE MOON
IS MADE OF
GREEN CHEESE?**

OF COURSE NOT

NOR DO YOU
WANT TO BELIEVE
THE MEN WHO
TELL YOU THAT
ROOFINGS
MADE OF TAR
PITCH OR WATER-
PROOF COM-
POUNDS ARE
AS GOOD AS
ROOFINGS
MADE OF

**NATURAL
TRINIDAD
ASPHALT**

**Robert Murray.**

24 Duane St.,
New York City.

General Hardware

999

Agent for Atlantic Screw Works.
Wood Screws of Every Description.
Agent for Maynard's Socket Shovels.

The BICYCLE STEP LADDER.
Especially adapted for Hardware Stores.

Ask about the new **noiseless** track.
Highest award World's Fair.

WRITE US.

THE BICYCLE STEP LADDER CO.,
65 Randolph St., CHICAGO, ILL.

**Don't Steer**

Your business craft through untried channels in the clipper line.

It's dangerous. You hazard profits—repeat orders and last but not least—your business reputation—your most

precious asset.

Try the time-tested, loss-proof and customer-fetching

COATES CLIPPERS

We make all kinds of clippers for all kinds of hair.

For twenty-five years they have steered many a dealer straight to the goal of profits.

Try a sample order this Fall and see!

You ought to have our catalog and prices.

Coates Clipper Co., Worcester, Mass.

"Horse Sense"

Demands that the best calks are none too good for any horse—good, bad or indifferent—to prevent it from slipping on ice, pavements and roads.

The Best Calks

"Always Sharp"

are the best to buy—the best to sell—because:

**They Save the horse
They Save the shoe
They save over**

Fifty Per Cent.

in shoeing expenses.

Six sizes for horses weighing from 800-1800 pds.

If you have never sold "Always Sharp" Calks, try 'em this Fall. As quick sellers they will surprise you.

**THE
"Always Sharp" Calk Mfg. Co.
JERSEY CITY, N. J.**

Capewell Horse Nails Can Be Used Successfully in Hot and Dry Climates

THE CAPEWELL HORSE NAIL CO.,
Hartford, Conn.

Dear Sirs:--

I feel that I owe you a few words of praise for your first-class nails, as I have tried nearly all
kinds and find yours the only nail I can drive in **these hard feet of our western horses**
without bending the nail, or splitting the hoof, and best of all, every nail clinches without breaking
one of them. I consider your nail the best that money can buy.

Yours truly,
THE GREAT BEND IRON WORKS,
CHAS. TRITTEN, President

“I consider your nail the best that Money Can Buy.”

CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. Chopper
catalog.

Both feet rest firmly on the floor—no danger of upsetting bucket and wetting feet. *Pressure that wrings mop is from a spring, not from the foot.* Two springs, one on either side are independent of each other, pressure adjusts itself to any unevenness of mop—wings all of mop thoroughly.

Bucket is strong and extra braced. Rollers are solid maple and *never* stick. Attractively labeled—make good display in your store—sure to please customers.

Ask your jobber.

THE NETTLETON REVERSIBLE NIPPER

HARDWARE

The Census Bureau has issued a statement concerning manufactures of New York State for the last five years. During this period the number of manufacturing establishments has increased from 35,957 to 37,194, capitalized at \$2,031,459,515, an increase of 33 per cent. The employees number 954,992 and the factory products had an annual value of \$2,488,345,579. The principal industries are men and women's clothing, flour and grist mill products, foundry and machine shop products, malt liquors, and printing and publishing.

American harvests for this year will be the largest on record, according to the following estimates based on data of the Department of Agriculture: Winter wheat, 493,434,000 bushels; Spring wheat, 278,930,000 bushels, against 428,462,834 and 264,516,655 bushels, respectively, in 1905. The total corn crop for 1906 is estimated at 2,713,194,000, against 2,707,993,540 bushels last year.

The Union Metallic Cartridge Co., Bridgeport, Conn., have issued a number of lithographed hangers designed for the use of dealers in calling attention to ammunition stock during the hunting season. The hangers are attractively gotten up and brightly colored, and attract very favorable notice. Merchants need only drop a postal card to the advertising department of the company at 313 Broadway, New York, to receive a package of hangers suitable for complete window display.

Judge Edward Whitson, sitting in the United States District Court, has just handed down an opinion in the case of the Spaulding Manufacturing Company against the Inland Empire Retail Hardware Dealers' Association, making permanent pendente lite an injunction prohibiting the defendants from harassing the salesmen of the company. Edward W. Evenson and others of Spokane, connected with the association, have appealed to the United States Circuit Court of Appeals from the order and a bitter legal fight is looked for on both sides.

The Holley-Mason Hardware Company has received a draft of \$50,000 from the Title Guarantee Trust Company in full settlement of loss under bond furnished by the company to the contractors for the new building on Howard street and Railroad Avenue, Spokane. The company putting up the structure found it had bid too low and that much of the material was defective. It abandoned the building and went into bankruptcy. Since the paying of the bond the contract has been relet and the building is being pushed to completion.

The Chicago Implement Company will open a branch store and a big warehouse in Spokane the coming fall. The company's agent while in Spokane a few days ago announced that a site had been secured and that it is the intention to erect a one story building 50x100 feet to cost \$5,000, after which work on the store will begin. The company will put agents into the field in the Spokane district.

The American exports of agricultural implements for the fiscal year ended June 30 aggregated \$24,544,427, an increase of about 20 per cent. over 1905. Mowers and reapers constituted about one-half of this trade. The best customers of the United States for these goods for several years has been Argentine, to whom we sold last year \$5,963,714, Russia second with \$3,851,455, France \$2,895,243, and Germany \$2,016,894.

The American motor-car manufacturer is evidently going to invade Great Britain with a cheap car, states the *London Financial Times*. At the last Crystal Palace show the four-cylinder Ford car for \$500 was much talked of. Now the Pope Manufacturing Company is searching for a West End showroom.

A Pittsburgh man was recently killed when his automobile hit a railroad train. Experience will show automobilists that there are a few things that it is not safe to try to run over, and a railroad train is one of them.

NEW SYSTEM OF RAILWAY SIGNALING.

Consul Frank W. Mahin reports from Nottingham that the Great Western Railway has successfully experimented with and just installed on a branch line a method of audible signaling as a substitute for the familiar semaphore system which it is believed will be entirely displaced in course of time.

The new system is electrically worked and is declared to be simplicity itself. The engine as it travels along the line comes into contact with an apparatus, fixed to the track, which is worked from the signal box, and sets in motion a form of mechanism on the engine. Instead of the engineer having to look out for his signals, they declare themselves to his ear unmistakably. "Line clear" is expressed by the blowing of a whistle, which continues until the engineer with his own hand turns it off. Both bell and whistle are fixed inside the engine cab, close by the engineer as he stands to his lever, and should afford a more telling means of notification than a dial on which signs appeared. The substitution of audible for visible signals would relieve engineers of the strain of perpetually looking out for any particular signal or lamp. The apparatus is so constructed that if anything went wrong anywhere the whistle signal would operate. The chief value of the audible signals would be found in foggy weather and the new system is therefore of particular importance in a country so fog-afflicted as England is.

CIRCULAR SAW DRIVEN BY AIR.

Development of the use of air as a motive power is responsible for the invention of an exceedingly small and yet effective circular saw which is of such dimensions and weight that it is easily transported. Instead of requiring that the work should be carried to the saw, the saw, may be carried around to many different points in the course of the day and set up and operated wherever it is most convenient.

The saw is driven by a turbine, which in turn is propelled by the air. The turbine is supplied with thirty-five buckets, and the air from a compression plant is directed upon the buckets from three nozzles. This is sufficient to drive the turbine at the rate of 8000 revolutions a minute, but as this is far greater than is ordinarily required, it is reduced by gearing to 500 revolutions. This adjustment is entirely in the hands of the operator, and should the character of the work be such that it is desirable to have the full speed, it can be readily arranged.

The apparatus is fitted with a brake controlled by a convenient lever at the side, and this is applied automatically as the air is shut off. When the air is again turned on, the brake is automatically released. Another interesting feature of this piece of mechanism is that the saw may be removed and an emery wheel substituted.

COMMERCIAL EDUCATION IN AUSTRALASIA.

According to Consul F. W. Goding, of Newcastle, commercial education is interesting the people of Australia and New Zealand.

The New Zealand University has established a chair of commerce, and will give to successful candidates the degree of bachelor of commerce. Only matriculated students of the university are eligible. The final examinations are of a purely business character and consist of commercial law, statistical method, commercial French or German, accountancy, and two of the following: Actuarial mathematics, industrial law, economic history and currency and banking. The Sydney University has resolved to likewise take up commercial education.

HUMANITY AND MACHINERY.

Machinery is the cornerstone of modern society, the very foundation on which law, science, ethics, the arts, even the state itself, rests. It is so new that we do not yet know its poetry. We do not yet understand. Only two generations have lived beside the highway of steam; only one has seen the Bessemer converter transform the blacksmith into a master builder of ships and towers. The sewing machine, the far speaker, the typewriter are common things to-day, accepted as a matter of daily convenience, and yet are they teachers of the people. Machines that come close to our lives and homes insensibly teach truth, precision, the adjustment of universal laws to human needs, respect for that wise American idea that labor saved is labor released for higher and nobler toil. The machine is the head master of the high school of the race.—*Reader Magazine*.

SEPTEMBER 10, 1906

Editorial Trade Review

Trade this summer has been unusually good, establishing in many cases a record for sales. The conservative condition of prices, as advances have been only nominal, helped to some extent. Prevailing prices are strengthened by the continuance of the demand, and the confidence in the future manifested by the buyer. Advances have this season been made only when it was imperative to do so, and keep the percentage of cost intact. The trade this summer beyond a doubt has been the most encouraging one we have had for years on which to bank for the future. It has been pushed and extended beyond an ordinary conception, until without much assistance from any advance in prices the customary dullness of summer has not been known and felt by many of the dealers, while the usual vacations have been noticeably shortened by the imperative demands of the trade, which for August have been of a continuous nature.

There is considerable difficulty in filling orders, try as they will manufacturers fail to do it with apparently ample facilities; and the whole trade of the country are alive to the fact that a prosperous Fall trade may be looked for. The multitudinous sweep of orders from every section literally swamps the manufacturer, and he begins to realize the constant accessions to his order book is a condition, not a theory, that confronts him. The rule is not to send the orders back while there is a possibility of delivering within three months. Almost everybody has for a month or two felt that to get the goods delivered for this season's trade it will be necessary to get his order in, and the consequence is, orders have gone forward with commendable fullness until deliveries on specified dates begin to look problematic. The dealer, wise in his day and generation, will begin to worry about getting his goods with some degree of assurance, in order to do business this Fall, for the difficulties will undoubtedly increase as the days go by, and the impossibility of making deliveries is forced on the attention of

those in waiting. But notwithstanding the marked conditions, and the slowness of possible deliveries, there is visible no padding of orders with speculative qualities. The trade seems to be in a condition where they will experience the happiest feelings if they can only be sure of getting the actual estimate of their needs to make the season successful. The methods surrounding the Hardware business generally to-day are of such an improved character that we can scarcely realize it. We are more intimately connected with our trade than ever before, and the increase in mail orders and orders by telephone and telegraph give evidence of it. Business has got to be of such an insistent and hustling nature that the fear is that if the goods are wanted every effort must be made to obtain them, or the prestige of the house will be lost. So we telephone or telegraph where we formerly wrote.—and by the way, there is an awful amount of hurry pictured when a retailer takes the trouble and expense of telegraphing a jobber. If the jobber can only do it, the goods go at once.

GETTING READY TO BUY.

The traveling salesman is a great modern commercial institution; we could hardly do without him. But did it ever occur to you that he is offering the same lines of goods to other Hardware dealers that he displays to you, and that your greatest profit might be found in something that he did not have?

Don't wait for him to come around and tell you all about the new things on the market the same day that he tells the other fellow; get all the new ideas you can before he comes. Thrash around for yourself and sift out the new lines, the improvements, the claims their makers present, and the defects that may be present without being claimed. You will be all the better equipped to talk things over with the drummer when he comes; to get into those important little details that are so apt to be overlooked when first examining a new thing. You will buy the more intelligently, if you decide to buy at all, because you will have had more time to study into the limitations of the article.—what it will not do as well as what it will,—and weigh its adaptability to your particular trade. You will be saved many unwise purchases during the season and may, because of the exact time allowed for consideration, be self-persuaded into taking hold of something that would not impress you on a hasty examination but from its special local application, might be made a very profitable investment.

Watch the trade papers closely for announcements; and then, instead of sitting idly down and awaiting to hear what the traveling salesman has to say about it, get ahead of him and be the fellow to spend a few cents and time writing to the manufacturers for information. Inquire a little of some level-headed men to whom you sell goods. They will feel all the more your friend after you have consulted them and they may open your eyes to a latent demand for something that you did not know existed. Anyway it would bring out how the idea first struck the average user; what objections would most likely be advanced and whether they are genuine or not. Get all the ideas you can from both the manufacturers and your customers but do your own thinking and decide for yourself in the end. Then when the drummer comes along you will be prepared to hear what he has to say and to question him to the best advantage. He'll soon appreciate the fact that you are not to be played with and will lay himself out to give you his best facts and to give you facts only in the future.

Sometimes it pays to pack your grip and start out for yourself in search of something worthy of a special drive. Maybe your jobber has something of which he thinks so little that he does not take much trouble to get it out before the trade but it may just fit into a troublesome unfilled niche in your local business. More than one retailer has struck his Eldorado in the output of some cross-roads shop unknown to the trade. Many a local mechanic has a good thing that he is producing in a small way without appreciating his possible market or knowing how to reach it.

Opportunity in the Hardware business as well as elsewhere, has to be dug out, and frequently the man who does a little of his digging away from the beaten path will get the biggest tubers.

MAKING SUGGESTIONS.

To sell a man an article is one thing. To have him leave your store with the impression that you take a personal interest in having him get full value out of his purchase is even more important. The first means one sale; the last may mean many.

A man recently came into a Hardware store and purchased an unusually long rope for use in tackle-blocks. As a clerk was doing up the purchase the dealer came forward and after a few unimportant comments said:

"When you get home straighten the rope out upon the ground and, taking hold of one end, drag it some distance over the ground; then lay that down and take up the other end for a similar purpose. It will take the surplus twist out and will probably do away with most of the kinking that is so troublesome in using a new rope in pulleys. Another thing, before putting it into the pulleys at all, just draw a section of it back and forth through your hand a few times till you can determine which direction it feels smoothest; then thread it into the pulleys so it will be running through them the smooth way when the load is on. Rope has 'grain' and if it is so put up that the fibers are pressed down into place instead of being roughened, when the strain is on, it will last much longer."

The dealer fertile in labor and material saving suggestions and with fair tact in presenting them to customers without seeming obtrusive is sure to win the good will of his people and will find his extra efforts in their behalf more than repaid by their increased confidence in his advice and interest in one who shows so great an interest in themselves.

LOOK OVER YOUR CIRCULARS.

"That's the best little machine for my use that I ever got hold of," remarked a farmer to his dealer recently. "Why haven't you kept them before?"

"Because I did not know there was such a thing on the market," was the reply. "You see they are made by a little one-horse establishment about a hundred miles from here that nobody ever heard of. The fellow has been circularizing me for the last five years, I guess, and I have chucked his stuff into the stove unread. The last batch I examined by the merest accident, got interested and finally sent in a small order. I sold three machines at once and they have all proved highly satisfactory."

"It's a lesson to me to find out what every man wants to talk to me about before turning him down, whether he comes in an automobile or a buff envelope with a one-cent stamp on it. If he can afford to come at all I cannot afford to turn him under without giving him a hearing."

TRUE COMPETITION.

Lord Wellington when petitioned by his officers, before a desperate assault was undertaken, to take some less exposed position and permit a subordinate officer to lead the charge, replied: "Certainly, boys; any of you are welcome to ride before me—if you can," and put spurs to his horse.

His was the true spirit of competition; not the sort that takes delight in holding back or crippling a competitor or in competing with one who is not a worthy foe in equipment and natural ability; but the sort that wins the victory by doing something first, thinking something, being something worth while; the spirit of "Ride before me if you can ride as fast."

Competition of that sort is the kind that is the life of trade in its highest sense; the kind that builds up trade and all who are associated with it.

THE CLERK BEHIND YOUR COUNTER.

Have you ever realized how much the success of your store depends on your clerks? They sell your goods—or not. They boom your reputation—or cloud it. They please and extend your custom—or turn it away. They swell your profit sheet—or become a tax on you. They are either an integral part of your success—or thorns in your business flesh. What can you do to improve your clerks?

A great deal. You know that, after all, they are human plants who will surely improve under wise cultivation. Won't it pay better to develop them than be forever scolding or changing clerks, or "firing" them?

There is a way out of the difficulty—a difficult way for both employer and employee, but it is the surest way to success for both. Create in your clerks the desire to know not only the price, but also the merits and practical value of every article in your store. Knowledge of this kind is power. It fits him to sell goods intelligently, easily and profitably. Such intimate knowledge of everything in your store from cellar to garret gives him a bearing that makes friends of all our patrons who

naturally will turn to him because "he knows his business."

Such intimate knowledge of your store and its contents makes him a sure business-getter and business-builder, as well as a cheerful worker, and not only a comfort to all with whom he deals, but a strong factor in the prosperity of your business. Such knowledge, making him conscious of the power it gives him over every purchaser, will develop in him the spirit of trust, energy, order and high purpose, and his service to you will grow in value every day. He will become indispensable to you—indispensable to our customers.

To equip your clerks with knowledge necessary for the intelligent conduct of your business, collect and keep every catalogue or circular describing any goods, comprising your stock, in a catalogue cabinet for the ready reference of your clerks. Tell them it is their reference library, and as they have the actual articles in the store, they can learn both theoretically and practically the best points—the best selling points—of all your goods. It may take time to do this—your clerks may not always have time during the day to delve deeply into such a library of useful knowledge, collected for the good of the cause, but let the steady habit once be formed and it will stick. Let the knowledge once gained be applied to the work at hand and, if your clerk be aggressive at all, he will continue to amass this valuable knowledge and make use of it whenever opportunity offers.

In this he should receive every encouragement from his employer. Of course, such industry and desire to become more useful has its own reward; nevertheless, every employer seeing the extra efforts put forth on the part of his clerks to make themselves indispensable to him, should be encouraged by praise, by instruction, by co-operation, or perhaps by some remembrance on Christmas Day, or in some other substantial manner.

There is no use to let a new clerk blunder into "the tricks of the trade" or to learn from observation alone. Observation is a good teacher, but not all clerks in a Hardware store have their faculty of observation so trained that it will work automatically in every instance. He needs help. He should not be left to grope his way upward unaided. Frequently kindly counsel will not come amiss. Mistakes should be pointed out and their remedy suggested. Above all, every employer himself should be to his clerk a shining example of industry, intelligent effort and absolute honesty in all things. If he has the right stuff in him your clerk will certainly become one of whom you can be justly proud—a valuable assistant and, perhaps, a partner of great promise.

CASHING CHECKS.

It pays to be accommodating always, but there are times when it is well to first consider to which of two conflicting interests the courtesy of an accommodation is first due. The convenience of our customers and business associates should not be allowed to suffer seriously for the sake of complying with the promiscuous requests of strangers, or even of acquaintances with whose commercial standing we may be familiar but who are not customers in any sense of the word.

Country stores in particular, where banking facilities are meager or wanting, are apt to be bombarded with requests for the cashing of checks and the Hardware dealer comes in for his full share. Where the responsibility of all parties is well known there may be no objection in this so long as the dealer is careful not to let his stock of change run low enough to disturb his own transactions with his customers; such a course would not only inconvenience himself but would be robbing them of a courtesy to which they are first entitled in preference to a stranger.

It is not enough that more funds are expected in soon, either from some debtor or even from the bank. Wait till it comes. Something may delay it and one cannot do business on expectations. If the holder of the check is willing to wait until the expected funds arrive, then it is all right to cash it for him; if not, let him go elsewhere. Your first obligation is to the people who come in to buy goods and it is your first place to guard their convenience.

Make it a rule and stick to it to cash no checks that will reduce your cash on hand below some fixed point that business experience has shown you to be a safe margin. Some dealers fix this at a certain sum; others at a certain percentage of the average daily business done the week before. One dealer in a small country village in a thriving community recently told the writer he never dared get below \$50 in change. This figure would be ridiculously low for some dealers; for others it might represent the sum total of several days cash business. No fixed rule for all dealers would be possible, but each should fix one for himself from his personal knowledge of his own business and should then stand by that rule.

COMMERCE WITH CUBA IN THE FISCAL YEAR 1906.

Commerce of the United States with Cuba in the fiscal year just ended was greater than in any earlier year of the trade relations between the United States and that island. This is particularly true of exports. The imports from the island fell slightly below those of 1905, due to the fall in the price of sugar, but the exports to the islands were 25 per cent. greater than in 1905, 75 per cent. greater than in 1904, and about 120 per cent. greater than in 1903.

The growth in the exports to Cuba during recent years has been very rapid. The value of exports to that island had never reached the 20 million dollar line until the year 1893, when they were 24 millions. In 1894 they were 20 millions, then during the war period they dropped as low as 8¼ millions. but in 1900 again crossed the 20 million line, being in that year 26½ million dollars. In 1903 they again dropped to a little less than 22 millions, in 1904 27 millions, in 1905 38 millions, and in 1906, \$47,763,688.

In imports the gain is less strongly marked. Prior to 1895 the value of the imports into the United States from Cuba ranged in most years from 50 to 75 million dollars, being in 1874 85 millions, and in 1893 78 millions. The year 1905, however, made a record slightly higher than that of 1874, the total value of imports from Cuba in 1905 being \$89,304,259. In 1906, the fiscal year just ended, the value of imports into the island was \$84,979,831, a slight decrease as compared with 1905.

This fall in the value of imports from Cuba in 1906 was due solely to the fall in the price of sugar. The five articles forming the bulk of our imports from Cuba are sugar, tobacco, cigars and cigarettes, iron ore, and bananas. Of these, the most important by far is sugar, which amounted in value in 1906 to 60 million dollars, tobacco 13½ millions, cigars and cigarettes 4 millions, iron ore 2 millions, and bananas 1 million. Tobacco, cigars and cigarettes, and iron ore show an increase in the fiscal year 1906, and bananas show a reduction of less than half a million dollars, while sugar shows a reduction of over 4 million dollars in value in 1906, as compared with 1905. The quantity of sugar in 1906 was, however, more than 33 per cent. in excess of that in 1905, being 2,781,901,380 pounds and the value \$60,208,148, against 2,057,684,169 pounds, valued at \$64,366,104, imported from the island in 1905.

The principal articles forming the nearly 48 million dollars worth of merchandise exported to the island were iron and steel manufactures nearly 10 million dollars, against a little over 6 millions in 1905, flour over 3 million dollars, cattle about 2 millions, lard about 3 millions, other provisions about 3 millions, including milk valued at \$665,277, lumber about 2½ millions, boots and shoes a little less than 2 millions, cotton goods 1½ millions, cars and carriages 1½ millions, and corn 1¼ million dollars.

The increase in shipments to Cuba, while visible in many articles, occurs chiefly in manufactures of iron and steel, of which the total exports to the island were \$9,879,648 in 1906, against \$6,164,908 in 1905.

"THROUGH FRISCO'S FURNACE."

We are indebted to the Joseph Dixon Crucible Co., Jersey City, N. J., for the receipt of an artistic brochure gotten up in the interests of Dixon's Silica-Graphite Paint, as used in San Francisco on the steel work of high buildings in that ill-fated city. The brochure is of high grade, both as to paper and press work, illustrations and borders throughout. It shows views taken since the earthquake and consequent fire of ten of the important structures on which Dixon's Silica-Graphite Paint had been used, and the manner in which the paint preserved the maximum strength of steel work on high buildings in San Francisco is well shown in the reports and photographs of the buildings that are illustrated in its pages. "In the many articles published describing the widespread disaster and the stability of the steel-frame buildings the question of protected coatings for preserving the maximum strength of steel frames has not been given the attention its importance deserves. Observing this fact, and having an intimate knowledge of the weakening action of rust on steel, we have had examinations made to determine the condition of Dixon's Graphite Paint that was used on the steel work of high buildings in San Francisco." The book is embellished with artistic illustrations from photographs of the James Building, Robert Dalziel Building, Jos. Dixon Crucible Co's salesroom, 304 Market Street, both before and after the fire, the Wells-Fargo Express Building, the Whittell Building, Merchants' Exchange Building, Mutual Savings Bank Building and the Kohl Building. They present very graphically the appearance and condition of these several buildings after passing through the earthquake and

fire. They give a diagram of the comparative areas of America's great fires, forming the frontispiece to the book, in which is shown the San Francisco fire in 1906 is the record, surpassing in point of area largely the Chicago fire of 1871, the Boston fire in 1872 and the Baltimore fire in 1904 combined. This with the illustration of the manufacturing facilities afforded by their immense plant in Jersey City form the contents of the book, which is well worthy of being requested, if not already in receipt of the same.

VACATION TIME.

The practice of active business men giving to themselves and to their closely confined clerks, salesmen and office help, a vacation of from ten to thirty days, each year, when the days are the longest and the weather the hottest; and when, as a rule, business is the dulllest, is a good one, and one that is becoming more in favor year after year. The farmer and the farmer's boys, says the *Implement and Vehicle Journal*, look upon this practice of business men taking vacations as nothing more than one of the many "society" fads of city folks. They imagine, or a majority of country people do, that city life is but a continuous round of pleasure; that while those in the country are required to perform their daily duties beneath the direct rays of a burning sun, the city people are comfortably protected from sun and rain, and many of them favored with pleasant breezes from an electric fan, while they sit around in comfortable chairs, doing little else than telling stories, swapping jokes, and studying how they may manage to live off the toil of their country cousins; then for them to advocate the advantages to be derived from an "outing," or ten to thirty days vacation from their pleasurable surroundings, is the height of foolishness and purely a "society" fad. The busy business man of the city, and his employes, know how unjust are the farmer's criticisms on the summer vacation custom. Those favored sons of toil—the farmer and his boys, and we may also include his wife and daughters—are as unconscious of their superior blessings to those bestowed on city people as they are ignorant of the nerve racking strain to which the busy business man, and his faithful employes are daily subjected. The wonder is that sickness, disease and death do not prevail to a greater extent among city people. To be housed between four walls, day after day, breathing an atmosphere pregnant with all sorts of poisonous microbic substances, while the form is bent over desks and the brain working with the rapidity of a fly-wheel to an engine with its steam chest taxed to the utmost in an effort to solve a perplexing business problem, casting up column after column of figures, and the clicking sounds of a type-machine, causing added pain to the aching head, is something more taxing to the mental and physical organism than is possible for our country cousins to realize without being themselves subjected to these same environments, when they would then realize that to be a busy business, or professional man in a busy city, is not one continuous round of pleasure, and that the vacation custom is no "society" fad. The vacation habit should be encouraged. Even a few days, if no more than a week's rest from the daily duties of a business or professional calling—a change of scenery, diet, and the inhaling of an atmosphere not poisoned with the fumes, dust, dirt and smoke of a manufacturing city or trade centre, is essential to health, and the time and money spent in this way is sure to prove a good investment. Our belief is that more business of a successful nature can be performed within eleven months of close attention to business affairs, and one month devoted to rest and out-of-door pleasures, than can be performed by the same individual confining himself or herself to the rotation of daily duties, continuously, through the twelve months. Take your vacations with regularity, each year, and you will live longer, enjoy life better, and accomplish more than is possible for you by not doing so. Henry Ward Beecher said: "It is not work that kills men; it is worry." Work is healthy; you can hardly put more upon a man than he can bear. It is not the revolution that destroys the machinery, but the friction and worry connected with the running of every business, however small it may be, no one will deny. No business man can refrain from thinking and worrying about his business while attending to his business, and he should set apart a few days—a month, if possible—each year to be spent in complete rest from his business. And the business man who has not given his body and mind a vacation—a rest from his daily pursuits, owes it to himself to do so.

Merit always has its reward. A trade paper writer of the West who has been very busy telling about the great prosperity of that section is now getting his. The landlord has raised the rent on him.

PRIZES AND PREMIUMS OFFERED BY PIKE MFG. CO.

An important and interesting announcement to Hardware jobbing salesmen and retail merchants appears in the advertising section. The prize and premium offer made by the Pike Mfg. Co., Pike, N. H., reflects more than ordinary credit upon the enterprise of this well known concern. We anticipate a successful selling campaign emanating from this idea. The business of the Pike Mfg. Co. was begun in a small way in 1823 with the crude manufacture of scythe stones. The product was peddled about the surrounding country and Canada, and even sent down the Connecticut river to New York. With each succeeding year came larger sales, so that the primitive mill

To overcome the conditions existing, namely, that sharpening stones were not being sold as extensively as they could be sold were they properly displayed and intelligently handled by the dealers, the Pike Selling Assortments were put on the market, the idea being to display in convenient sized cabinets an attractive line of guaranteed sharpening stones bearing descriptive matter showing the purposes for which best adapted, and giving instructions for care and use. That this idea is a successful one is best evidenced by the enthusiastic reception of the cabinets by the jobbers and retail merchants, and the fact that largely increased sharpening stone sales are reported. It is a well

AN ASSORTMENT OF SHARPENING STONES.

became inadequate to supply the growing demand and one brand of scythe stones was not sufficient. The necessity of this increasing business gradually brought about new scythe stone brands and better facilities for manufacture. Other lines were taken on from time to time thus enlarging the scope of the business to finally include the manufacture of sharpening material for

known fact that previous to the advent of the selling cabinet not one sharpening stone was sold where ten would be sold were a retail merchant properly equipped with well balanced stocks from which the consumer might make a selection, and also on account of the fact that the majority of merchants did not make a proper display of the stock they did have, nor could they intelligently impart information to the prospective buyer. These were the conditions to be overcome by the selling assortments. The retail merchant is now in a position to reap the benefit of largely increased sales and profits, and likewise know that he is satisfactorily supplying his trade.

One of the new methods evolved from the selling assortment idea is the supplying of oilstone stock by the dozen put up in individual cartons, and then in one dozen and half dozen packages, in place of supplying this stock on the pound basis and in less convenient packages. The idea in making the prize and

every purpose, with industrial departments at Pike, N. H., Littleton, N. H., Evansville, Vt., Orleans, Ind., and Hot Springs, Ark., together with a branch at New York, and agencies in London, Glasgow, Paris and Hamburg. During the past twelve years, during which time E. B. Pike as president has been the directing hand, the business has shown the larger increase. The in-

COVERFAST OILSTONE BOX.

crease alone in business for the year ending June 30, 1906, over the year ending June 30, 1905, is equal to the entire volume of business being done at the time Mr. Pike took the presidency, a remarkable record and one that reflects great credit on the ability of Mr. Pike, a man of strong personality, great resourcefulness and originality.

STONOL.

premium offer is to bring about a harmonious cooperation on the part of jobbing houses and the retail merchants in supplying trade with a proven medium of increasing sharpening stone sales.

In connection with the prizes and premium offer there also appears an announcement by this same concern, regarding its line of corundum wheels. With their customary enterprise the

Pike Mfg. Co. have spared neither time nor money in putting on the market a superior line of this manufacture. Several years were spent in experimental work to ascertain the best material and processes, and to develop this branch of the business so that it would be on a par with the parent sharpening stone industry. A superior line of corundum and emery wheels are now on the market and giving excellent satisfaction to a rapidly increasing patronage. A handsome new catalogue covering this line has just been issued and will be sent upon request.

Among the specialties recently introduced may be mentioned Stonoil. Owing to the constant demand for an oil especially prepared for sharpening stones considerable experimental work was done to develop the most satisfactory oil for the purpose. Besides being adapted for oilstones and razor hones, it was found that Stonoil was particularly successful in other lines, such as for use on guns, clocks, locks, typewriters, and other articles requiring an ultra-fine lubricant. It is further a rust preventive, cleaner, and polisher.

Also may be mentioned the Coverfast oilstone box, the idea being that the cutting qualities of an oil stone are greatly enhanced by the stone being kept clean and the oil moistened. The Coverfast consists of a solid hard wood box which cannot warp and a strong metal cover fastened by a pivot hinge which can be turned under the box instantly. The inside of the cover contains a thick felt pad which absorbs surplus oil and keeps the stone moist and clean and makes the cover practically air tight when closed.

We might speak of the policy of the Pike Mfg. Co., in only putting on the market such goods as will give satisfaction. We understand that the packers are instructed not to pack anything for shipment that is not good, or is such that they would not be willing to buy or make use of themselves. We further understand that quantities of good appearing sharpening stones, because of some slight defects, are thrown away. It is not strange in face of this that a successful business has been built up by the unremitting efforts of so many years, and a reputation so established is not liable to be jeopardized by lending itself to goods of inferior merit.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

VALIDITY OF WILL.

QUESTION: Mr. D. Gray made a will in 1893, at the time he was in the machine business, he willed to his wife at his death, all his property, real and personal, during her natural life. She was not to be responsible to anyone, for any disposition she choose to make, except Gray suggested, but did not commend that she dispose of all the real and personal property, not including the residence and household furniture, but all stocks, notes, bonds and judgments and invest them in first mortgage realty, and should the proceeds not be sufficient, for her comfortable support, then she is to sell such securities as are most available in her judgment for her comfortable maintenance. She is not to be accountable to anyone in anyway whatsoever, in thus disposing of said mortgages. At her death what remains of said estate, is to go to his only child, the daughter, this daughter has been married eight years, and as yet has not had any issue. Should the daughter die without child or children, he has willed that his residence be equally divided between his two nieces, daughters of an only sister. Four years ago his wife died, the daughter is to have the same use of the residence, as the mother had at his death. Mr. Gray has sold out his business since his wife's death, and he is desirous of having your opinion of the validity of his will.

REPLY: In view of the new situation created by the death of Mr. Gray's wife, it is evident that most of the provisions of the old will are inapplicable to the present state of facts. Assuming, therefore, that Mr. Gray is in all respects competent to make a will, we should emphatically advise preparing a complete new will, making whatever disposition of property the testator deems advisable among those who are now to be the objects of his bounty. So many close questions may be involved and important property rights affected by the construction of a will, that we cannot prudently undertake to pass on the general validity or invalidity of a will or any testamentary provision without reading the precise language of the entire document. If you

will submit a copy of Mr. Gray's will, we shall be pleased to give our opinion as to the validity of the entire will, or any clause thereof.

AGREEMENT NOT TO SOLICIT BUSINESS ENFORCED BY INJUNCTION.

QUESTION: We employed a driver on our route by contract in writing, in which he agreed not to solicit business from our customers, or deliver goods to them within three years after leaving our employ. It was also agreed that he might be discharged on one week's notice. Afterwards we gave him the notice required and discharged him, and he has now entered the employment of one of our competitors and is soliciting business from our customers on his old route. Can we prevent this?

REPLY: We think you are entitled to an injunction restraining your former employee from soliciting business in violation of his contract. It was a perfectly proper condition for you to impose that your employee should not, after becoming acquainted with your customers, leave your employ and solicit business for another in competition with you. As we understand your statement, he has had the benefit of the contract and you have not violated it. We are of opinion that the case is clearly a proper one for an injunction.

FREE HOSPITAL NOT LIABLE FOR SURGEON'S NEGLIGENCE.

QUESTION: "A" breaks his leg and goes to a free hospital for treatment. The leg is carelessly set by the surgeon and is two inches shortened in consequence. Can "A" recover damages from the hospital for this misfortune?

REPLY: If the hospital is a charitable institution, supported in whole or part by public benevolence, we think that "A" cannot recover anything against it. The rule laid down in the great majority of the States is that a public charitable institution is not responsible, even for the carelessness or negligence of its subordinates and employees, except perhaps in cases where the directors or managers have themselves been careless or negligent in the selection of their subordinates. The ordinary rule is that a master is liable for the negligence of his servant or agent because when he employs him, he expects to derive profit from the employment. But a free hospital does not derive profit from the employment of its surgeons; and to hold it liable for their carelessness would be to divert its revenue from the objects for which they were donated. It follows that the hospital is not liable, except for the omission to give the care to the selection of its surgeons; and if such care was given, no recovery can be had against it for the surgeon's negligence.

ABSOLUTE DEED MAY BE SHOWN TO BE A MORTGAGE.

QUESTION: John Smith borrowed \$500 of Thomas Jones, on the security of a piece of land. Instead of a mortgage, an absolute deed of the land from Smith to Jones was drawn up. But it was orally understood that the deed was given simply as security. Can Jones treat the land as his and refuse to deed it back, if the \$500 with interest is offered to him?

REPLY: The rule is generally established, and clearly so in the State of New York, that a deed which is absolute on its face, may be shown by oral evidence to have been intended as a mortgage. While this rule is settled, it is also established that a person who has signed a deed absolute on its face, but who seeks to show by oral evidence that it was intended simply as a mortgage, must prove his case by clear and satisfactory evidence. If Smith can prove clearly that the deed he signed was intended simply as a security for the repayment of \$500 borrowed by him, a Court of Equity will give effect to the substantial intention of the parties by compelling Jones, on payment of the debt and interest, to deed back the property.

EXCLUSIVE AGENCIES DESIRED FOR THE "ROYAL BLUE."

H. F. Brammer Mfg. Co., Davenport, Iowa, have been advertising largely in the trade papers the desirability of handling their Royal Blue Washing Machine on the exclusive agency plan, by the aid of which they confine the sale of the machine to a single merchant in a town, enabling him to derive all the advantages of their advertising, they giving that form of publicity unusually close attention. In the cities and towns where the Washer has not been handled the company will be glad to hear from the dealers who are desirous of establishing this connection. The success which the Royal Blue Machine has met wherever introduced, and the fact that it is made by expert mechanics from superior materials, and that it is a handsome and well-finished Washer has had its effect, and the agency is made very profitable to the dealer. Among other special features, attention is called to the small number of castings which constitute the gearing, and the ease with which any broken part can be replaced.

CONGESTION OF SHELF ROOM AVOIDED

Most Hardware stores in the land look crowded. In some, the goods are placed in chaotic condition so that a customer on entering the store, is almost overwhelmed by the idea that he will surely stumble and fall over something to get next to the thing he wants. This condition of affairs could easily be reme-

are used, the same number are needed, but without standards.

Some merchants have the top shelf wider than those below. This seems necessary for the storage of articles requiring a wider shelf than those under it. Some Hardware dealers want their shelves closer or farther apart at one end, or in the middle

died by studying the conditions—then applying the remedy.

One of the ways of improving and enlarging the size of your store for all time is found in Baines' Improved Brackets, adjustable and fixed, or stationary. They form a new and complete system of shelving that is adapted to all kinds of business, and to every position wherever a shelf or shelves are needed in store rooms or dwellings.

BAINES IMPROVED BRACKETS.

This improved system has many and great advantages over old methods, some of which we point out: First, the shelves are free from obstructions from props among, or in front of the goods, forming a clear, continuous line the entire length of the shelf section, just what is needed for the proper arrangement and best display of Hardware. To properly arrange a Hardware store for the best display of its goods, a straight, continuous, unobstructed shelf is an absolute necessity, and this can only be obtained by the use of brackets for the shelf supports. The shelves can be placed closer or further apart at either or both ends, or in the middle of a shelf section, without using extra standard bars; the right number of brackets only are required.

A second and most important advantage is the large gain in shelf room. This gain is estimated by those who have used both the old and new shelving, to be from twenty to thirty per cent. Bear this item in mind when counting or estimating cost of bracket shelving. The gain of shelf room is practically an enlargement of the entire room for business purposes, and also gives it a better, neater appearance.

TO FIND THE NUMBER OF STANDARDS AND BRACKETS REQUIRED TO FURNISH A ROOM OF ANY SIZE.

Divide the length of the shelf line by the distance you intend to place the brackets apart, and add one to each separate section of shelves as a "starter." Example:—A section of shelves 48 feet long, brackets 4 feet apart, requires 13 brackets for each shelf; 4 shelves high, 52 brackets, and 13 rows of wall bars made up of 2x2 ft. section. If base shelf or drawers are supported with brackets, 13 half-section standards and brackets the proper length for base shelf are required. If the stationary brackets

of one side of a room. To find the right number of brackets needed in such cases, a diagram should be made, locating every bracket. If the adjustable brackets are used, no extra standards will be needed; extra brackets only.

If you have any difficulty in making the estimates of brackets and wall bars required for your room, if you will give us the length and height of your shelving, and the width and number of shelves, we will make the estimates for you.

THREE SECTIONS OF SHELVING.

Divide section No. 1, 20 feet long by 4 feet, the distance the brackets are to be placed apart, and adding one as a starter, gives 6 brackets for each shelf 20 feet long; 4 shelves high would require 4x6=24 brackets. As 4 shelves require 4 feet of wall bars and as each section of wall bar is only 2 feet it would take 6x2=12 sections of two-foot wall bars. The other sections are estimated in the same manner.

If you are crowded for room don't build a larger store—don't move—but try Baines' Improved Brackets, made by the Piqua Bracket Co., Piqua, Ohio.

GEORGE W. PITKIN CO.'S IMPROVED PLANT.

George W. Pitkin Co., Chicago, Ill., have succeeded in rebuilding their extensive plant, which was destroyed by fire on April 10th. The fire, which was a disastrous one, entirely destroyed every vestige of their works, rendering it necessary for the company to immediately equip a complete temporary factory until they could rebuild. New plans were drawn, which gave them greatly enlarged capacity and modern equipment in every respect, and efficiency has been the first consideration throughout. Therefore they have installed electric power with a large number of individual motors to supplant steam power. All of the mills and other machinery are of the most modern make. The general offices, vaults, chemical and testing laboratories have this time been located in a separate building immediately south of the main plant. In fact, the company feel justified in saying their new plant will be surpassed by none in every facility for manufacturing and marketing a complete line of first-quality paints.

ESSENTIALS OF GOOD SALESMANSHIP.

Salesmanship is a topic that has been pretty thoroughly discussed in all its phases, and there is very little, perhaps, left to be said. With the increase of competition, however, and the narrowing of profit margins, the question is always a vital one and worthy of any thoughts that may be devoted to it. While there is undoubtedly much ability and business acumen needed in making a successful buyer, there is an equal amount of tact and shrewdness necessary in the making of a good salesman. Goods rarely sell themselves, especially sporting goods, and we know that without good salesmanship the money will not come in and the end of the year will not show results.

Recently there appeared in an issue of the *Value World* an article on the subject of salesmanship possessing merit that warrants reproduction. It was intended mainly for the traveling salesman, but the points are likewise applicable to the man in the retail store. In part, it is as follows: Nowadays we know that unless the buyer gains through the transaction, he will not again be a purchaser. If the seller is obviously disposing of his goods at a loss, the suspicions of the buyer are at once aroused. Anybody can give things away; a salesman is one who can not only sell goods at a fair profit, but who can make regular customers for his house. The day for the torrent-of-words salesman, whose life and talk smack of the frontier, is gone. Occasionally a survivor of the old type is found who is unquestionably successful. He succeeds, not because of his uncouth methods, but in spite of them. We pity him, and wonder how much more he could accomplish were he to adopt modern methods. He is like the peasant who still uses a crooked stick for a plow. The successful salesman of to-day is a man whose methods and point of view are in accord with the high requirements placed upon a man by the community with whom he deals. He must be a man of judgment and intelligence. He must be a man of decency, for he deals with decent people. He must be honest and frank, for these are qualities which men of character demand of those with whom they associate. The salesman must have good health, without which his mind will not be alert, and the man himself will be nervous and crabbed.

The salesman must be an enthusiast, not in the emotional sense, but he must know he has a meritorious article, and be eager for others to appreciate its excellence. This is the enthusiasm of conviction. Then the salesman must be aggressive, looking upon obstacles and rebuffs as opportunities given him to show the stuff that he is made of; in other words, he must be a man of mental vigor and courage. He must keep awake. This is not a time for Rip Van Winkles. This is an age of hustle, but hustle does not mean merely high speed. Hustle means constantly keeping going toward a definite object, saving minutes and words. Mere bustling around accomplishes nothing and brings ridicule. "No knocking of competitors' goods," should be the motto of every salesman who hopes to succeed, for the world despises a knocker and it is at once disposed to be unfriendly to him. This does not mean that a salesman should not compare his goods, as to quality, price, etc., with those of his competitor, but it does mean that he will do so, if at all, fairly and squarely. One of the fine things that comes into the life of a salesman who is not only a man of character, but a man of pleasing address and an attractive personality, is the friendship he forms with the best men with whom in his work he comes in contact. Many are the profitable and pleasant hours he spends with such companions. And it is out of such friendships that happiness is gained, for it is human nature for us to assist our friends. The salesman can never meet with a large measure of success until he knows men—until he can read character, understand and sympathize with men. No two men can be approached in exactly the same way. It is certainly a wise provision of nature that we intuitively adapt our speech and manner to those with whom we are brought in contact, unless we deliberately make an effort to treat all comers alike. Here arises the question of the value of set speeches in presenting goods, a method of salesmanship which probably had its origin in the subscription-book business. The average book salesman memorizes a little story and recites it to any one who will listen. Yet in presenting a complicated article this method has the merit of affording a means of concisely and succinctly giving full information. But it does not in any way relieve the salesman of the necessity of having an intimate knowledge of the goods he is pushing.

That the salesman should be able to present reasons as to cost, durability, etc., why his article should be bought, goes without saying, yet the relative importance of these reasons depends entirely upon the customer and his object in making a purchase. To one man price is no object. To another price is the prime object, quality being of secondary consideration. As a general

statement the world wants reasons, and wants them presented logically and pointedly. Many salesmen are much more familiar with the intrinsic merits of the article they are pushing than with the uses to which it may be put—a decidedly important feature in that such knowledge frequently enables the salesman to suggest economies which would be made possible through the use of his article. That these requirements are more or less ideal, is freely admitted, but they are the direction in which the salesman should endeavor to grow; and there is just the pith of the matter, for by intelligent endeavor a man can make himself almost what he wills. Of course, he can not make himself grow tall or short, or have black instead of blue eyes, but our physical appearance, which is largely beyond our control, unless bearing the tell-tale marks of dissipation, plays a small part in our life compared with the leading roles taken by those qualities over which our will has dominion.

There are four steps through which the mind of the purchaser must be led. First his attention must be gained. There is no use talking to a man who is intent on something across the street or who is in the midst of a newspaper article which he goes on reading. The attention accorded depends largely upon the personal appearance and manner in which the salesman presents himself. Here is where character, the ability to look a man square in the face and gain his recognition play an important part. After the attention is gained, the customer must be interested in the subject matter of the proposed sale. Usually a man is most interested when shown that he can profit by making a purchase. After his interest is aroused, the next step is by arguments adapted to the particular case to lead him to desire to possess the article, the merits of which are being presented. Then he must be able to make up his own mind, to decide and to say that he will purchase. Now, advertising, or "salesmanship-on-paper," may be used with the idea of carrying the mind of a prospective customer through all these four stages. Above all, the salesman should know what statements are being made in regard to them, for ignorance in regard to such matters puts the salesman in a bad light and tends to weaken the respect which a customer should have for him and his firm. These are sound principles and should be of much value to anyone who sells goods, be he a traveling salesman selling the retailer, or a clerk in a retail store. In this day and age the salesman must know his business.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED AUGUST 27, 1906.

- 409,947. IRONING BOARD AND TABLE. D. Fettes, Baltimore, Md.
- 409,961. PNEUMATIC DOOR CHECK. T. Goodenough, Woodside, N. Y.
- 409,989. TOOL HANDLE. N. Linsley, Freeport, Ill.
- 410,024. PADLOCK. A. Richards, Sr., Willis, Tex.
- 410,074. LIFTING JACK. L. J. Crocellus, St. Louis, Mo.
- 410,084. SOLDERING IRON. J. H. Ferns, Montreal, Quebec, Can.
- 410,103. CHURN. P. Kallen, Fort Wayne, Ind.
- 410,109. WASHING MACHINE. J. P. Kinisley, Adrian, Mo.

PATENTS ISSUED AUGUST 28, 1906.

- 829,398. LOCK. J. A. Giese, Chicago, Ill.
- 829,407. NUT LOCK. W. H. Long, Howard, Pa.
- 829,408. STOVE. W. H. Lutz, Knoxville, Tenn.
- 829,612. WRENCH. E. Vuillemot, Birch Run, Mich.
- 829,616. LOCK. M. G. Wood, London, Eng.
- 829,672. WRENCH. G. W. Rowell, Portales, N. Mex.

+

Consul-General Guenther, of Frankford, writes that M. Germain, a French chemist, has patented a process for rendering celluloid proof against fire. This result is obtained by adding to a celluloid mass in course of preparation, when at the highest point of liquidity, a certain quantity of salts—phosphates, bicarbonate of ammonia, or magnesia. Celluloid thus prepared, when touched by fire or a flame, gives forth a gas that checks combustion. Immersion of celluloid in a solution of any of the above-named salts reduces its inflammability.

PUMPS IN THE HARDWARE TRADE.

There is an opportunity for the Hardware trade to do a much larger and more profitable business in Pumps than is the case at the present time. In most sections the Hardware store is the natural source of supply for this line, and the general run of merchants carry a small stock, at least of cheaper grades, which can be sold like a pail or a washtub when anybody calls for them. The opportunity referred to, however, does not lie in desultory business of this kind, and the line is one which will amply repay more active, intelligent and thorough attention.

BY SECURING THE AGENCY

in his locality for a reputable and comprehensive line of Pumps, studying their features, advertising their merits, giving proper attention to installment, fittings, etc., and educating his customers to avoid cheap makeshifts and buy high grade Pumps adapted to the work required of them, a merchant cannot only establish a good volume of business in this line, but can make it pay as large a percentage of profit as any goods he carries.

MANUFACTURERS ARE WILLING

and anxious to co-operate with the trade. Many of them, especially those who have entered the field within recent years, have found great difficulty in securing efficient representation with the consumer. Oftentimes they have been forced to resort to agents of unsatisfactory business caliber and would welcome an arrangement by which they could confine their output to the responsible Hardware merchants. Some manufacturers already have many retailers on their books who represent them exclusively in their locality. These arrangements are commonly satisfactory, as will be clear from the extracts from letters of large manufacturers given below. Indeed, the letters show that most manufacturers would be only too glad to increase the number of their Hardware representatives and will cheerfully accord them such protection as will preclude a competitor from coming in and sharing the profits of their introductory labors. A few concerns, however, notably those who have been identified with the Pump business for many years and whose product is widely and favorably known, regard it as better policy for them not to confine their line to one local merchant, believing that they may reasonably expect a share of the business of all.

SOME DIFFICULTIES ARE ENCOUNTERED

by the Pump makers in connection with marketing their product through the Hardware trade. These considerations, however, are such that attention has only to be directed to them to demonstrate both the justice of the manufacturers' demands and the ease with which they may be met by the merchant with concomitant advantage to himself. The principal and, indeed, the fundamental difficulties arise from the retailer's tendency, deplored by all students of Hardware merchandising, to do all his business inside the store. Pumps are only one of a number of profitable lines which to be handled successfully require that the Hardwareman or his capable representative should get out from behind the counter and circulate among his customers. Other lines in this category include Implements, Farm Machinery, Wire and Iron Fencing, Paints, Sewing Machines, etc. The benefits of doing outside work on any one of these lines will accrue to the advantage of the other lines, as well as benefit the merchant's general trade. Only by keeping in touch with present or prospective customers can the merchant keep posted as to their immediate or future requirements and become a successful bidder for the more considerable orders to be placed in the local market.—*The Iron Age.*

NERNST LAMPS.

In these days of vast engineering undertakings probably none has presented more difficulties, or been more interesting to the architect and engineer, than the design of the New York Terminal with its tunnels, for the New York, Pennsylvania and Long Island Railroad.

This building is of such magnitude that it can easily accommodate a traveling population equivalent to a large city, and it is obvious that the equipment for the various services required, independent of the transportation question, should present many interesting problems, not the least being the choice of an economical lighting service.

The unusual proportions of the rooms to be lighted, the long hours of burning and the continuity of the service, made it necessary to investigate all systems thoroughly and impartially, to tabulate the results and then select the system that approached nearest to the specific requirements.

After a careful and exhaustive study of all commercial systems, the engineers have decided to use the Nernst Lamp.

The characteristics of this lamp are admirably adapted to fill the requirements of illuminating such a building, on account of the graded units of the lamp, giving uniformity of color; the color quality of the light; its steadiness; its distribution and its economy in maintenance and operation.

The last two items are very carefully scrutinized by a railroad corporation, and other things being equal, they usually decide the question.

Financial considerations, however, did not govern entirely in this case, and the conception of the architect was given due consideration, as the choice of an unsuitable lighting scheme would have seriously marred the interior architectural beauty of such a magnificent building.

Here again the Nernst lamp had the advantage, and by using the inverted lamp the rays will be thrown upward, giving a perfectly diffused and steady light of pleasing color and low intensity, so desirable in lighting high interiors.

It is doubtful if there is another room in the country that has the proportions of this main waiting room, which is approximately 100 feet wide, 300 feet long and 167 feet high. It is difficult for the imagination to picture such a room.

The building itself is approximately 450 feet wide, 800 feet

NERNST LAMP.

long and 100 feet high, and is divided into waiting rooms, dining rooms, driveways, a concourse, train platforms, etc.

There are also to be lighted several miles of tunnels and approaches, and large terminal yards, for which the Nernst Series Lamp is admirably adapted.

It will be seen from the above list that every variety of lighting service is called for, and the predetermination of the energy required was the first problem to settle. On account of the economy of the Nernst Lamp, the plant required will be remarkably small, about 20,000 glower units being specified.

It was recognized that in order to have the large rooms satisfactorily lighted, the entire volume should be uniformly illuminated, and inverted lamps have been so located as to produce these results.

On account of the great variation in the architectural features of each room, no uniform arrangement of lamps was permissible, each room being a problem in itself.

The spaces thus treated, with their approximate dimensions, are as follows:

| | WIDTH. | LENGTH. | HEIGHT. |
|------------------------------|---------|---------|---------|
| General Waiting Room | 100 ft. | 300 ft. | 167 ft. |
| Seventh Avenue Arcade | 50 " | 220 " | 64 " |
| Men's Waiting Room | 60 " | 100 " | 60 " |
| Women's Waiting Room | 60 " | 100 " | 60 " |
| Restaurant | 60 " | 120 " | 33 " |
| Lunch Room | 60 " | 120 " | 33 " |
| Concourse | 60 " | 450 " | 90 " |
| 31st St. Carriage Drive..... | 50 " | 530 " | 65 " |
| 33rd St. Carriage Drive..... | 50 " | 530 " | 65 " |

The remainder of the building offers nothing unusual in the lighting problem, and it is unnecessary to go into details at the present time.

In the offices and corridors, the lamps will be located on the ceiling, no drop lights being used.

A provision has been made for desk lamps where required.

The shop lighting in the arcade will be a feature of this installation, and Nernst Lamps will be used with a standard mirror reflector for the shop window lighting.

✱

The big colleges are not taking kindly to the spelling reform, but that is no drawback to the reform. Big colleges teach theory, and the graduate picks up the practical ideas later.

It is now said the Standard Oil Co. is about to buy up all the distilleries. If this trust absorption continues there will only be two parties in this country, the Standard Oil Co. and their customers.

PORCELA.

The Porcela Co., Bessemer Building, Pittsburgh, Pa., with New York offices at 105-107 Hudson Street, are placing upon the market a new chemical cleanser, which under the name of Porcela—the Magic Cleaner—is becoming well known to the Hardware and plumbing trades. It is the result of a number of years experimenting by a chemist enameler in the employ of a large manufacturing company in Pittsburgh, and while it is

made exclusively for cleaning porcelain enameled bath tubs and other plumbing fixtures it is found excellent for cleaning enameled and porcelain ware. It will remove grease or stains from enameled, granite, agate, porcelain or aluminum kitchen utensils and can be used to advantage on Mason's jars or milk bottles, leaving no dirt or dust. It is also claimed to be used in cleaning stained tea or coffee pots. It may also be used on marble, tile and onyx and all the metals throughout the home. Enamel painted walls or wood are not marred or scratched by Porcela or windows and glassware. Ink or grease stains may be removed from the hands by Porcela, and it will be found as pleasant to handle as fine toilet soap.

THE R. E. DIETZ COMPANY, NEW YORK CITY.

Mr. R. E. Dietz, the founder of the business that bears his name, commenced manufacturing lamps, lanterns and burners in this city in the year 1840, a long time before kerosene was discovered. After the discovery of this oil a burner had to be made to consume it, and the Dietz Burner was about the first to make its appearance on the market. Many of these burners are still in use. When Mr. Dietz began the manufacture of "the original Tubular," the lantern that has earned a world-wide reputation as a superior light-giver, his manufacturing quarters were very small compared with the plant now occupied by the company. His factory consisted of three upper floors of a building about 60 by 60 feet, corner of Fulton and Cliff Streets, in New York City—floor space about 12,000 square feet. The present works contain nearly 212,000 square feet of floor space. This shows expansion.

The R. E. Dietz Company was incorporated in 1886. During the year 1887 they moved into the Dietz building, a new factory built purposely for their use by R. E. Dietz, in the heart of New York, corner of Greenwich and Lighthouse Streets. The building is ten stories, including basement, of fire-proof construction throughout on a plot 75x125 feet and contains a floor space of over 84,000 square feet. In the year 1898 they purchased the business of the Steam Gauge & Lantern Company, of Syracuse, a corporation that was capitalized for \$250,000, and later they purchased the factory property this company occupied, with plot about 275x300 feet. This factory contained over 40,000 square feet of floor space.

Their business increased so rapidly that it was but a short time before they had not sufficient space to turn out the goods required in these two large factories, and in 1904 they erected a third factory on their plot in Syracuse, five stories, including basement, 60 by 260 feet, of mill construction, which, including engine and boiler room, contains nearly 90,000 square feet of floor space. It will thus be seen that their present plant consists of three large factories and these factories are equipped with the most modern and improved kinds of machinery for making lanterns and automobile lamps on a large scale.

About a quarter of the combined product is exported. Comparatively little business is received from continental Europe, China and Japan, no serious attempt as yet having been made to get the trade in a large way on the continent of Europe in competition with the native product.

RECENT TRADE PUBLICATIONS.

FORBES SILVER CO., Meriden, Conn., with New York office at 218 Fifth Avenue and 9-15 Maiden Lane, have issued their catalogue No. 11. This is a voluminous publication, showing an extensive assortment of Tea Ware, Coffee Sets, Chocolate Pots, Dessert Sets, Sugars, Confection and Almond Dishes, Water Pitcher Sets, Ice Pitchers, Tilting Pitcher Sets, Waiters, Crumb Sets, Bread Trays, Cake Baskets, Fruit and Flower Baskets, Bowls and Compotes, Fruit and Berry Dishes, Castors, Prize Cups, Child's Cups, Tureens, Baking Dishes, Butter Dishes, Syrup Cups and Plates, Spoon Trays, Napkin Rings, Mustards, Jars, Peppers and Salts, Hotel Ware, Wine Coolers, Ice Tubs, Soda Glass and Bottle Holders, Punch Bowls, Community Ware, Candelabra and Candlesticks, Toilet Ware, Puff Boxes, Hair Receivers, Collar Button Boxes, Shaving Sets, Jewel Boxes, Match and Toothpick Holders, Smoking Sets, Fern Dishes, Spoons, Forks, Flatware, Bar Spoons, etc., etc.

FLINT & WALLING MFG. CO., Kendallville, Ind. Catalogue No. 47 of Tanks and Substructures. The frontispiece shows a view of their immense plant, and scattered through the book will be found fine half-tone engravings of various factories, office buildings and yards where their line of manufacture has been installed. The company say in regard to this catalogue: "In the preparation of this catalogue we realize that the business man wants explicit and inviting information about the goods he should have, and with that object in view, we point with pride and satisfaction to these pages, illustrating and describing our various outfits and their uses. As the illustrations are photographable reproductions of original outfits installed by us, and the data and arguments concise, they will be appreciated by the buyer, who can readily determine what is best adapted to his requirements. Upon receipt of full particulars we will be pleased to submit detailed information and prices."

Boss Mfg. Co., Kewanee, Ill.; New York office 48 Leonard Street, have presented us with their catalogue of Buck Flatbel and Husking Cloth Gloves, Canton Flannel Gloves, Gauntlet Gloves, Knit Wrist, Leather Tipped and Waterproof Glove, leather Faced Gloves, Single Mittens, Patched Mittens, Full Faced Gloves, Single Mittens, Patched Mittens, Leather Faced Mittens, Fancy Striped Tick Mittens, "Boss" Huskers, Husking Pins, Combination Huskers, Thumb and Finger Stalls, Hook Huskers, Husking Gloves and Mittens, Buckle and Lace Wrist Supporters, Motormen's and Laborers' Palms, etc. The frontispiece consists of a view of their main plant and offices at Kewanee. They also have factories at Galesburg, Ill.; Findlay, Ohio; New York City, Fort Wayne and Bluffton, Ind. A historical sketch of the company is included in the contents, in which they say: "Instead of 15 feet square, as in the beginning, we now have 125,000 square feet, over 3 acres of floor space, devoted entirely to the manufacture and sale of our products. Our capital stock, which we have also increased from year to year, is at present \$200,000.00, surplus \$20,000.00. All our branch factories are owned by us and managed by thoroughly experienced men. The officers of the Company have been the same since 1897, and several of the heads of departments, including the superintendent, have been with the business since we started in 1890. The officers are: W. H. Lyman, president; H. T. Terry, vice-president; F. M. Lay, secretary, treasurer and general manager; P. A. Waller, manager sales department; T. R. Stokes, superintendent." Photographs of the officers are also given on the opposite page. On another page a description is given of how cloth gloves and mittens are made in their factories with several striking illustrations and in regard to which they say: "Only the best grade of canton flannel, husking cloth, fancy ticking, ducks, etc., procurable is used in our gloves and mittens. Few people realize that cloth gloves pass through as many processes as do leather gloves. After the material which is to be used in a certain glove or mitten is laid off and carefully examined to discover imperfections, the several parts are cut out by means of dies. The parts then go to the sewing rooms where they are distributed among the different operators, each one having a certain work to do in joining the several parts, special machines being used for certain parts of the work. All gloves and mittens are sewed wrong side out, and from the sewing department they go to the turning department, where they are turned and forwarded to the examining department. In this department every glove and mitten is drawn over a metal form, the gloves over glove forms and the mittens over mitten forms, where they are carefully examined, the seams smoothed down, etc."

RECENT TRADE PUBLICATIONS.

TUBULAR RIVET AND STUD CO., Boston, Mass. Price List M of Tubular Bevel Pointed and Outside Pronged Rivets, Staples and Caps, and Price List O of Perfection Fasteners.

CLEVELAND WIRE SPRING CO., Cleveland, Ohio. Catalogue No. 26 entitled "Money Savers in Shop Requirements." Illustrations and descriptions are given of their "Iron Clad" and "Hercules" Never Drip Steel Mortar Hods, "Standard" Steel Brick Hods, Steel Mortar Boards, Two-Man Hand Barrows, Hardware Steel Nail Boxes, Shop Boxes, Piling Boxes, Annealing, Chip, Lathe and Drying Pans; Bench and Shelf Boxes, Square Steel Pails, Individual Racks, Two-Section Tool Racks, Blue Print Cabinets, Barrel Trucks, Steel Barrels, Shop Kegs, Pails, Washing Kettles, Trays, Cutlery Boxes, Factory Waste and Rubbish Cans, Waste Boxes, Flanged Steel Heads, etc.

N. N. HILL BRASS CO., East Hampton, Conn. Catalogue M 4 of Bells for the Hardware and Saddlery Trade. Included in the contents is a line of Sleigh Bells, Broadway and Gibson Straps, Swiss Chimes, Dexter, Russian and Swedish Pad Bells; Metal Shaft Bells and Chimes; Norwegian and Swedish Bells; House Bells, Sportsmen's Dog Bells, Patrol Gongs, Turkey Bells, Cab Bells, Sheep Bells, Hand Bells, School Bells, Milkmen's and Auctioneer's Bells, Trip Gongs, Gong Door Bells, Electric Stroke Door Bells, Tea Bells, Call Bells, Bicycle Bells, Bell Toys, etc. This company is a branch of the National Novelty Corporation, 826-828 Broadway, New York and 105 Federal Street, Boston, Mass.

ASSOCIATED SILVER CO., 174 East Lake Street, Chicago, Ill. Catalogue of Silver Yourex Silver, manufactured for them by the International Silver Co., successors to Rogers Bros. Of this silver the company say: "It may indeed be termed a new discovery in precious metals. It is the only satisfactory substitute for sterling silver ever introduced. It will not tarnish in show cases like sterling silver or plated goods. These goods being solid and not plated there is no other color under the surface to show, consequently the knife may be sharpened like a steel knife, and may be cleaned with sapollo, which would ruin plated goods." A line of Breakfast Knives is shown; also Tea, Table, Ice-Cream and Bar Spoons; tipped Windsor and Shell pattern; as well as their Bertha and Alma pattern of Tableware, including Orange, Coffee and Berry Spoons, Oyster Forks, Jelly Knives, Cold Meat Forks, Pie Knives, Cream Ladles and Preserve Shells.

P. LOWENTRAUT MFG. CO. INC., Newark, N. J.; sole selling agents John H. Graham & Co., 113 Chambers Street, New York. Catalogue of Ice Skates regarding which the manufacturers state: "In offering our line of Skates for the season of 1906-1907, we have departed but little from the improved pattern of last season, the Skates having given such general satisfaction. All of our Men's Lever Skates from sizes 10 to 12 inches are made with extra long outside clamps to fit the extension sole shoes now worn. The key-locking Hockey Skates are made with improved adjustable toe clamps which may be extended at will, thus doing away with the extra clamps which are required on skates of other makes. We also desire to call the special attention of the trade to the patented device of the heel clamps on the Hockey Skates. We are also making Ladies' Key-Locking Hockey Skates and Key-Locking Rink Skates, which latter are made for either ladies or gentlemen." Illustrations are given of Club Skates, both Ladies' and Gentlemen's Rink Skates, Hockey Skates Canadian Pattern; Club Hockey Skates, Racers and Extension Sled Skates; also Ankle Braces, Skate Keys, etc.

BARNEY & BERRY, Springfield, Mass. Catalogue on Ball Bearing Roller Skates. In a prefatory note the company say: "The increasing popularity of Roller Skating has caused us to experiment extensively with a view to the production of a line of Roller Skates in keeping with our reputation as skate manufacturers, and in submitting the line herein shown we feel confident that it is the best ever produced, judged from any standpoint."

They also issue a catalogue of Ice Skates for the season of 1906-1907, illustrating their various lines, with descriptions and prices. Hockey rules which govern the game in the principal leagues of this country and Canada are also included in the catalogue.

AMERICAN GAS STOVE CO., St. Joseph, Mo. Catalogue for 1906-1907 of their New Improved Gas Heaters, which they manufacture in a number of styles, and in regard to the mechanical construction of which the company say: "The advantage of the New Improved Gas Heater over the ordinary gas stoves is in mixing the gas twice, first mixing it cold, then after it passes into the heated chamber it expands, passing through tubes and remixing with hot air as it passes from inner to outer chamber. This double mixing process produces double the amount of flame of any ordinary gas stove, thus using much less gas and more oxygen to obtain these results. The outer chamber of our New Improved Upright Gas Burner is surrounded by basket grates. The bottom of each serves as a deflecting plate radiating the heat to the floor. The top plate spreads the heat to the outside of the drum where it is radiated into the room." Illustrations are also given of their New Improved Crown Burners as applied to all makes of heating stoves; also their New Improved Upright Burners applied to furnaces; Crown Gas Burners for heating stoves; hard-coal base burners and furnaces; Combination Crown Cook Stove Gas Burners, Air and Gas Mixers, etc. A telegraph code of business phrases and a code word index, as well as blank pages for memoranda, will be found within the contents.

FOSTORIA GLASS CO., Moundsville, W. Va. Catalogue No. 3 of fancy Decorated Lamps in Fired Colors. In a prefatory note the company say: "In presenting to you our catalogue for 1906, of decorated lamps, etc., we beg to call your attention to the many new shapes and attractive decorations that are to be found in this year's line, produced with great care and in the same clean and bright finish that keeps "Fostoria" lamps to the front. We continue to use the best trimmings that can be purchased, from the cheapest to the highest priced lamp, using the "Royal" centerdraft burner exclusively, and we guarantee same. Rochester lead glass chimneys used." The illustrations are in colors and the lamps are placed before the trade under the names of the Mary, Ivan, Neil, Ogden, Dover, Rhea, Louis, Cordon, Alvin, Waldo, Kirby, Seine, Elsie, Milan, Harlan, Tacoma, Tremont, Menger, Lisbon, Canton, Concord, Lopez, Winton, Sitka, Idaho, Saturn, Nicholas, Elliott, Lowell, Stanley, Oregon, Newark, Augusta, Victoria, Genoa, Albany, Vendome, Imperial and Premier. The company are also manufacturers of American Beauty Rose Vases in several artistic shapes; Hand Painted Vases with ornaments, and a variety of miscellaneous goods such as Pin Trays, Night Lamps, Globes and Shades; also a line of Solid Blue Glass Goods.

IDEAL MFG. CO., New Haven, Conn., have favored us with their "Ideal Hand Book of Useful Information for Shooters," an idea of the character of which is gained by a number of the headings under which the information appears, viz.: How to Prepare your own Ammunition, Resizing Expanded Shells, Crimping Rifle and Pistol Shells, Bullets, Smokeless Powders, Reloading Shells for High Power Rifles, Short Range, Directions for Preparing Antimony Alloys, The Standard Drachm Measure, etc., etc. In a note to the trade the company say: "The many questions that are asked dealers by their customers about the variety of ammunition, bullets and shells, whether this thirty-two calibre is the same as that thirty-two calibre or will this thirty-eight calibre bullet fit that thirty-eight calibre arm and so on throughout the long list of very much mixed up so-called calibres, is to say the least very annoying and perplexing to us all. Thousands of letters are written in explanation, and as many packages of goods sent out wrong, causing much expense in carriage backward and forward all on account of misunderstandings on these points. We realize that it would take much more time and space than is allotted in this little book to make all as plain as day, yet we feel that if the dealer will take the trouble to read up the few points here given it will be of great assistance to him, his customers and ourselves. We are constantly on the lookout for the requirements of shooters, and we are from time to time presenting new and useful implements. There is no standing still in this busy world of ours; we must be going backward or forward, and we propose to be leaders in our line rather than followers. The increased demand for our goods is evidence that our efforts are appreciated. We desire all who sell our goods to guarantee them to the purchaser as we guarantee to the trade."

NEW GOODS AND SPECIALTIES

WILCOX-PROUTY HOUSE DOOR HANGER.

Wilcox Mfg. Co., Aurora, Ill., are the manufacturers of the Wilcox-Prouty Door Hanger and Track, which is claimed to be the first and only noiseless House Door Hanger with side adjustments on track, an illustration of which we give herewith. The Hangers have easily accessible adjustment, are made of malleable iron and steel, oil gloss finish. They run in a narrow pocket, only $2\frac{3}{4}$ inches required. The wheels are fitted with special combination roller and brass bushed noiseless bearings, provided with means for permanent lubrication. They have

WILCOX-PROUTY HOUSE DOOR HANGER.

rubber-faced roller floor guides, with wide contact on surface, and it is claimed will not mar the door. The old-style steel floor guides, however, will be furnished if desired. One only adjustable bracket required for each door. The balance regularly spaced 15 inches apart. For extra heavy doors, 300 pounds or over, extra brackets will be furnished if desired. The brackets are clincher type, which securely bind and hold the tracks, and prevent any sound or vibration. Brackets and screws are packed with Hangers. Adjustment in bracket is positive, and in combination with Hanger adjustment is sufficient to plumb doors. The track is made from white maple, kiln dried and oil finish, and is impervious to moisture, made absolutely uniform in size, packed in neat and convenient bundles 30 inches long. For full sets 15 feet are furnished with 12 stationary and 2 adjustable brackets, while for half sets $8\frac{3}{4}$ feet are furnished with 7 stationary and 1 adjustable bracket. This is claimed to be the only Door Hanger ever made where the track is made adjustable in this manner, viz.: both lateral and vertical.

STEEL NUT WRENCH NO. 54.

Bemis & Call Hardware & Tool Co., Springfield, Mass., are offering the Hardware and Supply trade their new Steel Nut Wrench No. 54. In the construction of this Wrench special attention has been given to strength, durability and the quality of material used. It is adapted for use where a wood-handle wrench will not answer. Water, steam or mud cannot injure it, it is claimed. It is built on correct mechanical principles,

STEEL NUT WRENCH NO. 54.

and is practically indestructible. The head, bar and shank is a one-piece steel forging. The handle is made of steel and is forced on to the wrench under great pressure, then securely riveted in place. Being oval in form it fits the hand and doesn't tire it in using as a straight handle will. The nut gives great gripping power to the jaws, as on nuts with the corners rounded off the whole hand can be applied in making the adjustment. Ordinary adjustment can be made with the thumb and finger.

There is no screw to get buckled and jam the slide. The Wrench is made in several sizes. The 6-inch to 18-inch have the steel handle as shown. The 21-inch and 24-inch have a handle made by a continuation of the bar.

NETTLETON REVERSIBLE NIPPER.

Nettleton Mfg. Co., Middletown, Conn., with sales department at 157 Chambers Street, New York, are the manufacturers of the Nettleton Reversible Nipper, of which we present an illustration. The special feature of these nippers is shown in the

NETTLETON REVERSIBLE NIPPER.

reversible jaws, giving a double cutting edge to each of the two blades used. In the smaller sizes the blades are held in place by a single screw, but in the larger sizes two screws are used. When bolt blade edges become dulled through use a new set of blades can be inserted. The jaws are beveled. The handles are of a shape to easily grasp and retain a firm grip, being smooth and finished in black. The 6 and 8 inch sizes are specially adapted for cutting piano wire, bicycle spokes and type bars. The 6-inch size is for cutting 1-16 inch wire; 8-inch size for 1-8 inch wire; 10-inch size for 3-16 inch wire, 12-inch size for $\frac{1}{4}$ inch wire and 14-inch size for 5-16 inch wire.

"IMPERIAL" SELF-HEATING FLAT IRON.

Imperial Brass Mfg. Co., 247 South Jefferson Street, Chicago, Ill., are placing on the market the "Imperial" Self-Heating Flat Iron, of which we give an illustration. The Flat Iron is approximately the same size as those ordinarily used for family ironing. The Iron itself is $6\frac{3}{4}$ inches long, being $11\frac{1}{2}$ inches over all and weighing $6\frac{1}{2}$ pounds. The flame is contained entirely within the

"IMPERIAL" SELF-HEATING FLAT IRON.

body of the iron, and it is consequently not affected by drafts, nor is there any danger of clothing catching fire. The burner is lighted in a similar manner to gasoline blow pipes or gasoline pressure lamps, a small initial pressure being placed on the reservoir by means of a small hand pump which is supplied with the outfit. About two tablespoonfuls of oil are allowed to flow into the body of the Iron, and can be lighted with a match, which produces the initial heat for generating the gas. The flow of gasoline is governed by the buttonheaded needle stem which is shown at the right of cut. The burner is of the improved type, and is placed inside the iron body, but is entirely separate and distinct from the Iron itself. It may be lifted out by removing the upper part of the flat iron. The fount is a small, strong, glass bulb with a capacity of one-sixth quart of oil. An even temperature is maintained, thus saving time and annoyance of

changing irons every few minutes, and also avoiding the heat of a kitchen range with its attendant discomfort. The iron is finished in heavy nickel plate, making a handsome article.

OAKMAN SELF-LIGHTING BURNER.

Oakman Mfg. Co., 84 to 86 Chambers Street, New York, are the manufacturers of the Oakman Self-Lighting Burner illustrated herewith. It is a simple, compact and gas-tight burner.

OAKMAN SELF-LIGHTING BURNER.

The pilot tube is not only almost wholly covered in by the burner, but its light is within the mantle, where an air current cannot disturb it. The parts are assembled into a form that is low in height and graceful in outline. It is claimed that for high candle-power with low gas consumption this Burner is not excelled by any incandescent gas burner. Besides, it brings great saving in mantle and lamp furniture, and escape of gas is prevented, which is unavoidable when matches are used. The burners are put up one in a box, including mantle wire and adjustable baffle plate to be used with air globes.

THE "IMPROVED DEWEY" STOCK WATERER.

The B-B Mfg. Co., Davenport, Iowa, are the manufacturers

of the "Improved Dewey" Double Stock Waterer which is shown in our illustrations herewith. The large cut shows the complete Waterer in position attached to a barrel, except that the shield E is cut away on the side, showing pipes 1 and 2. The

smaller sectional view will further explain the working of the Waterer and establish its simplicity. It will be noticed that the screen cap marked D in the large cut is perforated and so acts as a strainer, preventing straw or other matter from getting into the clogging valve 2. As the water is used out of the bowl, the spun-metal ball or float 1 falls and forces valve 2 upward, thus allowing the water to rush from barrel, or tank, into the valve chamber. As the bowl fills, the float 1 rises until the supply of water is shut off just before the bowl is full. The bowl is bolted firmly to the barrel or tank, so that it cannot be injured by heavy stock crowding against it. Hogs can drink out of it, but can't get their feet into it as into an ordinary trough. Its contents are always clean. As it cannot overflow, the ground about the fountain remains hard and does not get muddy. Being double, the bowl can be set for two pens or yards. The intake pipe with its screen cap points up into the barrel or tank and therefore gets no sediment into the water; does not freeze even in cold weather. The manufacturers claim that no catalogue house or agents handle the "Improved Dewey."

"ALTERNATING" ALARM CLOCK.

Western Clock Mfg. Co., La Salle, Ill., with New York offices at 51 Maiden Lane, are introducing a new "Alternating" Alarm Clock to the trade, which is of a form that is destined to become popular. It is a new style of intermittent alarm; rings and stops alternately at intervals of 20 seconds during fifteen minutes. It is put up in a 4½ inch nickel-plated case, extra

"ALTERNATING" ALARM CLOCK.

deep, and substantial, and is made to be sold at a moderate price and pay the dealer a good profit. It runs from 32 to 36 hours without winding, and has a shut-off attachment for the alarm. The movement is claimed to be the most simple intermittent movement on the market. It has no extra wheels—nothing to get out of order, "Friction-Less" pivots, "Self-Centered" wheels, with hard steel pallet escapement, and is seven inches high.

EVANS CRESCENT EXPANSION BOLT.

F. H. Evans, 598-614 Kent Avenue, Brooklyn, N. Y., is placing before the trade the Evans Crescent Expansion Bolt, a double end grip Expansion Bolt, which we illustrate herewith. It differs in construction and manner of working from any expansion bolt now on the market, and is calculated to give excellent service wherever used. The manufacturer states it to be the only one among bolts made in two parts expanding at both ends, and

FIG. 1.—CRESCENT EXPANSION BOLT, SHOWING PARTS READY TO BE SCREWED DOWN.

also the only bolt of the kind whose pliable metal bends and grips or secures itself into the sides of the hole. The lower piece, or one furthest from the head of the bolt, is tapped out or threaded to take the bolt, and is called the nut piece. The upper piece

is loose, and is of the proper size for the bolt to just go through without friction. The interlocking fingers of these two pieces so engage each other that the bolt, when inserted, must take the thread on the first trial, and when it is screwed in hard the expanding fingers grip the hole at so many points that it is impossible to rock, shake or twist them out of position. All that is required is a hole of sufficient size and depth to insert the bolt with nut and double jaw, when, by turning the head, and with a large screw or common wood screw, the nut piece is

FIG. 2.—CRESCENT EXPANSION BOLT IN PLACE AND GRIPPING SIDES OF HOLE.

drawn towards the head of the bolt, causing the interlocking fingers to be drawn together and outward over the beveled spaces on both the nut end and the free end. Any strain on the bolt only tends to further expand the jaws, and the greater the tension, therefore, the firmer the bolt will hold. A feature of these new bolts is the fact that they can be removed as easily as they are applied, and without injury either to the articles fastened, that to which they are fixed, or to the bolts themselves. Their use is indicated wherever it is not practicable or desirable to drill or bore through the material to which the fastenings are to be made, such as for fastening down bridge work, engine beds to masonry or solid rock, electrical work, in building iron window and door frames, railings, fire escapes, etc. The difficulty of drawing work down closely which is so often met with in the use of expansion bolts generally is successfully overcome with the new double end grip expansion bolt shown. It is only necessary to put the fittings in the hole in the usual manner, the nut piece in first; then, with a setting tool or piece of round iron or pipe and a hammer, give a sharp blow on the upper or close jaw, driving it down hard on the lower or nut piece. This will open out the interlocking fingers on both pieces, causing them to grip or pinch at both ends and on all sides of the hole. The piece to be fastened is then placed in position and the bolt put in and screwed down hard. The work to be fastened will then be drawn down closely against the stone or brick.

MILBRADT ROLLING STEP LADDERS.

With Milbradt Rolling Step Ladders most Hardware stores can be re-arranged and made more convenient to all concerned. It is claimed they will pay for their cost in a very short time,

MILBRADT ROLLING STEP LADDERS.

and will last a life-time. They are absolutely safe, noiseless and neat, and always ready for use. Hardware dealers, interested

in the improvement of their store, can make it the best in their town by sending for specification sheet which gives complete instructions how to order.

Milbradt Rolling Step Ladders are made by G. A. Milbradt & Co., 1922 and 1924 North Broadway, St. Louis, Mo.

THE "RELIANCE" MOP WRINGER.

The Lee Chair Co. of Oneida, N. Y., is offering to the trade a new patent Mop Wringer which is called "The Reliance." It is made of the best malleable iron and red birch and is practically indestructible, and "makes good." With "The Reliance" you can wring a mop dry, and use boiling water and any kind of cleaning powder, as your hands never come in contact with

THE OLD STYLE.

THE "RELIANCE" MOP WRINGER.

the water. Mop Wringers have been on the market in a small way for a number of years, but the Lee Chair Co. is a progressive concern and works on small margins which has built up a business in chairs second to none, which is an assurance that the sale of Wringers will be pushed. They net dealers a nice profit and they will do well to get them in stock.

HUMOROUS LOGIC.

That song "Everybody Works but Father" has been changed since the arrival of the vacation days to "Everybody Works Father."

Philadelphia has succeeded in eliminating the "siren" horn from automobiles. Now, if some city would only eliminate the smell.

A man named Casebeer has been nominated for the legislature in Kansas. That name ought to be good for anything with in the gift of the people in a Prohibition State.

KALAMAZOO SLED CO.'S NEW CATALOGUE.

KALAMAZOO SLED CO., Kalamazoo, Mich., successors to the Columbia Sled Co. and the Page Mfg. Co. Catalogue for the season of 1906-1907, including their Round Knee Frame Sleigh, Perfection Bent Knee Sleigh, Straight Knee Sled, Goose Neck Sleigh, Upholstered Top Sleigh, Large Champion Fender Sleigh, Ash Fender Sleigh, Bow Runner Sleigh, Scroll Tip Sleigh, Excelsior Fender Sleigh, Hard Wood Coaster, Curved Runner Coaster, "Our Birds," Coasting "Bobs" or "Double Runners," Baby Carriage Runners, Doll Cutters, Children's Cutters, Children's Boxes, Twin Body, Twin Cutter, Presto Baby Carriage Sleigh Attachment, etc. In the company's announcement to the trade they say: "From experience of past years, the trade generally must realize that it is not good policy to delay the placing of orders for Children's Sleds until the last minute or put off shipments until it is time for snow to fall. Our seasons now are pretty generally unreliable and the wise buyer will place his order early and make his shipping instructions read September or October at the latest. We can confidently predict an unusual demand for sleds during November and December this year, if it should snow early and those who delay their shipments to that date will run some risk of disappointment on some numbers at least. Goods that are rushed through late, cannot or never will be, as satisfactory as those which are made before the rush commences. There is also the congested condition of all freight traffic to contend with during November and December and there is much more risk of loss, damage, and delay at that time than in the earlier months. We earnestly request our customers to make their shipments as early as possible and we offer unusual terms for this purpose. We assure you that we will use our best efforts to maintain the high standard of our work as well as add new designs and approved methods of manufacture." They are also manufacturers of Lawn Swings, Hammock Stands, Reclining, Folding, Steamer and Swing Chairs, Lawn and Porch Settees and Summer Novelties, and claim to have the most complete line in each class produced by a single factory.

"ALWAYS SHARP" CALKS.

After the most extensive tests made in various army posts, the Government decided that the "Always Sharp" Calks are the most practical and reliable of any removable calks made. It is using thousands of pairs every year.

This preference given to "Always Sharp" Calks over all others is simply due to the construction of this calk. It is unique. It combines points of different lengths, having a progressive arrangement whereby, when the edge of one point becomes worn, the edge of the next one comes into play, and so on throughout the series, thereby obviating frequent sharpening, and at the same time always having a sharp edge to make positive engagement with the slippery surface and insure a firm footing.

"ALWAYS SHARP" CALKS.

Another desirable feature of the "Always Sharp" is that they can be put in or taken out with any ordinary wrench without removing the shoe. As the threaded shank is slightly tapered, and binds tightly, it is unnecessary that the calk should be screwed in flush with shoulder to prevent it from turning. The shank is only case-hardened and positively will not break off in the shoe.

The old-fashioned wedge-shaped calk has always been considered best. The "Always Sharp" has three wedge-shaped blades to one calk, or forty-eight cutting edges to one set of calks, the positive proof that such a calk will stay sharp and wear longer than any other. The calk is made of finely tempered steel; when all the points are worn smooth, they make a most excellent mud calk, being square and flat, giving the horse a good surface to stand upon. The shoe can be used for a long while, as it is only the calk that wears. It may be stated right here that there is nothing so injurious to a horse's hoof as the constant taking off of a shoe to sharpen in the old way.

The accompanying cut shows the wear on "Always Sharp" Calks after three and five months, respectively, showing they can still give a horse a strong foothold on any slippery pavement.

"ALWAYS SHARP"
TOE CALK.

WEAR AFTER 3 MONTHS.

WEAR AFTER 5
MONTHS.

The Always Sharp Calk Mfg. Co., 34 Essex Street, Jersey City, N. J., are the manufacturers of this excellent calk and, on application, will furnish any dealer with circular matter describing them, as well as testimonials from the largest users of "Always Sharp."

OH WHAT A BEAUTIFUL DREAM.

Nephew—Do you know, uncle, I dreamt last night you had lent me ten dollars!

Uncle (graciously)—Is that so; Ah! well, you may keep them, Otto.

✱

A prominent man called to condole with a lady on the death of her husband, and concluded by saying, "Did he leave you much?"

"Nearly every night," was the reply.

TERMS USED IN SADDLERY.

It is interesting to know something about the derivation of some of the saddlery terms with which we are all familiar, says *Harness Gazette*. Many that we speak carelessly day by day carry history in their names. Here are a few of them:

Basil—is a corruption of the French *basane*, which stands for sheep leather.

Bearing rein—is so called because the horse's head bears upon it. As has been ridiculously said by the opponents of the bearing rein, his head is tied to his tail. The French name is more expressive of its true nature—*fausse rein*—as they call a chin chain a *fausse gourmette*, or false curb. The Germans call the bearing rein *haltungszugel*, or holding rein.

Billet—is known to the trade as an appliance at the end of a rein or strap for attaching to a ring or bit. It may take the form either of a buckling piece or of any style of spring hook. It is supposed that the word is diminutive of "bill," a hatchet with a hook point, the hook looking like the bill of a bird, as did the old plated rein billets which were used in great quantity in London years ago; hence the buckle piece has acquired the same name.

Bridoon—is a word sometimes, but wrongly, written *fradon*, being derived from the French *bridon*, a snaffle bridle. It is worthy of remark that while the French for a bridoon is *filet*, they call a Wilson snaffle a *bridon a quatre anteaux*, a four-ringed snaffle, and a Weymouth bridle a *bridon a filet*.

Cavesson—is also sometimes spelled *cavezon* and in French *cavecon*. Literally, it means a muzzle, halter or holder, used on the nose of a horse while breaking him in. Probably the commonest spelling is *cavison*, yet you cannot find it so spelled in any dictionary. It is derived from the Italian, and comes from *cavare*, to draw.

Crook—is the really correct way of spelling what is technically known as "crew," as in the words "crew-joint," and with reference to spring hooks, to crew, or knock down. This is an interesting instance of the corruption which words undergo in a work shop. The French call the crook, or joint-box, *aux oeufs*, or egg-shaped.

Dandy brush—is also a corrupted word. To suppose that it had anything to do with a coxcomb, either from its bristling nature or because it contributes to the finery of a horse's coat, would be somewhat ridiculous. It seems more likely that one of the two words, *dander*, or *dandruff*—the former a corruption of the latter—will be found to be the true derivation. *Dandruff* is a scurf that forms on the head and comes off in small scales, and a similar scaling from the horse's hide is removed by the hard fibre of the "dandy brush."

Demi—A demi saddle is not a half shaft, as the Latin word *demi* would seem to imply. A half shaft saddle has a hogskin seat and hogskin covered flaps, but only hogskin stea and hogskin covered knee-rolls, and the rest solid leather.

Ferrule—is a ring of leather applied to a cane or stick to strengthen it. These ferrules are called mounts by whip makers; that which covers the end of the whip is called the cap, and the tubular ferrules along the whip are named collars.

Hames—were formerly, and not very long ago in some places, called "homes." If the word is the same as is signified by driving the nail home, its meaning conveys a lesson to harness-makers, as hames fit properly unless they cling closely or press home to the collar at every point of contact.

Japanned—is a word along with patent that has taken the place of varnished with reference to leather. It may have been a process at first peculiar to Japan, as they successfully use this lacquer on wood, metal and leather. The French use *vernir*, meaning to varnish, and the Germans *lackiren*—to lacquer, as applied to leather.

Martingale—It is curious that the word which signifies a strap passing down a horse's breast from collar to girth, should be derived from an Italian word meaning stockings or breeches.

Panel—is a word very often spelled with two n's, but it is really only another form of the word *pane*, meaning a sunken portion, or piece, surrounded by a border, as the panel of a door, the pane of a window, or the panel of a saddle.

Swivel—is by its derivation something that turns round. It is possible the original bearing rein swivels were made to thus turn round like other swivels, and hence the name.

PHILOSOPHICAL DR. HALE.

In his "Memories of a Hundred Years" that distinguished New Englander, Dr. Edward Everett Hale, says of Edward Everett that he was hopelessly sensitive to what the press printed, "not knowing what I, who was bred in a newspaper office, know: First, that of whatever is put in the newspaper half the people who see it do not read it; second, that half of those do not understand it; third, that of the half who understand it half do not believe it; fourth, that of the half who believe it fully half forget it; fifth, that the half who remember it are probably of no great account, anyway."

TRAVERS BROS. COMPANY.

The Travers Brothers Company, 41 Worth Street, New York City, has decided upon a radical change in the manner of conducting its business, towards which it has been working for some years. It will within the next sixty days move its offices and warehouse from 41 Worth Street to 556 West 52d Street, between Tenth and Eleventh Avenues, where it will conduct business in conjunction with the Commercial Twine Company, whose plant is on Fifty-second Street. At the same time, the company will practically retire from the jobbing trade, and will be strictly a manufacturers' distributor, marketing principally the product of the mills it owns or controls.

The Travers Brothers Company's business has grown from the smallest possible beginning as a wholesale Twine store to a large distributing and manufacturing concern, with three large plants wholly or partially owned by its officers. Travers Brothers, composed of the late Francis C. Travers and Vincent P. Travers, succeeded the firm of McKenzie, Travers & Co., Twine jobbers, in 1871, and their first store was at 104 Duane Street. In 1876 they moved to 107 Duane Street, where they at first occupied the store and a portion of the cellar. Later they took the whole of the cellar and sub-cellar, and added the store in the rear at 16 Thomas Street, ultimately also taking the second floor of 16 Thomas Street. Here the mercantile branch of the business was conducted until May 1, 1902, when it was moved to 41 Worth Street.

In 1891 the three partners in the firm organized a corporation styled the Travers Brothers Company with themselves as the officers to continue the business. In 1903 the manufacturing and mercantile branches of the business were separated, a close corporation being formed on March 5 of that year under the name of the Commercial Twine Company to continue the operations of the plant on Fifty-second Street, while the Travers Brothers Company devoted itself to the marketing of the product of that company and of others. In 1900 the Travers Brothers Company became the agent for the Roanoke Cotton Mill Company, Cotton Yarn, Twine, etc., Roanoke, Va., in which the President of the Travers Company is interested. Last year the Travers interest acquired the plant, business, good will, etc., of the New Bedford Cordage Company, New Bedford, Mass., and they plac-

ed the plant in operation. It has proved a successful venture. The Travers Brothers Company is the distributing agent for it.

The Travers Brothers Company will continue to be the distributor for the product of the Commercial Twine Company, Soft Fibre Cordage, New York City; New Bedford Cordage Company, Hard Fibre Cordage, New Bedford, Mass., and the Roanoke Cotton Mill Company, Cotton Cordage, Roanoke, Va. Following are the names of the present officers of the Travers Brothers Company: Vincent P. Travers, president; V. Paul Travers, first vice-president; Augustine V. Travers, second vice-president; George B. Cooper, treasurer; John J. Burbridge, secretary; Frank A. Bryant, general manager.

THE SMALL ORDER.

There is a natural attraction in the big order and salesmen are too frequently tempted beyond the limits of good business policy to obtain it. Sometimes the margin of profit is cut into; or extravagant concessions made; or hopes are held out to the purchaser that will disappoint him; in fact, it sometimes seems as though any method is regarded as legitimate to obtain a nice fat order.

As a matter of fact the dozen or two little purchases that are so apt to be despised and frequently neglected, are very apt to represent more profit, as well as a wider clientage, than the one order that is a dozen times as big. It's the steady customer that pays in the end, even though his individual purchases fall within the list of despised small orders. Special inducements to big sales will sometimes serve as decoy ducks, but it is the hunter himself, who fixes a steady and alert attention to his business in every detail that is sure to bag the game, and the less fuss he makes about it the better it will be for his next shot.

Don't neglect the little orders for the big one. Rather depend upon the little ones for the profit and get as many of them as you can. The man who spends 25 cents a day with you at a good rate of profit will make you more money in your life-time than the one who once or twice in a dozen years gives you a \$100 order after first frying every drop of fat out of it by the extra concessions he demands with it because of its importance.

OUR CANADIAN LETTER

TORONTO, SEPTEMBER 5, 1906.

ONTARIO RETAIL HARDWARE CONVENTION.

The semi-annual convention of the Ontario Retail Hardware and Stove Dealers Association was held in Toronto yesterday and to-day about three dozen members from various parts of the province being present. Considering that this is over one-fifth of the membership and that the present is a particularly busy season with Ontario Hardwaremen, many of whom are coal dealers and are now stocking this line as well as other Fall and Winter goods, the attendance was very satisfactory.

President A. W. Humphries, Parkhill, read an interesting address drawing attention to the great progress made since the organization of the Association less than five months ago, this illustrating the general desire for trade organization. He criticised the croakers who were saying that the Association had accomplished nothing, pointing out that patience was necessary and that a fair membership must be secured before the Association could be expected to make its power felt.

Secretary Weston Wrigley, Toronto, reported over 150 members enrolled and urged the selection of a permanent organizer. He reported the result of his visit as a delegate to the convention of the Western Canada Retail Hardware Association at Winnipeg in July. It was there proposed that a Dominion Retail Hardware Association be formed similar to the National Retail Hardware Association in the United States, and the convention should take some action regarding the proposal. He also recommended that the convention adopt a resolution demanding an amendment to the Criminal Code, which now made illegal the arrangement of price agreements by merchants associations while giving this power to labor unions and professional men.

Treasurer Caslor reported a balance of \$117 in the treasury.

TRADE GRIEVANCES.

The Executive Committee reported as follows:

We are glad to be able to report that certain objectionable market reports which were published in the daily papers until recently are not now being published. We would make the following recommendations:

1. That the Association appoint a committee to interview representatives of the enamel ware manufacturers and ask them to stamp all seconds as such in plain letters of large size.
2. That the special committee appointed to meet the wholesale representatives request the jobbing houses to have all goods charged at sufficient prices to cover the cost of packing and to do away with all special packing charges.
3. That the special committee to be appointed advise the representatives of the wholesale houses that in future the members of this Association will not pay cartage charges at point of shipment.
4. That the special committee urge that wherever manufacturers or jobbers sell to buyers outside the trade that the sales be made at a price sufficient to protect the legitimate Hardware dealer.

The resolution regarding enamel ware was sent to the Secretary of the Enamel Ware Manufacturers' Association and the Wholesale Hardware Association will be asked to endorse the request. At present the sale of enamel ware seconds by the manufacturers seriously affects the sale of firsts by the legitimate dealers.

After discussion the convention decided not to urge the abolition of package charges (15 cents is the minimum charge made for boxing by jobbers), until the matter was further considered at the next convention.

The cartage charges resolution was adopted unanimously. A minimum charge of 12 cents is made on every shipment of goods from jobbing houses, etc., although most orders are "f.o.b. cars." The retailers look upon the charge as an imposition as it is charged on every shipment, even when railway sidings run into factory yards and no cartage is required. Cartage companies closely allied to the railway corporations are the beneficiaries.

This together with the resolution regarding the sale of goods to persons outside the trade was urged strongly before a meeting of the Canadian Wholesale Hardware Association by a special committee of the retailers. The jobbers agreed to consider these matters at their convention this month at Hamilton, and the retailers decided to defer action regarding cartage charges until a reply was received.

MUTUAL INSURANCE.

J. Walton Peart, of St. Marys, reported for the Mutual Insurance Committee, that Canadian laws prevented the formation of a mutual company except by farmers, and a special act of the legislature would be required to form a Hardware Mutual. He presented a close analysis of the results of mutual insurance amongst Hardwaremen in the States and compared it with the experience of stock companies in Canada, strongly urging Canadian Hardwaremen to form a mutual company.

Mr. Peart was followed by Fred C. Lariviere, of Montreal, a wholesale and retail Hardwareman, who had made a close study of mutual insurance, and who visited the convention to fraternize with the Ontario dealers. He suggested that if difficulty were found in securing a charter for a mutual company that arrangements be made with an old line company or underwriting firm to carry all the insurance of the Association members up to a \$10,000 limit. He said it could easily be arranged that each member who sent in his insurance through the Association secretary could get a 20 per cent. rebate (in lieu of the usual agents' commission) and that a further division of profits could be arranged which would place from two to five per cent. more into the Association treasury.

The matter was left in the hands of the committee to deal with and report at the annual convention in March.

COLLECTION OF ACCOUNTS.

The system of collecting accounts used by the members of the Western Canada Retail Hardware Association was explained, and the matter referred to a committee to bring in a recommendation at the next convention.

A strong resolution was adopted favoring the proposed amendment to the Criminal Code and another resolution endorsing the proposed Dominion organization was also passed.

After an interesting address on "Profits and Costs" by F. C. Lariviere of Montreal, followed by a general discussion, the convention adjourned to meet again on the second Tuesday in March, 1907.

CONDITION OF TRADE.

Wholesale houses report a very satisfactory Summer's trade with booked orders for Fall delivery even greater than the record made a year ago. Everywhere there is an optimistic feeling, the large crops having been successfully harvested in Western Canada. The traveling men are all on the road again after the vacation season and are cleaning up all orders for Winter goods not yet booked for delivery. In firearms and ammunition the sales have been exceptionally good. Some Winter lines, such as sleigh bells, horse blankets, skates, snow shoes, etc., are selling slowly in some districts, owing to large carry-over stocks following the very mild weather last Winter. Cutlery and silverware are selling in large quantities. In heavy goods there are shortages in bolts and nuts, with prices of all metal goods very firm.

NEWS OF THE TRADE.

W. J. Grant will open an agency in Montreal for the sale of William Hutton & Sons English cutlery and silverware.

Chesney & Smiley have purchased E. A. Latimer's Hardware, stoves and tinware business at Seaforth.

Harold Anderson, of Merrick, Anderson & Co., Winnipeg, was one of the Winnipeg four-oared crew which recently won the championship of America.

Doctor Bros., Moose Jaw, Sask., have opened a Hardware store.

T. L. Waldon, Winnipeg manager for Caverhill, Learmont & Co., Montreal, has resigned to become manager of the Winnipeg branch of the Marshall-Wells Co.'s business. The position vacated by Mr. Waldon has been filled by the appointment of Frank Ross Newman, Winnipeg manager for the Canadian Fairbanks Company.

The Shewin Williams Company are to erect a second Canadian factory at Winnipeg in addition to their plant at Montreal.

P. M. Young, Almonte, Ont., has sold his Hardware business to Taylor Bros., Carleton Place, who will conduct it as a branch store.

Thomas G. Scott has opened a Hardware store at Dunnville, Ont.

A. C. Lawson is opening a new Hardware store at Cartwright, Man.

REVIEW OF THE MARKETS.

WIRE NAILS: As most of the larger orders have been placed, there could be no advance in prices now without the creation of as much regret as different conditions would cause. The orders sent the mills exceed their capacity, and with steel scarcer than orders, the mills have their output handicapped, in fact. They are doing the best they can under the circumstances, some mills running double time, but with lack of material and needing skilled workmen as they do, it is impossible to fill orders complete. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers.....\$1.85
Carload lots to retail merchants.....\$1.90

New York.—The local trade is affected by several causes, among which may be mentioned a shortage in cars, which affects deliveries. Jobbers failing to receive their supplies from the mills there is only a normal demand for small lots from store, which are on the basis of \$2.10 per keg.

CUT NAILS: There has been only a moderately heavy demand during the past two weeks for Cut Nails, which is gradually becoming stronger under some concessions from official quotations of 5 cents a keg, which in Pittsburgh appears to be general. Quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—In proportion to the sale of Wire Nails the demand for Cut Nails is heard from. Quotations for small lots from store are on the basis of \$2.00 per keg.

BARB WIRE: Mills are experiencing difficulty in making prompt shipments on contracts, although the deliveries through August were said to be extremely large; in fact, away ahead of all previous records. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carload lots.....\$2.00 \$2.30
Retailers, carload lots.....2.05 2.35
Retailers, less than carload lots.....2.15 2.45

SMOOTH FENCE WIRE: There is a large business doing on contract orders, and the demands on the mills are very heavy. Some of the smaller mills are making concessions of about \$1.00 a ton for large orders. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carloads.....\$1.70
Retailers, carloads.....1.75

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

COPPER WIRE: Advances which have taken place have resulted in higher prices for Copper Wire, an advance of ¼ cent having been announced within a few days. This brings the price up to 20¼ cents in car lots, a slight advance being made for smaller parcels.

PLANES: Under date of September 1 Stanley Rule & Level Company, New Britain, Conn., announced a new schedule of prices on its Bailey Planes, to take effect at once.

SHOT: An advance of 5 cents per bag of 25 pounds going into effect with the opening of September. This makes the card prices as follows, terms, f.o.b. New York, net cash 30 days, or 2 per cent. discount for cash in 10 days:

| | 25-lb. bags. | 5-lb. bags. |
|--------------------------------------|--------------|-------------|
| | Per bag. | Per bag. |
| Drop Shot, sizes smaller than B..... | \$1.90 | \$0.45 |
| Drop Shot, B and larger sizes..... | 2.15 | .50 |
| Buck and Chilled Shot..... | 2.15 | .50 |
| Dust Shot..... | 2.35 | .55 |

From these prices an abatement of 10 cents per bag of 25 pounds is made on orders for ton lots and upwards.

ROPE: The following prices may be said to represent the market:

| | Cents Per Pound. |
|-----------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12½ |
| B Quality Manila..... | 11½ |
| Pure Sisal, 7-16 and larger..... | 9 |
| No. 2 Sisal, 7-16 and larger..... | 7¾ |
| No. 1 Jute, ¼ and larger..... | 8 to 8½ |
| No. 2 Jute, ¼ and larger..... | 7 to 7½ |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....39 cents per gallon.

In lots of 5 barrels or more.....38 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.

Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.

Calcutta Oil.....68 cents per gallon.

THE PHILADELPHIA TRADE.

With the advent of September and the delightfully cool days to which Philadelphia has recently been treated, it naturally brings to our attention the Fall season and things pertaining thereto, and in doing so, we are reminded of the particularly poor demand last winter for seasonable goods, such as sleds, skates, snow shovels, etc., on account of the lack of even an ordinary supply of cold weather, ice and snow in this section. but if there is anything in the saying that severe winters follow excessively warm summers, the same condition should not exist this year, and with business in the healthful state of to-day, we look for a good demand for goods of all descriptions—in fact, one of our greatest obstacles to overcome at the present time is to secure promised deliveries. Manufacturers all over the country are busy, and every report one reads on trade, crops, railroad earnings, etc., etc., seems to be interlined with that one word, "prosperity."

BIDDLE HARDWARE CO.

THE GRAPHITE TRADE.

Concerning the prospects of trade, we beg to state that our goods reach all parts of the United States, North, East, South and West, and the orders from every quarter are larger than usual and more of them, so that up to date, our business for the present year is larger than a year ago, and we see no cloud yet in the sky. Nature has assured the people of the United States once more an abundant crop and this crop will soon be on its way to the consumer and will soon be that much wealth to the people as a whole. The farmers have an abundance, and they are getting good prices. This makes them well-to-do and gives them plenty of spending money, and they spend it freely on necessities and some luxuries. It means the cancellation of their debts, if they have any, and their houses improved and their stocks added to, and their general condition in good shape. This means business for every one that has goods for sale.

JOSEPH DIXON CRUCIBLE CO.

JOHN A. WALKER, Vice-President.

THE ST. PAUL TRADE.

This week is one in which we see a great many of our customers, as our city has the State Fair within its limits. We do have a splendid Fair, exhibiting the largest and best of our products and of cattle and horses. It also brings in thousands of people because of very cheap railroad rates. Our customers show up by the dozens and it keeps our traveling force at home, who, with our house salesmen, entertain the customers. Sales to these visitors are few and small. They come to see, and not to buy. These annual visits, however, result in an immediate loss, though we may get it back by greater friendships existing by reason of better acquaintance. Business is surely good and prices firm and advancing. All goods are scarce. Factories away behind in deliveries, making it impossible to keep up stock. Salesmen from factories report that orders for next year are rapidly being placed with a prospect of greater shortage than ever before.

THE PITTSBURGH TRADE.

Cool weather during the early part of September brought an early demand for seasonable goods and the Fall business has opened up well. The demand for Summer goods kept up unusually late this year owing to the continued hot weather and the month just closed was an exceptionally busy one, the volume of business being fully 33 1/3 per cent. larger than last year.

Many of the company store buyers in the district surrounding Pittsburgh come to the city this month to make their Fall purchases. During the month of September, the Merchants & Manufacturers' Association of this city, offers free transportation to merchants coming to Pittsburgh and special rates are also offered by the railroads in connection with the Pittsburgh Exposition, which is now in full blast. These and other causes attract many buyers and the volume of business placed by merchants, who come to the city to do their buying, is very large during a period of prosperity like the present time.

The difficulty of securing prompt deliveries of many lines of goods from the manufacturers is beginning to handicap the jobber in his efforts to keep a full and complete stock. Some goods it is impossible to get without a delay of from four to six months and slow shipments by the manufacturers are the rule rather than the exception. Locally, all our industries are fully employed with a large volume of business in sight. We believe that the Fall season will bring an unprecedented demand for Hardware and that there will be plenty of business for every merchant who makes energetic use of his opportunities.

LOGAN-GREGG HARDWARE CO.,
P. L. LOGAN, Vice-President.

THE SAN FRANCISCO TRADE.

Fine buildings do not make good business, but it is good business that causes fine buildings to be erected. That business is booming in San Francisco every one knows, and, furthermore, nearly every one is well informed why it is booming. San Francisco has an enormous amount of capital; she is relatively better supplied with that adjunct to successful enterprise than any other city in the Union; her merchants have well established credits and they have used them to provide big stocks of goods which are being freely bought by a community filled with workmen who are receiving top-notch wages, and it can sell goods much more cheaply than any rivals can possibly hope to do. Under the circumstances the recorded fact that we, last week, passed Pittsburgh in the bank clearings race is not surprising. It merely shows that ashes and dust are no more of an obstacle to trade than the coal smoke of the great iron producing city named. The bank clearings of San Francisco last week aggregated \$43,914,147, an increase of 9.3 per cent. over the corresponding week of 1905, and for the first time San Francisco takes sixth place in Bradstreet's current list, having passed Pittsburgh

which showed up with only \$43,658,262, a decrease of 7 per cent. There were but five cities in the country whose clearings last week exceeded those of San Francisco.

Since the disaster four months ago on the west side of San Francisco bay, making four square miles of wreck and ruin in the center of San Francisco, the east side of the bay, where there was no disaster to speak of, has been advancing industrially by leaps and bounds. For instance, this last week of August I have noted that articles of incorporation of the Emeryville Hardware and Tool Company were filed in Oakland. Emeryville is a settlement on the northern boundary of Oakland, midway between Oakland and Berkeley, and rapidly building up. The capital stock of this new Hardware company is \$25,000 and the incorporators are H. E. Brittingham, H. N. Taylor and William Ingram, all substantial men of Oakland. And again, within the last fortnight, the Montgomery-White Hardware Company filed articles of incorporation in Oakland. The capital stock is \$50,000. The company intends to carry on a general Hardware business in Oakland and the incorporators are J. M. Montgomery, A. P. Leach and G. E. Archambault of Oakland; C. A. McAllister of Alameda and C. M. White of Berkeley.

Of course, wherever people read current news of the day it is known that San Francisco is again a city of pedestrians. Buses and wagons are carrying passengers to and from the ferry and railroad stations. Market Street, the main thoroughfare of the city, is a jumble of autos, motorcycles and vehicles of every description. Rapid passage is impossible, but the great majority are glad to go along even at a snail's pace, if their feet are spared the cobbles. The supply of vehicles is, of course, inadequate to accommodate those desiring transportation. More than this, the fee charged, twenty-five cents, makes a trip on wheels prohibitive to a large number. The trouble is the street car operators have gone out on strike for twenty-five cents per day additional to their \$2.75 per diem wage, and eight hours work instead of nine.

Within ten days the fire-scorched people of San Francisco subscribed one thousand dollars a day and sent it to their fellow sufferers in Chile. The Hardware people of the city took a hand in this without exception, this considerable factor of the \$10,000 being headed by the Pacific Hardware and Steel Company with a \$200 subscription. Several prominent florists had occasion last week to think kindly of the wholesale Hardware men of the city who gave them liberal orders for floral pieces to be sent across the bay for decorating the home in Vallejo of Miss Pearl Winchell on the day of her marriage to Lerton G. Denius, a traveling man for a Portland, Ore., Hardware house. The bride is the daughter of Charles Leroy Winchell, a prosperous Hardware merchant of Vallejo, and the couple were wedded beneath a floral horseshoe in a bower of ferns and palms.

SAN FRANCISCO RISING FROM HER ASHES.

With a grit that is characteristic of the West, with a determination which is bound to bring success, with a display of courage and energy most marvelous, the people of San Francisco are settling down to the great task of rebuilding a great city. The fire which swept the city wiped out practically the entire business and large part of the residential portion.

When one realizes that over 900 blocks of buildings were, for the most part, completely destroyed—that the distance around the ruined district is 28 miles, the great task ahead of rebuilding can be better understood. And the city will be rebuilt.

GREAT FUTURE FOR SAN FRANCISCO.

The great natural resources, the best harbor on the Pacific Coast, the location geographically, the richness of the country to the East, North and South, these same resources which made San Francisco the great city of the Western slope—these, backed now by the energy and loyalty of her citizens, will make this even a greater, more beautiful, richer and prosperous city in the future. San Francisco is to-day the great city of the great West, and in a very few years will be one of the greatest cities of the greatest country in the world. After the fire the first thing to be done was the erecting of temporary structures for the immediate use of the thousands of homeless people, and for business purposes. Now, the restoring of partially burned buildings and the erecting of permanent steel and stone structures is beginning. The greatest fire is being followed by the greatest building activity known in the history of the world.

A GOOD SIGN.

Much has been said about the losses sustained by the citizens of San Francisco. These losses are being met with a pluck seldom seen. And one of the best signs of the faith of the citizens in the future of their city is to be found in the small amount of property offered for sale. Many signs there are "For Lease," but in all my week's stay in the city I saw but three signs "For Sale." The people are going to stay. One or two lots on lower Market Street have been sold, but in each case for more than their valuation before the fire.

ENTERPRISE OF HARDWAREMEN.

Now, four months after the fire, almost all of the old Hardware houses are re-established with complete stocks, and, of course, are doing big business. One of the first of these concerns to get a location was the Osborn Hardware and Tool Co., formerly of Market St., now at 517 Golden Gate Ave. J. P. Eisen is president. P. J. Eisenmann, who is general manager and treasurer of the concern, in speaking of present conditions said: "We are doing all the business we can handle." All these temporary buildings require more or less Hardware, almost all the carpenters, masons and mechanics need tools—people all need household utensils, and of course paints and glass are in great demand. There are more Hardware stores to-day in the city than there were before the fire and there is enough business for all."

**FIRST IN THE FIELD.**

E. D. Vaut has the honor of opening the very first Hardware store in San Francisco after the fire. Mr. Vaut has just returned from Alaska where for seven years he had operated a successful Hardware store. Upon hearing of the fire, he went at once to Seattle, where he procured a stock and by the time it arrived Mr. Vaut had his building up at 115 Grove St., and early in May opened his store for business. E. D. Vaut Hardware Co., will make a specialty of merchandise, tools and pick-up Hardware. Mr. Vaut said that his present location was only temporary, and that in the near future he hoped to secure a store on Market St.

One of the oldest established concerns to procure a location

and complete stock is the Dunham, Carrigan & Hayden Co. With wonderful pluck and in a surprisingly short length of time, this concern at once secured a new stock, and have maintained their force of some forty salesmen hardly without interruption. The business of the Dunham, Carrigan & Hayden Co. is now going on with more activity than before the fire. This concern is making a big bid for the sporting goods trade, which department is in charge of Mr. Nelson, one of the most popular sporting goods men to the Coast.

Another wholesale concern to speedily recover from the fire is the Ralph Brown Co., now located in their permanent new building on South street. In addition to a line of tools, Hardware specialties, and dog collars, the Ralph Brown Co. carry a very complete line of sporting goods. Mr. Brown has been in the trade for years and understands well the local demands.

A FINE RETAIL STORE.

A finely stocked store located at 950-52 Van Ness Avenue is now occupied by Chas. Brown & Sons with a big stock of stoves and ranges, shelf and building Hardware and tools. The extensive line of Kitchen supplies and Hotel and Restaurant goods carried by Chas. Brown & Sons is well displayed, making an unusually attractive appearance. Van Ness Avenue, a few months ago the beautiful residential street of San Francisco, is now the centre of the temporary retail district of the city. On both sides for blocks one and two story modern or sheet iron buildings have been erected, giving the appearance of a frontier town rather than the principal business section of a city, with our 200,000 population.

The new firm of Brittain & Co., are located on Van Ness Avenue at the corner of Turk Street. Mr. Brittain was for some years associated with the Pacific Hardware & Steel Co.

GREGORY HARDWARE CO.

One of the best equipped stores and best arranged in the city, is that of the Gregory Hardware Co., located at 519-21 Golden Gate Avenue, within a block of Van Ness Avenue. By well-placed advertising and by the use of thoroughgoing practice and up-to-date business methods the Gregory Hardware Co. at once established themselves as one of San Francisco's principal business houses. A strong line of builders' Hardware is carried, and complete and up-to-date lines of household utensils, glass, paints and oils. The Gregory Hardware Co. are also carrying a full line of doors; sporting goods are being added. L. A. Spangler, who is the general buyer for the Gregory Hardware Co., is one of the best posted Hardwaremen on the Coast.

In speaking of trade conditions Charles M. Sage, of the Sage Hardware Co., said: "The demand for goods here now is so varied that the San Francisco Hardware Store to-day must carry a stock more as you would find in a country store. We will have a call for a fine tool, next customer will probably want a buck-saw—then a fine carving set will be sold. There are a lot of Hardware stores but there is business for all." The store of the Sage Hardware Co. is at 1462 Market Street.

Stalder & Hinkelbein are now located on Polk Street, between Sutter & Bush, and are taking care of their old customers in Hardware and stoves. This firm are making a special bid for roofing and jobbing work and are kept busy by the great building operations.

At 728 Polk street is the Union Hardware Co., carrying a big line of 'mechanics' tools and Hardware specialties. Electrical goods are also being added.

The big store of the California Hardware and Cutlery Co. at 812 Van Ness Avenue, is well stocked with general Hardware. This is a new concern, being a partnership formed by J. H. Miller, S. B. Moe, and M. A. Johnson. Mr. Miller of the firm said that the concern were handling all the business possible and that the future was filled with brightness.

One of the old concerns to get a good location near his old store is S. J. Dean, now at 1532 Market Street. Mr. Dean spoke encouragingly of local conditions and of the prospects in the future. He said that there was of course a great demand for tools of all kinds.

BACK AT THE OLD STAND.

Seller Bros. & Co., whose big store at 101 and 103 Market Street was gutted by the fire, and all stock destroyed, are again in the old store and stock is arriving daily. With great activity Seller Bros. & Co. went at once to work after the fire and fitted up the building and ordered a new stock. There was an air of activity about this house which spoke volumes for the business, the house is already doing.

A duplicate of the old familiar sign seen by so many people for years on lower Market Street of the Alexander-Yost Co., is now over this firm's store at 1437 Pine Street. The old friends of the concern are finding the new store and proving their loyalty.

(Concluded on page 40.)

THE GENUINE KAMPFE

THE RAZOR.

**STAR
Safety Razor**

Price \$1.50

THE BLADE.

Three Stars for Shavers

THE CASE.

SOME things, though old, have never been improved upon. Sunlight is still the best light and The Star Safety is still the best razor. New-fangled fad razors and cheap imitations of the Star have come and gone, but after the 30 years that the Star has been in use, it is still the best shaving instrument man has.

This is because the Star Safety razor is, first, built upon correct principles, and second, made of the very finest materials. The Star blade is hand-forged in the old-fashioned way from the finest razor steel, ground concave and tempered by a process peculiar to Kampfe Brothers. The Star process makes the kind of razors that are

handed down from grandfather to father and son.

The Star Blade can be honed and stropped more easily and better than the old-fashioned razor—if our patent Star Strop is used. A blade that cannot be honed or stropped, cannot give you the velvety shave of a Star. The Strop puts a finer edge on a blade than can be done by any sort of grinding. Naturally this fine edge is dulled by one shaving, so that a razor blade must absolutely be stropped for each shaving if the shaver is going to get the best kind of a shave.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. 6. CONTRACTS BY MAIL, TELEGRAPH, TELEPHONE.

A person making an offer may require that the acceptance shall be made in a particular manner; in such a case an acceptance in any other manner will not constitute a contract.

Example: A in Detroit wires B in New York, that he will sell five hundred dozen eggs at eight cents a dozen, and adds, "Wire acceptance." On receipt of the offer B writes and mails a letter of acceptance. On the following morning, before the letter of acceptance is received by A, A sells the eggs to another customer. B is without recourse. An acceptance wired, however, in case the offer had said, "mail acceptance," would probably be sufficient.

A person making an offer may require that the acceptance be communicated to him, and in such case an acceptance not communicated although actually sent, will not fulfil the requirements of a contract.

In Massachusetts the law is contrary to the generally accepted law as laid down in this article. There, it appears, the receipt of the acceptance is always deemed necessary to the completion of the contract.

A person may not make an offer and stipulate "If I do not hear from you I will consider this offer as accepted," and bind the person to whom he has made the offer by that person's mere silence. Mere silence in the law is not consequent, generally speaking, though there are instances where this common law, "silence gives consent," is true in the law.

An answer giving the price of an article in response to an inquiry as to its price is not necessarily a proposal or an offer to sell it to the particular person inquiring the price.

Example. B in New York writes A in Detroit asking the price of five hundred dozen eggs. A writes, "eight cents a dozen." B responds, "I will take them." A contract is not thereby completed. A's statement of price does not necessarily mean that he will sell them to the person inquiring.

Most, if not all, the rules relating to contracts by letters are equally applicable to contracts made by use of telegraph.

Where one party makes an offer by telegraph which is accepted by the other party by telegram, the contract is as valid as though it had been made by letters through the mails, or even directly by the parties in person. The contract is completed by telegraph when the acceptance is written and handed to the telegraph company, or its agent, for transmission.

If the offer is communicated by mail and the acceptance is communicated by telegraph, when is the contract completed? The doctrine of agency, to which we have referred, and by which the offerer makes the post his agent, and by reason of which the delivery of the acceptance to the post is the affirming of a contract would not seem to apply here, as the making of the offer by mail cannot make the telegraph company an agent of the offerer. If the offer is made by post and the acceptance is made by telegraph, the telegraph company is really the agent of the acceptor, and therefore the notice of acceptance in the case of a telegraphic message in reply to a letter must be delivered to the offerer or to his duly authorized agent, before the contract is completed and binding.

When an offer is made by telegraph it is best to accept it by telegraph, as the handling of the message of acceptance to the telegraph company for transmission completes the contract, the telegraph being the implied agent of the offerer. By mailing a letter accepting an offer made by telegraph one is liable to be defeated in his acceptance by receiving a retraction of the offer before the acceptance reaches the offerer. The postoffice in that case cannot be considered as the agent of the offerer, he having chosen the telegraph as the means of communication.

Persons using a telegraph as a mode of communication are not responsible for, nor bound by the errors of the operators in transmitting messages.

Example. B in New York telegraphed A in Detroit asking on what terms he would sell him one hundred dozen eggs. A answered stating his terms. B telegraphed, "Send one hundred dozen." The operator sent it "Send five hundred dozen." A sent five hundred dozen eggs. B refused to accept more than one hundred dozen, on the ground that his telegram as he had written it specified one hundred. B could be compelled to take but one hundred dozen eggs.

Inasmuch as communications by telephone are personal, although the parties are out of sight of each other, the ordinary

rules of personal communication apply. The only question that arises is the question of fact as to whether the person to whom or by whom the offer was communicated was the principal, or the principal's duly authorized agent. This of course is difficult to prove oftentimes, but where the contract is in dispute it is necessary to do so.

SAN FRANCISCO RISING FROM HER ASHES.

(Concluded from page 38.)

A good advertiser is the Williams Hardware & Stove Co. All through the city are the signs of this concern and everyone knows the store is located on Market Street near the corner of Van Ness Avenue.

The Palace Hardware Co., have opened at 456 Golden Gate Avenue in the building erected specially for them. It is well arranged and has handsome fixtures—give a permanent as well as up-to-date appearance.

The big wholesale stock of Baker & Hamilton was completely destroyed. The concern are now handling their trade in good shape, being located at 115 Berry Street.

A big line of stoves and kitchen goods is being shown by W. W. Montague & Co., now located at 2251 Folsom Street.

That justly popular Hardware man, C. H. Philpott, has started again in the retail business with a well stocked store at 135 Fifth Street. Mr. Philpott said that it was not a question of selling goods as much as one of procuring and delivering them when sold.

When one knows the actual conditions it is more easy to understand the great future of San Francisco. There is a demand to-day for 30,000 more men. The present demand for labor is so great that a good bricklayer can easily make \$8.00 a day—and some are being paid \$10.00. Plasterers are being paid the same—while the minimum scale for carpenters and metal workers is \$4.50. There are building operations under way now of over \$50,000,000 in value.

The history of San Francisco has been one of steady growth in wealth and in commerce. The future is still greater than the past. The sun which set upon a burned and ruined city has risen again to shine upon a new, a greater San Francisco—more beautiful than the old, with a commerce which will extend to all parts of the globe.

HAMMERNAIL.

Absolute Accuracy

beautiful finish and strength of shooting is shown in the

FAMOUS Hamilton Rifles

MODEL No. 23

Retail Price \$3.00

Full length 35 in. Barrel and action 21½ in. long. Take-down, Bolt-action Model. Stock Genuine Walnut. Barrel finely tapered and beautifully finished in blue-black gun finish. Automatic action in loading and ejecting exploded shell.

SELLING STOVES.

A talk on "How to Sell Stoves," by W. T. Leckie, Michigan representative of the Estate of P. D. Beckwith, Dowagiac, Mich., opened the Thursday morning session of the convention of the Michigan Hardware Association in Detroit, August 8, 9 and 10. He spoke in part as follows:

I believe in order to sell Stoves or any other article the most essential thing is to know about the article one is going to sell and to know it thoroughly. The next most essential thing is to have implicit confidence in the article. In order to have confidence and believe thoroughly in the article I believe you should sell good goods, high grade goods with a reputation, something that will stand up and make good for all of the good things you say for it.

One of the mistakes I think a great many retailers make in buying goods is that they don't listen to the story that is being told them by the man who is selling the article. I believe to-day that the greatest educator with which the retailer comes in contact is the commercial traveler. I do not say this to you because I happen to be one of that unfortunate army, but if you are to know the qualities of the goods you are buying, and you are buying goods to sell, you must listen to the story of the man who sells them to you. I know the average retailer is a busy man. And he often says, "if I spent the time the average traveler thinks I should spend with him I would not accomplish anything."

There are two kinds of travelers, one is a gentleman and the other is the boor who never knows when to quit. When the gentleman traveler comes to call treat him with every courtesy; in fact, treat him the same as you would a customer. The boor I would show to the door. By listening to the story of the salesman you will understand the merits of the article you wish to sell, and this you should do. It is as necessary for the clerk to know about your goods as it is for you. How many of you take your clerks into your confidence or give them all the information you know about what you are dealing in? I believe the best thing the retailer can do is to educate the clerk on every article that he wishes him to sell. And I believe it is just as essential for the clerk to try and learn and pick up all the knowledge he can as it is for his employer to inform him. There is not a single walk in life to-day that has as many good openings in it as that of the salesman. Every concern, manufacturer or jobber, is always on

the lookout for a good salesman, and I believe that salesmanship should be classed with the arts.

Another very necessary thing in the sale of Stoves is that of display. If you are going to be successful in the sale of any line of Stoves you must display them on your floors. I have gone into stores where I have seen Stoves covered up with blankets or harness or dishpans, and nothing could be seen of the Stove but perhaps the legs. And this man will tell me that he has not been as successful in selling Stoves as Jones over there; that he cannot sell them, and one of the great reasons why he does not sell them is that he does not display them. I believe when a lady walks into a store to buy a Range or any other article it is half sold when it appeals to and strikes her fancy, but it ought to be clean and polished and made attractive.

Another thing the retailer falls down on is letting his competitor run his business. A great many times you meet a man in the Hardware business who says, "I have to have goods of a certain price because my competitor has them." I don't think that is necessary. I think if every retailer will handle a good line and present it properly to his customers the other fellow won't run his business. The successful fellow is the one who runs his own business and pays no attention to his competitor.

HUMOROUS LOGIC.

That Kentucky professor who recently advocated the practice of "spraying the lips with a carbolic atomizer before kissing to avert danger of death dealing microbes," should have been addressing an old maids' club, and not a teachers' institute. When teachers kiss it is no cut and dried affair, they are not thinking of either microbes or atomizers.

A recent newspaper dispatch tells of a New Jersey woman who has trained her cats to run up a cherry tree when she gets after them with a broom, and as long as they are in the tree they keep the birds away from the cherries. Larger animals can be trained in the same way. We have often heard of men who would run from a broom in the hands of a determined woman.

A merchant of St. Joseph, Mo., recently had a bargain day with dishpans as the attraction, and the bargain hunters really fought over them. That shows what a habit bargain hunting has become. Probably not a single shopper in the bunch liked to wash dishes.

Gillette Safety Razor

NO STROPPING NO HONING

**It Pleases
Every User.**

**The Most

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Birmingham, Ala.—The Gilbert Nut-Lock Company has been incorporated. Capital stock \$50,000. The objects of the corporation are to manufacture the Gilbert patented nut-lock to be used on "T" crossings and rails. James Gilbert is named as president in the incorporation papers, F. T. Johnston, vice-president, and J. M. Caldwell, secretary.

Chattanooga, Tenn.—Application for charter for the Fields Manufacturing Co. has been filed by B. F. Fritte, F. F. Granger, W. G. M. Thomas, L. Thomas and William Thomas. Capital to be \$10,000. The purposes of this company as set forth in the application for charter are to engage in the manufacture of all kinds of utensils, farming implements and other articles not named.

Canandaigua, N. Y.—Lawrence-Bostwick Manufacturing Co., Ltd., has been incorporated for the purpose of manufacturing cream separators, tinware, etc. Capital, \$40,000. Incorporators: M. H. Buell, Akron, N. Y.; E. L. Vezina, W. J. Brown, Canandaigua, N. Y.

Chester, Pa.—A new co-partnership under the firm name of Eurich & Tryens has been formed which will engage in the manufacture of drop forging dies and automobile and gas engine parts.

Chicago, Ill.—The Lovejoy Tool Works has been incorporated with a capital stock of \$35,000, and will continue the business heretofore conducted for some years under the name of Thomas H. Lovejoy. Mr. Lovejoy is one of the incorporators of the new styled company, and with him are William H. Dangel and M. E. Brennan. The line of manufacture consists of boiler makers' and railroad supplies.

East Orange, N. J.—Standard Separator Company has been incorporated with a capital of \$250,000; location in Illinois Chicago; capital in Illinois, \$1,000.

Mincola, N. Y.—New York Beck Lamp Co. has been incorporated to manufacture lamps and other devices and machinery. Capital, \$50,000. Incorporators, W. Ottmann, H. Schwartz, S. S. Sanguinette, New York City.

Los Angeles, Cal.—The Antique Hardware Manufacturing Co. has lately been incorporated under the name of the Western Lock & Hardware Manufacturing Co., with a capital stock of \$200,000. The incorporators and officers are: John Q. Tufts, president; Orville Ewing, vice-president and manager, and F. R. Greenleaf, secretary and treasurer.

Meriden, Conn.—A certificate of incorporation has been filed by the F. W. Loll Manufacturing Company. The company will manufacture kitchen utensils and light Hardware. It has an authorized capital of \$5,000. The incorporators, all of Meriden, are: Fred W. Loll, Clarence W. Otto and Albert N. Butler.

Newark, N. J.—International Nut Lock Company has been incorporated; agent in charge, Henry Pomeretne. Capital stock,

\$300,000. Incorporators, Le Roy Armstrong, Joseph H. Strange, Louis D. Fienot. The company is to manufacture locks, nuts and all kinds of machine Hardware.

New York, N. Y.—Conirbo Mfg. Co. has been incorporated for the purpose of manufacturing tools, devices, Hardware, etc.; capital, \$5,000. Incorporators: C. Ackesler, J. Weissner, R. J. Sachers, New York City.

Newark, N. J.—International Nut Lock Co., No. 286 Market Street, has been incorporated to manufacture nut locks, washers, screws and machine Hardware; capital, \$300,000. Incorporators: Le Roy Armstrong and Joseph H. Strange, South Orange, N. J.; Louis D. Frenot, Newark, N. J.

Pavilion, N. Y.—A new industry has recently come into prominence in this village. Rufus Hutchinson, who owns and controls a patent used in construction of wire fence, has installed a plant for making wire hooks with which to fasten wooden slats at right angles to the wires, stiffening the fence and reducing the number of posts necessary for its support. The wire is fed into the machine automatically from the bale, and the hooks are turned out complete at the rate of 150 and upwards per minute. The motive power is a gasoline engine.

Portland, Me.—Nemo Heater Company has been incorporated to manufacture appliances for heating, cooking, etc. Capital, \$1,000,000. President, P. C. Veerie; treasurer, D. W. Wormwood, Chelsea.

Sheffield, Ala.—A declaration of incorporation by the Stanford Steel Range Company has been filed. The new industry will manufacture, buy and sell steel ranges, heating furnaces and machinery of all kinds, and do all kinds of steel foundry and machinery work. It is capitalized at \$20,000, and its principal office will be at Sheffield. The incorporators are William R. K. Stanford, E. B. Wright, C. T. Robinson and R. H. Wilhoyte, all well-known citizens of Sheffield. William R. K. Stanford is president of the new organization; C. T. Robinson, vice-president; and E. B. Wright, secretary and treasurer.

Changes.

Bristol, Conn.—The Ira B. Smith Co. has succeeded Ira B. Smith in the manufacture of light Hardware and specialties; also dies and punches. The company comprises Marshall I. and Robert M. Smith.

Buffalo, N. Y.—Plans have been filed for a \$6,000 addition to the plant of the Buffalo Wire Works Company at 623 Jackson street.

Bridgeport, Conn.—The Standard Manufacturing Co., manufacturers of gear cutters, special light machinery and electrical novelties, are to erect a factory building with boiler house and elevator.

Chattanooga, Tenn.—The Chattanooga Plow Company has just completed the erection of a brick addition to the foundry which will enable the company to increase its melting capacity to twenty-six tons per day. The new addition is 85x126 feet in dimensions and is equipped with all modern appliances for the foundry work.

Greenfield, Mass.—The Goodell-Pratt

Company is making plans for the enlargement of its works which will greatly increase the output of the plant, besides considerably increasing the working force. The company has had plans drawn for a new foundry and will have everything in readiness to erect it in the early Spring. The building will be 75 by 170 feet in size, built of brick, one and two stories high. It will have a large cupola and will contain a complete foundry equipment of large dimensions.

Oakland, Cal.—The Byron Jackson Machine Works of Oakland, Cal., which formerly had its plant in San Francisco and since the fire has housed its machine shops in a hastily constructed warehouse, intends to erect a steel building 110 by 250 feet, in West Berkeley. In addition to this building a two-story pattern shop will be erected.

Newcomerstown, O.—The Rex Saw & File Co. is now in full running order. The capacity of the plant when in full blast will be between 300 and 500 dozen files per day.

New Britain, Conn.—The Russell & Erwin Manufacturing Co., manufacturers of Hardware, are to erect a building to be devoted to general manufacturing purposes.

Providence, R. I.—The Brown & Sharpe Manufacturing Co. is increasing its machine shop capacity by adding a story to the large building in which are located the offices, raising it from a three to a four-story structure, exclusive of basement.

Pawtucket, R. I.—The Potter & Johnson Machine Co., manufacturers of machine tools, are erecting a new building to be used for storage purposes.

Providence, R. I.—The Bullard Automatic Wrench Co. are planning the erection of a new and complete manufacturing plant in that city.

Reading Pa.—W. F. Price, manufacturer of gasoline lamps, has recently added the chandelier business, and is now making a full line of gas, electric and combination chandeliers.

St. Louis, Mo.—Two new factories, employing a total of 600 men, are to be built in Valley Park within the next three months. Papers for consummation of the deals already have been drawn and executed. The companies moving their headquarters to the county are the Acme Truck and Tool Company and the Wilson Heater Company. The factories, it is claimed, will cost \$250,000 each. The tool company employs 400 men and the Wilson Heater Company 200.

Toledo, Ohio.—The J. M. Skinner Bending Co. has amended its charter so as to enable it to make scrapers, wheelbarrows, carriage woodwork, road scrapers, and agricultural implements of all kinds. The company's plant is located on Broadway, at the Wabash tracks, and some improvements are to be made immediately to take care of the new products of the concern. The company will erect several small buildings at once.

Miscellaneous.

Erie, Pa.—At the annual meeting of the stockholders of the Griffin Manufacturing Co., held recently, it was decided to double the capital stock of the company, all the new stock being taken by former stockholders.

logue now on the press. Write for it.

Atlantic Stamping Co., Rochester, N. Y.
185 Ames Street.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Aberdeen, S. D.—H. E. Roilien is about to open a sporting goods store.

Bridgeport, Conn.—The Hardware & Sporting Goods Supply Company has been incorporated with an authorized capital stock of \$10,000. The incorporators are: Robert W. Curtis, E. F. Leeds and Beatrice W. Leeds.

Camden, N. J.—The Wilmot Motor & Cycle Mfg. Co. has been incorporated for the stated purpose of manufacturing motorcycles, bicycles and automobiles. The capital stock is \$125,000 and the incorporators named are C. M. Cushman, W. Davis, A. S. Flowers and M. M. Garrison, of Camden, and R. K. Dix, of Atlantic City.

Camden, N. J.—Wilmot Motor & Cycle Manufacturing Co. has been incorporated to manufacture automobiles, auto cycles, bicycles, etc. Capital, \$125,000. Incorporators: C. M. Cushman, W. Davis, Camden; R. K. Dix, Atlantic City; A. S. Flowers, M. M. Garrison, Camden.

Cartwright, Man.—A. C. Lawson is opening a new Hardware and sporting goods store.

Elmira, O.—The Columbia Steel Co., whose factory is in Elmira, Ohio, has become a Connecticut corporation, as one of the Pope interests. The corporation will begin business with \$1,000 and the amount of authorized capital stock is \$300,000, divided into 3,000 shares at \$100 each. George Pope, W. C. Walker and Geo. T. Morrow, all of whom are identified with the Pope Mfg. Co., are named as the incorporators.

Syracuse, N. Y.—The Syracuse Rubber Co., and the Rochester Rubber Co., who deal somewhat extensively in bicycle tires, have become incorporated under New York laws as separate companies, each with \$25,000 capital. F. C. Howless, of Syracuse; E. R. Rice of Buffalo, and C. W. Barnes, of New York City, are named in the papers for both companies.

Montreal, Can.—The Monarch Motor Co., capitalized at \$250,000, will go into the manufacture of automobiles.

New York, N. Y.—The Badger Brass Mfg. Co., of Kenosha, Wis., makers of the Solar lamps, have incorporated their Eastern factory, which is situated in New York City, under the laws of New York State. The capital is placed at \$1,000, and the directors for the first year are G. A. Yule and R. H. Welles, of Kenosha, and L. J. Keck, of New York.

Portland, Ore.—Manufacturers of sporting goods are asked to send catalogues and price lists to Backus & Morris, who have opened a store in Portland, to be known as "The Hardware Shop." They will make a specialty of fishing tackle and sporting goods.

Ranferly, Alberta.—Labelle Bros. have opened a Hardware and sporting goods store.

Regina, Sask.—Armstrong, Smith & Downswell have opened a new Hardware and sporting goods store and wish to re-

ceive catalogues.

Slocomb, Ala.—The Metcalf Hardware Company have opened a retail sporting goods business.

Trenton, N. J.—A certificate of incorporation was recently filed by the Trent Auto & Supply Co., whose principal office will be at 118 North Warren Street, in charge of John F. Toman. The capital stock is \$10,000. The company will handle automobiles and general sporting goods.

Changes and Improvements.

Almonte, Ont.—Taylor Bros. & Co., Carleton Place, have purchased the Hardware and sporting goods business of P. M. Young, and will conduct it as a branch store.

Boynnton, I. T.—Howard Bros. & McCuen have succeeded to the Hardware and sporting goods business of the Howard Hardware Company.

Coshocton, O.—W. D. Tracy has purchased the bicycle store of H. O. Nelson located in the Mulligan property on Main street.

Stanton, Neb.—Gustav Krenzein has bought out the sporting goods business of the Wagner Bros.

Montreal, Canada.—John Miller & Son have moved into larger premises at 321 St. James Street. They have a large trade in bicycle, automobile and electrical supplies.

Melbourne, Ont.—J. E. Hussey has added a stock of Hardware and sporting goods to his tinware business.

New Milford, Conn.—M. H. Mallett has succeeded to the sporting goods and Hardware business of Straub & Mallett. In the future more attention will be devoted to arms, ammunition, etc.

Rockford, Ill.—The sporting goods store and business of H. D. Ticknor on North Main Street, was recently purchased by Louis Thiess.

Springfield, Mo.—Hagebush & Weaver have purchased the business of the Weaver Hardware Co., and will hereafter handle a good supply of sporting and athletic goods.

Table Rock, Neb.—Carmichael & Smith have sold their sporting and athletic goods business to Nemescheck Bros.

Wilkesbarre, Pa.—Although the Kingston Garage and Motor Car Co. has changed hands, the bicycle department will be continued as heretofore. G. W. Schulte, of Scranton, Pa., has purchased the business from S. R. Snyder and J. H. Brandt, and installed S. D. Bishop as resident manager.

Waynesburg, Pa.—The Luce Bros. have purchased the sporting goods business of Walter Scott.

Embarrassments.

Chicago, Ill.—One of the immediate results of the disastrous failure of the Milwaukee Avenue State Bank in Chicago, so far as the bicycle trade is concerned, is the placing of the Steel Ball Co., of this city, in the hands of a receiver. Judge Berthea, sitting in the United States District Court, appointed W. F. Ziebel to take charge of the property of this company. According to the statement of the Bank Examiner who has been at work on the books ever since the bank closed, the indebtedness of the Steel Ball Company to

the institution is in the neighborhood of \$180,000.

Miscellaneous.

ITALIAN DUTIES ADVANCE.

A commission has just submitted a report to the Italian Parliament according to which the duties on cycles, motorcycles and parts will be raised to the following charges: Motorcycles, per machine, 80 liras (\$16.00); ordinary cycles, per machine, 42 liras (\$8.40); cycles with more than three wheels will have to be paid for as carriages for the transport of persons; parts of cycles and motorcycles, with the exception of such as can be classed as raw steel or iron parts per 100 kilos, 100 liras (\$20.00); cycle frames will be taxed as finished machines.

SMOKE AS A PUNCTURE FINDER.

How to locate punctures in tires which are porous, long has been a much argued question. The problem has now been solved once and for all by Charles Long, a Welsh collier living near Cardiff. By his method a thick smoke is pumped into the envelope, which leaks out every flaw and reveals its exact location.

The invention takes the form of a specially prepared fuse which, when ignited, is almost flameless, and gives off a large amount of very dense white smoke, and which is said to be non-injurious to rubber. The fuse is struck on an ordinary matchbox, and placed in a suitably constructed small iron cylinder, which can be at once attached to any inflator.

The smoke is pumped into the tube and invariably locates the puncture in a few seconds. This whole contrivance need not be more than an inch and a half in length, and can be conveniently carried in the waistcoat pocket. The device complete can be manufactured at a cost of less than a nickel.

MANUFACTURERS RECORD

Meriden, Conn.—The stockholders of the Aetna Nut Company at their meeting recently elected the following directors: Andrew S. Upson, Unionville; H. H. Clark, Milldale; S. D. Neal, M. B. Wilcox, Southington; A. R. Treadway, Cleveland, and H. C. Judd, Hartford. The directors then elected as follows: H. H. Clark, president; B. S. Porter, secretary and treasurer; Stephen D. Neal, general manager.

Southington, Conn.—The annual meeting of Clark Brothers Bolt Company was held recently and the following directors were elected: Henry H. Clark, Charles G. Perciani and Edwin S. Todd, of Southington, and Charles W. Clark, of Chicago. The following officers were also elected: H. H. Clark, president; Charles H. Clark, vice-president; Edwin S. Todd, secretary and treasurer; Charles Perciani, superintendent.

Southington, Conn.—The meeting of the stockholders and directors of the Southington Cutlery Company was held recently, at which the stockholders elected the following directors: M. B. Wilcox, C. H. Clark, M. H. Holcomb, Charles Campbell, Southington; C. E. Jennings, Webster R. Walkley and George Munson, of New York City. The officers elected were: C. E. Jennings, president and treasurer; M. B. Wilcox, assistant treasurer; J. H. Baldwin, secretary.

in a Revolver. If you do not wish to sell a customer a second time, then it might pay you to offer him a cheap and worthless weapon on which you make a big profit. If you want his future trade, sell him the famous

H & R REVOLVER

recognized as the greatest revolver value for the money. H & R Revolvers are noted for their accuracy, safety and durability. Made of the best obtainable materials, in a factory fitted with the most improved machinery, operated by highly skilled mechanics; each one is rigidly inspected to insure absolute freedom from flaws of any kind. Every part is accurate to the thousandth of an inch. H & R Revolvers are free from shake or rattle, and if treated with ordinary care will last a lifetime and can always be depended on. When you sell one you make a friend of your customer, and he'll come again to buy cartridges or other goods he may need in your line.

If you have never handled these goods, it is to your interest to put in a stock at once. They are the kind that don't stay on the shelf, and that make satisfied customers. Send for catalogue.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

The Gem Mop Head

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

SOMETHING FROM

To the Wholesale Hardware Salesman
making the largest sales of our Product
for one year.

| | | | | | | |
|---------------|---|---|---|---|---|--------------|
| First Prize, | - | - | - | - | - | \$1,000.00 |
| Second Prize, | - | - | - | - | - | 500.00 |
| Third Prize, | - | - | - | - | - | 250.00 |
| 10 Prizes of | - | - | - | - | - | 100.00 each. |

To all others who enter the contest, 5% on their sales of our
goods for one year.

Here is an opportunity for EVERY salesman of the wholesale houses handling our goods to make extra money for themselves and profit for their houses.

If you wish to enter the contest, write us at once, giving us your name and address and the house you travel for, and we will enter your name on the list and give you any information you may require, sending you one of our new catalogs and advise you when the contest will commence. Every three months you will send us a report of your sales certified to by your house, and we will issue a bulletin giving the standing of the contestants.

For years we have realized that but a small percentage of sharpening stones has been sold to the consuming public that could be disposed of through a proper display and sales medium. The Selling Assortments were the outcome of our constant endeavor to remedy this condition. Retail merchants handling the cabinets report largely increased sales. This success warrants the larger distribution of the Selling Assortments among retail merchants.

As you will see on the opposite page, we are inaugurating a scheme with the retailers of displaying and advertising our goods. With the co-operation of the salesmen travelling for the wholesale houses and the retail merchants, we believe that a larger portion of the parties that need sharpening stones will buy them.

Let us hear from you promptly so that we can get our list of contestants ready.

PIKE MFG. CO.

GOOD FOR YOU PIKE

To the Retail Hardware Merchants.
Prize and Premium Offer
for Display and Sale of Sharpening Stones.

| | | | | | |
|---------------|---|---|---|---|-------------|
| First Prize | - | - | - | - | \$100.00 |
| Second Prize | - | - | - | - | 50.00 |
| Third Prize | - | - | - | - | 25.00 |
| Ten Prizes of | - | - | - | - | 10.00 each. |

In addition to these prizes we will offer the following premiums:

CHOICE ONE YEAR EXHIBITS One of our No. 2844 combination razor hones in silver case with chamois lined compartment for razor in the cover, the hone in the case being a 7 in. Extra Choice selected Belgian. One of our No. 2843 silver cases containing razor hone but without compartment in cover for razors.

CHOICE 6 MO. EXHIBITS One of our No. 2845 natural stone carving knife hones or steel with handsome silver handle. One of our No. 2842 handsome silver boxes containing Arkansas stone about 3½ x 1.

CHOICE 3 MO. EXHIBITS One of our No. 2832 which is a handled silver box containing an Arkansas stone about 2 in. long by 1 in. wide; a beautiful and unique present for a gentleman's desk or lady's manicure set. One of our No. 2833 which is similar to No. 2832 but without handle; has, however, an ornamental silver dog on the cover.

2 MO. EXHIBIT One of our silver souvenirs.

First Prize will be given to the retail dealer who makes the best and most comprehensive display of our goods in his show window or on his counters for one year and whose purchases during the year are not less than \$300.

Second Prize will be given for an exhibit of our goods as specified in the foregoing paragraph for not less than nine months and purchases during the year of not less than \$200.

Third Prize will be given for the best exhibit of our goods for a period of six months and purchases during a period of one year of not less than \$100.

Fourth Prize will be given to ten other dealers for making exhibits of our goods as indicated above for three months or more and whose purchases amount to not less than \$100 for the year.

To others making exhibits of our goods for periods from two months to a year, we will award premiums as indicated in the foregoing list.

The fact is a very small per cent. of sharpening stones have been sold in the past that could be sold were they properly brought to the attention of the user. Since we have put on the market attractive cabinets containing our Selling Assortments, retail dealers having them report largely increased sales, and we believe if retailers will display these Selling Assortments prominently they will sell large quantities of sharpening stones, because not one family in a hundred have anything of this kind and not one mechanic in fifty has as many as he requires.

We suggest your advertising in local papers and will furnish you the copy for such advertisements if you wish. We anticipate the full co-operation of the wholesale and retail dealers the coming year, and will aid them in every way possible to increase sales and likewise profits. We have nearly one hundred years' experience in manufacturing sharpening stones, and any stone bearing our trade-mark and name we guarantee to do the work for which it is intended or money refunded.

Advise us if you will enter the contest so we may put your name on our list and send you souvenirs and printed matter from time to time.

The "Reliance" Way

**The Mop Wringer
That "Makes Good"**

The Reliance

Proves itself the strongest,
simplest and most dur-
able Mop Wringer on the
market. A strong claim
which it would be idle to
make if the Reliance didn't
"make good" in ac-
tual performance.

Not only is it the best
Mop Wringer made, but it
sells for 25 per cent.
less than the next best; and
sells itself strictly on its
merits. It fits onto any
pail.

There's no "come back"
on the dealer who sells the
Reliance. Send for descrip-
tive catalogue and price list.

ENTER

Surprising, how many people have it on their minds to buy an **Enterprise Food Chopper**.

They've seen the advertising in the magazines, in their mail and in cook books and booklets.

They want an **Enterprise Food Chopper**, have decided to buy one, and they will buy at the first opportunity—*of the dealer who reminds them of it.*

This is your opportunity. Show the goods. Hang up our metal lithographed display. Treat your customers to our book of famous old recipes, "The **Enterprising Housekeeper**" and the business-bringing booklet, "The Cook, Her Critic and . . ." *Advertising at our expense.*

Order from your jobber the new number, No. 202. Thoroughly tinned, has four knives for cutting everything from nut butter to hash; phosphor-bronze bearings.

Write us direct for advertising matter.

The Enterprise Mfg. Co. of Pa.
PHILADELPHIA.

NEW YORK OFFICE: 10 WARREN ST.

P R I S E

Just glance through the 1906 edition of the Enterprise catalogue and see if you are doing all the business you should with **Meat and Food Choppers.**

From the small family size, at \$2.00, up to a fifteen horse-power electrically-driven Chopper, we can furnish a "knife and plate" Chopper for every possible use.

These are the choppers that first introduced a perfect method of chopping and they have remained for years without serious competition.

They are the only choppers that cut perfectly every tendon and piece of gristle.

The popular sizes, Nos. 5, 10 and 20, have a wonderfully quick sale to families, boarding houses, hotels and institutions.

The Enterprise Sausage Stuffer, Lard and Fruit Press is bristling with good points and patented features that make it the quickest selling and most satisfactory machine on the market. Are you posted on it, stocked, and prepared with advertising matter to push it?

SAN FRANCISCO OFFICE: 318 MARKET STREET.

WARNING!

TO WHOM IT MAY CONCERN:

We have been advised that the Automatic door closing device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 1900. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO., Inc., Des Moines, Iowa.

WATROUS AUTOMATIC DOOR CATCH

OPEN

TWO-THIRDS ACTUAL SIZE.

PATENT APPLIED FOR.

For screen doors, storm doors, office gates, etc. Holds the door tight shut and prevents sagging open at the top or standing ajar.

Neatest, cheapest and best acting door catch on the market. No templet needed. Anyone can put it on in two minutes. The lightest trip and the strongest hold. Mounted Model free with each first order of three dozen or more. If your jobber does not carry it, write us and we will give you name of someone covering your territory who does.

CLOSED

Japanned Steel Door Buttons.

Patent Applied For.

Half the weight of the cast, much stronger, and will not break. No higher in price and twice as good. Made in all sizes from 1 1/4 to 2 1/2 inches.

Insist on having them. Carried by all leading jobbers. Write us for samples and name of nearest jobber.

THE E. L. WATROUS MFG. CO., - - Des Moines, Iowa.

MISSION STYLE REVERSIBLE SWING
LENGTHS—3 TO 6 FEET.

The Mission Style Reversible Swing

Is the best ever offered to the trade. Has a Reversible Back which the occupant can change in five seconds, reversing his position.

It is the only swing of its kind on the market, more comfortable, stylish and modern than any other.

Taken apart in five minutes and knocked down for storage or shipment. Finished in Weathered Oak, 30 feet silverized chain and other attachments, complete for hanging. We make other swings—ask us about them.

The Patent Bent Rung Ladders

Strongest In The World.

COLUMBIA STEP LADDERS

Made with Basswood or Norway Pine sides, Oak Steps and Bent Hickory Rungs.

Single and extension bent rung long ladders made in all lengths—for all purposes.

We also manufacture other high-grade Step Ladders, as well as a complete line of Single and Extension Straight Rung Ladders. Send for descriptive catalogue and prices.

THE INDIANA BENT RUNG LADDER CO
INDIANA, PENN.

DOUBLE COLUMBIA STEP LADDER—TWO IN ONE

Hight's Union Combination Square

All the Combinations available all the time.

Five Tools in one : 8-Inch Try Square, Bevel,
Butt Gauge, Marking Gauge and Mitre

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner. If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices

and full description sent on application.

The best tool of its kind on the market.

A. W. HIGHT, Box 39, Station B, Toledo, O.

**LAWN
FENCE**

Strong and durable for Churches, Lawns, Cemeteries. Substantial, bustling dealers wanted in each town and city. We manufacture a heavy Malleable and Steel Picket Fence. 84 different designs. Prices that will make you money. Cat. free.

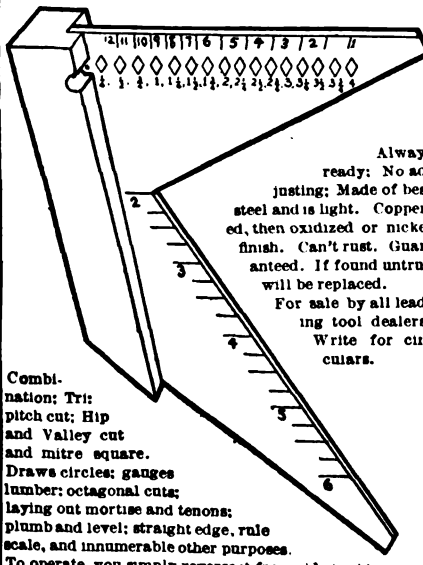

WARD FENCE CO., Box 31 Marion, Ind.

**Illinois River Folding
DECOYS**

can be placed out or picked up three at a time. Many other advantages. Price, \$4.50 dozen. Reynolds' Double Duck Calls, entirely new. Sound at each end. Two calls in one. Price \$1.00 each. Discount to dealers. J. W. Reynolds, Mfr., 68 S. Morgan St., Chicago.

The New Universal Square
"New Style"—Made in 3 Sizes
No. 6—6 inch. No. 10—10 inch. No. 12—12 inch

Always ready: No adjusting; Made of best steel and is light. Coppered, then oxidized or nickel finish. Can't rust. Guaranteed. If found untrue will be replaced. For sale by all leading tool dealers. Write for circulars.

Combination; Tri; pitch cut; Hip and Valley cut and mitre square. Draws circles; gauges lumber; octagonal cuts; laying out mortise and tenons; plumb and level; straight edge, rule scale, and innumerable other purposes. To operate, you simply reverse it from side to side. It marks 1/4 inch on one side and 1/4 inch on the other

The Duby & Shinn Mfg. Co., Inc.
Office and Works, 34 E. 29th St., N. Y. City

Snowflake

Axle Grease is most easily remembered by one thing: It is the best. Thousands of users throughout the country know this. They will use no other.

A trial order sent now will prove that there's a string to every can of "Snow Flake"—a "string of customers" who want a second lot.

If you want price and discount, write

SNOW FLAKE AXLE GREASE CO., FITCHBURG, MASS.

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.

Put up in coils 300 feet each.
Patent Metal Reel Frame with each coil.
Straps made in four widths: $\frac{1}{4}$, $\frac{3}{8}$, $\frac{1}{2}$ and 1 inch.
Patented in all countries.

CARY MFG. CO.,
19 & 21 Roosevelt Street, New York.

Capewell Horse Nails Can Be Used Successfully in Hot and Dry Climates

THE CAPEWELL HORSE NAIL CO.,
Hartford, Conn.

Dear Sir:--

I feel that I owe you a few words of praise for your first-class nails, as I have tried nearly all
kinds and find yours the only nail I can drive in **these hard feet of our western horses**
without bending the nail, or splitting the hoof, and best of all, every nail clinches without breaking
one of them. I consider your nail the best that money can buy. Yours truly,

THE GREAT BEND IRON WORKS,
CHAS. TRITTEN, President

Complete illustrated catalogue (550 pp.) sent on request. Highest Awards: St. Louis 1904, Portland 1905.

A VAST DIFFERENCE

Between the orderly and roomy appearance of this store and many others—isn't there? It's because this store uses

Baines Shelf Brackets Adjustable or Fixed

Those other stores don't—to their own detriment.

If crowded for room try the Baines Brackets. They'll change the entire appearance of your store and make it more roomy and attractive to your customers. Catalog H for Hardwaremen tells of number of brackets required; how to install them, etc. *Send for it to-day.*

The Piqua Bracket Co.,
Piqua, Ohio.

Bottomless

chairs of the ordinary kind can be mended by anybody with Universal Chair Seats

PLUS A PAIR OF SHEARS

We make 'em—the Universal Chair Seats. They are better and cheaper than cane or leather—more durable than either.

Two kinds—square and round—both used by the largest chair manufacturers.

Enough profit in them for both of us.

Write Us To-Day

*Quality
 Tells*

When Henry Disston was asked the
 question:

"What do you put in your saws?"

He replied:

"Good steel and honest work."

UPON THIS FOUNDATION IS BUILT

DISSTON QUALITY

"If you want a saw it is best to get one with
 a name on it that has a reputation. A man who
 has made a reputation for his goods knows its
 value as well as its cost and will maintain it."

HENRY DISSTON & SONS., Inc.

Established
 1840.

PHILADELPHIA, PA.

The Anguish of Angling

for more and better business in Fishing Tackle is reduced to a minimum by using the right kind—the best made and best liked by discriminating sportsmen—

PFLUEGER'S Fishing Tackle

Made by the

The Imperial Rotary Washer

Has made a hit with discriminating housewives everywhere.

The reason? Plenty of 'em.

It washes more clothes in less time with less wear and tear and less work than the other kind.

Don't Forget!

Again--
Its sliding cylinder on square post insures greatest strength of any Rotary.

All Steel Roller Bearings

make it speedy and easy to run and noiseless. For that reason it's the Best Washer on the market to-day. Send for complete catalogue.

BLACKSTONE MFG. CO., Jamestown, N. Y.
Established 1871.

Every Hardware Dealer

recognizes that an advertised article is four times easier to sell than an unadvertised one.

We have appropriated this season a good many thousand dollars for advertising our products in the large papers and magazines of national reputation. You are certain to have calls for:

The Hartmann Stockade Wire Fence
The Hartmann Steel Picket Fence
The Glen Steel Folding Mat

If your stock on these goods is low just drop us a line. You can't help selling them and run no risk in stocking up.

DON'T TAKE A CHANCE.

When you positively know--

- that a certain established line of Farm and Garden hand-tools has been continuously good for years;
- that you can bank on those tools being always just as good, in truth, a little better;
- that you can get every kind of hand-tool you need;
- that you are sure to get just what you order and all that you order, with promptness;
- that the prices are always right;
- that you are going to be well looked after by the manufacturers;
- that you can always handle this same line every year, if you want it;

you have every reason in the world to hitch good and tight to that brand.
You are taking no chances when you handle one of these standard brands:

This trade mark is printed in RED on every label of every bottle of "3-in-One." Also on the outside of every package. Other oils dare not imitate it. They may try, in fact they do try to imitate the oil itself—but they only try. Beware of infringements and articles "said" to be "just as good." Get the real, the only "3-in-One."

SOLD BY ALL JOBBERS

G. W. COLE COMPANY, Manufacturers

141-145 BROADWAY, NEW YORK

The Shear of The Year

Not How Cheap--But Quality and Durability.

You don't want the Cheapest, but **The Best**. We claim in our **Patent Adjustment Shear** to give you a Shear that has the advantage over other makes of **Quicker Adjustment** and **Longer Service**, combined with **Quality** and **Workmanship**. Requires grinding 1 to 10, that is, other Shears require grinding ten times where ours are ground once. It is not the cutting, but the bearing which dulls the shears.

The **Perfect Feature** of construction of our Shear is the method of drawing the Shear blades together **Without the use of a Screwdriver**. A turn of the milled nut tightens or loosens the blades by forcing the **Forked Head** under the head of the pin which passes through both blades. By a few turns of the milled nut the blades can be taken apart, which eliminates **All Use of the Screwdriver** for taking apart, or taking up lost motion.

Send for Circular and Trade Prices.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

HARDWARE

The United States Steel Corporation has sent out an order to its employes forbidding any officer or employe of any company owned or controlled by the steel corporation, under pain of instant dismissal, to accept any present, whether it be for Christmas, a wedding, a birthday or any other pretext, coming from any person or corporation doing business with subsidiary companies of the corporation or the corporation itself. Officers and employes are forbidden to accept stock in any such concern as a reward for services rendered, or to be rendered, and the ownership of such stock will have to be satisfactorily explained to the directors.

James L. Robertson & Sons, Inc., and Eureka Packing Co., sales department, announce their removal from 204 Fulton Street to 48 Warren Street, New York. Their trade literature may be had upon request by any who are interested.

The demand from Canada for the "Reliance" Mop Wringers has grown to such an extent that the company is now arranging to have them manufactured in that country. There have been a great many mop wringers on the market, but the success that the Lee Company is meeting with the "Reliance" is a pretty good indication that their wringer "makes good" as they state in their advertisement.

Vice-President E. P. Stoughton of the Millers Falls Company, and manager of the New York house, has returned from his extended European trip September 4th. Mr. Stoughton accompanied by his daughter left New York June 30th last, taking the time necessary to visit Great Britain and the more important places on the Continent. He reports business in Europe generally as being pretty good.

J. STEVENS ARMS & TOOL CO.

ADVERTISING CONTEST FOR ONE HUNDRED PRIZES.

J. Stevens Arms & Tool Company, Chicopee Falls, Mass., have under way an advertising contest which they inaugurated to stimulate the local advertising of the dealers who handle their Rifles, Shot Guns and Pistols to any extent. The contest began August 15th and will reach a termination on November 15th. They propose awarding to the contestants who are successful 100 prizes that will aggregate \$1,000 worth of Stevens Arms. The first prize will consist of ten of the company's No. 350 double-barrel guns valued at \$25 each, or \$250 in all. Ten prizes, each of which will consist of ten guns, rifles or pistols will be awarded and delivered free of all cost to the winners of the prizes. These prizes will be given for the first best advertisements to appear in the dealers' local papers during the time specified above. In making comparisons for excellence, the advertisement will be judged on its own merits; for the strength of copy; the cogent reasons and originality of the arguments why Stevens Arms should be purchased by the consumer or why the dealer sells them and can recommend them, and secondly, the typographical appearance and effective manner of text and its eye-catching qualities in general. Each advertisement submitted will be judged by the matter referring to the Stevens Arms and accessories although the incidental mention of other sporting goods will be permitted. A Stevens Favorite Rifle No. 17 will be adjudged as a prize for each compositor setting up the winning advertisements.

Full particulars of the conditions that govern this contest can be obtained by dealers desirous of participating, on application to the company.

THE WORK A HOME DOLLAR DOES.

An interesting experiment was tried in a small town of the East. A dollar was tagged and on the tag was the request to note to whom it was paid and for what. In a few hours it had passed through the hands of a grocer, a butcher, a collector, a bookstore man, a Hardware merchant and a preacher. In a few days it had paid over \$100 worth of debts. The idea was to show that a dollar spent at home does good to many each day and that its actual monetary value is not its full measure of good in a community. Spent with a catalogue house, it leaves the home town and does no more good there.

THE OHIO SOCIETY.

The Grafton Press announces for immediate issue "A History of the Ohio Society of New York, 1885-1905," by James H. Kennedy. While presenting the annals of a social club, the volume will also give sidelights on American history and the doings of such men as Grant, Sherman, McKinley, and others. The appendix will contain addresses delivered before the society. The illustrations will include portraits, facsimiles of documents, memorials, programmes, &c.

ADIRONDACK MURRAY MEMORIAL ASSOCIATION.

The Adirondack Murray Memorial Association has been formed to perpetuate the memory of Mr. Murray, to erect a suitable monument at his burial place, to preserve the homestead at Guilford, to assist in the education of his daughters and to promote the sale of his books. The trustees of the association are W. H. Merrill of the Boston *Herald*, Col. A. A. Pope, of Hartford, Rev. Dwight L. Hillis of Brooklyn, Edw. Griswold and C. H. Scholey of Guilford, Conn.; M. J. Hapgood of Peru, Vt.; James H. Cutler of Washington, D. C.; Harry V. Radford of *Woods and Waters*, and M. F. Westover of Schenectady, N. Y. Mr. Griswold is president, Mr. Hapgood, treasurer, and Mr. Westover, secretary. Membership is permanent, without annual dues. The payment of \$2. makes one a regular member, \$5 a special member, and \$25, or any larger sum the person may be disposed to give, a patron. Every friend and admirer of the great evangelist of outdoor life is invited to send his name to the treasurer, or other officer of the association, together with the sum necessary to admit him to the class membership desired.

A HANDSOME BACKGROUND.

A London retailer recently fixed up his window, covering all the woodwork at the back, the floor and the iron pillars, with red burlap. The result was a rich, wholesale background for the merchandise. When the burlap became stained and unattractive, he changed it for another shade. Sometimes, for a change, he took crepe paper and put it over the burlap, tacking it in place with brass tacks. He cut the paper in widths of about ten inches or a foot and in laying it overlapped the edges, which he pulled out somewhat, in order to impart a fullness or sort of ruffle. Around the iron pillars he wound the paper in spirals. The effect was attractive and inexpensive. When the crepe paper faded or became soiled he took it off, and the burlap which was underneath served its purpose again.

ORGANIZATION TO DEFEAT PARCELS POST.

An organization has been made in New York, under the name of the Merchants' League of America, the object of which is to conduct a systematic campaign against parcels post and other legislation deemed favorable to the catalogue and mail order houses. The movement has only just started, but several thousand letters have been sent out to merchants in different parts of the country calling their attention to the menace of such legislation, and urging co-operation in an effort to crush it when presented at the next session of Congress, taking early advantage of the opportunity afforded by the November elections to put candidates on record in regard to the measure. Frank A. Selah is president of the League, and E. S. Luther secretary. From the secretary it is learned that Hardware merchants have quite freely shown a disposition to support the movement, and he has received much assistance from the officers of various Hardware associations.

DAIRY MACHINERY IN SOUTH AFRICA.

Consul Albert Halstead, of Birmingham, sends a clipping from the South African Hardware Chronicle in regard to dairy machinery in that country.

The opening for dairy machinery in South Africa now and in the near future is and will be immense, for the great pastoral possibilities existing in all the colonies are, it is stated, on the eve of more effectual working than they ever have been, owing to the favorable influences—Governmental, economic and climatic—now prevalent. The co-operative movement which the Cape Government is setting on foot is one among several influences stimulative in a high degree to this industry and other agricultural pursuits.

Consul Halstead adds: The manufacturers of dairy machinery who are most enterprising in preparing for the pastoral development of South Africa should be able to obtain a market that will continue to grow in value.

SEPTEMBER 25, 1906

Editorial Trade Review

We have had the longest spell of Summer weather that it seems we have ever known and felt. It certainly enabled the dealer to get rid of his Summer stocks, and left little to carry over. There is apparently another year just like it to come, and we will bid it welcome hoping it will be as propitious. The prices obtained for this year's crops will affect in a favorable manner the trade of next year.

The consuming demand for goods in this country is unprecedented, and as wages advance and extra remuneration is paid in succeeding years, the host of good things that are within reach of the humble mechanic makes him independent of his environment. And the farmer, how is it with him? For years the money lenders throve on his impoverished conditions, as crop after crop failed him; but now king of the situation, his crops are highly productive; prices heard from are of the record order and acreage planted of the highest limit. He has in the vernacular "money to burn," and is in the market for any improvement that will increase his crops or augment his resources.

Inability of the manufacturer to deliver goods on his orders is daily becoming a congested fact. Famine in the car line accounts for some of it, which is getting worse instead of better. The jobbers are embarrassed very much, as among the orders received, under such conditions, are many of them "rush" orders, which according to precedent and example should be filled the same day as received. And a non-receipt by the dealer causes loss of the sale, in favor of the man who was wise enough to stock up early.

A community of interest between dealers makes purchases easy, becoming more easy as organization increases; as we all become better acquainted we grow more friendly and confident, and the exasperating competition that cuts the profit to nothing is no longer abroad in the land. It's the personally knowing your competitor that makes you feel less aggressive, and the traces of a commercial anger become exceedingly faint.

Honorable intentions and feelings to match are gradually increasing in the land as the ancient era of a "hundred per cent." profit finds a new level. The lessened profit as a ratio to cost swells sales by a natural channel in an indefinite manner, and we are all reaping the benefit of these changed views.

Even the immigrant fleeing from a country, where

saving money is made difficult by a system of low wages, brings to America his limited sum, which in the aggregate amounts to millions.

Advances continue to be the feature of the trade, although they are not excessive, they are more or less frequent. Builders' Hardware has been among the most difficult of all products to obtain, and the number of orders small and large is remarkable. This has again become advanced and the trade is becoming restless. What's the use of the manufacturer getting his order book so crowded with orders that he cannot see the end of them, and then advancing the price, when he knows that he cannot deliver for months? It is better that the manufacturer does not show any signs of cupidity these days. If the cost is really higher temporarily, a mark up may be advisable if trade is good, but there's an old fable about "killing the goose" that lays auriferous eggs, that is recalled in the transaction.

USING THE TRADE PAPER.

When a man can truthfully say that his trade paper is not giving him several times the value of his money he is either taking the wrong paper or else he is the wrong individual, and the chances are very much in favor of the latter being the case. Trade periodicals are to be had in every line so ably edited that the old law of the "survival of the fittest" must soon retire from the field any that fail in offering some plausible excuse for their existence and that do not make good their excuses. There are degrees of excellence and some publications are better adapted to the special conditions of certain people than others. The aim of each business man should be to select as his bosom counsellor, not the one that Smith tells him is the best, but the one that hits his own ideas of business with the most force.

Once having made the selection of a trade publication there is as wide a field for good auxiliaries as circumstances can make profitable; still, we should select one for our particular planet, the one that has shown up the best record of value in the past, and let the others revolve around that as satellites. The business policy of any intelligent man who reads to any purpose is influenced a great deal by his favorite paper. Usually his favorite will be the one that is in the closest harmony with his ideals and to follow it is to strengthen and centralize the main ideal. A definite purpose, a special aim, a policy that means something to the business head and that is a part of his life the same as his religion is, should have for its chief cabinet adviser some one periodical with its one policy and not be permitted to drift aimlessly about among the waves of various editorial opinions. Let the other publications serve as balance-wheels, hint-bringers, thought-suggesters; but elect one to the place of policy-builder and then do not change your master mechanic without good reasons any more than you would change the head carpenter in your building operations.

It is a pretty theory to assert that you select the good impartially from all sources and allow your policy to be influenced by none. The man who can do that has a very strong mind or else a very stubborn one and is rare, though he has a good many distant relatives who think they can do it. In any event there is a great deal of energy wasted in resisting the policy of your advisers constantly; better to select one in harmony with your own purpose and then be strengthened by the alliance.

The subscription price of any good trade paper is of course an insignificant matter to any good business man. Any of them give full value during the year for the small amount of money they cost. Once having subscribed it is a first business principle to see that they do pay. The true test of the paper's value is in the answer to the question "can I afford the time to read it." If the time it requires is time well spent, there can be no further question as to whether it pays him or not. But is it? Are the suggestions that impress you of the kind that you at once put into force in your own business and thereby increase its efficiency or do they merely come to you as clever ideas for the other fellow but not exactly adapted to your own conditions? No man has time to read much about how those differently located should run their business if he gets no suggestions from it that he can adopt or adapt to his own. If all of the ideas offered him are for some other line of business than his own he is reading the wrong magazine. If he simply fails to make use of what should be useful to him he is the wrong man. Some Hardwaremen

will obtain more real practical good out of a sample copy of a grocers' journal or a shoe dealers' magazine than another will get out of the best Hardware publication in a whole year, but the difference in the men is sure to show in a good many other parts of their business. The trade paper should be read for the thoughts that are received, suggested and acted upon and not for the enjoyment found in the reading.

The superlative degree in the high quality of our modern trade publications may have rendered some of us less appreciative than we should be and less reciprocative for favors received. How easy it is for the business man who has received value from his favorite trade journal to several times the price he paid for it, to return a small measure of the gratuitous aid he has been given by mentioning his favorite with a kindly word to his fellow-tradesmen occasionally. Or, when the jobber's representative or the manufacturer's agent drops in for a talk about new goods, is it more than the payment of a just debt of gratitude to remark that "I saw your line described in So-and-So last week?" It may mean a good deal in the future of your chosen adviser to send that agent back to his house with the remark that "So-and-So is all right for our line. I had it thrown in my face a dozen times a day." Then how easy it is when writing to advertisers to add, "I saw your advertisement in So-and-So." It sets you well with advertisers too, for most of them like to know just where their ad. is paying them and appreciate little helps like that even if they never tell you so.

The up-to-date, fair-minded business man selects his favorite journal, his policy-former, as he does his vocation, deliberately and with an idea of continuance; he changes it only for good cause, and not because a change happens to be suggested by the whim of an hour. He adds to it such other periodicals as he can take time to glean for thought suggestions, short cuts, window displays, advertising, whatever he has an active interest in doing well. He remembers that the supply of these is legion, that he can only use a limited number, and when he has enough, though still with an eye ever alert for something better, prefers to put those he has into use rather than spend too much of his life in hunting for something that he vaguely dreams of but never quite finds. In other words, he uses the best he has at hand and doesn't just sit reading because he hasn't found something better. He appreciates the good commercial value that his paper gives him and tries to reciprocate in a measure by a timely kind word in the right place. And, most of all, when he does not happen to grasp the usual amount of value from one issue, he is wise enough to see that he is probably not in a receptive mood and that the paper is less to blame than he.

A CAMPAIGN SUGGESTION.

Don't allow yourself to be drawn into political discussions during business hours, even though you know your own political views to be in complete harmony with those of your customer. In the first place, in this era of independent voting, you don't really know. More important still, you do not know what other customer may come in and surprise the conversation at a point where it will be particularly offensive to him. This ought to be enough but there are even weightier reasons.

In the heat of a campaign it is impossible to tell where a political talk between friends will stop; what points will become involved; what other men will be drawn into the controversy. If all are in harmony and the talk enjoyable to the participants (it seldom is to a by-stander), there is ever after more freedom among those who took a part in renewing it in your store at some future time, either among themselves or with others to whom it may not be so agreeable. Perhaps even a little mission work will be attempted upon members of the opposite party; in any event, your place of business gets a reputation as a sort of loafing ground for the politicians of your favorite party and members of the opposing faith are somewhat prone to stay away.

It is a great deal easier to get rid of this condition without offending some of your friends and political brethren by not commencing it and the easiest way to prevent its commencing is to throw about it an air of inappropriateness through the entire absence of such discussions by yourself or any of your employees. Even though an ill-mannered person enter your place of business and indulge in most exasperating partisanship it is better to ignore him entirely if possible; if not, then let the rebuke be for disrespectful remarks against any possible choice of the people rather than in defense of your own particular candidate. Base your objections to his remarks on principles of Christian fellowship rather than of political faith. Speak freely, frankly and somewhat fully along that line, striving, before your own flow of talk is interrupted, to have turned the channel of comment to something less sulphurous and more refining than mere partisanship. The chances are that you may be able to relieve a serious

situation without giving offense to anyone, even to the person rebuked. At the worst you will have retained your own self respect and, if you have chosen your words wisely, the respect of those who overhear you. Your outraged political beliefs will be avenged and your place of business gain in reputation as one where business hours are kept on a high plane into which political brawls are not admitted.

HOW TO INTEREST A WOMAN IN PAINT.

"The best way to clean house is to paint," is a timely motto containing more of fact than of fiction. Paint is a great renovator, not simply brightening up, but literally making clean. Further, it is a little recognized insecticide, destroying both egg and adult; and those unfortunate in getting into apartments infested with vermin will find it a more satisfactory remedy than carbon bisulphide.

Convince a woman on one or two of these points, and you have an interested listener. Few women who have never substituted the paint brush for the scrub brush are aware that they can do the most of their own painting and varnishing. With prepared paint and a few simple directions regarding care and selection of brushes, which the dealer should be prepared to throw in, creditable work is not beyond the reach of the most inexperienced. But the successful salesman should familiarize himself with the common problems of the housewife, anticipating her needs and showing a cordial interest. He should know what colors harmonize—for the color cards are not fully satisfying to the novice; how to prepare sizing for the kitchen wall if it is not hard finished plaster; to warn her against using anything but iron paint on tin. These and other "kinks" will be appreciated and prove profitable on both sides; for the real homemaker delights in using her own hands in every possible way in beautifying her home, and the newly acquired manual skill will find two ways to use paint where one was found before.

THE MAN WHO SELLS.

BY GEORGE A. POST.

What means this prosperity? Sales. Sales necessitate transportation. Transportation calls for power and vehicles. The results are felt in every part of the country. Sales light the furnace fires, blacken the sky with smoke, set machinery in motion, quicken the demands for labor, and spread the smile of plenty over the face of the land.

He who sells things is the apostle of happiness; he is the bulwark of prosperity; he fills the hotels; he crowds the trains and he loads the freight cars with goods. The man who sells things is the best friend of everybody. He makes the people believe they need it; he is patient, tactful, broad-gauged, generous, good natured and tireless; for him no whistle blows to sound the end of his daily toil; for him there are but few peaceful evenings at his home fireside; for him it is hustle, hustle, hustle; he travels up and down the highways; he seeks audience with and tells his tale to men of varying titles; he runs the gauntlet of every conceivable degree of importance from the president to the office boy.

All honor to the man who sells things. Let us call him the commercial engineer. When he is not abroad in the land there is "nothing doing." His appearance foretells commercial activity and just in proportion as he succeeds, the tide of prosperity ebbs and flows. The man who brusquely turns him down, or who affects to be bored by his presence, or who bars him from his office, does an injustice to the interests confided to his care, and also robs himself of a large amount of information that he needs in his business.

DEATH OF MRS. E. W. MORLEY.

Mrs. Edward W. Morley, wife of the vice-president of Morley Bros., died September 8 at the family home, 1330 South Jefferson Avenue, Saginaw, Mich.. She had been seriously ill most of the Summer, but within a few days had shown encouraging improvement, so that her death, which came suddenly of heart failure, was quite unexpected. At the time noted, while sitting up in her bed, she gasped and passed peacefully away at a breath. Helen Frances Kelley was born at Lowell, Mass., in 1850; she was the daughter of Mr. and Mrs. Jacob Kelley. She was married to Edward W. Morley at Chicago, October 8, 1871, and had lived in Saginaw twenty-two years. Five children, four sons and one daughter, survive: Albert J. and Walter K., of Aberdeen, Wash.; Ralph C. of Saginaw, Mrs. C. H. Glaize of Chicago and Paul F. H. of Saginaw. There are four grandchildren.

HOW TO SELL GOODS IN BRAZIL.

Mr. W. J. Johnston, publisher of the AMERICAN EXPORTER, New York, who last summer made a trip to the Orient as a member of Secretary Taft's party, to study commercial conditions and the opportunities for the sale of American goods in Japan, the Philippines and China, is spending the present Summer in South America, visiting the principal countries at the same time as Secretary Root, so as to take advantage of the increased interest in American manufactures aroused by the tour of our Secretary of State.

Mr. Johnston has this to say regarding Brazil:

Rio de Janeiro, Brazil, Aug. 1st, 1906.

There is undoubtedly a large market in Brazil for manufactured articles from the United States—machinery, Hardware, novelties, agricultural implements, automobiles and other vehicles, typewriters, shoes, textiles, drugs and proprietary medicines, food preparations and beverages, perfumes, paints, oils and varnishes, furniture, roofing, clocks and watches, steam and electrical specialties and the like.

Manufacturers of such articles are probably more interested in some practical suggestions as to how they can market their products in Brazil than in an essay treating of the general commercial situation.

To begin with, the fact should be borne in mind that the conditions all favor a large trade between the United States and Brazil. The United States is Brazil's best market, taking more than half of her entire exports. We admit free of duty her coffee (to the extent in 1905 of \$64,136,008) her Indian rubber (\$28,476,252,) her cacao (\$1,238,859,) her hides and skins (\$2,364,207 free besides \$507,936 dutiable) her manganese ore and oxide of manganese (\$990,044,) making with other articles a total for 1905 free of duty of \$97,966,274.

It will thus readily be seen how seriously the prosperity of Brazil would be affected were we, for example, to impose even a small tax upon her coffee.

The important special concessions recently made by Brazil in favor of certain lines of American goods and the answer which Brazil has made to other countries, which objected to the preferential arrangement with us, and which claimed equal privileges (under the favored nations' clause in their treaties) demonstrated that the statesmen of Brazil appreciate the situation. They frankly point out to these other countries that the commercial relations existing between the United States and Brazil are unique and that this is the reason why the special advantage is given to the United States.

It is considered not unlikely that rebates will be made from time to time on other lines of American manufactures; in fact American exporters may be able to secure additional concessions if they will only present the matter forcefully before the State Department. Secretary Root takes more than the ordinary patriotic interest in the extension of American foreign trade. He is now personally known to and highly esteemed by Brazilian officials. Never before have the Brazilians received a foreigner with such marked attention. A request later from the State Department is likely to receive careful consideration. If American manufacturers do not get further tariff advantages in Brazil, the fault will be entirely their own.

The merchants of Brazil complain that while their customers demand and they are anxious to handle American goods, they are handicapped by the fact that the manufacturers of the United States insist on spot cash payments while they themselves can only sell their goods by giving their customers extended credit. True, they get liberal interest—usually twelve per cent. but as German and British manufacturers make no objection to giving credit, American manufacturers certainly lose many orders by not following the practice of other nations in this respect. Even where a Brazilian is able to pay cash, he resents as a personal slight, insistence upon prompt payments. The Brazilian prides himself upon keeping his financial obligations and comparatively little is lost in bad debts.

Manufacturers of the United States who are in a position to grant credits and who wish to do something approaching the maximum business open to them in South America may find on investigation that the risk involved is less than they have imagined. In nine cases out of ten when I ask a merchant what American manufacturers should do to increase their volume of trade in Brazil the matter of credits is what he mentions first.

Dealers complain too, that while the first letter they receive from an American manufacturer usually gives promise of opening up satisfactory business relations, the second one, in answer to their inquiry for prices and terms is so full of restrictions and apparent lack of confidence in their commercial honesty that hope of inaugurating a business connection vanishes.

Germans are doing much of the business in Brazil that was formerly carried on by British manufacturers. This is due, primarily, to the fact that the German salesmen is particularly well equipped in business training, languages and adaptability to secure the confidence of the Brazilians, and secondly, to the fact that the German houses will modify their goods to meet the special Brazilian requirements. At the same time, German goods are not well thought of in Brazil and where the proper effort is made American goods will always sell in preference to German goods even at a considerable higher price. For example, nine-tenths of all the electrical machinery in Brazil is American.

The head of the leading department store in Rio de Janeiro told me that it was only after several years of effort that they succeeded in getting an American shoe manufacturer to make shoes in the way they wanted them. Now they are selling hundreds of thousand of pairs of his shoes. They formerly sold only English shoes. They are so well pleased with their success in shoes that they have asked me to put them in touch with American manufacturers in other lines.

A partner of one of the most prominent of the retail houses on the principal shopping street—the Rua Ouvidor—showed me some food products from the United States made by one of the best of our manufacturers, which had spoiled on account of the damp climate. He said the goods sold splendidly but as they are packed in paste board boxes instead of in tin, only a part of each shipment is fit to use. The reputation of the food as well as of the merchant suffers in consequence. The merchant wrote to the manufacturer offering the pay additional expense of having the food put up in tin boxes but received the reply that the manufacturer did not care to make any change in the packing. Possibly this company is wondering why its sales are not increasing in Rio.

The German manufacturer through his salesman studies conditions in each country. For instance, I met here the representative of a German manufacturer of a high grade of patent leather. I learned from him that his concern sends experts not only to Brazil but to India, Australia, etc., and that it makes a special patent leather for each country, adapted to the particular climatic conditions of that country.

Another German salesman told me that certain of his goods he never attempts to sell in the larger cities and certain others he disposes of altogether in the cities. The sale of some goods he confines to certain cities and he makes up lines of samples for particular houses. While he usually remains out here for more than a year, there are certain times when he is away from Brazil for a considerable period. To keep in touch with his customers, however, he prepares lines of samples for each concern with whom he does business.

In case he cannot call upon a particular customer when that customer is making his purchases, he sends him the samples and writes him. This salesman pays a small commission to agents in each of the cities in which he does business. This is to secure their co-operation in closing orders—though he himself solicits the business personally—and their assistance afterward in connection with the delivery of goods, making collections, etc. He has made gradual but radical changes in the discounts to commission houses. The present discount is but one-fifth what was formerly paid. He says, however, that the reduction in discounts has had no appreciable effect on the sales made through commission houses. In other words, his own efforts combined with advertising, create a demand for the goods, part of which is filled through commission houses and for that reason thinks that a nominal discount will bring him practically as much business from commission houses as would a large discount.

It is found in practice that in South America the best results are obtained from a salesman who is paid a liberal salary with a small commission on sales. The salesman is depended upon to determine the line of credit in each case. In some instances a part of any losses from bad debts is deducted from his commissions. A man who is trusted with an important territory so far from his home office may be relied upon to be exceedingly conservative in granting credits.

W. J. JOHNSTON.

MEADOW KING HAY CARRIER.

The J. E. Porter Company, Ottawa, Ill., refers with pride to the substantial favor which its "Meadow King" Hay Carrier has met at the hands of the trade. The unique feature of this carrier is that the supporting dogs catch and hold the sheave or wheel of the fork pulley, thereby allowing the greatest range of adjustment with absolutely no friction on the supporting dogs, as the adjustment is obtained by the swinging of the pulley frame on the axle, while the sheave is perfectly motionless when in the carrier.

CHANGE IN CLASSIFICATION OF IMPORTS AND EXPORTS

The Bureau of Statistics of the Department of Commerce and Labor has modified its classification of imports and exports, with the purpose of presenting an analysis more in keeping with present conditions of production and commerce than those formerly utilized.

The old classification of exports into the great groups, Products of agriculture; Manufactures; Mines; Forests; and Fisheries, was adopted thirty-six years ago, when the United States was chiefly a producer and exporter of natural products, the exports of manufacturers at that time being but about one-tenth as to-day. The old classification of imports was adopted twenty years ago, when the classes of articles forming the bulk of the imports also differed materially from those of to-day.

These two old classifications of imports and exports differed so widely that they were not comparable one with the other in attempts to analyze the general trade movements into and out of the country. Meanwhile the principal European nations have adopted classifications adjusted to present conditions of trade and differing materially from those utilized in the United States, and thus rendering difficult a comparison of our trade figures by great groups with those of the leading European countries. Still another and equally important reason for readjusting the old grouping is the fact that the census classification of manufactures includes under that term many articles not classed as manufactures by the Bureau of Statistics, thus rendering difficult a comparison, under the old classification, of the export figures of manufactures with the census figures of production. By the new classification, however, such comparison is entirely practicable.

The new classification, which is applied to both imports and exports, is as follows:

- A.—*Foodstuffs in a natural state, and food animals.*
- B.—*Foodstuffs partly or wholly prepared.*
- C.—*Crude materials for use in manufacturing.*
- D.—*Manufactures for further use in manufacturing.*
- E.—*Manufactures ready for consumption.*
- F.—*Miscellaneous.*

The principal articles forming the first group, "Foodstuffs in a natural state, and food animals," are wheat, corn, rice and other food grains; animals, except horses and mules; coffee, tea, and cacao in natural state; eggs; fruits in natural state; fresh fish; vegetables and spices in the natural state.

The principal articles forming the second group, "Foodstuffs partly or wholly prepared," are flour, meal and preparations for table food; fish prepared or canned; fruits dried, preserved, or canned; meats and dairy products; olive and cotton-seed oil intended for food; wines, liquors, and distilled spirits; sugar and molasses; canned or preserved vegetables.

The principal articles forming the third group, "Crude materials for use in manufacturing," are raw cotton, wool, and fibers; copper ore, matte, and regulus; coal; chemicals in a crude state; mineral oil, crude; cotton seed and flaxseed; leaf tobacco; logs, pulp wood, and cabinet wood.

The principal articles forming the class "Manufactures for further use in manufacturing" are copper in pigs, bars, and ingots; chemicals prepared for use in manufacturing; tin in pigs or blocks; yarns; iron in pigs, billets, blooms, bars, ingots sheets, tin plates, and wire rods; diamonds cut but not set; naval stores; paraffin; leather; sawed and hewn timber, lumber, and wood pulp.

The principal articles included in the group "Manufactures ready for consumption" are agricultural implements; books; cars and carriages; clocks and watches; manufactures of cotton, wool, silk, and fibers; clothing; glass; glassware and chinaware; manufactures of iron, steel, brass, copper, zinc and lead, ready for use; jewelry; boots, shoes and gloves; refined mineral oil, vegetable oils except those used for food, animal oils; paper and manufactures thereof; soap, manufactures of tobacco; furniture; and other finished manufactures.

The principal articles forming the group "Miscellaneous" are horses and mules, nursery stock, and seeds for agricultural purposes.

In the import classification the old group "Articles of voluntary use, luxuries, etc.," disappears, most of the articles formerly contained in that group being transferred to the group "Manufactures ready for consumption," except diamonds, which are

transferred to the groups "Crude materials for use in manufacturing" or "Manufactures for use in manufacturing," according to the condition in which they are imported, and leaf tobacco, which is transferred to the group "Crude materials for use in manufacturing."

In the export classification the articles included in the old group "Products of agriculture," are chiefly transferred to the groups "Foodstuffs in a natural state" and "Foodstuffs partly or wholly prepared," except raw cotton, wool, fibers, and hides and skins, and unmanufactured tobacco, which are transferred to the group "Crude materials for use in manufacturing." The articles formerly grouped as "Products of the mines and forests" are chiefly transferred to the group "Crude materials for use in manufacturing," except lumber and naval stores, which are placed in the group "Manufactures for further use in manufacturing." Articles formerly grouped as "Products of the fisheries" are transferred to the "Foodstuffs" groups. The articles formerly grouped as "Manufactures" are divided into two groups, "Manufactures for further use in manufacturing" and "Manufactures ready for consumption."

This new grouping of imports and exports presents (a) a more complete analysis of the foreign commerce of the United States than that formerly utilized, (b) renders comparable the figures of imports and exports, (c) renders comparable our own commerce by large groups with that of the principal European countries, and (d) renders comparable the figures of the Bureau of Statistics and those of the Bureau of the Census, so far as relates to the production and exportation of manufactures.

The groups "Manufactures for further use in manufacturing" and "Manufactures ready for consumption," include practically all articles formerly classed as manufactures, and if to these be added the group "Foodstuffs partly or wholly prepared" the total will show the exportation of practically all articles classed by the census as manufactures.

A statement of the export value of all articles formerly grouped as products of agriculture will still be published by the Bureau of Statistics in connection with the new classification, for the convenience of those desiring to continue the old grouping of agricultural exports in their study of the export trade.

This new grouping, it should be understood, makes no change in the list of articles appearing in the Monthly Summary or annual volume, but merely rearranges them into new groups.

A comparison of the totals under the new grouping with those under the old grouping has been made for the seven months ending with July, 1905. The new import groups, "Foodstuffs in a natural state" and "Foodstuffs partly or wholly prepared," aggregate 165 million dollars against 153 millions in the old group, "Articles of food and live animals," the increase being due chiefly to the transfer of wines and liquors to this class. The new group, "Crude materials for use in manufacturing," totals 246 million dollars against 244 millions in the old group, "Articles in a crude condition, which enter into the various processes of domestic industry." The new groups, "Manufactures for further use in manufacturing" and "Manufactures ready for consumption," aggregated 259 million dollars against 277 millions in the three old groups, "Articles wholly or partially prepared for use in manufacturing," "Articles manufactured ready for consumption," and "Articles of voluntary use, luxuries, etc.," the reduction being due chiefly to the transfer of diamonds and leaf tobacco from the "luxuries" class to the classes composed of manufacturers' materials, and wines and liquors to the "Foodstuffs" group.

The change is more apparent in the export classification, especially as relates to the old group, "Products of agriculture." The articles of the old agricultural group, which aggregated 433 million dollars in the period named, now appear in the groups, "Foodstuffs in the natural state," 19 million dollars, and "Foodstuffs partly or wholly prepared," 166 million dollars, while the remaining 188 millions (consisting chiefly of raw cotton, cotton seed, and leaf tobacco,) form the chief part of the group, "Crude materials for use in manufacturing," which aggregates 216 million dollars. The old group, "Manufactures," which aggregated 325 million dollars in the period named, is represented by the two new groups, "Manufactures for further use in manufacturing," 122 millions, and "Manufactures ready for consumption," 244 millions, the increase of 40 millions in the two new groups of "Manufactures" being chiefly due to the transfer to

those classes of lumber, naval stores, and furs.

The new grouping will be used in the Monthly Summary of Commerce and Finance beginning with July, with comparative figures under the new system for the immediately preceding year, and the summarizations of earlier years will also be re-adjusted to the new system so as to render them comparable with the figures of the present fiscal year when completed.

An application of this classification to the domestic exports of the year covered by the recent census of manufactures (1904) shows the exportation of articles classed by the census as manufactures as \$852,204,398, or 5.76 per cent. of the \$14,802,147,087 reported by the census as the value of manufactures in that year, this total of \$852,204,398 being obtained by combining the three groups, "Manufactures ready for consumption," \$375,924,687, "Manufactures for further use in manufacturing," \$193,799,852, and "Foodstuffs partly or wholly prepared," \$282,479,859.

THE INDEX AND STOCK CARD SYSTEM.

By B. A. CHAMBEAU.

Every retail store should be indexed, very carefully and thoroughly. There are several reasons why this should be done. One is that it preserves that admirable condition expressed by "A place for everything, and everything in its place." It also helps to keep the stock up, preventing the "just out" condition. It helps to keep tab on the rapidity with which any certain stock moves. It preserves a record of prices, frequently settling disputes and often saving money on buying. The hardest part about keeping a card index system is the installing. Afterward it is easy, requiring only care. But even the installation is not so hard if properly gone about, the time devoted to it being slack hours.

The card index system is much preferable to the book index system, for several reasons. It is more convenient to install, for it is more elastic. It is more complete in its efficacy, as it permits of the filing of a great deal of data that could not be cared for by the book system. It is neater, and easier to refer to. It is cheaper in the end, because it will outlast a book system, the latter having to be renewed as soon as one department becomes cramped for room, or as soon as the pages are worn out. With the cards, there is no limit to the size to which it may be stretched, if desired, and the wearing out of a card means only to replace it with a new one. Besides, with the book system, old entries are liable to be scratched off, indeed, that is the only way to dispose of them, while with the card system, cards for stock that is out of date and cards that are too full for further additions may be filed in "defunct" or transfer drawers, where they are easily accessible.

The cards should be four by six inches in size, filed in drawers. Different colors may be used for different departments or classes of stock.

The cards should be ruled, both vertically and horizontally, both front and back. No card should be devoted to more than one article.

One side of the card should carry, at the top and left hand side, the name of the article. On the left hand side should be placed, in the first column, under the title, the amount in stock on the date the card was filed, entering the date in the second column. Then, thereafter, whenever a new supply arrives, put down the amount, date, name of firm from whom it was purchased, price, discount allowed, price it is to sell for, and, whenever the selling price changes, date of change; condition it came in, whether good or bad. With some articles this last entry is not necessary.

The reverse side of the card should carry at the top the name of the article and its location in the store and in the storeroom. The lower three-fourths may be used as a continuation of the front side.

It is not necessary to have a column for every entry to be made. The date of the change in selling price, for instance, may be noted in the same column with the price only in another color of ink. Same with the condition of arrival when the condition is bad, a cross may be placed just above the price, or somewhere else where it is not liable to escape attention.

It is easy to see the importance of this system as far as it is used to denote location of the stock. Many a merchant has forgotten stock piled away in remote corners and is ordering new. It saves time and money. The buying record it affords is highly valuable in buying, for from it you may get a line on the last prices you paid, whether the goods are moving rapidly or not, and, in fact, the complete information without which you can not buy to the best advantage for yourself.

The stock and index card system is also of great value in taking an inventory; often shortening that work by several days. And all this cost only a little time in installing, and after that not

so much time as you would waste for the lack of it if you didn't have it; and, from ten dollars up, according to the size of index needed.

Never throw a card away. This is important, for you do not know when you will want to refer back to it. Cards should be filed in a transfer drawer as soon as they are filled, and the same should be done with cards of articles no longer in stock. In the case of filled cards, the new or, "live" card in the working case should bear a mark showing that a preceding card has been filed in the "defunct" drawer.

Never, not in a single instance, should the system be neglected once it is installed. A card should be made for everything in stock. Every purchase should be entered. No system is of value unless properly carried out. Do not trust to memory; put it on the card.

Of course, in denoting the location of stock, the store will have to be divided into compartments and each given a designated number or letter. The best method in most cases is to give each show case a double letter, like AA, BB, CC, and so on. The shelf compartments may be lettered and the shelves numbered. Drawers may be treated in the same manner. Then, after this is done, it is easy to tell, when the card says a certain article is at "G3" that it is in compartment G, shelf 3, or, if it says that it is in "S. R. G. 8," that means that it is in the store-room, in compartment G, shelf 8. The method is very simple.

With this method should be a record on each shelf, wherever such a record would be of assistance, giving a list of the articles belonging on the shelf. This may be placed back out of the customer's sight. It is very convenient in preventing any article from being out of stock, and by its use any person who can read is capable of stocking up the shelves. In the case of drawers, the articles they are supposed to contain may be written on the sides.

IMPORTANT PHASES OF THE RETAILER'S BUSINESS.

In conducting his business from one year's end to another, the sporting goods dealer must take into account the elemental principles upon which all trade is based—he must keep a strict tabulation of all expenditures, must know exactly at the year's end what his receipts have been, and thus be enabled to arrive at his percentage of profit. Perfect business methods says the *Sporting Goods Dealer* consists in keeping these different transactions or items on a money-making plane. That is, when a certain bill of goods is bought, it should be sold at a figure to allow a certain profit; when a salesman is employed, the proprietor naturally expects him to bring back into the cash box the amount of his salary, and some more; if advertising is carried in the daily paper elsewhere, a full return for money expended is looked for. These various returns often do not come up to expectations, for one cause or another, and this marks the degrees of success attained by different merchants. Now there is one phase of the sporting goods dealer's business that he is apt to be careless about and therefore not realize a full return on the expenditure—that is the display window. The cost of maintaining this exhibit is a just charge to the wage account, exactly as is the salary of a clerk or salesman. Without windows the rent would be much less, so there is every reason for giving special attention to making it a business-bringing feature. The show windows may be considered an employe, and an expensive one. The time of an assistant to dress the window, the cost of working tools and paraphernalia are some of the expenses that may be charged against it. The question remains, does the window sell enough goods to warrant this expense? With the aid of counter books the dealer can keep track of the work of his salesmen and determine what returns they are bringing. In the case of the show window this is not so easy. More time and continued experimenting is necessary to investigate the business brought into the house by the outside exhibit.

The proprietor expects his salesmen to be constantly bright, pleasing and wide-awake; he should make his display window the same. There are unlimited possibilities open to the dealer who considers the window dressing proposition in a serious light. By a careful record of the sales of each class of sporting goods during a specified period, and comparing one with the other, bearing in mind when and how the different goods were featured in display, he can form a very satisfactory estimate of the benefits being obtained from this method of publicity. As has been stated time and time again, the display window is probably the dealer's best business getter. Unlike the salesmen and other employees, the window may be asked to work day and night, and there are no holidays or vacations to be considered. But again, unlike good employees, the window needs constant looking after and shaking up. It is apt to get slovenly and out-of-date unless proper attention is bestowed upon it. Its success, therefore, rests with the dealer himself. It is up to him.

WONDERFUL DEVELOPMENT OF THE FAR NORTHWEST

VAST RESOURCES IS CREATING A GREAT ACTIVITY IN BUILDING OPERATIONS.

Explain it as you may, the fact remains true that the people of the far Northwest are in a most remarkably prosperous condition. Business is in a better and more healthy state to-day than it ever has been. On every side are the evidences of prosperity of the people. Many new modern up-to-date buildings are rapidly taking the place of old structures in the rapidly growing cities of Spokane, Seattle, Tacoma and Portland. New towns are coming into existence in every part of the great States of Washington and Oregon. The higher prices of lumber and the unprecedented demand has produced an activity never before known in the lumber business. Many new mines are being developed; irrigation is bringing large tracts of formerly barren or marsh land into splendidly paying farms, and everywhere is seen the happy smile of prosperity. All wholesale merchants and retail dealers are being benefited by the general good times; but none more than the Hardwaremen.

SPOKANE PROSPERITY.

The building that is taking place to-day in Spokane, Wash., is the best evidence of this city's great future. All the Hardware dealers here report a fine business and greater sales than in 1905.

The big store of McGowan Bros., which was partially destroyed by fire in the Spring, was re-opened September 1st and is a model in many ways. New fixtures and shelving of the latest design add much to the attractive appearance of the new store. The success of McGowan Bros. has been most remarkable. This concern began business in a comparatively small way about ten years ago, doing a local retail trade. The business was a success from the start, and has grown each year, until to-day the firm travel four men and cover the trade of Northern Idaho and Oregon and Eastern Washington. With true Western enterprise and a zeal seldom seen, McGowan Bros. were open and ready for business the next day after their fire, having worked all night in opening an office in their warehouse—with telephones and all conveniences—on Howard Street and the Northern Pacific Railroad tracks. Here all Summer an active trade has been maintained, and as soon as an insurance adjustment was made, the damaged stock from their store was sold. McGowan Bros. now open the new store with a new and complete stock.

Another Spokane concern to enlarge is the Holly-Mason Hardware Co., who are now erecting a large four-story building for the exclusive use of their wholesale trade.

A new concern in the Hardware trade, but one of Spokane's old successful firms, is the Ware Bros. Co., formally the exclusively sporting goods house of Ware Bros. Moving into a larger and finer store Ware Bros. have added a stock of general Hardware, making a special bid for the trade in cutlery and tools. Mr. Ware said that the adding of Hardware and their change in location was helping the sporting goods business, that since moving they had done a larger trade than ever before. Ware Bros. Co. do an extensive business in tents and awnings, having a most complete workshop on their second floor.

One of Spokane's old concerns and successful both in retail and jobbing of Hardware is Jensen-King-Byrd Co., who are now well settled in their new store which was built especially for their business. In speaking of local conditions Mr. Jensen said "Our wholesale trade is constantly growing, the development in mining and in agriculture is doing much to create good business through Eastern Washington. Our city of Spokane is growing rapidly and during the past year there has been a lot of new building." The store of Jensen-King-Byrd Co. is well arranged and goods are attractively displayed, especially in the sporting goods department which is in charge of "Hi" Hervey, one of the best posted sporting goods men of the Northwest.

The Spokane Hardware Co. have attractive window displays and have recently put in a stock of sporting goods, having consolidated with Rapp & Lloyd, bicycle and sporting goods dealers here.

GREAT GROWTH IN SEATTLE.

Those people were called foolish who, twenty-five years ago, said that in 1906, Seattle would be a mighty city with commerce extending to all parts of the world. But what seemed only wild visions a few years ago, is to-day a reality, and Seattle in many ways is one of the best business centres of the West. The Hard-

ware jobbers have kept pace with the city's growth, and the new building now occupied by the Seattle Hardware Co. is a model in every way. Upon moving into their new warehouse, the Seattle Hardware Co. retired from the retail business and now devote their entire energy to their rapidly increasing jobbing trade. A very large and varied stock is carried, the concern doing an extensive trade in Alaska as well as all up and down the Pacific Coast.

A new concern closely allied to the Hardware business is the Seattle Sporting Goods Co. Although only having been in business a few months the Seattle Sporting Goods Co. control a large and rapidly growing business. The president of the concern, Fred S. Clewley, is a man of rare personality and while only having lived in Seattle five years, has surrounded himself with an ever increasing circle of friends. Mr. Clewley was for some time manager of the sporting goods department of the largest Hardware house of the far Northwest and thoroughly understands local conditions and trade requirements of the Northwest. Two salesmen now represent the Seattle Sporting Goods Co. on the road and are looking closely after the gun and rifle business and the trade in athletic goods. Kindred lines, such as cutlery, are being added, and specialties in the Hardware line. The retail store of the Seattle Sporting Goods Co. is one of the finest stores on the Pacific Coast.

The Schwabacher Hardware Co. have recently moved into their new six-story modern warehouse and with improved and more up-to-date ways of handling their business are now in still better shape to take care of their fast growing trade. This concern have discontinued the retailing of Hardware and are devoting their entire energy to the wholesale business.

An air of prosperity about the store of the Whiton Hardware Co. spoke well for the business of this concern. Attractive windows are used to good advantage to display goods. A special feature of the business of the Whiton Hardware Co. is the mill supply and tool trade, which is followed up closely. During the past twelve months there has been great activity in real estate here in Seattle and a large amount of building. Values and rents are rapidly increasing.

A new wholesale concern was recently organized with George Boole as president and general manager. The Western Hardware & Metal Co., which concern are now carrying as large a stock as will be found in the Northwest, of iron and steel and heavy Hardware. A large business is being done in mining and mill supplies. Mr. Boole who has been for many years in the Seattle trade said that business was in splendid condition and the outlook never better for Seattle trade.

TACOMA TRADE ACTIVE.

The prosperity of the Puget Sound country is being reflected in the business activity of Tacoma. Many new buildings are being erected and rented as rapidly as completed. The Henry Mohr Hardware Co. are handling about all the business possible from their large store and warehouse, doing both a wholesale and retail trade.

The Washington Hardware Co., one of Tacoma's old established concerns, located at 928 Pacific Avenue, has passed into new hands. Mr. Knatvold, the new owner, said that Fall trade was opening well, and that the outlook was very good. A very complete line of builders' Hardware and house furnishing goods is carried by the Washington Hardware Co.

A very large sporting goods business is carried on by the Kimball Gun Store, Inc., of Tacoma. Howard A. Steele, who is vice-president and secretary of the corporation, in referring to general trade conditions, said: "The building of new railroads here in the Far Northwest is opening up a large new fishing and hunting country. The development of the great natural resources of the great States of Oregon and Washington are bringing in a vast number of people. These are the causes, which bring the result—good business in our line."

PORTLAND'S PROSPERITY.

Some people say that it is the effect of the Exposition last year that has produced Portland's prosperity, that many visitors last season to the Northwest have made investments or have become permanent residents of the Pacific slope. Whatever has been the cause, the results are nevertheless most manifest, and prosperity rules in Portland to-day as never before in the history of the city. Fine big office buildings of modern steel and concrete

construction, are rapidly replacing older and less attractive structures. All the railroads are carrying in and from Portland more freight than ever before. A visit to the big warehouse of the Marshall-Wells Co. is proof positive that the Hardware jobbers are getting full benefit of the growth and prosperity of the country.

The Honeyman Hardware Co. have already started the big addition to their store. This will increase their floor space about two fold, and give the Honeyman Hardware Co. much needed room. The retail store of the Honeyman's is undoubtedly the finest retail Hardware store on the Pacific Coast. Special attention is given to window displays which are exceedingly attractive. The store is well lighted and stock well displayed.

"The Hardware Shop" is the style of a new concern recently opened at 305 Washington Street, being a partnership of W. F. Backus and J. C. Morris. Both members of the firm are practical Hardwaremen. The location of the store is good, and Backus & Morris's thorough knowledge of the business backed by their endeavor to please, and courtesy to customers is bound to bring success to "The Hardware Shop."

Another new concern is the Portland Cutlery Co. at 92 Sixth Street, where a complete line of Solingen, Germany, high-grade cutlery is carried.

The past ten years has witnessed great growth and marvelous development here in the far Northwest, but with two and possibly three new trans-continental railroads, there is little doubt but that the next ten years will see even greater progress and even more rapid growth than in the past. HAMMERNAIL.

WEST VIRGINIA RETAIL HARDWARE ASSOCIATION.

The first meeting of the West Virginia Retail Hardware Association was held in the Board of Trade rooms of the city of Wheeling on September 5 and 6, with an excellent attendance of the merchants of the State. This meeting was the outgrowth of informal conferences held within the past few months when temporary officers were chosen and steps taken looking to the formation of an organization of the retail merchants of the State. It was a very successful and satisfactory meeting.

The convention was called to order at 1.30 P. M. by the temporary president, F. R. Clelland of Fairmont. The other officers representing the temporary organization, J. H. Krepps of Morgantown, and J. H. Morgan of Morgantown, the secretary and treasurer respectively, were also present. Immediately after the opening of the convention T. B. Fry, of Keyser, made a motion that the temporary organization be made permanent. This motion was carried by the unanimous vote of the convention.

R. R. Williams, of New York, Hardware Editor of *The Iron Age*, then addressed the convention, speaking on the advantages of such an organization to the retail Hardware trade, and referring to some of the important trade questions which present themselves for consideration. Mr. Williams was followed by Sharon E. Jones, of Richmond, Ind., representing the National Retail Hardware Association. His speech, which touched upon business methods, the advantages of organization, and the work of the National Association, was listened to with appreciation and aroused much enthusiasm. Addresses touching upon practical questions were also made by C. S. Davis of Oakland, Md., and Louis Heiner of Wheeling.

At the opening session much progress was made in the work of organization, including the adoption of the constitution and the settlement of questions in regard to the work of the association. A number of details in connection with the organization, appointment of committees, adoption of resolutions, etc., received attention. The earnest and practical way in which the business was transacted and the work of the organization taken hold of promised well for the success of the movement.

In proceeding to the adoption of the constitution and by-laws for the government of the organization the convention reviewed the constitutions and by-laws of several of the States and decided to make that of Indiana the basis for West Virginia, with such changes and additions as would render it adapted to the new association. After some discussion it was decided that the organization be named the West Virginia Retail Hardware Association, that the membership fee be fixed at \$5.00 per annum, that the association have two vice-presidents, and that the regular annual meeting be held on the second Tuesday in February.

OFFICERS.

The following are the officers of the association for the present year:

PRESIDENT: F. R. Clelland, Fairmont.

VICE-PRESIDENTS: C. D. Kyle, Wellsburg; C. P. Moore, Ravenswood.

SECRETARY: J. H. Krepps, Morgantown.

TREASURER: J. H. Morgan, Morgantown.

COMMITTEES.

The president appointed the following committees:

EXECUTIVE: H. C. Kalbitzer, Wheeling; T. B. Fry, Keyser; C. P. Moore, Ravenswood; president and secretary, *ex-officio*.

AUDITING: A. J. Hess, Mannington; Lawrence Hoge, Wheeling; C. S. Davis, Oakland, Md.

RESOLUTIONS: T. B. Fry, Keyser; C. R. Wolf, Cameron; T. S. Sadler, Pt. Marion, Pa.

THE ATLANTIC CITY CONVENTIONS.

The National Hardware Association and the American Hardware Manufacturers' Association have chosen Atlantic City as the place at which they will again hold their respective conventions, which this year will be held at the early date of October 17th, 18th and 19th. The headquarters selected being at the Marlborough-Blenheim, one of the finest hotels in the country. The conventions will be held simultaneously and it is believed that a railroad rate of a fare and a third will be provided for by the several passenger associations under the certificate plan as heretofore.

The programme has been formulated by the Manufacturers' Association and a suggestion of it is given herewith.

TUESDAY, OCTOBER 16TH, 3.00 P. M.

Meeting of the Executive Committee of the A. H. M. A.

WEDNESDAY, OCTOBER 17TH, 2.30 P. M. (Executive Session.)

Unfinished Business.

New Business.

Election of Officers.

Adjournment.

FRIDAY, OCTOBER 19TH, 3.00 P. M.

Meeting of the Executive Committee of the A. H. M. A.

It is seen the Manufacturers will have only two Executive Sessions—one on Wednesday afternoon and another on Friday morning at the latter will be held the election of officers for the ensuing year. As the work of the convention has to quite an extent been discussed and digested through the several standing committees, it is anticipated that after their endorsement has been made there will be a good deal of business covered in a brief period.

The Executive Committee of the Manufacturers' Association recommends to the members, who contemplate giving out souvenirs, to confine the distribution of them to the hour of five to six p. m. of each day of the conventions, so as to avoid interfering with the sessions devoted to business.

Celluloid recognition badges will be distributed as usual, and F. L. Mitchell, Secretary-Treasurer, 309 Broadway, New York, requests early advices, not later than October 6th, from those who desire badges for the occasion. These badges will display on celluloid, the name of the wearer, and the name and address of the company represented. Badges of similar design, but giving simply name and address, will be prepared for the ladies.

THE NATIONAL HARDWARE ASSOCIATION.

The programme of the National Hardware Association has not yet been settled, the definite arrangements not having been completed sufficiently to finish it.

The annual banquet, which will, as usual, be a prominent feature, will be given on Friday evening, October 19th. The guests will embrace a number of speakers of National reputation, among which will be Hon. E. C. Stokes, Governor of New Jersey, and the Hon. John E. Watson, Member of Congress, from Indiana. It is proposed on Thursday evening to give a card party, presided over by Mrs. George W. Trout, of Chicago, who on a previous occasion made a brilliant success of a similar affair. She will be assisted by a committee of ladies.

A convention of dealers in tin plates and metals has been called for Tuesday, October 16th, to consider a number of subjects of special importance. The invitations are extended to a number of dealers, who are not necessarily members of the National Association, in order to have uniform action of the work in hand. The meeting, however, will be held under the auspices of the Association.

RECENT TRADE PUBLICATIONS.

C. SIDNEY SHEPARD & Co., proprietors of the Buffalo Stamping Works, Buffalo, N. Y. Catalogue No. 67. The catalogue is divided into sections, Section No. 1 being devoted to Kitchen Specialties; Section No. 2 to Deep Stamped Ware; Section No. 3 to Shallow Stamped Ware; Section No. 4 to Tinsmiths' Trimmings; Section No. 5 to Pieced Tinware; Section No. 6 to "Ideal" Anti-Rusting Tinware; Section No. 7 to Japanned Ware; Section No. 8 to Black and Galvanized Sheet Steel Ware; Section No. 9 to Coal Vases; Section No. 10 to Copper Ware; Section No. 11 to Milk Cans, Creamery Pails and Trimmings; Section No. 12 to Oil Tanks; Section No. 13 to Ice Cream Freezers; Section No. 14 to Enameled Ware; Section No. 15 to Tin Plates, Black and Galvanized Sheets and Metals; Section No. 16 to Tinsmiths' Supplies, Miscellaneous Housefurnishing Goods; Section No. 17 to Tinsmiths' Tools and Machines; Section No. 18 to Spice Cans and Caddies, Tin Cans, Tin Boxes, etc. Views are given of their large factories in Buffalo, one of which is devoted to the manufacture of Tinware and the other to Enameled Ware, etc.; and of their offices in New York, Chicago, St. Louis, Buffalo, Kansas City, Seattle, Denver and San Francisco. The catalogue is bound in stiff covers and will be found a very complete one.

NORVELL-SHAPLEIGH HARDWARE Co., St. Louis, Mo., have recently issued their Fall catalogue, in which, as they state, they "have endeavored in a practical way to help the retail Hardware merchant meet Catalogue House competition by giving him a large line of goods at very low prices. With these goods, he is in a position to advertise and bring customers to his store." They call particular attention to the front part of the catalogue which contains many pertinent suggestions to the retail dealer under the heading "Just A Little Plain Talk." Included in the contents of the catalogue will be found a full line of Heating Stoves, Base Burners, Ranges, Cook Stoves, Oil Stoves, Stove Pipe and Fittings, Stove Boards, Fire Sets, Andirons, Fire Screens, Stove Polish and Enamel, Hollow Ware, Roasters and Bakers, Blue and White Diamond, Dixie, Hollander Mottled and Royal Enameled Ware, Nickel Plated Copper Ware, Chafing Dishes, Bread Makers, Pieced and Stamped Tinware, Tea and Crumb Trays, Japanned Ware, Galvanized Ware, Oil Cans, Clothes Wringers, Washing Machines, Sad Irons, Kraut Cutters, Churns, Step Ladders, Ice Cream Freezers, etc., etc. Every utensil that is necessary for the household will be found described and illustrated in its pages, and the dealer should not fail to write for a copy.

JAMES B. CLOW & SONS, Chicago, New York and Havana. Hand Book for Steam and Hot Water Heating Contractors. The company say: "We have compiled this handbook with a view of placing at your disposal as varied and complete information as possible to aid you in figuring on your heating work. This book contains our full line of steam and hot water boilers, namely: Volunteer, Monarch, All Right, Safety, Triumphs; also Radiators, Gas Appliances, Tools of all kinds, and useful information. Our immense works at Newcomerstown, Ohio, and our large plant and warehouses in Chicago make it possible for us to insure prompt shipments of all orders." Net prices are given throughout. Illustrations are also given of Marble Radiator Tops and Saddles, as well as Cast Iron Fittings, Hook Plates, Pipe Hangers and Thimbles, Ceiling Plates, Brass Valves, Registers and Ventilators, etc., etc. It will be found a very useful and instructive book to those interested in Steam and Hot Water Heating.

PENN SHEAR Co., Reading, Pa.; New York office in charge of D. P. Harris, 48 Warren Street. Catalogue of Sheep, Mule and Horse Shears, Grass Shears, Hedge Shears, Border Shears and Lawn Shears. In regard to the tempering of their Shears, the company say: "We have adopted the 'Razor tempering process' which has been so long and so successfully used by the leading manufacturers of razors, in which we employ the always accurate thermometer as a scientific aid to the single, individual judgment, thereby assuring uniform and perfect temper in our entire product and enabling us to consistently guarantee every pair of shears that we produce. We do not hesitate to say that the quality of the shear depends more upon the treatment it receives in this one department, than in all the others combined. If a shear is not properly tempered, no matter how carefully it has been brought through the other six departments, it is practically worthless.

Realizing this fully, we have given tempering a vast amount of consideration, believing as we have for some time past that the methods now being used are not by any means giving the best results, for when labor of this nature depends entirely upon the eye and judgment of a single individual the work cannot always be uniform. This is why one so often finds a pair of shears with one blade hard, tough and properly tempered, while the opposite blade is soft and imperfect, making the shear practically worthless irrespective of how good the steel in them may have been or how perfectly they may have been constructed in the six other departments of labor."

ROYAL MFG. Co., Lancaster, Pa., have issued a booklet entitled "Practical Talks About Practical Grinders and Tool Sharpeners." Regarding this booklet, the company state: "This book is intended to give you full information and to set forth in plain language just what we manufacture, prices of our goods, and to give you the benefit of the knowledge we gained in an honest endeavor to supply a demand from the public for hand and foot power grinders. We designed, experimented with and fully tested every part of our machines, and the results have proven our claims for the best selection of grinding wheels and the best constructed machines on the market to-day. Years of experience with grinding wheels by our experienced men resulted in bringing on the market general purpose grinding machines for sharpening in order to meet the wants of a large class of people who do not have any power installed." Their grinding wheels are made of alundum, which is manufactured by a special electrical process at Niagara Falls by the Norton Wheel Co. Their machines are designed to sharpen all known cutting tools which by use become dull, such as knives, mower sickles, scythes, axes, and in fact all tools used by butchers, blacksmiths, carpenters, electricians, foundries, farmers, households, harness-makers, lock and gun-smiths, tinshops, moulders, machinists, millwrights, mechanics, masons, platers, pattern-makers, plumbers, repair shops, steam fitters and stone-cutters.

MARTIN SKATE Co., Old South Building, Boston, Mass. Catalogue of "Martin" Folding Pocket Ice Skates and Wallets for 1906-7, which includes a line of rink, hockey and racer skates. The company state regarding their skate: "The 'Martin' is built on entirely new lines with the toe and heel-plates eliminated, which enables us to form our toe-clamps to the natural shape of the shoe, and have same come in direct contact with the sole throughout its entire width, and overlap the upper edges of same in every instance. The heel clamp likewise grips the heel firmly and positively, even though it may be badly worn down at the side. The 'Martin' heel-support is adjustable at both the front and rear—a feature not found in any other clamp skate—so that a heel of any size or shape may be accommodated; consequently our skate will fit any and all styles of shoes, and will stay on under absolutely all conditions. The sole and heel-clamps are braced by supports on the under side in such a manner that they cannot be bent downward out of position, and the skate may always, therefore, be instantly placed in the proper clamping position both at the toe and heel, with but one hand."

SARGENT & Co., New Haven, Conn., and 149 Leonard Street, New York, have recently issued an attractive booklet on the subject "How to Sell Builders' Hardware," with particular reference to Sargent's Artistic Hardware. Many valuable suggestions are given in regard to showing a prospective customer the right kind of Hardware trimmings to add to the attractiveness of the home, so that he may select that which will harmonize with the style of architecture or character of interior finish. Suggestions are also given to those contemplating building a new home or remodeling an old one. The booklet will be sent free upon request for the same.

UNION HARDWARE Co., Torrington, Conn. Catalogue for 1906-1907 of Ice Skates. They state that while they are making the same general line as in past years, they are presenting some new high-grade goods with special features. Their improved Flanged Blade has been applied to many numbers. Three patterns of all-clamp skates for ladies who use "common-sense" shoes are shown, as well as a new "Swedoh" Racer and "Extension Bob" for children. A line of Hockey Skates is also included in the contents, and the Union Skate Sharpener, which fits any blade.

NEW GOODS AND SPECIALTIES

INTERCHANGEABLE RATCHET AND SOCKET WRENCH.

Bay State Tool Co., 98 to 100 Beacon Street, Worcester, Mass., are the manufacturers of the Interchangeable Ratchet and Socket Wrench as illustrated herewith. By means of interchangeable bushings five sizes of wrenches are obtainable in one. The bush-

INTERCHANGEABLE RATCHET AND SOCKET WRENCH.

ings are made from steel castings and case hardened and finished in a blue gun-metal finish. By reversing the bushing when inserting it in the wrench a socket wrench is obtained. Two sizes of sets are included in this line, viz.: Set No. 2 consisting of wrench $1\frac{1}{8}$ inch hexagonal opening and the four bushings with

THE SOCKET WRENCH ONLY.

openings of $\frac{3}{4}$, $1\frac{1}{8}$, $\frac{7}{8}$ and 1 inch. Set No. 3 consists of a wrench with $1\frac{1}{8}$ inch hexagonal opening and four bushings with openings of $1\frac{1}{8}$, $1\frac{1}{4}$, $1\frac{3}{8}$ and $1\frac{1}{2}$ inch. Fig. 2 shows the tool used as a socket wrench.

THE BARD ADJUSTABLE BUSHINGS.

The Bard Adjustable Bushing for Armstrong Die Stocks, made by the Armstrong Manufacturing Company of Bridgeport, Conn., is a natural, trouble-saving improvement over the old order of things. It is made in four sizes, each size taking the same range of pipe as the corresponding number of the stock. This bushing as shown in the illustration attached to the stock, consists of a

THE BARD ADJUSTABLE BUSHING.

strong malleable iron body having a sleeve fitting into the barrel of the stock. A simple twist of the cam plate brings a set of extra hardened jaws firmly against the pipe, centering it at the same time. The cam plate is then secured by a thumb screw insuring an absolutely accurate and straight thread. When a crooked, or drunken, thread is desired, however, it can be cut as easily as with the old style ring bushings. The Bard Adjustable Bushings save all the bother of lost or misplaced ring bushings with the time lost in search and fitting to the stock. It is much more reliable and accurate than the makeshift of wrapping paper or tin around the pipe when the exact size bushing can not be found.

There is no necessity of carrying a set of bushings in the kit when one of these adjustable bushings has been fitted to the stock. This is a thoroughly reliable tool which need not be removed from the stock after fitting and has nothing to get out of order. It will be of inestimable value to the pipe-fitters and mechanics who need a tool which is in the right place at the right time and is "right" at any time or place. A complete 48-page catalogue of machines and pipe-fitters tools and specialties will be sent upon request to The Armstrong Manufacturing Company, Bridgeport, Conn.

GIFFORD GALVANIZED STEEL-PLATE SNOW SHOVEL.

Neverslip Tin Cover Co., Watertown, N. Y., are placing before the trade this season the Gifford Improved Galvanized Steel-Plate Snow Shovel, which is made in two styles, with and without lift handle, as shown in the illustration. The dimen-

GIFFORD GALVANIZED STEEL-PLATE SNOW SHOVEL.

sions of the blade are: Bottom, 22 inches; top, 18 inches and height 15 inches. The V-shaped ribs or grooves running parallel to the handle strengthen the blade; also prevent the snow from sliding sideways. The adjustable lift handle is a new, desirable feature. It can be raised or lowered at will, making it adaptable for light, heavy or deep snow; also for tall or short people. The blades are made of galvanized steel, making them much more durable than ordinary steel or wood, while the handles are constructed from the best seasoned ash, and necessarily quite strong. The blade has a spring steel point with floding sockets at each end, securely riveted, retaining all the advantages possible to gain in mechanics. The galvanized steel blade will not rust, neither will it shrink or swell, check or split as wood shovels do when they get wet.

ALUNDUM.

Norton Company, formerly Norton Emery Wheel Company, Worcester, Mass., are placing before the Hardware and Supply trade a new material called Alundum, which is claimed to surpass all other materials of a similar nature as an abrasive. Alundum is the hardest, sharpest and most durable abrasive material known. It is manufactured by a special electrical process in their own plant at Niagara Falls, N. Y. These works, which are devoted exclusively to the manufacture of Alundum, are located at this great source of power because of the large amount of electrical energy required in its production.

The principal raw material used in the production of Alundum is Bauxite, an amorphous hydrate of aluminum. Bauxite was

originally found at Baux, France, from which it derives its name, but purer forms are now found in Georgia and Arkansas. The highest quality only is used in the manufacture of Alundum. This material is transformed into a pure crystalline abrasive in electric furnaces of special design. The temperature at which Alundum is formed is above the limit by which temperatures are measured by any means known to science. The process of manufacturing Alundum is patented, being thoroughly protected by United States and foreign patents on the process and apparatus, which are controlled exclusively by the company. Certain special improvements of the process result in great purity, uniformity, and hardness of crystal.

Alundum comes from the furnaces in the form of large ingots, which are broken up and shipped to their main works at Worcester, Mass. It is then crushed and graded, and manufactured into grinding wheels, stones, and other articles, and put up for the general grinding and polishing trade. Extreme hardness and sharpness, and remarkable uniformity are the general characteristics of Alundum. Its purity and uniformity are under absolute control. The supply is certain.

Alundum Wheels are constantly proving their superiority over anything heretofore used. They are adapted to *all* kinds of grinding. Vitrified Wheels of Alundum are made exclusively by the Norton Company. In addition to its use in Norton Grinding Wheels, Alundum is being used on cloth and paper for abrasive purposes, and in the grain for grinding and polishing with remarkable success.

THE "ONE MINUTE" WASHER.

The One Minute Washer, illustrated herewith, is manufactured by the Hawkeye Incubator Company at Newton, Iowa. The company took up the manufacture of this machine about a year and a half ago and since that time the business has grown until the capacity of the plant has been exceeded and extensive additions are now being made. This washer presents some entirely new features. The fly wheel is placed directly underneath the tub and is driven by a gear wheel attached to a lever on the side of the tub. This is a compound lever which gives the operator double power and a short stroke. The fly wheel makes six revo-

THE "ONE MINUTE" WASHER.

lutions for each revolution of the dolly or clothes agitator, thus increasing the speed of the machine greatly and decreasing the necessary power to a minimum. In fact the machine requires but a thumb and finger touch to maintain its speed. When raising the cover the operator does not have to lift the weight of the fly wheel and as the top of the cover rests against the lever when machine is open there is no strain on the hinges, as is usually the case. There is an arrangement of roller and ball bearings to reduce friction and the machine is sold under a written guaranty that it will wash quicker, cleaner and with greater ease than any other hand power washer. This makes the company's proposition attractive to the trade. It is sold only through responsible dealers.

ALHOUSE-WHEELER Co., Waupun, Wis. Catalogue and price list of Waupun Motors, which are made in six sizes and adapted to driving Ice Cream Freezers, Scroll Saws, Pumps, Coffee Roasters, Light Carriage Manufacturing Machinery, Corn Shellers and Feed Grinders, Washing Machines, Grindstones, Sewing Ma-

chines in Households, Light Machine Shops, Circular Saws, Grain Elevators, Meat Choppers, Ice Crushers, Coffee and Spice Mills, Exhaust Fans and Blowers, Ventilating Fans and Carpenter Shop Machinery.

THE YOUNG MICANITE CANOPY INSULATOR.

Mica Insulator Co., 218 Water Street, New York, manufacture the Canopy Insulator represented in the illustration shown herewith. It is constructed by making up large laminations of mica and moulding them with both flange and taper into a complete

THE YOUNG MICANITE CANOPY INSULATOR.

whole. In Fig. 2 is shown a fixture insulated with the canopy. The Insulator is calculated to overcome the usual danger from fires where wires project through a floor or wall when making

SECTIONAL VIEW.

connection with wires of the electrolier. The flange of the insulator also gives protection to the brass canopy from the surface of the ceiling or wall, removing any possibility of a short circuit between the conducting wires and the canopy through the canopy to the ceiling.

KALOR GAS ATTACHMENT.

The Willock Manufacturing Company, 140 West Forty-second Street, New York, is placing upon the market the Kalor portable

FIG. 1.—KALOR PORTABLE GAS COOKING AND HEATING ATTACHMENT.

three-burner gas attachment of which we give an illustration. Not only can the attachment be used to heat an oven to bake or

roast in, but other cooking processes are possible, by merely attaching a flexible rubber tube to a gas bracket, after removing the tip and slipping other end of tube on to a curved brass tube $\frac{3}{8}$ inch in diameter outside, which can be turned in any direction. Fig. 2 shows the Kalor introduced into firebox of range resting on grate so that the burners are within about $1\frac{1}{4}$ inch of stove lids. When roasting or baking the Kalor is placed in the oven standing upright, lying down or in the position best suited, the small brass connecting tube serving to keep an oven door open just enough to properly ventilate the oven and allow the products of combustion to escape, as well as supply the

FIG. 2.—AS APPLIED TO RANGE FIREBOX.

flame with necessary oxygen from the surrounding atmosphere. The attachment with intelligent use can also be made to heat the water back so as to accumulate a supply of hot water in the range boiler, full directions concerning which are given in the company's literature. Where much water is wanted two Kalors can be economically and advantageously used, the consumption of gas at ordinary pressure from all three Bunsen burners being, it is said, but 12 cubic feet an hour. Some of the advantages of this device are that the brick set or portable range or stove can at once be turned into a gas cooking or heating device with all the convenience of top stove room, direct chimney flue construction, avoidance of having both coal and gas ranges at one time in the kitchen as well as the saving in cost of gas range and cost of taking down and storing it during the Winter. Another point brought out is that as the heat is applied directly against the stove lids or utensils in an enclosed space the heat is conserved instead of being partly diffused in space, while superfluous heat can be sent through the dampers up the chimney instead of into the room, according to the requirements of the occasion. In oven practice the company say that 500 degrees of heat can be obtained in 10 minutes with the three burners, using about 12 cubic feet an hour at an average pressure, each burner being controlled by a separate key, while 300 to 400 degrees serves for most purposes. The Kalor attachment consists of a substantial cast iron frame, japan finished, $10\frac{1}{2}$ inches long over all and $5\frac{1}{2}$ inches high, the bottom center tube being $\frac{7}{8}$ inch outside. The flame spreaders, 2 inches in diameter, are hinged so they can be thrown back when direct flame for some special purpose is needed.

WIZARD INVERTED GAS BURNER.

The Manhattan Screw & Stamping Works, 202-206 West 11th Street, New York, are placing on the market the Wizard Inverted Gas Burner, illustrations of which accompany this. The

WIZARD INVERTED GAS BURNER.

peculiarity of this burner is shown in the original method by which the light rays are given a downward reflection there being no under shadow, which wherever used, in home, store, or

church, will be at once appreciated. The light is soft and diffused giving the effect of an electric light in the intensity of its rays at a fractioned part of its cost. The construction of the device is such that it is easily installed. To attach to an ordinary gas jet, the pillar is taken off, and then one of the parts of the "Wizard" Burner is screwed in place, after which the remainder of the burner is screwed on. The 125 candlepower mantle which is $1\frac{1}{4}$ inches long, closed at the one end, is readily put in place, and then the glass globe is placed in position, when the light is ready for use. A needle valve regulates the gas pressure, so that natural or artificial gas can be used. Provision is made for regulating the air supply. The mantle used with this burner is claimed to outlast three of the ordinary kind. The glass globes are four inches in diameter, and come in ball or pear shapes, open or closed at bottom. These globes are imported by the company direct from Europe, and are fireproof

CROSS-SECTION VIEW OF BURNER.

quality. This burner consumes but two feet of gas per hour, which the makers state is about half the quantity used in proportion to the light given by the ordinary incandescent gas burners. The illustration shows the device one-third actual size. The company will bring out two other styles a little later on. By-passes will also be brought out to use in connection with this burner. The cross-section view will clearly show the mantle attached, globe in place and downward bend of supply pipe.

"BLACK HAWK" CORN SHELLER, MODEL 1903.

A. H. Patch, Clarksville, Tenn., is the manufacturer of the "Black Hawk" Corn Sheller which has been made since 1885, when the patent was first obtained. It has for years been recognized as the standard of excellence for Hand Corn Shellers. Its capacity of from eight to fourteen bushels per hour is large enough for all home uses. The parts of the "Black Hawk" Sheller that are put to a heavy strain are made of malleable iron. The bearings are long and of chilled iron. This insures

the sheller being easy to turn. The 1903 model, which is illustrated in the cut, has enclosed Hopper and Separator, to prevent scattering of the shelled corn. This model can be clamped to barrel or tub, as well as to a box or bin. The hopper, separator and crank are made of malleable iron, and are instantly fastened to barrel or box by two large, strong clamps with wing nuts. The "Pony" Corn Sheller, shown in figure 2, has a long steel axle with chilled bearing, which makes it very durable and easy to turn. It takes every grain off the cob and never fails to throw the cob outside. It is strongly recommended to those who desire a machine lower in price than the "Black Hawk", as a first class Sheller by the manufacturer who guarantees it for good and satisfactory work.

OUR BRITISH LETTER.

LONDON, Sept. 12, 1906.

THE PROSPECTS OF AUTUMN TRADE.

There are many indications that Autumn and Winter trade in the different branches of Hardware will be satisfactory. Already prices have an upward tendency, and many large buyers are laying in stocks of heavy goods, believing that prices will rise still further in the near future. Manufacturers also are busy with home orders, as retail ironmongers are now buying season goods in all the different branches required between now and Christmas. Seasonable goods for immediate sale, such as lamps and coal vases, are moving briskly, and many of the more advanced ironmongers have already received their first consignments of these goods. The petroleum lamp trade is not what it once was, although there are still many districts where the cheaper kinds of petroleum lamps are sold freely. In such markets the demand is for better burners and improved safety appliances. Many efforts have been made in this direction during the past few years, but so far no satisfactory burner has been placed on the market likely to meet the needs of users of lamps in dangerous and exposed situations. In better class lamps there is still a brisk trade done, especially in floor lamps, so many of which are now sold for decorative purposes and for use in drawing rooms, their pleasing appearance when fitted with ornamental shades rendering them very popular. The makers of coal vases for the coming season have brought out some very novel and attractive goods, especially those embellished with hand repousse work, and the new process of ornamentation known as bullet hammering. The increased price of metals has led to the use of some of the cheaper metals and compounds and also to the introduction of aluminum work and ornamental bands, nickel plated, and other methods for improving the appearance of Hardware goods made out of the commoner metals.

HARDWARE ASSOCIATIONS.

Hardware associations are now very active, and the reports of meetings held during the past month show that keen attention is being given to current subjects and that the members of the local ironmongers' associations are not slow to grasp the possibilities of improving trade by grappling with the difficulties that beset it whenever opportunities present themselves for clearing away such grievances, and improving their business. In a previous letter I referred to the arrangements which were made recently by the London Gas Light and Coke Co., by which London ironmongers were enabled to take part in the business, and not only sell stoves and cookers, but also reap some of the benefit from the hire purchase systems and other schemes of deferred payment, under which the gas companies in Great Britain let out the majority of the stoves, for the use of which they hope to secure an increased consumption of gas, and thereby produce higher dividends for their shareholders. Since the arrangement referred to has been put into operation, ironmongers all over the country are enquiring whether the same scheme, subject to alteration to meet local requirements, could not be applied to nearly all the gas-consuming localities in Great Britain. Already the Central Board of the I. F. A. (Ironmongers' Federated Association) has the matter under consideration, and at their instigation more than one local ironmongers' association has been able to make satisfactory terms with their local gas companies. The importance of such a development in the Hardware business cannot be overestimated, as the sale of gas stoves and the participation in the business associated with it, is one of vast moment and leading to increased business in almost every place where ironmongers are able to take part in it.

PRICE MAINTENANCE.

still occupies a prominent place in the debates of local associations, and a keen eye is kept upon price-cutters, such firms being regarded as the worst enemies retail ironmongers have to contend with. The opening of retail shops by manufacturers, who at the same time carry on considerable business with retailers, is an evil which some of the associations are now grappling with. This attempt to "run with the hare and hunt with the hounds" does not pay in the long run, and in many instances manufacturers who have made the attempt to carry on business on such lines have been forced either to give up their retail shops or to lose the support of the retail traders. Such cases are

especially difficult to deal with when manufacturers have sprung up from comparatively little-known makers; in fact, there are many such makers in the Birmingham and Black County districts where large firms have grown from small beginnings, probably the founder making and selling his goods much in the same manner as the old-world ironmongers two or three centuries ago. These makers have been in the habit of selling retail locally, and as their business had grown, carrying on a wholesale business in other districts. But even many of these makers have been brought in line with the accepted theory of how manufacturers should trade, but the pressure brought to bear upon them by the officials of the I. F. A.

TRADE JOURNALISM.

It may interest some of your readers to know that the interest in trade journalism is spreading on this side of the water, and that the present rush of modern trading necessitates retail traders being posted up to date, and having at their command the means of knowing what is happening in the Hardware world almost as soon as the events recorded transpire. *The Ironmongers' Chronicle*, which has been known in this country for the last fourteen years is one of the leading Hardware journals, and for some time past as the *only* monthly of the trade, has now found it necessary to commence a weekly issue, and the keen interest exhibited among ironmongers in the announcement shows that British Hardwaremen are glad of any new movement whereby they may become better informed of Hardware doings and movements of the Hardwaremen and makers in all parts of the world, doubtless the issue of a trade journal twice a month the same as *HARDWARE* is the ideal which both readers and publishers would aim at. The comparatively short time which elapses between two such issues prevents its news from becoming stale, but unfortunately the postal regulations in this country make a fortnightly newspaper prohibitive, and the choice lies between a monthly or a weekly, the former now, owing to the increased activity of the Hardware world, has become almost an impossibility.

LIGHTING.

During the Autumn months the real live Hardwareman gives much attention to lighting, an important factor in making the home comfortable and bright, shop and warehouse attractive, and public buildings, open markets, streets and thoroughfares equally as enjoyable and available for business during the short days of Autumn and Winter, as in the longer days when the sunlight lasts far into the night. The improved burners for incandescent gas-lighting are constantly being still more improved and patent after patent, the outcome of inventive genius, are launched upon the market, making it possible for the consumer of gas to obtain at a minimum cost the highest illuminating powers yet attained through scientific research. Many of the fittings which have been remodelled this season are exceedingly beautiful and their designs have been accomplished on the right lines in order that the full benefits of converted burners, which are now considered the best and most effective form of incandescent gas-lighting, may give forth the best results. Electric lighting is also marching on, and the electroliers, pendants, brackets, and cluster lights which have been brought out recently are not only very beautiful in themselves, but they are so arranged as to throw by a system of reflectors and right adjustment, most brilliant lights possible. Oil lighting already referred to also receives attention at the hands of the inventor, and incandescence is now very largely introduced in the more elaborate pillar lamps and oil-lighting devices in use in large rooms. Acetylene, too, is coming very much to the front, and acetylene installations are being carried out in many isolated homes, and also on a larger scale in villages and even entire districts. The apparatus needed in generating acetylene gas has been carried to a high state of perfection; many of the improved systems making it possible to use acetylene even in confined situations. The unpleasant odors formerly associated with the use of acetylene having now disappeared, and much better control over the distribution of the gas has been obtained. Undoubtedly the prospects of the trade in lighting appliances during the next few months are quite as bright as the improved lights themselves, and inquiries elicit the fact that ironmongers are now very much more alive than they formerly were to the advantages of selling the very best of fittings and burners, tested and approved.

WIRE SCREENS.

ENGLAND DEFENSELESS AGAINST FLIES AND MOSQUITOES.

Consul Albert Halstead writes from Birmingham that the people of England suffer great annoyance from flies, mosquitoes, and gnats, and that, despite this suffering, no adequate means for defense have been adopted. The Consul writes:

I have yet to see a house in England equipped with window and door screens, such as make life endurable in the United States in the summer months. There are, however, a very few mosquito bars, made of cotton netting, such as were so common in America a quarter of a century or so ago, and were later displaced by wire screens. While insects do not remain so long and are not so numerous as in the United States, it seems as if there should be a favorable opening here for the sale of wire screens and wire netting. The very general use in England of (French) windows that open outward is an obstacle to the introduction of wire screens, but one that could be overcome by having the screens inside the windows, as is not infrequent in the United States, or by having them open into the room as doors do.

The introduction of wire screens and wire netting into the United Kingdom would not be an easy task. No manufacturer of these articles could secure results by sending over circulars or catalogues, arranging with Hardware dealers to "stock" his goods, or by casual attempts to secure trade. Quiet, earnest, and persistent work through trained agents would be necessary. Demonstrations of the advantages to follow, and skillful illustrations of the advantages and comfort of a house screened from insect pests, would be required. Advertising attractively worded would be a benefit. The education of the people to the really greater comfort and better health that would follow the use of wire screens would perhaps be a slow and costly process, but a campaign properly conducted should in the end bring profitable results.

FAVORABLE CONDITIONS.

The present appears to be a favorable time for such a campaign, for British newspapers and physicians have called attention to the house fly as a most dangerous carrier of disease and

to the mosquito as a distributor of malaria. Fly paper is generally used in kitchens and in some meat markets, but the sign of a kitchen filled with flies, or of flies feasting on meat exposed for sale in a butcher's shop, is not encouraging to the appetite nor calculated to assure one that he is not in danger of typhoid or other disease.

The manufacturer of wire screens or wire netting who would capture the British market must have a care that he offers only a screen that is actually rustless, for the dampness of the British climate at all times, except perhaps in July and August, is certain to rust any screen that is not absolutely rust proof. Such a result would be fatal in a country where durability is an imperative requirement in all articles.

MICHIGAN HAS DEEPEST MINE.

It is probably a fact not generally known that the Michigan copper country possesses the world's three deepest vertical mining shafts. The deepest of these is the No. 3 at the North Tamarack property, its measurement being 5,200 feet—eighty feet less than a mile. To the South, at a distance of 4,000 feet, is the No. 5 shaft of the same company. This ranks as the second deepest vertical shaft on the globe, its measurement being 5,080 feet from the collar to the bottom level. Second only to these great openings is the Red Jacket shaft of the Calumet and Hecla Company, which is down 4,900 feet, and in which the copper lode was not encountered until a depth of 3,300 feet had been attained. The deepest incline shaft in the world is the No. 4 of the Calumet and Hecla. This shaft itself, from the collar to the lowest level, is sunk on the plane of the lode for a distance of 8,100 feet, while from a drift at the bottom a winze extends downward 190 feet to the boundary of the property, giving a measurement of 8,290 feet from the surfaces. No. 4 shaft passes by the Red Jacket shaft at the fifty-sixth level.

IN THE HONEYMOON.

"Is our new cook clean, dear?"

"I'm afraid not. When I asked her what kind of soap she used to wash the vegetables she said she didn't use any."

REVIEW OF THE MARKETS.

WIRE NAILS: The business in Wire Nails continues with a full demand, which in volume exceeds the productive capacity of the mills. Urgent calls on stocks in shape of requisitions on previous orders, have been met by deliveries until the reserved stocks are no longer to be relied upon. The business throughout the country being largely in excess of a year ago, even among independent manufacturers the market is well maintained as to prices. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers\$1.85
Carload lots to retail merchants 1.90
New York.—The demand is large, and the stocks on hand are running low, with the prices well maintained. The business for July and August is reported as a satisfactory increase over last year by comparison, with every probability that it will show up still better in September. The dealers suffer from delayed deliveries, as the mills are running farther than ever behind their orders. Quotations on small lots from store are quoted at a basis of \$2.10 to \$2.05 per keg.

CUT NAILS: The market on Cut Nails is much firmer, with no concessions; as quotations of less than official prices have been withdrawn quite generally. Export quotations are reported to have strengthened quite materially on recent orders. Official quotations are as follows: \$1.80 base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carload lots, f.o.b. Pittsburgh; \$1.95 for carload lots on dock New York; \$2 for less than carload lots on dock New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—An unusually heavy demand locally has characterized the Cut Nail market, largely depleting the stocks of the jobbers. Delayed deliveries of orders complicating the situation, somewhat. Stocks are so badly broken that but partial deliveries are possible. Quotations on small lots from store remain at the base price of \$2.00 per keg.

BARB WIRE: There is but little doing save specifications on contracts at this time of the year, but the mills are doing the best they can in producing stocks; suffering as they are from inability to obtain the requisite supply of raw material. There will be a large trade done this Fall, which will seek early deliveries to avoid the car-famine threatened by the transportation facilities. Quotations remain as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | | |
|-----------------------------------|-------------|--------|
| Jobbers, carload lots |\$2.00 | \$2.30 |
| Retailers, carload lots | 2.05 | 2.35 |
| Retailers, less than carload lots | 2.15 | 2.45 |

SMOOTH FENCE WIRE: Specifications from manufacturers demanding material for their products is freely in evidence; so that the mills are several weeks behind their deliveries with every indication that the Fall trade will prove a record, as stocks accumulated by the mills are moving out very freely. The market is firm. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

| | |
|---------------------|-------------|
| Jobbers, carloads |\$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BOLTS, CARRIAGE, MACHINE, Etc.: A meeting of leading manufacturers of Bolts and Nuts was held recently in this city and advanced prices were decided on for all items except the smaller sizes of carriage and machine bolts. An important change in terms is also announced to take effect October 1, on and after which date the terms on Bolts and Nuts will be 30 days net, or 1 per cent. off for cash in 10 days, instead of 60 days with 2 per cent. for cash as heretofore. The new level of the market may be represented by the following quotations:

| | |
|---|-----------------|
| Common Carriage Bolts, 3/8x6, smaller and shorter, cut thread | 75 to — % |
| Common Carriage Bolts, longer or larger than 3/8x6, 60 and 10 to 60, 10 and 5 % | |
| Machine Bolts, 3/8x4 or shorter and smaller, with H. P. or C. P. Plain Nuts, cut thread |75 to — % |

| | |
|--|-------------------------------|
| Machine Bolts with H. P. or C. P. Plain Nuts, larger or longer |65 to 65 and 5 % |
| Machine Bolts, all sizes, with C. & T. Nuts |60 to 60 and 10 % |
| Machine Bolts, 4x3/8, smaller and shorter, without Nuts, with cut thread |70 and 10 % |
| Machine Bolts, other sizes, without Nuts, 6 in. and shorter |65 and 10 % |
| Machine bolts, without Nuts, longer than 6 in. | 65 and 5 to 65 and 10 % |
| Machine bolt Blanks |65 to 65 and 5 |
| Bolt Ends, with H. P. or C. P. Plain Nuts |65 to 65 and 5 % |
| Bolt Ends, with C. & T. Nuts |60 to 60 and 10 % |
| G. P. Coach Screws |75 and 10 % |
| Cone Point Lag Screws |75 and 15 % |
| Forged Set Screws and Tap Bolts |50 and 10 % |

HOT PRESSED NUTS: The new prices on Hot Pressed Nuts adopted by the manufacturers are as follows:

| | |
|---------------------------------|-------------|
| | Off list. |
| Hot Pressed Blank Square Nuts |\$5.00 |
| Hot Pressed Tapped Square Nuts | 4.90 |
| Hot Pressed Blank Hexagon Nuts | 5.40 |
| Hot Pressed Tapped Hexagon Nuts | 5.30 |

COLD PUNCHED NUTS: The new prices on Cold Punched Nuts adopted by the manufacturers are as follows:

| | |
|---|-------------|
| | Off list. |
| Cold Punched Plain Blank Square Nuts |\$4.80 |
| Cold Punched Plain Blank Hexagon Nuts | 5.20 |
| Cold Punched C. T. & R. Blank Square Nuts | 5.10 |
| Cold Punched C. T. & R. Blank Hexagon Nuts | 5.80 |
| Cold Punched Plain Tapped Square Nuts | 4.80 |
| Cold Punched Plain Tapped Hexagon Nuts |5.20 |
| Cold Punched C. T. & R. Tapped Square Nuts | 5.10 |
| Cold Punched C. T. & R. Tapped Hexagon Nuts | 5.80 |

ROPE: The following prices may be said to represent the market:

| | |
|------------------------------|------------------|
| | Cents Per Pound. |
| Pure Manila, 7-16 and larger |12 1/2 |
| B Quality Manila |11 1/2 |
| Pure Sisal, 7-16 and larger | 9 |
| No. 2 Sisal, 7-16 and larger | 7 3/4 |
| No. 1 Jute, 1/4 and larger | 8 to 8 1/2 |
| No. 2 Jute, 1/4 and larger | 7 to 7 1/2 |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

| | |
|--------------------------------|---------------------------|
| In lots of less than 5 barrels |39 cents per gallon. |
| In lots of 5 barrels or more |38 cents per gallon. |

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

| | |
|--|---------------------------|
| Double Boiled Linseed Oil, 2 cents per gallon higher than raw. | |
| Regular Boiled Linseed Oil, 1 cent per gallon higher than raw. | |
| Calcutta Oil |68 cents per gallon. |

THE PITTSBURGH TRADE.

Trade during the first half of September has been quite active, but not so good as it would have been with cooler weather. With the thermometer ranging in the eighty's it is difficult for the average retailer to realize that he will very soon need gas stoves, horse blankets, and other seasonable goods. We will wake up some morning and find a frost on the pumpkins, and then there will be a scramble for cold weather goods. Recent advances in costs have grown quite numerous. Builders' Hardware, all copper goods, and all wood goods have stiffened up in price very considerably. How much of these advances is warranted by increased cost of material and labor we do not know, but the active demand has no doubt a good deal to do with it. We would warn our manufacturing friends that there is no surer plan of cutting off the demand than advancing prices, and that the end of our good times is in sight when they congratulate themselves on being able to get any price they ask.

LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

It has been some time since we made a report on trade conditions in our territory. In the first place, we have been too busy and there has been no change in conditions. The trouble

we have is in getting goods fast enough. Manufacturers are taking advantage of everything possible to excuse themselves from keeping promises of shipments. One has a strike, another a break down and some can't get material and so on. They will write they hope to ship in one, two or possibly three weeks and trust it will be satisfactory; and this in the face of the information that we are out and orders going short every day. We wish they would lose the habit of trusting it will be satisfactory. They know it is anything but satisfactory. Bolts, Screws, Railroad Spikes and a number of articles are at a premium; and still with known shortages, margins have never been cut so close. Axe manufacturers are slow with deliveries. Same with Coal Hods. No doubt jobbers will be able to deliver in plenty of time, but retailers are anxious to have their goods so they will be ready when the demand comes.

Corn is being cut now, and will be a record breaking crop. The heavy wind and rains during August got a great deal of corn down so machines cannot be used. This has made an unusual demand for hand corn cutters.

We don't think the trade is taking kindly to the recent advance on builders' Hardware; but we are getting accustomed to advances. That seems to be the rule now. We can't blame manufacturers for taking advantage of conditions. They know they can sell all the goods they can make.

Another combination has gone the way of many. We refer to the Snath Combine. This is one item that is lower, and no doubt snaths will be sold as much too low this coming year as they were too high the past two years. It is the same old story with trusts, either a feast or a famine. A good safe old jog is the best. These extreme changes always hurt somebody. The outlook for the rest of this year and surely for the first half of 1907 is very flattering. We believe dealers are perfectly safe in buying conservatively for Spring trade. The Republican party "played the Dick-ins" at the last convention. That "Four-acre" lot at Dayton seemed to be attractive. Well, we will see later.

THE SMITH BROS. HARDWARE CO.

THE DAVENPORT TRADE.

There has been a sharp advance in many lines and the tone of the general Hardware market is decidedly firmer, and the difficulty in getting prompt shipments from the maker continues. The corn crop is simply immense and has passed beyond the danger of frost. Money seems to be plentiful. The aggregate deposits in Davenport banks have increased over a million dollars within a month. Two of our largest banks, the Citizens' National and German Savings Bank, have merged into one. Sales are improving and there is no known reason why they will not continue at least normal in amount during the Fall and early Winter.

SICKELS, PRESTON & NUTTING CO.

THE SAGINAW TRADE.

This section of the country has never experienced greater prosperity than at the present time. Farmers have much to be thankful for. The country merchants have been very busy, and there is a decided improvement in collections. Money is in good demand, which was not unlooked for with a lumber crop to move.

MORLEY BROTHERS.

THE ST. PAUL TRADE.

When considering the amount of business in hand and placed for delivery during the first quarter of next year, we are not surprised that goods should advance in price. Every factory is busy, many working three shifts and so working the twenty-four hours of each day; still goods are hard to get. Many factories are weeks and even months behind their filling orders promptly. We think this condition will continue during the Winter and Spring and probably longer. The latest advances were somewhat surprising. We thought builders' Hardware was high enough, yet it goes up 12½ per cent. We were not surprised to have an advance on nails and barbed wire. Looking back for ten days, we note sharp advances on Wood Chopping Bowls, Pine Ware, Conductor Hooks, Hay and Manure Forks, Soldering Coppers, Clevises, Tarred Felt, Wringers, Sad Irons, etc. We wonder where it will stop, or are we again to experience the year 1899 when everything went scooting out of sight. If demand and supply causes the advance we have no reason to complain.

HACKETT, WALTHER, GATES HARDWARE CO.

T. G. Walther, Vice-President.

THE SAN FRANCISCO TRADE.

In the last issue of *HARDWARE* it was recorded that San Francisco was a city of pedestrians; that owing to a double-end want—more wages and less hours—the street car men were loafing and the cars locked in the barns, and that all Hardwaremen who couldn't afford automobiles, and all other good business citizens were walking to and from their business. A happy change in the condition of affairs is reportable this week. The New York president of the local street car system came here with 800 expert street car operatives to run the cars, and he won the distressed town, this president did, by his philanthropic procedure. He conclusively showed the carmen strikers that they were "dead wrong;" that they had been wrongly advised by their association officers to "walk out;" that he had a contract with the National Union Labor Association officers that there should be no strike and all differences should be arbitrated. Following this revelation to the misguided strikers their president, whom current public report says is a "little man always in a hurry," was notified by the national president to have the strikers return to their work or surrender their charter. The strikers

ers yielded; the cars are running; all San Franciscans are jubilant; arbitration proceedings are progressing, and if the local carmen's union escapes paying the expense of transporting the 800 men from New York to San Francisco and return, it is thought it will be owing solely to the generosity of the New York president of San Francisco's street car system.

The huge task of San Francisco's rehabilitation is pushing ahead by leaps and bounds. And one of the greatest of these tasks, engineers say, will be the laying of six billions of bricks required. This number can hardly be conceived. Some of the statistical engineers have figured out that these six billion bricks for the rebuilding of the city would build a wall five feet high around the world.

The California Promotion Committee reports rapid reconstruction in San Francisco; that the city's loss immediately following the disaster was 335,000 of its population; that about 200,000 have since returned; that 65,000 are waiting in nearby cities for accommodations in order that they may return, and that the present population is 365,000.

A city publication is anxious that the Hardware business be not overdone. New Hardware stores, it says, are springing up so rapidly in San Francisco that it keeps one on the jump from morning until night in order to locate them. Take a car ride through the city on any line and you will see a new sign indicating a location for a Hardware store and each day you will see another one. San Francisco is going to use a tremendous lot of Hardware in her rebuilding and there will be a lot of Hardware stores to furnish the goods. It is hoped it will not be overdone and that some of these good people will wish they had embarked in some other business. The houses in this line that are established are doing excellently well, and it is hoped there will be business for them all. Every one of the old established houses is enjoying a greatly increased business, having recovered their trade held before the earthquake-fire, and will undoubtedly continue to have this increase right along. The new people will get more or less, but the question is, will the increase warrant establishing many more new stores.

Holbrook, Merrill & Stetson have incorporated with a capital stock of \$800,000 all subscribed, \$100 per share. Directors: Charles Holbrook, 1950 shares; John F. Merrill, 2,000 shares; James B. Stetson, 2,000 shares; Charles Merrill, 2,000; Horatio Hurd, 50 shares.

The Berkeley, Cal., Steel Company has incorporated; capital, \$200,000. Directors, H. C. Vensano, William A. Lucas, A. R. Grim, H. H. Stewart.

Pacific Paint & Varnish Company has incorporated; capital stock, \$500,000. Directors, J. G. Cunningham, M. Cunningham, E. R. Diming.

Great Western Iron & Steel Company has incorporated; capital stock, \$200,000. Directors, A. Alper, A. A. Lobru, William V. Kish.

The Hardware house, Baker & Hamilton, has incorporated the Baker-Hamilton Realty Company; capital stock, \$500,000. Directors, Wakefield Baker, Alexander Hamilton, Charles W. Willard, P. J. Muller and W. S. Burnett.

Puget Sound Portland Cement Company with a capital stock of \$500,000 has been incorporated. Directors, W. C. Webb, Edwin Schwab, R. M. Sims, R. M. Moore, A. F. Morrison.

The Geldert-Wright Hardware Company has been incorporated with a capital stock of \$25,000. Directors, C. H. Geldert, T. H. Wright, Walter S. Braun.

The place of business selected by each of the foregoing incorporations is San Francisco, and over the bay in Oakland the Southern California Cement Company has incorporated to do business there with a capital stock of \$2,500,000. Directors, George W. Reed, Clarence M. Reed, Percy C. Black, Rod W. Church, B. H. Griffiths, Cecil T. Walker and J. L. Rose.

INDUSTRIAL PRESS ASSOCIATION.

RIGHT YOU ARE.

An Irishman was describing his efforts at golf. "The first time I missed the ball," he said; "and the second time I hit it in the same place. 'Tis a poor game."

ARMS MANUFACTURE AT LIEGE.

The large majority of the workmen who carry on the manufacture of firearms at Liege, in Belgium, do their work at home, having private forges and workshops. Each man is engaged in one special branch of the trade at which he becomes extremely skillful and which is brought to the highest stage of perfection. These workmen carry on their trade for years, initiating the members of their families into their own particular branch, always endeavoring to give a perfect finish to their manufactures and to discover and carry out new theories. The maker of gun barrels, for instance, is frequently employed in manufacturing barrels for several different factories at the same time, and the better the work the higher the finish of the articles he produces, the more probability there is of his obtaining regular and lucrative employment. Thus the major part of the workers in the Liege arms industry are practically their own masters, their remuneration depending entirely on their intelligence, ability and application.

DANGER OF CHEAP FIREARMS.

The menace to the songbirds and poultry yards, the danger to life and limb which comes from walking in the woods, are not from valuable guns, says a clipping from a Maine daily paper. It is from the cast-iron shotgun that is advertised for \$1.14, from the bulldog revolver that is marked down from \$2.50 and from the rusty and ramshackle rifles that are out-of-date and untrustworthy, that the well-being of Maine and other states suffers. These weapons are widely advertised and the pockets of small boys often contain several illustrated catalogues of the firms that handle these goods. Not only this, but many Hardware and sporting goods stores are loaded down with cheap goods to supply the trade. The profit on cheap guns is, in some cases, more than upon reliable weapons, and a dealer can almost afford to give away a cheap revolver to a boy for the sake of the profit he is sure to receive later on from the sale of cartridges. It is not a case of depriving the poor and honest boy from having the solace of owning a gun, as has been claimed, which prompts sane men to limit the sale of cheap weapons. Fact is, many of the low grade guns and revolvers which are sold to the boys are more dangerous to those who stand at the breech than to objects at the muzzle. The reason why everybody should refrain from carrying and using cheap firearms is that they are unsafe. The man who wishes to use a gun at all should have one that will be of some service to him, and the cheap firearm is neither safe nor serviceable.

HUMOROUS LOGIC.

How would you like to be the ice man, in these times of trust investigation and jail sentences upon conviction?

A Kansas farmer who was recently surprised while walking on stilts explained that he was getting in practice for corn gathering time.

A Western sporting editor remarks that Mr. Gans, the prize fighter, is not the first colored gentleman to score on a fowl.

Russia may win that Japanese war yet. We note that Lieutenant General Stoessel, who surrendered Port Arthur, is to be again tried by court-martial.

Some people even intimate that bank examiners should examine the bank's books and securities, instead of taking the word of the officials as to what is happening.

Any old kind of beer seems good to the people of a prohibition state. We see where a man named Sourbeer has just been re-nominated for the Kansas legislature.

Professor Tyler, of Amherst, states that a man can live comfortably without brains. The public, after reading some of the recent speeches of college professors, had come to about the same conclusion.

A burglar blew the safe of one of the newspapers of Butler, Mo., the other night, and actually found \$2.85 in real money. The collector was evidently busy the day before.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED SEPTEMBER 3, 1906.

- 410,216. DOOR KNOB ATTACHMENT. C. E. Steller, Milwaukee, Wis.
- 410,238. LAMP OR LANTERN LIGHTING DEVICE. L. Gerhardt, Washington, D. C.
- 410,240. WRENCH. H. Hammond, New Haven, Conn.
- 410,362. WASHING MACHINE. L. L. Kellogg, Leon, N. Y.
- 410,366. LAWN MOWER. W. A. Loud, Springfield, Mass.
- 410,375. SCISSORS ATTACHMENT. J. H. Norrell, Augusta, Ga.
- 410,384. WRENCH. C. A. Swanson, Marshall, Minn.

PATENTS ISSUED SEPTEMBER 4, 1906.

- 829,946. FLOOR CLAMP. F. L. Buff, Eaton, Ill.
- 829,976. VISE. C. J. Lindgren, Warren, Pa.
- 830,013. LOCK. J. H. Shaw, New Haven, Conn.
- 830,014. LOCK. J. H. Shaw, New Haven, and A. A. Page, East Haven, Conn.
- 830,117. LOCK. H. G. Voight, New Britain, Conn.
- 830,118. LOCK AND LATCH MECHANISM. H. G. Voight, New Britain, Conn.
- 830,300. WRENCH. J. Christian, Hydraulic, and C. E. Wetzel, Naturita, Colo.
- 830,485. CONVERTIBLE EXTENSION STEP LADDER. L. M. Norton, Northampton, Mass.

PATENTS EXPIRED SEPTEMBER 10, 1906.

- 410,606. METAL FORMING TOOL. A. S. Patton, Creighton, Pa.
- 410,610. LOCK. M. Riedinger, Cincinnati, Ohio.
- 410,612. EXTENSION STEP LADDER. W. Soper, Sibley, Mich.
- 410,620. COOKING UTENSIL. W. Ward, New York, N. Y.
- 410,638. OIL STOVE. J. DeMooy, Jr., Cleveland, Ohio.
- 410,646. STOVE DAMPER. W. C. Metzner, Chicago, Ill.
- 410,710. BENCH PLANE. G. Karmann, Unionville, Conn.
- 410,773. ICE CREAM FREEZER. C. G. Shepard and P. Adams, Buffalo, N. Y.

PATENTS ISSUED SEPTEMBER 11, 1906.

- 830,500. PERMUTATION PADLOCK. R. Gibson, Gaffney, S. C.
- 830,531. LOCK. E. H. Roy, Nashville, Tenn.
- 830,541. BENCH PLANE. J. A. Traut, New Britain, Conn.
- 830,619. WRENCH. J. H. Shepherd, Idaho Springs, Conn.
- 830,746. SAFETY RAZOR. L. T. Snow, New Haven, Conn.
- 830,916. HINGE. R. E. McCuen, Lexington, Ky.
- 830,999. WRENCH. J. A. Holton, Windsor, Minn.

DOES THIS APPLY TO YOU?

How many retailers who are complaining about the number of orders their neighbors are sending to the mail order houses have tried to discover the reason and overcome it?

It may be a hard pill to swallow, but in many instances the fault lies with the retailer, says F. A. Parker in *Farm Implement News*. In the first place too many men are engaged in the retail business who do not care to take the trouble to learn their business properly. They depend upon their location, the well advertised brands handled, or something besides themselves, and overlook the fact that it is the expert in every line who is entitled to, and generally gets, the best that line can offer. There is a good reason for this. Your customer is seldom a good judge of the goods you have to sell, and if you have the name of being an exceptionally good judge it is natural that your expert knowledge will draw to you a large amount of trade.

The mail order house has experts, of course, but as a general rule their best experts are those engaged in writing advertisements and dictating their letters. In buying, they generally try to get an article which looks the same as a well known standard, and then buy as much cheaper as possible, and of course the manufacturer cheapens the goods. The fact that your prices are seldom beaten, except where unknown brands are offered, should be used by the expert salesman to show that good goods cost money and the cheapening of the price always means a corresponding cheapening of the quality.

If you are an expert in your line, and recognized as such, you will have little difficulty in convincing your neighbors of the above fact, but if you do not take interest enough in your own line of goods to give it the right amount of study, you are, of

course, merely a silent salesman, the same as a penny-in-the-slot machine, and cannot be expected to have thoughts which will interest your customers in your goods, and keep him coming back to your place to learn more.

Of course a dealer who has no desire for more knowledge in regard to his own business cannot be expected to realize that thousands of his neighbors are always thirsting for knowledge, and it is that very thing which causes them to preserve the catalogue of the mail order house. They want to know the price of everything, not only in your line, but in all other lines. The catalogue lets them know how much money they will need to buy whatever they desire, and if you happen to be a retailer who cares so little about your own business that you neglect to keep yourself posted, your neighbor will know there is no use going to you for information, and will depend upon the catalogue more than ever.

Retailers who are now losing trade to the mail order houses should stop complaining and take a good long look at themselves. It may be largely their own fault, and in that case the remedy is simple. Get to work. Try to learn your own business so thoroughly that you can answer all questions without hesitation. Then you will feel like talking to everyone about your line of goods. You will know the reason for advances and declines in price, the difference in the methods and cost of manufacture, etc., and when you can give out that kind of information you will find it is exactly what you need to tell the reason for the difference in the cost of goods, and people will soon be coming to you for information before buying.

Your knowledge of your own business will be a guarantee to them that they are getting what they want and at the right price, no matter what the catalogues say, while your lack of knowledge at once makes the average consumer feel like taking the advice of the catalogue, because it represents a big house, which is supposed to know what it is talking about.

HOW IS THIS FOR PROGRESS?

The Earl of Chatham said about 150 years ago that the American Colonists had no right to manufacture so much as a horse nail.

In 1750 law forbade in America the erection of an iron rolling mill.

In 1780 even Benjamin Franklin, usually forgotten, said America will not make manufactures enough for her own consumption in 1000 years.

Sir Charles Napier said he would not command a steam propelled navy, as he didn't want to be boiled alive.

Lord Stanley said if steamships cross the Atlantic I will cut the boiler of the first boat that arrives.

Sir Humphrey Davy said it was as reasonable to talk of ventilating London with windmills as to light the big city with gas.

When Fulton's first steamer went up the Hudson the date was the 17th of August and the preachers of the time cursed the boat on the ground that the date was the total of the ten horns and the seven heads of the beast of Apocalypse.

As late as 1830 instruction in natural science was only to be had in colleges designed exclusively to train professional men.

By 1830 John Fitch, Oliver Evans and Robert Fulton had demonstrated the function of steam for land and water travel.

Wittmore had started his carving machine and Morse the electric telegraph. One year Harvard graduated only seven, whereas in 1906 she conferred 1073 degrees.

To-day the American crops total a value of \$5,000,000,000, and after supplying our own 90,000,000 with manufactured goods we have left over \$400,000,000 for export.

A clever machine is now ready to accomplish every mechanical detail.

Horse-power costs only one-third of the coal it cost thirty years ago. In 1814 Daniel Webster said: "I am not in haste to see Sheffield and Birmingham in America," and in 1906 America has one corporation doing as much business as either the whole of Sheffield or Birmingham. —J. A. WALKER, in the September *Graphite*.

ON THEIR WAY.

During a newspaper men's convention a number of journalists were one afternoon talking of the tricks of "the faithless types," when "Marse" Henry Watterson said:

"While I've heard of a great many funny typographical breaks in my time, about the oddest and most humorous transposition of the types that ever came within my observation was that in a New York paper some years ago. That sheet used to print its shipping news on the same page with the obituaries. Imagine the glee with which its readers found the captions exchanged one morning, whereby a long list of respectable names were set forth under the marine head, 'Passed Through Hell Gate Yesterday.'"

A BRIEF HISTORY OF THE SMITHING ART.

The use and production of iron is now generally known to have its origin in pre-historic times. A piece of the metal, said to date back at least 4,000 years, is to be seen at the British Museum and pieces of iron found in various sections of Egypt show that the ancients used weapons, sickles and other tools made of this metal. Excavations at Assyria and Babylon show that these ancient cities also knew the iron worker. There have been found chains, hammers, knives and even saws of iron. In Palestine and Phoenicia we also find that iron came into early use. Here was Tubal-Cain as "an instructor of every artificer in brass and iron." The Chinese claim that steel was invented 2,000 years B. C., and in Persia, India and Japan we also find evidence of the early knowledge of the industry. That the early Greeks and Romans understood how to work iron is proved by their writings, their vases and the articles made of this metal which have been discovered. As for welding the metal, one Glaucos of Chios is given the credit as the inventor. He lived about 600 years B. C.

These early records also show that the artistic as well as the

useful was the objective of the ancient iron-worker. Ornamental vases and embossed statues have been found beside the weapons and agricultural implements. The tools used by these ancient craftsmen are pictured on Grecian vases and represent anvils, hammers and tongs. Even their bellows were, to all purposes, very similar to those in use at the present day.

Further proof of the early existence of the art of iron working is found in the excavations at Pompeii, Herculaneum, Vulca and at Caere. Not only have iron weapons and utensils been found here, but locks, keys, tripods, braziers, searing-irons and even large chests fashioned from this metal have been brought to light. That rings of iron were worn by the ancients is shown by their custom of using them as an insignia of a free-man, and the fact that iron working was practiced in several parts of the old world long before the Romans started out to conquer it, is shown by the high state of development in which they already found the art.

On reviewing the early history of the smithing art, one is impressed with the fact that the ancients used iron and steel only where there was a probability of no other material well answering the purpose such as simple tools and implements

NO AIR

Sausages made with the **ENTERPRISE SAUSAGE STUFFER** have no air inside the casing. For this reason they keep better.

The corrugated spout allows the air to escape as the casing is stuffed. Buyers appreciate this, and other good points—like the accurate boring of the cylinder—in the

ENTERPRISE Sausage Stuffer, Lard and Fruit Press

185 Ames Street.

Hight's Union Combination Square

All the Combinations available all the time.

**Five Tools in one: 8-inch Try Square, Bevel,
Butt Gauge, Marking Gauge and Mitre**

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.

If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices

and full description sent on application.

The best tool of its kind on the market.

A. W. HIGHT, Box 39, Station B, Toledo, O.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Boston, Mass.—Trussell Hay Harvesting Machinery Company has been incorporated to manufacture machinery and agricultural implements; capital, \$250,000. President, Wilber C. Trussell, No. 92 Wenham Street; treasurer and clerk, Lemuel R. Howe, No. 108 Water Street.

Louisiana, Mo.—The Reliable Tool & Specialty Co. has been organized and will shortly be ready for business. The incorporators are F. W. Buffum, B. S. Carrick, D. Turnbolt and J. E. Pollock of this city and Peter Neerup of Decatur, Ill., and the officers are: F. W. Buffum, president; Peter Neerup, vice-president, and B. S. Carrick, secretary and treasurer. The capital stock is \$12,000. The company has purchased the Freeman foundry building on Fourth Street from Charles Pollman and will engage in the manufacture of edge tools and other specialties.

Lowell, Mass.—Bennett Bros. Company has been incorporated to manufacture garden tools. Capital, \$10,000. Incorporators: George E. Bennett, Lee Madden, Edwin H. Bennett.

New York, N. Y.—Electric Diamond Machine Co. has been incorporated to manufacture carborundum grinding machines and hardware; capital, \$20,000. Incorporators: Edward G. Saridge, Newark, N. J.; Robert E. Empey, No. 180 South Oxford Street, Brooklyn; Walter B. Grant, No. 7 Wall Street, New York.

New York, N. Y.—The Auto-Strop Safety Razor Co. has been incorporated with a capital stock of \$500,000. The directors are: H. J. Gaisman, F. L. Mueller and R. E. Dwight of New York City.

Northville, Mich.—The Stimpson Scale & Mfg. Company, recently organized, has just commenced operations in the plant formerly owned by the Hall-Carr Mfg. Co. The company's capital stock is \$110,000 paid in, W. F. Stimpson being manager of the plant. The officers are F. S. Harmon, president; C. C. Yerkes, secretary, and Edward Gay, treasurer.

Richfield Springs, N. Y.—Richfield Manufacturing Co. has been incorporated to manufacture tin and tinware, etc. Capital, \$3,000. Incorporators: R. Curcio, F. Brouners, J. A. Losee.

St. Louis, Mo.—Liberty Foundry Company has been incorporated. Capital, \$6,000. Incorporators: Frank Vanek, C. A. Stevens, Sam Richards and others.

St. Marys, W. Va.—Sparks Hoe Company has been incorporated for the purpose of manufacturing all kinds of garden implements. The authorized capital is \$10,000. The incorporators are: R. Bolard, Jr., J. R. McMahon, J. R. McCollom, and Clyde B. Johnson, of St. Marys, and Clark D. Johnson, of Letart, Ohio.

Tacoma, Wash.—The Acme Malleable Iron & Foundry Company has been incorporated with a capital of \$25,000 by T. H. Bellingham, J. W. Bechtel and K. G. B. S. Weed, Theodore Shenkenberg and Ben Haverkamp.

Changes and Improvements.

Attleboro, Mass.—The Frank Mossberg Company, manufacturers of special machinery, stampings and tools, has taken a building adjacent to its plant, adding more than 10,000 square feet of floor space, which will increase the capacity of the works some fifty per cent. Some new machinery will be required, but the new space will be used principally for spreading out existing equipment, which has become crowded in the rapid increase of the company's business.

Brackenridge, Pa.—The Solid Steel Tool & Forge Company is now actively at work in its plant, where a large variety of products are made. In addition to doing drop forging, helve hammer work, eccentric roll forging, bending, upsetting, brass forging, hot sawing, drilling, thread cutting, grinding and tempering, the company manufactures a wide variety of car forgings, railroad track tools, general forgings, nut locks, etc.

Buffalo, N. Y.—The Niagara Cordage Company is building a new plant at North Tonawanda, N. Y. The main factory building will be 70 by 300 feet, of cement block construction, and will be equipped with the latest type of machinery for the manufacture of rope and twines.

Chicago, Ill.—The American Logging Tool Company has been organized, with officers as follows: President, H. H. Bassett; vice-president, Benjamin Wolf; secretary and manager, N. W. Ely; treasurer, C. A. Libbey. The principal office of the company will be to act as distributing agent for the following concerns: Clyde Iron Works, Duluth, Minn.; Champion Tool & Handle Company, Ewart, Mich.; A. Sanford Logging Tool Company, Oshkosh, Wis., and the Columbus Handle & Tool Company, Columbus, Ind. Mr. Ely was formerly associated with Morley Brothers of Saginaw. The company is located at 38 South Canal Street, Chicago.

Columbus, Ohio.—Columbus Bolt Works has contracted for the erection of a warehouse, 60 by 95 feet, four stories and basement. The building will be of reinforced concrete and will be strong enough to carry a load of 1,000 pounds to the square foot on each floor. No wood will be used in the construction except in window frames and sash.

Danville, Va.—At a recent meeting of the stockholders of the Piedmont Hardware Company it was decided to increase the capital stock, which is now \$80,000 fully paid in, including surplus. The enlarged capital was necessitated by the increase in the company's business.

New Comerstown, Ohio.—The Rex File & Saw Company, successor to the Jamestown File Works, Jamestown, N. Y., is now thoroughly established in the new plant erected at this place. The plant has a daily capacity for producing 500 dozen files, which are marketed under the Rex Brand. The officers of the company are: David D. Lewis, president; M. Yingling, vice-president; Will A. Beers, secretary, and S. B. Mulyane, treasurer.

New Haven, Conn.—The William Scholhorn Company, manufacturers of Bernard's patent pliers, cutting nippers, belt and ticket punches, bolt clippers, etc., is about com-

pleting important additions to its plant and manufacturing facilities. More than \$40,000 has been expended in the improvements.

New York, N. Y.—The Federation Hardware & Tool Company, 277 Broadway, is a recently organized manufacturing enterprise with an authorized capital of \$150,000, divided into 15,000 shares of a par value of \$10 each. The company will manufacture and supply specialties in hardware, such as locks and mechanics' tools. The offices of the company are George G. Stephenson, president, long vice-president of the First National Bank, America, N. Y.; Julian A. Hurdle, vice-president and general manager, formerly with Charles Morrill, New York, and George A. Clement, secretary and treasurer. The National Butchers' & Drovers' Bank, New York, is the depository of the company's funds.

Shelby, Ohio.—The Shelby Spring Hinge Company has recently acquired the plant of the Van Wagoner Company, Cleveland, which manufactured ball-bearing Spring Hinges, Coat and Hat Hooks, the Van Wagoner holdback steel Screen Door Hinge, and other Hardware specialties, together with all patents, patterns, dies and kindred property. The Van Wagoner business went into the hands of a receiver in June, and the plant is now being moved to Shelby. The surplus machinery not needed will be disposed of.

Fires.

Indianapolis, Ind.—The factory of the Eureka Refrigerator Company has been destroyed by fire. Loss, \$70,000; insurance, \$50,000. The fire was started by the engine overturning the engineers torch in the flywheel pit.

Fires.

Mazomanie, Wis.—The store of the E. Diment Hardware Co. has been destroyed by fire.

Pittsburgh, Pa.—The engine room of the National Bolt & Nut Company, of Butler Street, near the Sharpsburg bridge, was damaged by fire recently to the extent of about \$1,500.

Tilsonburg, Ont.—Fire broke out in the forge room of Maple Leaf Harvest Tool Works recently and completely destroyed that portion of the establishment. The main brick building to east and ware room at north were saved. Loss will be heavy. Fire caused through breaking of oil pipe, which fed one of the forges.

Miscellaneous.

Columbus, Ohio.—At a meeting of the stockholders of the United States Hoe & Tool Company E. A. Cole, B. F. Hadley, T. F. Connors, J. W. Kauffman and S. S. Stiffey were re-elected directors. The board will organize by the election of the old officers.

Burglaries.

Waukesha, Wis.—The store of the Perkins Hardware Company, on Main Street, has been robbed and a quantity of razors, watches and other articles taken.

Yankton, S. D.—The Hardware store of D. D. Gross, corner of Third Street and Douglas Avenue has been entered and about \$50 worth of cutlery and revolvers stolen.

WE ARE ADVERTISING FOR YOU.

In September we commence talking to over two million, nine hundred thousand of the most intelligent, enterprising farmers of our country about the superiority of **PITKIN'S BARN PAINT**.

The talk is both interesting and convincing. Such high class, influential journals as Orange Judd Farmer, Successful Farming, Up-to-date Farming and Farm Life and many others of equal standing are being used. This means that those who are able to buy will be reached and persuaded.

Every advertisement and the whole follow-up plan sends the interested ones to you, Mr. Dealer. It is all so direct, vigorous, and continuous that it is simply bound to create business in your neighborhood.

Grasp your opportunity—have a stock of Barn Paint on hand when the inquirers come in and you are sure to make sales. Write us for details of the advertising plan and for prices, etc.

COLDWELL LAWN MOWER CO.

NEWBURGH, N. Y.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Buffalo, N. Y.—What has been brewing for several months came to a head this week—the separation of the George N. Pierce Co.'s cycle and automobile interests. The former has been incorporated under New York laws as the Pierce Cycle Co., with \$300,000 capital stock. Its officers are: Percy Pierce, president and general manager, and William B. Colburn, secretary and treasurer, who, with George N. Pierce, Charles Clifton and Moses Shire constitute the board of directors. Percy Pierce is the son of George N., Mr. Colburn is a relative by marriage and Mr. Shire has been the Pierce Attorney for twenty-five years. The present factory of the George N. Pierce Co. has been acquired and Pierce bicycles will, therefore, continue to be made in their old home. The cycle company will come into complete possession of the plant about November 1st, when the automobile business will be removed to other premises. Meanwhile orders for material have been placed and the Pierce travellers will be on the road in good season.

Cheyenne, Wyo.—William Peters and H. K. Bates, formed partnership and opened store 118½ West Sixteenth Street.

Syracuse, N. Y.—The Elbridge Motor & Tool Company of Elbridge was incorporated at Albany with a capital of \$25,000. The directors are: Reuben B. Sweet and William E. Robedee of Elbridge, and G. Erwin Delong of Syracuse.

Columbus, Ohio.—The American Auto Brass Manufacturing Company has been incorporated with a capital stock of \$20,000 to take over the business of the Hygienic Stove Manufacturing Company at 183 West Maple Street. The incorporators are George F. Hill, Milo B. Lee, Roy Coffman, Ed. S. Adams and E. B. Yohe. The Hygienic company will be dissolved and the plant on Maple Street will be very much improved. The concern will manufacture all kinds of auto and carriage lamps, specialties for automobiles and in fact a number of other specialties. George F. Hill is president, E. B. Yohe, secretary, and Milo B. Lee, treasurer and general manager.

Syracuse, N. Y.—The Cushion Wheel & Tire Company of this city was incorporated at Albany with a capital of \$100,000. The directors are Edward Mitchell and Thomas H. Ward of this city and Edward D. Woods of Indianapolis, Ind.

Coshocton, Ohio.—H. O. Nelson, Main Street, sold out to W. D. Tracy.

Terre Haute, Ind.—Hughes, Miller & Miller, sold out to J. E. Sayre & Co.

Changes and Improvements.

Truamsburg, N. Y.—The Morse Chain Co., the pioneers in the production of roller chains for the bicycles, have removed their plant to Ithaca, N. Y.

Embarrassments.

Cedarhurst, N. Y.—John S. Moran, a bicycle dealer, filed a voluntary petition in bankruptcy in the United States District Court, showing debts for merchandise amounting to \$988, with \$213 assets.

Fires.

San Pedro, Cal.—Henderson Bicycle Co., damaged by fire.

ANDERSON SUCCEEDS SMITH.

Because interests in other lines prevented H. O. Smith from giving to the G & J Tire Company that full measure of attention which he believed it deserved, he has resigned the presidency of the company and been succeeded by J. D. Anderson of the Hartford Rubber Works Co. The latter was elected to the office at a meeting of the directors held last week.

HUGHES JOINS NATIONAL STAFF.

Having disposed of the business of Hughes, Miller & Miller, the National agents in Terre Haute, Ind., to J. E. Sayre & Co., C. L. Hughes, of the old firm, has engaged with the National Cycle Manufacturing Co. He will represent Nationals on the road.

ELECTED OFFICERS AND HAD A "SPANISH" FEED.

The Garden City Wheelmen and Motorcyclists, of San Jose, Cal., held its semi-annual election of officers on Tuesday night of last week and after the election the cyclists punished a "Spanish feed," prepared by one of its indefatigable members—Jack

Dermody. The new officers chosen were: President, Louis Normandin; vice-president, B. C. Dale; recording secretary, W. R. Scully; financial secretary, B. Johnson; treasurer, Security State Bank; directors—William Halla, J. A. Benson, Alan Hope, George Ducier and C. D. Cavallero.

Miscellaneous.

Reading, Pa.—The R. S. motor cycle, manufactured by the Reading Standard Co., is meeting with success. President William F. Remppis stated that there was a very good demand for them, and that his company was unable to catch up with the orders. "It will take us at least four months to fill the orders now on hand. I believe we have the best machine in the country. In a recent contest at Lebanon, our motor cycle came out ahead. In a trial contest at Pike Peak, three of our machines were the first to reach the summit."

RUSSIAN DUTIES ADVANCED.

According to the provisions of the new Russian tariff which went into effect last Spring, the duty on cycles having two wheels, is 30 roubles each, or about \$7.50. Cycles having three wheels are taxed 60 roubles each, or \$15, and those having four wheels, 160 roubles, or \$40. Parts, except those which are especially restricted, are assessed at the rate of 40 roubles per pound, which is equivalent to something like \$3.60 per pound.

EXPORT SPURT IN JULY.

With that inconsistency that has characterized its fluctuations during the past two or three years, official statistics show an upward jump in exports for the month of July. The increase is one of more than 20 per cent., or from \$76,355 to \$92,671 and the most significant item in connection therewith is the advance in the amount sent to Japan, which rose from \$16,988 to \$21,658. It is likewise noteworthy that the total sent to the United Kingdom shows an increase of almost 50 per cent., or from \$10,698 to \$16,831. The remainder of the advance in the total is to be found in the jump of Other Europe to \$8,884 from \$2,422 a year ago, for the same month and that of Mexico from \$5,554 to \$13,052. The biggest shrinkage of the month occurred in British Australasia.

HARDWARE DEALERS RECORD

(Continued.)

Shamokin, Pa.—The Hack-Sanner Hardware Company, with stores at Mount Carmel and Shamokin, has recently been incorporated into a stock company, and to still further increase their growing business the members of the firm have decided to issue a limited amount of bonds and preferred stock.

Springfield, Ohio.—The Vulcan Hardware Company is the name of the new company which has taken over the stock and business of the old Elder & Tuttle Company.

Mr. Tuttle will remain with the new company, of which he will be president, but the management passes into other

hands. The managers will be T. C. Blowers and R. E. McDaniels.

Newark, N. Y.—Cook & Coleman Co. has been incorporated to deal in Hardware, plumbing goods, etc.; capital, \$15,000. Incorporators: W. E. Cook, J. L. Cook, E. H. Coleman, L. Coleman, Newark, N. Y.

Tacoma, Wash.—A business transaction has been completed during the last few days by which the Washington Hardware Co., which has been in existence in this city for more than twenty years, will be absorbed by the Fuller-Knatvold Co. The members of the latter firm, H. E. Knatvold, W. P. Sargeant and E. A. Noble, have bought the business of the Hardware company, located at 928 Pacific avenue, and the latter establishment is now closed while an inventory of stock is being taken. The Fuller-Knat-

vold Co., which has been located for nearly four years at Ninth and Commerce streets, engaged in business in stoves, ranges and sheet iron, will soon move to the present location of the Washington Hardware Co., and will thereafter continue their present business in addition to handling Hardware. H. D. Cowles, president, and E. K. Reynolds, secretary, of the Washington Hardware Co., recently purchased an interest in the Hunt & Mottet Hardware Co., and will join the latter as soon as the transfer to the Fuller-Knatvold Co. is completed.

Thor, Ia.—Chris Peterson has purchased the Hardware business of F. B. Jacobson.

Waverly, Kans.—D. J. Jackson has purchased the Hardware store of C. J. Reed.

Winder, Ga.—Smith, Bush & Co. will open a Hardware store here in September.

The Oakman System of Distance Gas Lighting

You want it---we have it. Of all the distance gas lighting apparatus ever put on the market, The Oakman System

Puts All Others In The Shade

Being extremely simple—thoroughly practical absolutely reliable and safe, it is the most economic and convenient device on the market. Pays for its installation in a short time.

That's why you should investigate its merits as a seller. *Write us to-day for full particulars.*

OAKMAN MFG. CO., 84-86 CHAMBERS ST.,
NEW YORK, U. S. A.

WARNING!

TO WHOM IT MAY CONCERN:

We have been advised that the Automatic door closing device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 1900. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO., Inc., Des Moines, Iowa.

WATROUS AUTOMATIC DOOR CATCH

TWO-THIRDS ACTUAL SIZE.

PATENT APPLIED FOR.

For screen doors, storm doors, office gates, etc. Holds the door tight shut and prevents sagging open at the top or standing ajar.

GRAND RAPIDS, MICH.

We make a specialty of making to order only,
a superior quality of **Cast Steel Wire Springs**,
either for extension or compression.

These Springs are all oil tempered and are
made of an extra quality of wire drawn specially
for our own use, of the same grade of stock as we
use for the Springs that we put in our Spring Scales

JOHN CHATILLON & SONS,

85 to 93 Cliff St. & No. 13 Jacob St.,

Established 1835, NEW YORK CITY.

FLEXIBLE FLYER

"The Sled That Steers"

Flexible Flyers are guided by the steering bar
which springs the STEEL RUNNERS to the right or to the left, as
desired. The bar is operated by the hands in lying down and by the
feet and hands combined when sitting up. This makes the Flexible
Flyers the fastest, safest and most comfortable coasters in the world,
and increases immensely the pleasure of their use.

THE BEST SLED FOR EVERY BOY.
THE ONLY SLED GIRLS CAN PROPERLY CONTROL.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Capewell Horse Nails Can Be Used Successfully in Hot and Dry Climates

THE CAPEWELL HORSE NAIL CO.,
Hartford, Conn.

Dear Sirs:—

I feel that I owe you a few words of praise for your first-class nails, as I have tried nearly all kinds and find yours the only nail I can drive in **these hard feet of our western horses** without bending the nail, or splitting the hoof, and best of all, every nail clinches without breaking one of them. I consider your nail the best that money can buy.

Yours truly,
THE GREAT BEND IRON WORKS,
CHAS. TRITTEN, President

“I consider your nail the best that Money Can Buy.”

“STERLING” HACK SAWS

Are “a happy combination” of mechanical perfection and lasting satisfaction to the user in actual work.

THEIR EFFICIENCY CANNOT BE MEASURED BY ANY OTHER STANDARD THAN THEIR OWN.

THOUSANDS OF “STERLING” ENTHUSIASTS VOUCH FOR THEIR SALABILITY. TRY 'EM.

Send for “Sterling” Booklet and Prices
